## Preface

Section 316 of the North American Free-Trade Agreement Implementation Act (NAFTA Implementation Act), Public Law 103-182, requires the U.S. International Trade Commission (Commission) to monitor U.S. imports of "fresh or chilled tomatoes" and "fresh or chilled peppers, other than chili peppers," until January 1, 2009. In response, the Commission instituted investigation No. 332-350, Monitoring of U.S. Imports of Tomatoes, and investigation No. 332-351, Monitoring of U.S. Imports of Peppers, under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)). ${ }^{1}$

This report on the Commission's monitoring investigation covers tomatoes for fresh-market use and for processing. The purpose of this monitoring, as expressed in the NAFTA Implementation Act, is to enable the Commission to conduct an expedited investigation concerning provisional import relief and, if appropriate, recommend to the President provisional relief should a petition for such relief be filed under section 202 of the Trade Act of 1974 with respect to imports from all countries, or a petition requesting such relief be filed under section 302 of the NAFTA Implementation Act with respect to imports from Canada or Mexico. Generally, such provisional relief would remain in effect, pending completion of the investigation by the Commission and the taking of final action by the President.

This report contains statistical information gathered by the Commission on the U.S. tomato industry in the course of its monitoring. This information includes (1) consumption and trade data (including U.S. imports and U.S. exports) and (2) other industry data (including U.S. production quantity, value, unit value, and harvested area; U.S. cost-of-production estimates; shipments; quantities available at major shipping points; and average U.S. retail and shipping-point prices). The information presented in this report on the U.S. tomato industry was obtained from a number of sources, including the U.S. Department of Agriculture, the U.S. Department of Commerce, the Florida Tomato Committee, and various other State agencies. This report principally includes 2002-06 data and partial-year data for 2006 and 2007.

[^0]
## Abstract

Imports of fresh-market tomatoes from Mexico and Canada, historically the two major suppliers to the U.S. market, have continued to rise relative to U.S. production in recent years. Imports of greenhouse-grown tomatoes and grape tomatoes from Mexico and Canada have risen, but imports of cherry and other field-grown tomatoes have declined. U.S. imports accounted for 39 percent of consumption volume in 2006 and are trending upward; U.S. exports are trending downward and remain small relative to production and consumption. Most imports from Mexico continue to enter the United States principally through Nogales, Arizona; most imports from Canada enter principally through border crossings in Ontario and British Columbia. U.S. harvested area of fresh-market tomatoes is trending downward, but the principal producing states remain the same. Market prices continue to vary among suppliers and between different product types and maturity.

Production of processing tomatoes remained steady from 2005 to 2006. Imports of processed tomato products, small relative to production, rose dramatically with the entry of additional product from China and Chile. U.S. harvested area of processing tomatoes rose from 2005 to 2006 with the principal producing states remaining the same.

## Highlights

The following are highlights of the statistical data collected on fresh-market ${ }^{1}$ and processing ${ }^{2}$ tomatoes for the 2002-06 period.

## Fresh-market Tomatoes

- Apparent U.S. consumption of fresh-market tomatoes was 2.5 million metric tons in 2006, about the same as that in 2005; consumption in 2006 was valued at $\$ 2.7$ billion, up from $\$ 2.5$ billion in 2005 (table 1). The ratio of import volume to consumption volume in 2006 was 39 percent, up from 37 percent in 2005. The ratio of import value to consumption value rose from 43 percent in 2005 to 46 percent in 2006. The principal U.S. trading partners for fresh-market tomatoes were Mexico and Canada (tables 3 and 5). Production in Florida was down considerably in 2006 from that in 2005 following weather damage to the crop during the early part of the growing season (table 22).
- U.S. production of fresh-market tomatoes was down by 4 percent from 1.74 million metric tons in 2005 to 1.67 million metric tons in 2006 (table 1). The value of production was about the same in 2005 as in 2006, with a 4 -percent rise in unit value from $\$ 921$ per metric ton in 2005 to $\$ 955$ per metric ton in 2006 . Florida and California remained the states with the largest production volume of fresh-market tomatoes in 2006, accounting for 37 and 31 percent, respectively, of total U.S. production (table 22). Other states with significant production volume during 2002-06 included Virginia, Georgia, Ohio, and Tennessee. U.S. harvested area of fresh-market tomatoes fell by 2 percent from 125,700 acres in 2005 to 122,800 acres in 2006 (table 22).
- U.S. exports of fresh-market tomatoes fell by 3 percent from 147,951 metric tons in 2005 to 144,184 metric tons in 2006; export value rose by 4 percent from $\$ 166.1$ million in 2005 to $\$ 172.6$ million 2006 (table 1). U.S. export volume was up by 8 percent during January-June 2007 as compared with exports during the corresponding months in 2006 (table 3). Canada continued as the leading market for U.S. exports of fresh-market tomatoes throughout the 2002-06 period, accounting for 83 percent of the total volume ( 84 percent of value) in 2006 (table 3).
- U.S. imports of fresh-market tomatoes rose by 4 percent from 951,786 metric tons in 2005 to 992,339 metric tons in 2006 (table 5). Imports were valued at $\$ 1.2$ billion in 2006, up slightly from $\$ 1.1$ billion in 2005. Imports were up 8 percent in volume during January-June 2007 as compared with imports during the corresponding months in 2006. Mexico, the leading supplier of imports throughout the 2002-06 period, accounted for 85 percent, by volume, of total imports in 2006 (table 5). U.S. imports from Canada fell by 5 percent in volume from 2005 to 2006 and accounted for 14 percent of total imports in 2006.

