OYSTER

Monthly average wholesale prices of oyster, at NY Fulton Fish market	7
Yearly average wholesale prices of some fresh oyster species in Rungis, France, in FF/100 p	9
Monthly average fresh shucked oyster wholesale prices at six large market cities, Japan, in Yen/kg	11
Yearly imports of fresh, chilled and frozen oyster by major importing countries, in MT	11
Yearly imports of fresh, chilled and frozen oyster by major importing countries, in US\$ 1 000	12
USA oyster imports, by country and product form, in 1 000 MT	13
Yearly Hong Kong oyster imports, by originating countries, in MT	13
Yearly Canadian oyster imports (meat weight), by product form and originating countries, in MT	14
Yearly exports of fresh, chilled and frozen oyster by major exporting countries, in MT	14
Yearly exports of fresh, chilled and frozen oyster by major exporting countries, in US\$ 1 000	15
Yearly Korearep canned oyster exports, by destination countries, in MT	15
Yearly New Zealand oyster fresh and chilled exports, by product form and destination countries, in MT	16
Yearly French oyster exports (live, in the shell), by species and destination countries, in MT	17
Yearly US oyster production, by major producing regions, in million lbs of meat	17
Yearly world cultured oyster production, by major producing countries, in 1 000 MT	18
Yearly world catches of oyster, by major landing countries, in 1 000 MT	19

SCALLOP

Monthly average wholesale price RUNGIS coquille St. Jacques, fresh, without roe, domestic, in FF/kg	20
Monthly average wholesale price RUNGIS coquille St. Jacques, fresh, shelled, imported, in FF/kg	20
Monthly average wholesale price RUNGIS (FF/kg); coquille St. Jacques, fresh, with roe, domestic	20
Monthly average prices of shucked frozen scallop meat (10-20 count, ex-warehouse, origin Japan), in New York, in US\$/lb	21
Yearly imports of fresh, chilled and frozen scallop, by major importing countries, in MT	21
Yearly imports of fresh, chilled and frozen scallop, by major importing countries, in US\$ 1 000	22
Yearly Belgium frozen king scallop imports, by originating countries, in MT	22
Yearly Spanish frozen king scallop imports, by originating countries, in MT	23
Yearly French scallop imports, by product form and originating countries, in MT	24
Yearly US imports of fresh and frozen scallop, by country of origin, in 1 000 MT	26
Yearly exports of fresh, chilled and frozen scallop, by major exporting countries, in MT	27
Yearly exports of fresh, chilled and frozen scallop, by major exporting countries, in US\$ 1 000	28
Yearly New Zealand scallops frozen exports, by destination countries, in MT	28
Yearly UK frozen king scallop meat exports, by destination countries, in MT	29
Yearly world catches of scallop, by major landing countries, in 1 000 MT	30

Yearly scallop landings in Japan, in 1 000 MT	31
Yearly world cultured scallop production, by major producing countries, in 1 000 MT	31

MUSSEL

Monthly average wholesale prices fresh mussel at Barcelona wholesale market, in Ptas/kg	32
Monthly average wholesale prices for domestic fresh Mussel in Rungis (Paris), in FRF/kg	34
Monthly average wholesale prices for fresh Mussel in Rungis (Paris), origin Spain, in FRF/kg	35
Monthly average wholesale prices for fresh Mussel in Rungis (Paris), origin Netherlands, in FRF/kg.....	35
Monthly CIF mussel meat prices (IQF, bulk pack) in France, origin Denmark, in US\$/kg	36
Yearly imports of fresh, chilled and frozen mussels, by major importing countries, in MT	37
Yearly imports of fresh, chilled and frozen mussels, by major importing countries, in US\$ 1 000	37
Yearly mussel imports by France, by product form and by country of origin, in 1 000 MT	38
Yearly exports of fresh, chilled and frozen mussels, by major exporting countries, in MT	39
Yearly exports of fresh, chilled and frozen mussels, by major exporting countries, in US\$ 1 000	40
Yearly New Zealand green shell mussel exports, by product form and destination countries, in MT	41
Yearly Korearep canned mussel exports, by destination countries, in 1 000 MT.....	42
Yearly Spanish live and deperated mussel exports, by destination countries, in 1 000 MT.....	42
Yearly Netherlands live fresh or chilled mussel exports, by destination countries, in 1 000 MT	43
Yearly world cultured production of mussel, by countries, in 1 000 MT	43
Mussel capture, in 1 000 MT	44

