The Aqualizer's fluid quickly creates a "perfect occlusion" by eliminating all occlusal interferences and by creating perfect bilateral balance. It allows the muscles to functionally correct both mandibular and condylar placement. Invaluable for pain relief, treatment and diagnosis of TMD/CMD occlusion.

Der Aqualizer, eine weiche Aufbisschiene mit Wasserfüllung, bewirkt eine „perfekte Okklusion“, da alle okklusionalen Störungen beseitigt werden und eine perfekte beidseitige Balance geschaffen wird. Mit Hilfe des Aqualizers können die Muskeln wieder für eine korrekte mandibuläre und kondyläre Stellung sorgen. Daher kann der Aqualizer hervorragend zur Schmerzbehandlung sowie zur Behandlung und Diagnose von TMD/CMD Okklusion eingesetzt werden.

Atlantis Components, Inc. utilizes patented expert system computer-aided design and sophisticated manufacturing methods (CAD/CAM) to deliver patient-specific, anatomically-correct dental implant abutments that require no hand-modification. Atlantis provides abutments in titanium and Y-TZP zirconia for more implant systems than any manufacturer. Visit Atlantis in Hall 4, Stand J-70.

Die Implantatlager von Atlantis Components, Inc. sind individuell auf den Patienten abgestimmt, anatomisch präzise und bedürfen keiner weiteren Nacharbeitung von Hand. Dafür sorgt ein patentiertes Verfahren, das von hochqualifizierten Spezialisten mit modernsten Computeranlagen und Herstellungsprozessen (CAD/CAM) durchgeführt wird. Atlantis liefert Implantatlager in Titan und Y-TZP-Zirkonium, die mit mehr Implantatsystemen kompatibel sind, als alle anderen Produkte am Markt.

Centrix is "Making Dentistry Easier". We have an innate understanding of the challenges dentists, hygienists and assistants undergo each day. As a company founded by a dentist for dentists, our pledge is to do everything possible to make dental practices more efficient and professional by developing and marketing revolutionary products.

Centrix erleichtert die zahnärztliche Arbeit. Wir haben ein immanentes Verständnis für die täglichen „Kämpfe“ von Zahnärzten, Mundhygienikern und Assistenten, denn das Unternehmen wurde von einem Zahnarzt für Zahnärzte gegründet. So entwickeln und vertreiben wir revolutionäre Produkte, die dem Praxispersonal helfen, Zahnbehandlungen noch effizienter und professioneller zu gestalten.

PRODUCTS: X-RAY EQUIPMENT

Our DENT-X division, started in 1986, has a global reputation as a supplier of superior dental X-ray imaging products. The Company's historic analog imaging business is the basis for providing dentists a broad selection from traditional film based images to digital systems for use in the operatory. This includes a complete line of state of the art intraoral dental x-ray units, a line of Panoramic X-ray and the "EVA" digital x-ray line.

Der Unternehmensbereich DENT-X, 1986 gegründet, ist weltweit anerkannter Lieferant von erstklassigen Produkten für das zahnmedizinische Röntgenbild. Die Erfahrung, die bereits im Bereich des analogen Röntgens gewonnen wurde, ist die Grundlage unseres breiten Produktangebots für Zahnmediziner – vom traditionellen Röntgenfilm bis hin zu digitalen Systemen zum Einsatz im Behandlungszimmer. Dazu zählt auch eine komplette Reihe von intraoralen Zahnröntengeräten der Spitzenklasse, Modelle für Röntgen-Panoramaaufnahmen und „EVA“, die digitale Röntgen-Modellreihe.

PRODUCTS: SEMI-CRYSTALLINE POLYCER

DRM is a Dental Restorative Materials Center for Research, Development and Manufacturing of a complete line of Semi-Crystalline PolyCeram Nanotechnology based materials. This includes a spectrum of Chairside clinical kits, DiamondLite™; syringable and Indi-Dose (16 Vita equivalent shades) and (4) SuperBrite™ colors, DiamondBond 001™; a Universal Single Step Adhesive, DiamondFlow™; a flowable semicrystalline filling/liner/base/blockout material, DiamondLink™; a universal dual-cure luting cement and pit/fissure sealant, DiamondCrown™-Chairside; a direct/indirect filling/inlay/onlay/veneer/crown system available in (92) colors and (10) opacities including the new DiamondCrown SuperWhite™ and DiamondCrown SuperClear Coat™ and DiamondCrown™-Lab; a Prosthodontic system for permanent Crown and Bridge work, Metal-Free and Integrated-Implant-Superstructure. This is further supported by a complete line of Optimal Chairside Photopolymerization Devices and Laboratory Curing Apparatus; DiamondLED-Mini™, DiamondLED™, DiamondPlasma™, DiamondLite-Turbo-Halogen™, DiamondLite FotoKur F/X™ Lab. Cure Booth and DiamondCrown ThermoKur F/X™ Cure Chamber.

