Live and Interactive CME Satellite Broadcast

Designed for physicians, pharmacists, nurses, and psychologists

Managing Acute Mania: From the Emergency Room to the Outpatient Practice

Objectives

At the end of this educational activity, participants should be able to:

- 1. To determine how to manage the agitated, manic patient in the emergency room both pharmacologically and non-pharmacologically
- 2. To recognize less severe forms of mania in the outpatient setting and to examine the impact of early treatment
- 3. To evaluate and compare treatments available for acute mania

Description

This CME activity will focus on treatment algorithms of the manic patient through the "life cycle" – from the emergency room to inpatient hospitalization to outpatient practice. The goal will be to familiarize practicing physicians on how to recognize the manic patient and offer up-to-date treatment. It will examine both pharmacological as well as non-pharmacological treatments of mania.