CLAM

Monthly average wholesale prices of some live clam species in Rungis, in FF/kg	46
Yearly average wholesale prices of some live clam species in Rungis, in FF/kg	48
Monthly average wholesale prices for domestic fresh Clam (Vongole) (Tapes decussatus) in shell, in Milano, Italy, in 1 000 Italian Lire.....	48
Yearly imports of fresh, chilled and frozen clams, by major importing countries, in 1 000 MT.....	49
Yearly imports of fresh, chilled and frozen clams by major importing countries, in US\$ 1 000	49
Yearly Japan clam imports, by product form and originating countries, in 1 000 MT	50
Yearly Canadian canned clam imports, by originating countries, in MT	50
Yearly Italian canned clam imports, by originating countries, in MT	51
Yearly Spanish clam and cockle imports, by product form and country of origin, in 1 000 MT	52
Yearly USA clam imports (meat weight), by product form and originating countries, in 1000 MT.....	53
Yearly exports of fresh, chilled and frozen clams, by major exporting countries, in MT	53
Yearly exports of fresh, chilled and frozen clams, by major exporting countries, in US\$ 1 000	54
Yearly Korearep canned baby clam exports, by destination countries, in MT	54

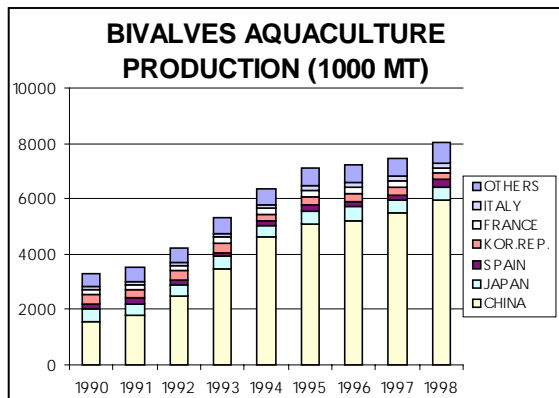

Yearly Thai canned baby clam exports, by destination countries, in 1 000 MT	55
Clam and cockle landings in China, by species, in 1 000 MT	55
Yearly world clam and cockle production (in shell), by major producing countries, in 1 000 MT	56
Yearly world cultured clam and cockle production, by major producing countries, in 1 000 MT	57

BILVALVES

PRODUCTION

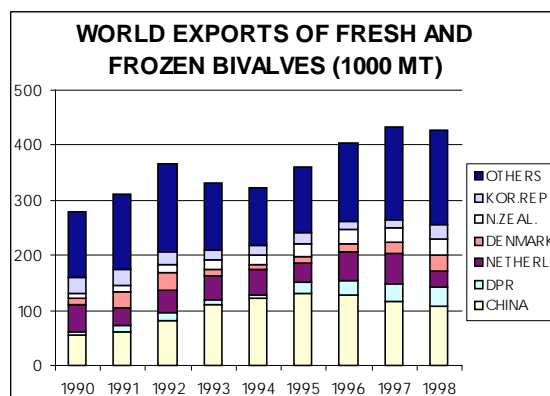

In 1998, world bivalves production (aquaculture + capture) was 9.8 million MT, having increased by 7% from 1997. Bivalves production has increased steadily since 1990 (5.3 million MT). China is the top producer (1998) with 5.9 million MT (+9% from 1997) followed by Japan (820 500 MT).

