BLM
WOPR
P.O.B. 2965
Portland, OR 97208

RECEIVED
JAN 11 2008

I live in North Douglas County, OR. My home town is Cottage Grove, OR. Maps representing the WOPR displayed in Cottage Grove are difficult to make sense of. They lack familiar reference points and they stop abruptly at district boundaries. These maps demonstrate a lack of concern for life at the edges. BLM wasted the opportunity to display the East-West Connectivity ^{running through C.G.} Corridor₁ — Something of great interest to this community.

I hope the next time BLM prints maps to be displayed in Cottage Grove they will be more descriptive.

I know that BLM has received many comments, including those from other agencies, ^{Challenging the WOPR} so I will keep the following comments brief.

- The economic analysis is flawed.
- The employment analysis is flawed.
- The forest growth analysis is flawed.
- The computer models do not adequately represent reality.

BLM has been charged with the management of these lands for a public that does not want to be burdened - defending them from every crook who has bought a politician. There is too much money corrupting our government. The WOPR is a result of that corruption and it would perpetuate more corruption. For the sake of democracy, sanity, and life on Earth, I hope the WOPR will be replaced by a plan that truly considers the needs of us all.