DRM ist ein Dentalzentrum für restoratives Material für die Forschung, Entwicklung und Herstellung der kompletten Reihe an semi-kristallinen PolyCeram Materialien auf Basis der Nano-Technologie. Dazu gehört ein Spektrum an klinischen Sets für den Patientenstuhl: DiamondLite™. Spritzen- und Indi-Dosierung (16 lebenssechte Schattierungen) sowie 4 SuperBrite™ Farben, DiamondBond 001™. Ein universelles Einzelschritt-Haftmittel: DiamondFlow™. Ein fließendes halb-kristallines Füll-, Liner-, Basis-, Sperrmaterial: DiamondLink™. Ein universaler doppelt verhärtender Feinenzement und eine Spalt- und Rissversiegelung: DiamondCrown™-Chairside. Ein direktes bzw. indirektes Füll-, Inlay-, Onlay-, Verblendschalen- und Kronensystem verfügbar in 92 Farben und 10 durchsichtigen Schattierungen, einschließlich des neuen DiamondCrown SuperWhite™ und DiamondCrown™-Lab. Ein prosthodontisches System für die dauerhafte Kronen- und Brückenarbeit, metallfreier und integrierter Implantat-Aufbau. Darüber hinaus wird diese Palette durch die vollständige Reihe an optimalen Stuhl-Photopolymerisationsgeräten und Labor-Heilungsgeräten unterstützt: DiamondLED-Mini™, DiamondLED™, DiamondPlasma™, DiamondLite-Turbo-Halogen™, DiamondLite Fotokur F/X™ Lab. Behandlungsstand und DiamondCrown ThermoKur F/X™ Behandlungskabine.

PRODUCTS: SUCTION, SEPARATOR & COMPRESSED AIR SYSTEMS / PLASTIC TUBING

Quality has made Freelin-Wade the leading manufacturer of plastic tubing in the dental industry. Our tubing is great, but what delights our customers most is how easy it is to do business with us. We lead the industry with short lead times, limitless product variations and no minimum order requirement.

Qualität hat Freelin-Wade zum führenden Hersteller von Kunststoffschläuchen im Bereich der Zahntechnik gemacht. Neben der hervorragenden Qualität unserer Produkte schätzen unsere Kunden vor allem den problemlosen Geschäftsablauf. Wir liefern schnell, ohne Mindestbestellmengen und bieten eine enorme Produktvielfalt – so sind wir in kurzer Zeit zum Marktführer geworden.

At Handpiece Headquarters, a Henry Schein Company, we specialize in the development, production, and distribution of parts, equipment, and tooling for handpiece repair. However we are more than just a parts supplier. Along with providing the highest quality products available, we are also your business and technical support resource.

Handpiece Headquarters, ein Unternehmen des Henry Schein Konzerns, ist Spezialist für Entwicklung, Herstellung sowie Vertrieb von Zubehör und Ausrüstung, bietet darüber hinaus aber auch einen Reparaturservice für Handinstrumente. Wir sind auf jeden Fall mehr als ein gewöhnlicher Lieferant. Wir bieten nicht allein die besten verfügbaren Produkte, sondern sind auch bei Problemen mit Technik oder Praxisablauf Ihr Ansprechpartner.

PRODUCTS: IMAGENTM RX-D PRODUCTION SYSTEM / IMAGENTM PRODUCTION SERVICES

imagenTM is dedicated to continuously improve the quality of dental patient care by providing dental laboratories with the most advanced manufacturing processes, equipment, and materials. By combining Ex One's patented rapid manufacturing technologies with FDA-certified materials, imagen has set new benchmarks for productivity, quality, and aesthetics in the dental industry. imagenTM is the world-wide exclusive licensee of the M.I.T. 3D Printing Technology for dental restorations. 3D Printing directly converts digital scan data into metal or ceramic components by combining multiple layers of particulate material using a specialized inkjet printing process. 3D Printing ensures CAD/CAM consistency of accurate fit, precise and uniform wall thickness, and fully traceable coping histories. imagen increases dental lab productivity without sacrificing quality. A single imagen production system can produce hundreds of units per day. • High noble 87% gold alloy cores (95% gold surface) • Excellent biocompatibility – antimicrobial & antiplaque surface properties • Bright gold luster • Fine grain structure for superior strength imagen. Superior Science, Beautiful Results.