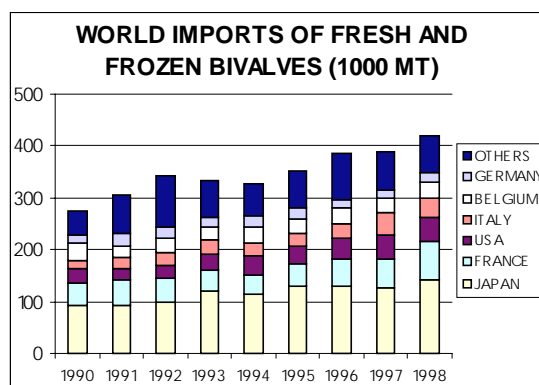

In 1998, 82% of the total bivalves produced in the world were cultured (8.0 million MT). This share has increased by 20% since 1990 (5.3 million MT) and by 7% from 1997. All of the Chinese bivalve production is cultured whereas only half of Japan's is cultured.

EXPORTS

World exports of bivalves dropped slightly in 1998 to 428 300 MT (US\$ 1.1 million). In 1990 exports of bivalves were 278 900 MT worth US\$ 699.4 million. China exports 25% of the world's bivalves, that is 107 000 MT (US\$ 173.4 million) in 1998, slightly less (-8%) compared to 1997. In addition to the fresh and frozen trade some 40 000 MT of bivalves exported in 1998 were canned. About 8% of the bivalve production is traded.

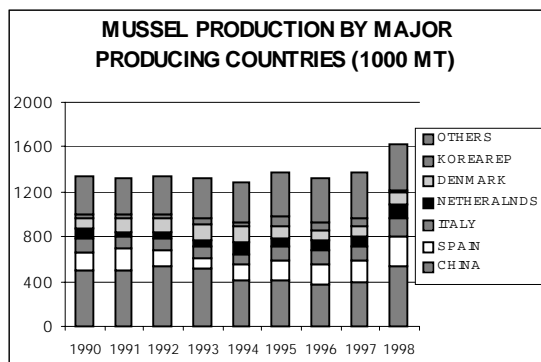

IMPORTS

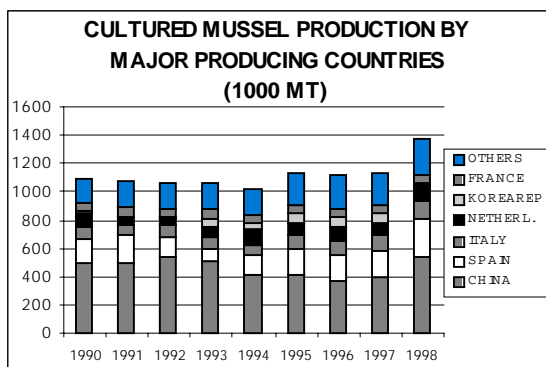

Imports of bivalves in 1998 increased further (+8%) reaching 420 300 MT (US\$ 1.1 million), the highest amount over the period. Japan imports 34% of the world's bivalves (142 300 MT and US\$ 269.4 million) having expanded its imports by 12% from 1997 and by 56% since 1990. France imported 73 000 MT (US\$ 199.2 million) of bivalves in 1998, up 32% from 1997 and 17% of the total bivalves imported in the world.

MUSSELS

PRODUCTION

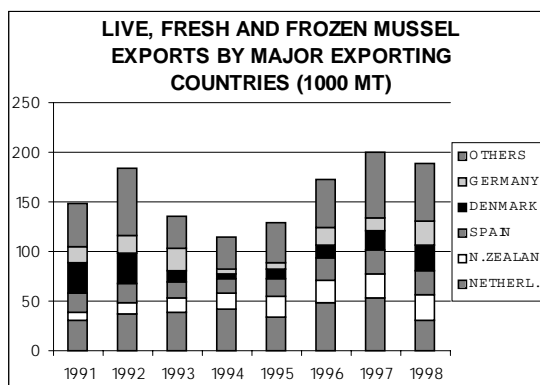

Mussel production (aquaculture + capture) increased by a further 18% in 1998 to 1.6 million MT. This represents a sharp peak considering the stable trend followed by mussel production since 1990. The main mussel species produced is blue mussel (39% of the total mussel produced). All main producing countries increased their output in 1998 but especially Chinese (world's top mussel producer) production shot up by almost 36% reaching 541 000 MT in 1998. Now Chinese mussel production is back to the 1992 high. Spain is the second main mussel producer in the world with 261 300 MT in 1998, 38% more than in 1997 and representing the highest it has been in the past eight years. Spain is also the major mussel-consuming country in Europe followed by France and Italy.

