Subject: Regulation Z

As per my comments & recommendations as to FURTHER AND REDUNDANT DISCLOSURES to reveal to the consumers the fact that Mortgage Brokers actually get paid by the consumer by both the Lender I PROTEST . What other profession is required to disclose three times that they do not work for free ? I contend and recommend that the proposed Reg Z rule proposed by the gods at the Federal Reserve be deemed irrelevant and redundant. The request should be denied. I will vote for the change when the employees at the Federal Reserve are also required to discloseto the pennyas we are how much money they are each , individually making AND WHY AND HOW OFTEN . It would be the same as requiring Car Dealerships to put in writing what their mark up on a car when the client first starts an inquiry on a purchase and then show them two more times before they are given the keys. If this revision of the Reg Z law is allowed then America is now one step less than America

Sincerely yours ,
Chris Wright Sr.
