

**Exhibit 4**  
**DTV Transition Plans and Change to Post-Transition DTV Table of Allotments**  
**"Appendix B" Facilities**

Station WNEO, Alliance, OH (Facility ID 49439)

Northeastern Educational Television of Ohio (NETO) is currently operating WNEO-DT on its interim pre-transition digital channel 46 and has not yet begun construction of the authorized DTV facilities. NETO intends to file shortly for a construction permit on its post-transition channel 45. Final construction is expected to begin in November, 2008 and the fully authorized, final post-transition DTV facility is expected to be operational by December 1, 2008 well in advance of the February 17, 2009 deadline.

NETO operates WNEO-DT with a Thomson channel 46 transmitter that will be shut down, for 10 -15 days, while it is retrofitted for channel 45 operation. The delivery of parts and equipment necessary to adjust the transmitter were ordered on December 14, 2006 and are scheduled for delivery November 1, 2008. This will require the termination of pre-transition digital service after November 19, 2008.

NETO intends to utilize the existing analog channel 45 non-directional antenna for its post-transition DTV operations, so NETO anticipates that analog service will also be terminated after November 19, 2008. Once the retrofitting of the transmitter is completed, NETO will connect the transmitter to the existing (top-mounted) channel 45 antenna and commence operations on its post-transition channel.

In addition , please note that the facilities NETO intends to build match the Table of DTV Allotments Appendix B in most respects, but uses the top-mounted existing antenna. Thus, the Antenna ID for the new facility will be 40775, the existing analog channel 45 non-directional antenna will remain located at 253 m, which will change the allotted height above average terrain (HAAT). In order not to exceed the allotted coverage, NETO plans to operate the facility at ERP 45 kW. Accordingly, NETO requests a correction to the Table of Allotments as follows, to match the intended WNEO post-transition facility:

From:

Facility ID	State and City		NTSC		DTV				
			Ch	Ch	ERP kW	HAAT (m)	Antenna ID	Latitude (DDMMSS)	Longitude (DDMMSS)
49439	OH	Alliance	45	45	388	223	74576	40-54-23	80-54-39

To:

Facility ID	State and City		NTSC		DTV				
			Ch	Ch	ERP kW	HAAT (m)	Antenna ID	Latitude (DDMMSS)	Longitude (DDMMSS)
49439	OH	Alliance	45	45	<b>45</b>	<b>253</b>	<b>40775</b>	40-54-23	80-54-39
