I SPECIAL NOTICES This section contains information of Special concern to the Mariner.

STELLWAGEN BANK NATIONAL MARINE SANCTUARY

A regular visitor to Massachusetts coastal waters is the severely endangered Right Whale. The whale is a slow moving animal that is prone to being involved in collisions with vessels. The National Oceanic and Atmospheric Administration (NOAA) has designated Cape Cod Bay and the region east of Cape Cod as Critical Habitat for this species, and has identified the Stellwagen Bank National Marine Sanctuary as an additional area of importance to the Right Whale. Vessel operators should use caution around Right Whales. Intentional close approach to Right Whales is prohibited and may result in a violation of federal or state law. Three federal areas of special concern are:

Stellwagen Bank National Marine Sanctuary - bounded by: 42 45 59N, 70 13 01W; 42 05 35N, 70 02 08W; 42 07 44N, 70 28 15W;

42 32 53N, 70 35 52W; and 42 39 04N, 70 30 11W.

Critical Habitat Area/Cape Cod Bay - bounded by: 42 04 48N, 70 10 00W; 42 12 00N, 70 15 00W; 42 12 00N, 70 30 00W; 41 46 48N, 70 30 00W and on the south and east by the interior shore line of Cape Cod, MA.

Critical Habitat Area/Great South Channel - bounded by: 41 40 00N, 69 45 00W; 41 00 00N, 69 05 00W; 41 38 00N, 68 13 00W; and

42 10 00N, 68 31 00W.

LIQUEFIED NATURAL GAS SHIPMENTS IN THE PORT OF BOSTON

The Distrigas Facility in Everett, MA expects to continue receiving shipments of Liquefied Natural Gas from the National Algerian Petroleum Corporation. The shipments will be delivered every two to three weeks, October through March and every six to eight weeks, April through

September by Algerian and U.S. Flag LNG tankships. The Captain of the Port will activate a moving safety zone around each vessel as it transits Boston Harbor. In accordance with the regulations in 33 CFR 165.110, all vessels must remain clear of the main ship channel two miles ahead and one mile astern of the LNG tankers during the transit. During cargo off loading the safety zone will remain in effect around each vessel moored to the Distrigas facility. In accordance with the regulations in 33 CFR 165.110, all vessels must remain clear of the moored LNG tanker at a distance of at least 50 yards. Marine Safety Broadcasts will be made every 30 minutes advising the vessel's location while each LNG tanker transits the Port of Boston. Notification of the broadcasts will be made on VHF-FM Channel 16, and the actual broadcasts will be made on VHF-FM Channel 22. The Captain of the Port will keep the port community informed of LNG tanker arrival times and associated harbor closures. Questions should be made to the Port Safety and Security Division of the Marine Safety Office at (617) 223-3000.

MASSACHUSETTS WATER RESOURCES AUTHORITY EFFLUENT TUNNEL CONSTRUCTION

The Massachusetts Water Resources Authority is currently constructing an effluent outfall tunnel which will connect the Deer Island Waste Water Treatment Plant to a series of diffuser pipes which extend approx. 10.5 feet above the sea floor. Construction is scheduled to be completed in January 1998 when the tunnel will finally be flooded. During this time workers will be in the tunnel, and any damage to the tunnel or diffuser pipes could result in fatalities. Therefore, mariners are strongly urged not to anchor, dredge, or drag in a zone 1,000 ft to either side and each end of the diffuser area between the points 42°23'19"N 70°46'48"W and 42°23'04"N 70°48'14"W. For additional information contact Joseph Griffith at (617) 539-7720 Chart(s): 13270, 13267 LNM 20/97 (CGD1).

OFF-LINE TIME

The National Ocean Service's NY/NJ Physical Oceanographic Real Time System (PORTS) will be offline from May through early June, 1997. This is necessary due to the relocation of components and the establishment of new communication systems at the new VTS Center at Ft. Wadsworth.

IV CHART CORRECTIONS This section conatains corrections to federal and private maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. The mariner must decide which Chart(s) to correct.

The following example explains the individual elements of a typical chart correction.

NEW YORK - NEW YORK HARBOR - EAST RIVER - GOWANUS CANAL - Channel Restriction - A 45ft X 126ft crane barge and a 30ft X 90ft scow barge will be operating at the 9th Street Bridge Across Gowanus Canal at mile 1.4, from 22 May through 31 December 1997. Hours of operation are from 0630 to 1530 daily, Mondays through Fridays. Mariners requiring the full horizontal clearance of the bridge should contact the contractor Mr. Dale Errico at (718) 330-0881 four hours in advance and request the barge to be moved out of the Channel. Mariners are advised to reduce wake and exercise caution when transiting the area.