Unlike most other species, cultured mussel production exceeds wild mussel production. 1998 sees a further increase (+ 21% from 1997) in cultured mussel production which reached 1.4 million MT. The recent (1985-1998) increase in total mussel production (both capture and culture) came almost entirely from an increase in culture production.

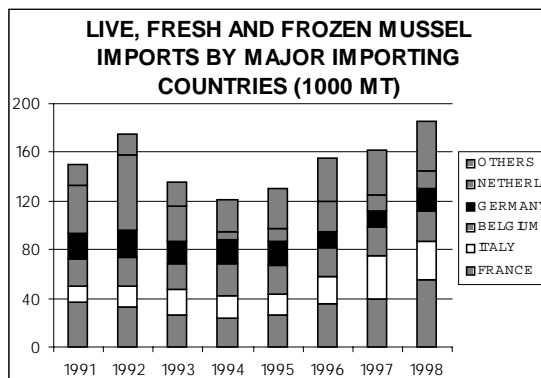

China is by far the world's leading mussel culturing country with some 540 900 MT produced in 1998. All of the Chinese mussel production is cultured mussel. The same applies for Spain. Chinese cultured mussel production increased by 36% from 1997 and Spanish production experienced a 38% growth in the same year. Spain is Europe's largest and the world's second largest mussel producer. Mussels are marketed either live or frozen and a significant proportion is destined to the local canning industry.

EXPORTS

Total live, fresh and frozen mussel exports dropped by 5% in 1998 compared to 1997 settling at 188 800 MT (US\$ 219.9 million). The sharp decline in exports by the Netherlands (the main exporting country) was the cause of the overall decline. In fact, Dutch fresh and frozen mussel exports dropped by 43% (from 1997) to 30 100 MT and US\$ 44.2 million) after the recent growth trend. The world's second major mussel exporter is New Zealand with 26 300 MT (US\$ 60.2 million), up more than 3% from 1997, based on the successful marketing campaign for greenshell mussel.

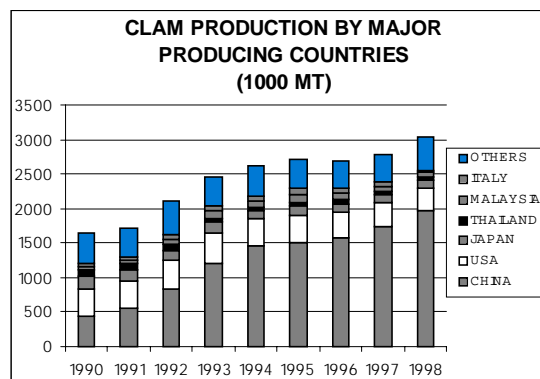

IMPORTS

CLAMS AND COCKLES

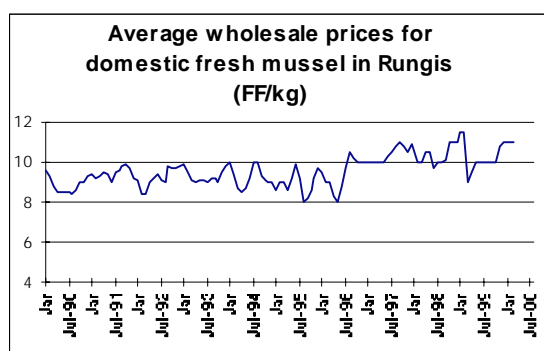

PRODUCTION

The markets for live, fresh and frozen mussels are restricted almost exclusively to the EU. World mussel imports peaked in 1998, reaching 184 900 MT (US\$ 225.8 million), up 14% from 1997. In 1991 total mussel imports were 149 700 MT (US\$ 147.8 million). France remains the world's leading mussel importer buying 54 900 MT (US\$ 45.6 million) in 1998, indicating an increase of 40% from 1997. In 1991 French mussel imports were 36 700 MT (US\$ 31.7 million). Italy ranks second among mussel importers with 31 600 MT (US\$ 30.9 million) in 1998, 12% more than in 1997.