[^1]- U.S. imports of fresh-market greenhouse ${ }^{3}$ tomatoes rose by 10 percent in volume from 2005 to 2006, and continued to rise substantially during January-June 2007 (table 6). Mexico and Canada accounted for 55 and 42 percent, respectively, of total volume in 2006.
- U.S. imports of fresh-market cherry ${ }^{4}$ tomatoes remained about the same in volume from 2005 to 2006 and amounted to 31,732 metric tons in 2006, with Mexico accounting for 98 percent of the total in 2006 (table 7).
- U.S. imports of fresh-market grape ${ }^{5}$ tomatoes, virtually all supplied by Mexico, fell by 1 percent from 35,518 metric tons in 2005 to 35,083 metric tons in 2006, and were valued at $\$ 51.1$ million in 2006 (table 8).
- U.S. imports of fresh-market Roma ${ }^{6}$ tomatoes rose by 4 percent from 358,635 metric tons in 2005 to 373,148 metric tons in 2006, and were nearly all from Mexico (table 9).
- U.S. imports of other fresh-market tomatoes amounted to 231,044 metric tons in 2006, down slightly from 232,790 metric tons in 2005 (table 10). Imports from Mexico accounted for nearly all of the total in 2006.
- U.S. imports from Mexico of all fresh-market tomatoes, entered on a July-June crop-year basis, amounted to 909,192 metric tons during July 2006-June 2007, up by 2 percent from 890,069 metric tons during July 2005-June 2006 (table 11). In recent years, nearly 55 percent of total annual import volume from Mexico entered through the Nogales customs district. In 2006/07, 55 percent of total annual imports from Mexico entered during January-April, overlapping the middle of the Florida growing and shipping season.
- U.S. imports of all fresh-market tomatoes (principally greenhouse-grown) from Canada, entered on a July-June crop-year basis, were down by 8 percent in volume from 2005/06 to 2006/07 (table 12). During July 2006-June 2007, 85 percent of total import volume entered through the combined Detroit and Seattle customs districts, with the bulk of these shipments entering during those months (May-September) coinciding with peak domestic production in California and the rest of the United States. Buffalo is also a principal customs district of entry from Canada, especially for tomatoes sold in Eastern U.S. markets.
- U.S. imports of all fresh-market tomatoes from the Netherlands, quite small relative to imports from Mexico and Canada, fell by13 percent from 6,775 metric tons in 2005/06 to 5,877 metric tons in 2006/07 (table 13). During July 2006-June 2007, 39 percent and 21 percent of total import volume entered through the New York and Boston customs districts, respectively.
- On a July-June crop-year basis, average U.S. monthly retail prices rose slightly from

[^2]$\$ 1.64$ per pound in $2005 / 06$ to $\$ 1.68$ per pound in $2006 / 07$, while shipping-point prices trended downward during the same period (table 28). Prices of Florida shipments of greens and pinks were down by 26 percent and 20 percent, respectively, from 2005/06 to 2006/07 (table 29).

## Processed Tomatoes

- California has remained the primary source for U.S. production of processing tomatoes for many years, but substantial production also occurs in Indiana, Ohio, and Michigan (table 24). Production volume of processing tomatoes rose by 4 percent from 9.2 million metric tons in 2005 to 9.6 million metric tons in 2006, with production value estimated at $\$ 677.4$ million in 2006 (table 2). Unit values have trended upward throughout the 2002-06 period. Harvested area of tomatoes for processing rose by 6 percent from 281,940 acres in 2005 to 299,400 acres in 2006; California accounted for 94 percent of total harvested area in 2006 (table 24).
- U.S. exports of processed tomatoes amounted to 182,376 metric tons (valued at $\$ 125.7$ million) in 2006, down slightly from 185,668 metric tons (valued at $\$ 127.0$ million) in 2005 (table 2). Canada, Mexico, Japan, and Korea were the leading U.S. export markets for processed tomatoes in 2006, together accounting for 87 percent of total export volume in that year (table 4). Export volume during January-June 2007 was down by 27 percent from exports during the corresponding months of 2006.
- U.S. imports of processed tomatoes remained small relative to U.S. production (less than 1 percent) in 2006 (table 2), but nevertheless rose substantially from 26,260 metric tons valued at $\$ 21.5$ million in 2005 to 50,149 metric tons valued at $\$ 36.8$ million in 2006 (table 21). Israel, Canada, and China were the leading sources of imported processed tomatoes in 2006, although significant quantities of imports from Spain, Italy, Mexico, and Chile have been received since 2002 (table 21). Imports during January-June 2007 were up by 129 percent in quantity and 113 percent in value from levels of the corresponding period of 2006, as a result of large overall increases in products from China, Mexico, and Chile.