imagenTM – oberstes Ziel ist die kontinuierliche, qualitative Verbesserung der zahnmedizinischen Versorgung von Patienten. Dazu will das Unternehmen beitragen, indem es modernste Fertigungsverfahren und -geräte als auch hochwertigste Materialien für das zahntechnische Labor anbietet. Imagen kombiniert patentierte, schnelle Herstellungsverfahren von Ex One mit FDA-zertifizierten Materialien und setzt so branchenweit Maßstäbe für Produktivität, Qualität und Ästhetik. ImagenTM ist welt-exklusiver Lizenznehmer der vom M.I.T. entwickelten 3D-Drucktechnologie für restaurative Zahnmedizin. Der 3D-Druck setzt digitale Scandaten direkt in Metall- oder Keramik-Werkstücke um, die aus Schichten ultra-feinen Materials mittels eines speziellen Tintendruck-Verfahrens aufgebaut werden. Dabei erhält der 3D-Druck die Präzision von CAD/CAM-Verfahren in Bezug auf Passgenauigkeit, exakte und gleichmäßige Wandstärken und vollständige Dokumentation zur Reproduktion. Mit Imagen kann die Produktivität des Labors ohne Qualitätseinbußen gesteigert werden. Ein einziges Imagen-Produktionssystem kann hunderte Werkstücke pro Tag herstellen. Hochwertigste Legierungen, 87% Goldgehalt (Rohling-Oberfläche 95% Gold) Hervorragende Bioverträglichkeit – antimikrobiell und Plaque vermeidend Strahlender Goldglanz Überagende Belastbarkeit durch feinste Struktur des Materials Imagen. Wissenschaftliche Höchstleistung, schöne Ergebnisse

Imaging Sciences International has been enhancing the way dentists see patients for over a decade with the most advanced dental and maxillofacial radiography systems, including the state-of-the-art Cone Beam 3-D imaging system, the i-CAT®. The i-CAT® provides more accurate information through immediate 3-D reconstruction of a patients' critical anatomy, which leads to better treatment planning and more predictable outcomes. Experience the i-CAT at our booth!

Imaging Sciences International unterstützt die Patienten-Dentisten-Beziehung seit mehr als einer Dekade mit den fortschrittlichsten Röntgendurchleuchtungsgeräten - darunter das technisch modernste Cone Beam 3-D Bildsystem - im Dentalbereich für die Mund- und Kieferchirurgie. i-CAT® bietet über die sofortige 3-D Rekonstruktion genauere Informationen zur kritischen Anatomie des Patienten und dies führt zu einer besseren Behandlungsplanung und vorhersagbareren Ergebnissen. Lernen Sie i-CAT an unserem Stand kennen.

PRODUCTS: DISPOSABLE ARTICULATORS

Monotrac V2 Articulator, cast in place, single pour, pinless model and die system. Featured benefits are internally retained dies with solid relocation. Tear-away base formers – no more base molds. Smooth universal snap-on articulator with improved excursive flex arm, fits 4 base shapes. Full, Anterior, Straight and Curved Quads.

Der ‚Monotrac V2 Articulator‘ ist ein System, das eine einfache und rasche Modell-Bearbeitung erlaubt. Integrierte Halterungen ermöglichen ein sicheres Umsetzen. Einweg-Sockelformer erübrigen Sockelformen. Leichtgängiger Universal-Artikulator mit verbessertem, flexiblem Ausleger, der vier Grundformen aufnehmen kann: Vollbogen, Front, gerade und gebogene Quadranten.

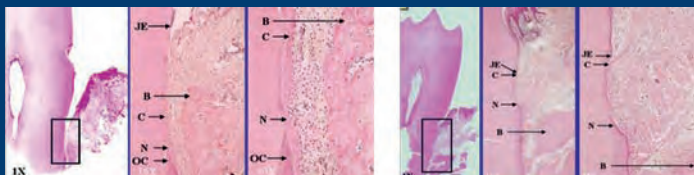

“Laser Assisted New Attachment Procedure (Laser ANAP)[®]

Cementum-mediated periodontal ligament
new-attachment to the root surface in the
absence of long junctional epithelium.”