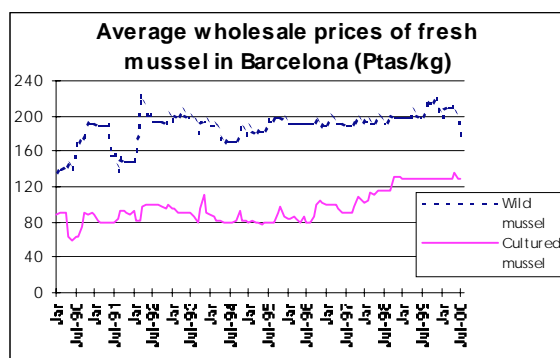

Clam production (aquaculture + capture) increased by over 9% in 1998 reaching over 3 million MT on the wave of steady growth started years ago. In fact, total clam production in 1990 was 1.7 million MT. China produces 65% of the world's clams (almost 2 million MT in 1998) comparing very favourably with both 1997 (+ 14%) and 1990 (+ 360%). However, the picture for the USA and Japan, the second and third (respectively) main clam producers is not so encouraging. In 1998, the USA produced 318 600 MT of clams and Japan's output equalled 107 100 MT. These figures both indicate a decline in production from 1997 by 7% and 2% respectively and from 1990 (-23% and 40% respectively). In 1998, cultured clam production represented 73% (2.2 million MT) of the total clam produced world-wide. All the clams produced by China originate from culture. Despite Malaysia is the fifth total clam producer in the world it ranks second among farmed clam producers with 81 700 MT in 1998. 93% of Malaysian clam production is farmed clam.

PRICES

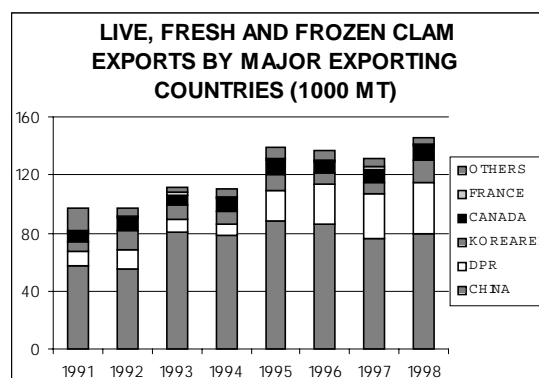

Mussel prices in France generally increase in the summer months and again in winter, with a general trend towards higher prices in recent years.

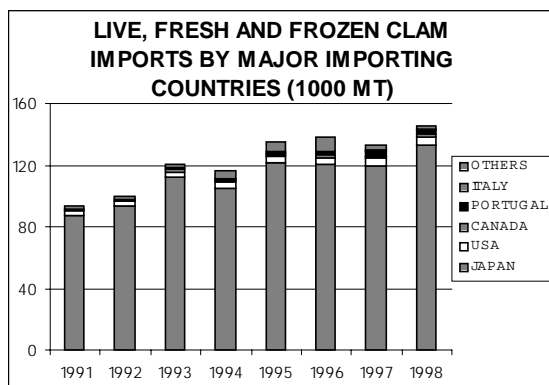

Wild mussel prices are almost double the cultured mussel prices, the latter also showing relatively more stable price levels compared to wild mussel, which have shown a decreasing trend in recent months.

