Vancouver, Canada Place

Victoria, Pre Inspection

- Land border ports
Vancouver Amtrak Station

* The Department of Homeland Security is testing the US-VISIT program's next phase of implementation, which uses radio frequency identification (RFID) technology to more efficiently record the entries and exits of visitors who are currently issued a Form I-94 (Arrival/Departure Record) at our land borders. Five U.S. land border ports will test RFID from August 4, 2005 through early summer 2006.