(FDA 510k Clearance K030290)

LANAP x 3 months

LANAP x 3 months

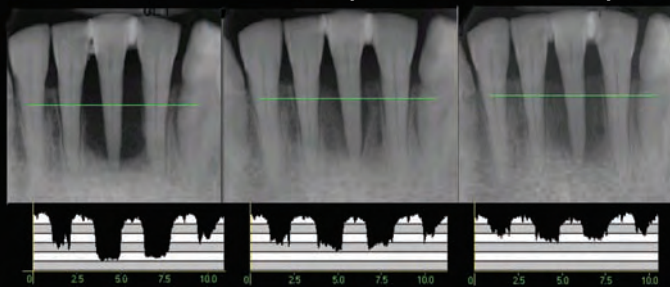

Key: N = notch in calculus; B = new bone; C = new cementum; OC = old cementum; JE = junctional epithelium

PRODUCTS: UNIQUE TOOTHPASTE ACTIVE INGREDIENTS

NovaMin represents a breakthrough in oral healthcare with superior tooth remineralization technology, nourishing your teeth with essential minerals in their rare ionic form, and supercharging the natural tooth remineralization that keeps your teeth looking and feeling healthy producing teeth that are less sensitive, cleaner, whiter and healthier than possible with old technologies like fluoride

NovaMin stellt einen Durchbruch für die Mundhygiene dar: eine Spitzentechnologie zur Remineralisation des Zahns versorgt die Zähne mit essentiellen Mineralien in Form von Ionen und unterstützt so die natürliche Remineralisation der Zähne – die Zähne sehen gesund aus, sind weniger empfindlich, sauberer, weißer und gesünder als mit alten Verfahren und Mitteln, wie Fluorverbindungen.

PRODUCTS: SPECIAL DEVICES

The NTI Tension Suppression System is a prefabricated matrix with approved indications for use by the U.S. Food and Drug Administration for the prevention of TMD symptoms and migraine headache pain. This device can be fabricated in 15 minute, chair-side, in one office visit with no impressions, models or outside lab fees. The NTI is being marketed worldwide in almost every continent and has in excess of 35,000 dental professionals currently using the device.

Das ‚NTI Tension Suppression System‘ ist eine vorgefertigte Aufbisschiene zur Vorbeugung von TMD-Symptomen sowie Migräne und ist von der amerikanischen Lebens- und Arzneimittelbehörde (FDA) erprobt und freigegeben. Die Schiene kann in 15 Minuten angepasst werden, direkt neben dem Patienten – nur ein Praxisbesuch ist dazu nötig, keine Abdrücke, Modelle oder Kosten für das externe Labor. NTI wird weltweit vertrieben und zur Zeit schon von mehr als 35.000 Zahnmedizinern verwendet.

VP of International Sales and Clinical Relationships
(E: bdshefsky@aol.com • T: +1.949.597.1428)

PRODUCTS: DENTAL & SURGICAL INSTRUMENTS / ENDODONTIC PRODUCTS / PIEZO-ELECTRIC ULTRASONIC DEVICES FOR ENDODONTICS AND SCALING / ULTRASONIC TIPS FOR ENDODONTIC SURGERY AND NON-SURGICAL PROCEDURES / ROOT CANAL FILLING MATERIALS / MICROSURGICAL HAND INSTRUMENTS

Obtura/Spartan manufactures the Obtura Warm Gutta Percha Filling System along with the Spartan MTS Piezo Electric Ultrasonic unit. The KiS, CPR and BUC tips are some of the names well known to the Endodontic community for both non-surgical and surgical endodontics.

Obtura/Spartan bietet unter anderem das ‚Obtura Warm Gutta Percha Filling System‘ sowie das Modell ‚Spartan MTS Piezo Electric Ultrasonic‘ an. Die KiS-, CPR- und BUC-Spitzen sind unter Endodontologen gut bekannt und werden bei operativen als auch bei nicht-operativen endodontischen Eingriffen verwendet.

You Control The Flow

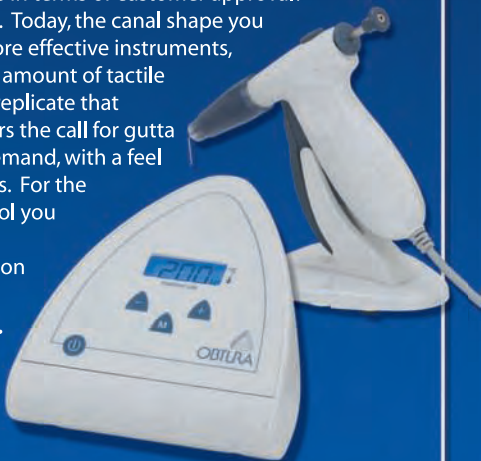

New Age Obturation

A Clinical Classic OBTURA

For the last 20 years one name has stood out from the rest in Injectable Gutta Percha Systems, OBTURA. What has set this unit apart from others in terms of customer approval?

In a word – CONTROL. Today, the canal shape you create with newer, more effective instruments, demands the highest amount of tactile sense and control to replicate that shape. Obtura answers the call for gutta percha delivery on demand, with a feel no other system offers. For the confidence and control you need in obturation procedures, the position has been filled.