EXPORTS

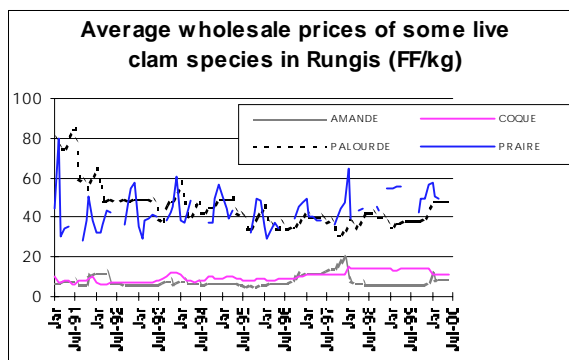

World exports of fresh and frozen clam show a rise in 1998 (+ 11% from 1997) peaking at 145 800 MT (US\$ 232.9 million). All major exporting countries reported increased shipments including China, the top producer (79 900 MT and US\$ 88.0 million in 1998, up 5% from 1997). Chinese clam exports were 57 900 MT (US\$ 66.1 million) in 1991. The Republic of Korea ranks second among fresh and frozen clam exporters. In 1998 it shipped 34 400 MT (US\$ 27.7 million) of clams to foreign markets, 9% more compared to 1997 and almost four times more than in 1991. It is interesting to note, that value-wise the first position is occupied by the Republic of Korea (US\$ 30.1 million in 1998) indicating the high unit value of Korean clams.

IMPORTS

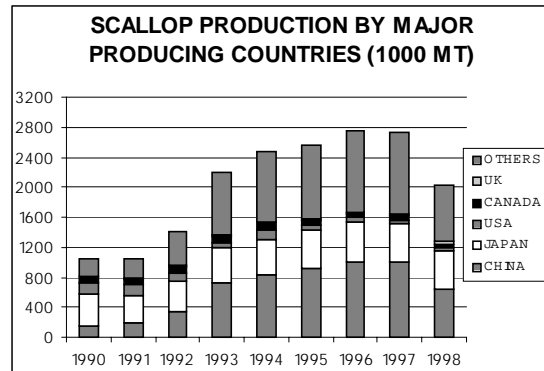

Total fresh and frozen clam imports grew by a further 9% in 1998 to 145 100 MT (US\$ 230.7 million). Japan imports 92% of the world's mussel (1998), that is 132 800 MT (US\$ 177.8 million), up 11% from 1997 and 52% from 1990. The USA, in second position imported 5 400 MT (US\$ 26.9 million) of fresh and frozen clams in 1998, 17% more compared to 1997.

PRICES

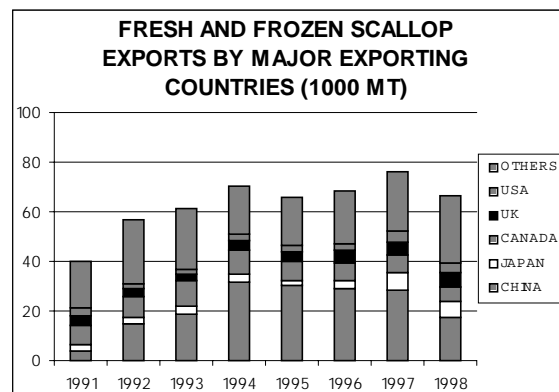

SCALLOPS

PRODUCTION

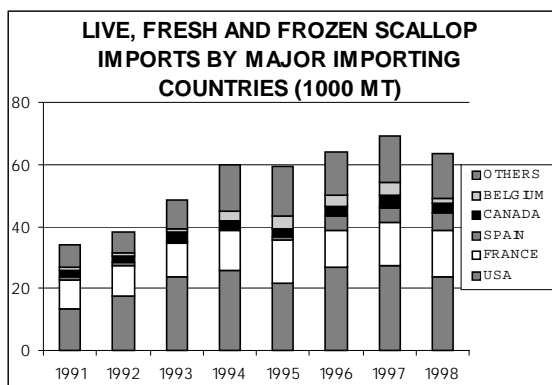

The global scallop production (aquaculture + capture) dropped sharply in 1998 to 1.4 million MT, a 20% drop from 1997 but still comparing favourable with 1990 (902 700 MT). China and Japan are the leading scallop producers in the world. In 1998 China's scallop output equalled 629 400 MT, 45% of the world's clam production. The sharp drop (- 37%) in Chinese production between 1997 and 1998 is the main reason for the overall drop in world clam output. Japan produced 513 900 MT in 1998 almost the same as 1997, but 22% more compared to 1990. 63% of the total scallop production is cultured scallop. This share has dropped by 10% since 1997. China's production consist of 100% cultured scallop (629 400 MT) and Japanese total production is 44% farmed.

