ECS Configuration Change Request

CCR No. 97-0075	**Logged Date** 1/21/97	**Rev.** -	**Request Type** CCR

Priority Routine [x] Urgent [ ] Emergency [ ]	**Affected Release** B1	**Change Class** I I

Title (description)
FOS Replay of Historical Performance Data and EDOS CODA Reports

Documents Affected	**Source Nos** (RID, NCR, Action Item, GSFC CCR, etc.) **or Tech Reference** AC-96-0457

RTM Change [X]   **Start New Baseline** [ ]

Problem
FOS Design Baseline does not provide capability to replay and process historical NCC UPD Messages and EDOS CODA Reports.

Proposed Solution
Modify FOS User Interface (FUI), Data Management Subsystem (DMS), Off-line Analysis (ANA), Resource Management Subsystem (RMS) and Real-Time Contact Management Subsystem (RCM) baseline designs to provide capability to replay and process historical NCC UPD Messages and EDOS CODA Report.

FOS Baseline Design currently provides the capabilities necessary to archive incoming NCC UPD Messages and EDOS CODA Reports. This CCR proposes only the additional functionality to request, access, meter and process the historical data. Requirements will be added that address the need for this capability (See attachment 1)