The all new OBTURA.

Experience the Performance of Spartan Ultrasonic Tips

At the forefront of ultrasonic instrument technology, Spartan continues to lead the way in design and performance. We have teamed up with some of the most respected clinicians in Dentistry to bring you a variety of ultrasonic solutions to some of the most challenging dental procedures. Learn about our New BUC[®] Tips for endodontic access refinement, our re-designed diamond coated CPR[®] Tips for endodontic re-treatment, KiS[®] Diamonds the benchmark for endodontic micro-surgical preparations, SL[™] Instruments for micro-restorative procedures and our Newest Tips, PST[™] Perio Scaling Tips with new slimmer designs and angles to create this highly effective collection of tips.

PRODUCTS: ARTICULATORS / BASE FORM / WORK AIDS AND MATERIALS FOR DENTAL LABORATORY PURPOSES

The Orbix Articulation System incorporates patented technology, which provides two distinct modes of operation, a solid centric mode when locked and true linear protrusive motions when released. A complete system is available including adapters for models poured in "slotted type" formers and a reusable Vertical Lock to provide complete stability on "free-end" cases.

Das Orbix Artikulationssystem bietet eine patentierte Technologie, die auf zwei Arten betrieben werden kann: Zuverlässige Bedienung im Zentrum in geschlossenen und echte lineare und vorstehende Bewegungen im gelösten Zustand. Wir bieten ein Komplettsystem einschließlich Adaptern für Formier im "Schlitztyp" und eine wieder verwendbare vertikale Sperre, welche die vollständige Stabilität der Fächer mit offenen Enden bietet.

In 1994 Raintree Essix introduced one of the first commercially viable thermoplastic for the dental and orthodontic markets. Now over 15 types of thermoforming plastics for various applications – from aligners to sports mouthguards – are offered. With the introduction of Essix ACE Plastic Raintree Essix continues to be the leading innovator in thermoforming technology.

1994 führte das Unternehmen Raintree Essix einen der ersten kommerziell nutzbaren thermoplastischen Kunststoffe für den zahnmedizinischen und orthodontischen Markt ein. Inzwischen werden über 15 verschiedene thermoplastische Kunststoffe für zahlreiche Anwendungen angeboten, darunter Korrekturschienen und Mundschutzmodelle für den Sport. Mit Einführung von ‚Essix ACE‘ Kunststoff bleibt Raintree Essix weiterhin der führende Entwickler in der thermoplastischen Technologie.

*Jean-Baptiste Bonnardier (E: jean-baptiste.bonnardier@solvay.com)***PRODUCTS: RADEL® R POLYPHENYLSULFONE**

Solvay Advanced Polymers manufactures RADEL® R polyphenylsulfone, an excellent material for devices that can withstand more than a thousand cycles of disinfection and steam sterilization without significant loss of properties. With exceptional durability, weight savings over metal and melt processability, Radel R allows for custom designed dental instruments, cassettes and devices.

Das Unternehmen „Solvay Advanced Polymers“ produziert mit RADEL® R Polyphenylsulfon das ideale Material für Geräte, die über tausend Desinfektions- und Dampfsterilisationszyklen ohne merklichen Verlust ihrer Eigenschaften vertragen müssen. Die hervorragende Haltbarkeit, die Gewichtersparnis gegenüber Metall und exzellente Verarbeitungseigenschaften von „Radel R“ prädestinieren das Material zur Herstellung von zahnmedizinischen Instrumenten, Kassetten und Geräten.

T: +1.617.464.4500 • F: +1.617.464.4266
E: marketing@tekscan.com • W: www.tekscan.com

PRODUCTS: COMPUTERIZED OCCLUSAL ANALYSIS

Tekscan's T-Scan® II is a simple-to-use clinical diagnostic device that records and analyzes occlusal forces using thin, disposable sensors. It's the only system that measures both timing and force of a bite, finishing cases at higher levels and reducing costs. Applications include Prosthetics, TMD, Occlusal Equilibration, Cosmetic Dentistry, and more!

Das Modell „T-Scan® II“ von Tekscan ist ein einfach zu bedienendes, klinisches Diagnosegerät, das mittels dünner Einwegsensoren okklusale Kräfte aufzeichnet und analysiert. Das einzige System, das gleichzeitig Bisszeit und -kraft misst, hochwertige Behandlungslösungen erlaubt und die Kosten senkt. Zu den Anwendungsgebieten gehören u. a. Prothetik, TMD, okklusale Untersuchungen und die kosmetische Zahnmedizin.
