

R 2 Comprehensive Permitting Report

This report was designed to provide all Permit Series/Event data and any linked Permit Unit data. Though this report will show Series/Event data with no links to Unit data, it will not show Unit data with no links to Series/Event data. That may be an option in the future if necessary.

User can enter Select Criteria:

State Event Codes
State District Leg/Op codes
Id/Name Actual Date Ranges
TSD Universe (GPRA or TSD Tracks)

Users can enter Sort Criteria:

By: District, Name, Event, Unit, LegOp

Event Codes were given special priority in this report. This ability to choose not only specific records for display, but comprehensive data based on the existence a specific event code is featured.

Event Codes: Each Event Code for selection is offered with two (2) choices

- 1) Row Only: Restricts the report to show only records having the chosen Event code - standard for most reports.
- 2) Included: Shows all data for an id that has at least one instance of the chosen event code - not standard on most reports. Ex.: Show all Event data for an id, as long as it has an event=OP482.

Leg/Op Codes: Each Leg/Op Code for selection is offered with three (3) choices

- 1) Row Only: Restricts the report to show only records having the chosen Leg/Op code - standard for most reports.
- 2) Included: Shows all data for an id that has at least one instance of the chosen Leg/Op code - not standard on most reports. Ex.: Show all Leg/Op data for an id, as long as it has an Leg=NR and/or Op=PF
- 3) All Units: Similar to Row Only, except the ids used are limited to those where "EVERY" Unit's last history has the Leg and/or Op chosen. Ex: Show only data where "ALL" Units are Protective Filers (OP=PF), not just Units that are (OP=PF), indicating that some units are not OP=PF

Special Note about the Report:

Sorting/Grouping

This report is fairly dynamic in terms of its Groups. A "Grouping by Formula" technique was employed to maximize functionality and aesthetics. Depending on the sort chosen, positionally preset Group Hierarchy's (ex: County, City, Name) and their Text Identifiers (ex: County="New York") reevaluate, and/or suppress themselves according to the sort selection. This allows the report not only the re-sort the detail data, but to display dynamic and multiple Group Headers in the body, not just display the sort selection in the Title Page, or Page Header.

Facility Name Selection

Selection of a Facility Name, also searches the "Previous Name" field, and displays any found instances of that name in a color-formatted place-holder aside the current facility name. This can be quite useful in further identifying facility's who are typically known best from an old name.

Highlighting

Red text highlights are displayed to bring attention to potential problem areas, or data instances that seem out of the usual - making the report useful for cleanup initiatives as well.