The drop in scallop production was reflected in the declining exports of this product in 1998. In fact, 13% less scallops were exported compared to 1997 and were 66 200 MT (US\$ 519.7 million) in 1998. World scallop exports were 40 300 MT (US\$ 315.7 million) in 1991.

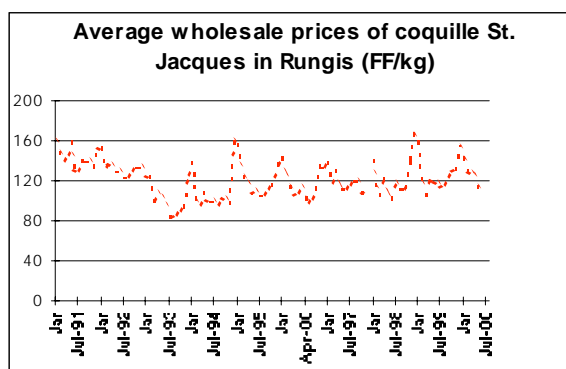

China leads the way among scallop exporters, directing 17 100 MT (US\$ 67.5 million) of this product to foreign markets in 1998, that is 40% less than in 1997. Japan and Canada export approximately 10 % of the world's scallops (1998) equivalent to 6 500 MT and 6 400 MT respectively, worth US\$ 80.3 million and US\$ 91.4 million).

IMPORTS

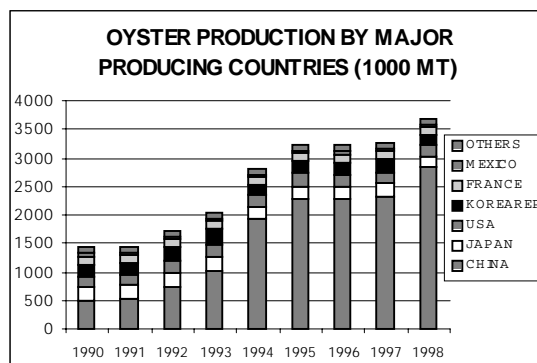

Fresh and frozen scallop imports dropped by almost 9% in 1998 settling at 63 400 MT (US\$ 529.2 million). However, this still compares favourably with 1991 when total scallop imports were 33 900 MT (US\$ 310.7 million). The USA is by far the top buyer on the world scallop market, importing 23 800 MT in 1998, worth US\$ 223.2 million). This figures shows a 13% drop from 1997. France imports 24% of the world's scallop (15 000 MT, US\$146.4 million), 8% more than in 1997.

PRICES

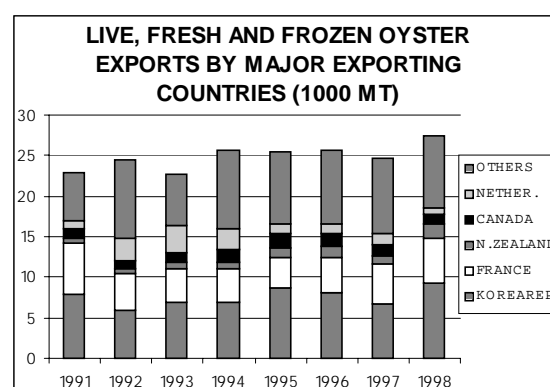

OYSTERS PRODUCTION

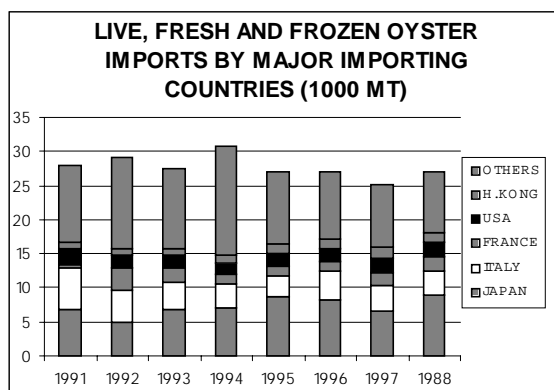

Oyster production (aquaculture + capture) in 1998 peaked at 3.7 million MT, having increased by 13% from 1997 and representing the highest peak over the period. Production has grown considerably since 1990 when it was 1.4 million MT. China is without doubt the world's top oyster producer with 2.8 million MT, 77% of the world's oyster production. Japan, in second position holds a 5% share of the world's oyster production, 185 800 MT, a 15% decline from 1997. 96% (3.5 million MT of the total mussel produced (aquaculture + capture) in the world in 1998 was cultured mussel. This share increase by 2% compared to 1997. All the Chinese oyster production consists of farmed oyster. Korean total oyster production consists of 95% cultured oyster (175 900 MT). Japan ranks second amongst cultured oyster producers (199 500 MT in 1998). All the oyster produced by this country consists of cultures oyster.

EXPORTS

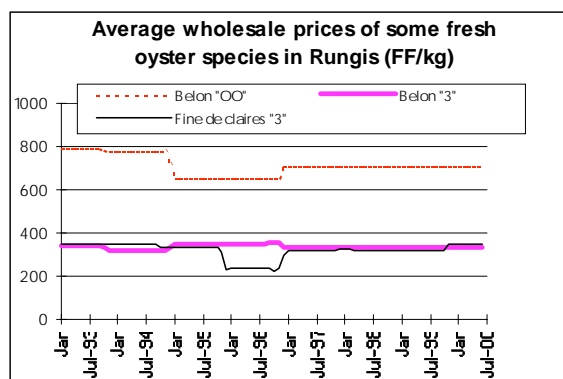

Oyster exports experienced an increase in 1998 reaching a 27 500 MT (US\$ 105.1 million) peak (+ 12% from 1997). There have not been great fluctuations over the period. The Republic of Korea, the top oyster exporter in the world increased its shipments outside the country by 37% from 1997 reaching 9 300 MT (US\$ 49.6 million) in 1998. Another important exporter of this product is France, with 5 600 MT (US\$ 16.6 million) in 1998, up 17% from the previous year.

IMPORTS

Oyster imports increased slightly (+7%) in 1998 when they were 26 900 MT, worth US\$ 107.7 million). No great fluctuations characterise the trend in oyster imports over the period. 33% of the world's oysters were imported by Japan (9 000 MT and US\$ 47.3 million) in 1998, up 38% from 1997. Italy imports a considerable amount of oysters, 3 500 MT (US\$ 8 million) in 1998 (- 10% from 1997). Japanese imports of this product have grown since 1991 (+ 32%) whereas Italian imports have declined (- 43%). Value -wise, the USA is second after Japan with US\$ 10.6 million.

PRICES

NEWS ITEMS

Italian mussel production down

“The Italian research institute of fish and aquaculture, Irepa, has issued a report showing declines in wild mussel production and revenues for 1999. Output is put at 416 000 MT, a 10.5 percent decline compared with 1998. The value (Lit. 2 963 billion) is 7.6 percent below 1998. Part of the decline was attributed to the fishing halt because of the Balkan war in 1999. Some concern was also expressed over deteriorating environmental conditions. It was also noted that the popular wild “vongole” clams are disappearing fast”.

New Zealand-Chinese mussel joint venture

“Two Chinese importing companies are going into business with a New Zealand company to produce mussels for the potentially huge Chinese market, the Nelason mail reports. Dah Chong Hong Ltd and Shanghai Fisheries General Corporation have signed a partnership agreement with a New Zealand company. On a visit early in 1999, Alex Chu of Dah Chong Hong praised the green clean image of the New Zealand mussel industry, saying it had the potential to make millions of dollars in the Chinese market. China is already New Zealand's fifth largest export market for greenshell mussels”.

Japan: oyster and shellfish imports

“Kaizan Ltd of Japan began importing Sydney Rock Oyster (the Crassostrea gigas species) in November 1999, after a two-year negotiation and preparation period. Producers of the Rock Oyster boast that the product is of top quality and offers a unique taste and experience. Meanwhile, during the January to November 1999 period, 43 284 MT of live/fresh shellfish were imported into Japan, including spiny lobster, sea urchin, king crab and tanner crab. Slight increases were seen for all species compared to the same period in 1998”.