## CONSUMPTION

Table 1 Fresh-market tomatoes: U.S. production, exports of domestic merchandise, imports for consumption, apparent consumption, and ratio of imports to consumption, 2002-06

| Year | Production ${ }^{\text {a }}$ | Exports ${ }^{\text {b }}$ | Imports ${ }^{\text {c }}$ | Apparent consumption | Ratio of imports to consumption |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Quantity (metric tons) |  |  |  | Percentage |
| 2002 | 1,795,684 | 150,640 | 860,097 | 2,505,141 | 34 |
| 2003 | 1,613,793 | 142,461 | 939,257 | 2,410,589 | 39 |
| 2004 | 1,726,647 | 165,841 | 931,972 | 2,492,778 | 37 |
| 2005 | 1,735,809 | 147,951 | 951,786 | 2,539,644 | 37 |
| 2006 | 1,671,218 | 144,184 | 992,339 | 2,519,373 | 39 |
| Value (1,000 dollars) |  |  |  |  |  |
| 2002 | 1,252,801 | 135,050 | 795,242 | 1,912,993 | 42 |
| 2003 | 1,332,361 | 146,233 | 1,047,361 | 2,233,489 | 47 |
| 2004 | 1,429,677 | 172,873 | 1,053,587 | 2,310,391 | 46 |
| 2005 | 1,598,828 | 166,131 | 1,075,119 | 2,507,816 | 43 |
| 2006 | 1,596,276 | 172,625 | 1,233,408 | 2,657,059 | 46 |
| Unit value (dollars per metric ton) ${ }^{\text {d }}$ |  |  |  |  |  |
| 2002 | 698 | 897 | 925 | 764 | 121 |
| 2003 | 826 | 1,026 | 1,115 | 927 | 120 |
| 2004 | 828 | 1,042 | 1,130 | 927 | 122 |
| 2005 | 921 | 1,123 | 1,130 | 987 | 115 |
| 2006 | 955 | 1,197 | 1,243 | 1,055 | 118 |

Agriculture (USDA), National Agricultural Statistics Service (NASS), Vegetables, 2004 Summary: Jan. 2005, Vg 12(05), 5; 2005 Summary: Jan. 2006, Vg 1-2(06), 32; and 2006 Summary: Jan. 2007, Vg 1-2(07), 33-34; exports and imports compiled from official statistics of the U.S. Department of Commerce (Commerce), except as noted.

Note: Production data are revised annually and figures for the most recent calendar years may not match data presented in earlier reports.
${ }^{\text {a }}$ Data are converted from pounds to metric tons using a factor of $2,204.62$ pounds per metric ton.
${ }^{\mathrm{b}}$ Data are for fresh or chilled tomatoes (Schedule B No. 0702.00.0010, 0702.00.0030, and 0702.00.0050) on a fresh-weight basis.
${ }^{\text {c D Data }}$ are for fresh or chilled tomatoes (Harmonized Tariff Schedule (HTS) subheadings 0702.00.20-0702.00.60) on a fresh-weight basis.
${ }^{\text {d}}$ Calculated by Commission staff using rounded numbers.

Table 2 Processed tomatoes: U.S. production, exports of domestic merchandise, and imports for consumption, 2002-06

| Year | Production $^{\text {a }}$ | Exports ${ }^{\text {b }}$ | Imports $^{\text {c }}$ |
| :--- | ---: | ---: | ---: |
| 2002 | $10,587,602$ | Quantity (metric tons) |  |
| 2003 | $8,908,302$ | 148,799 | 36,643 |
| 2004 | $11,127,913$ | 182,557 | 27,788 |
| 2005 | $9,247,054$ | 183,012 | 26,133 |
| 2006 | $9,626,893$ | 185,668 | 26,260 |
|  |  | 182,376 | 50,149 |
| 2002 | 679,823 | Value (1,000 dollars) |  |
| 2003 | 576,441 | 103,316 | 21,611 |
| 2004 | 719,285 | 116,628 | 17,988 |
| 2005 | 620,987 | 122,230 | 18,175 |
| 2006 | 677,388 | 127,046 | 21,510 |
|  |  | 125,669 | 36,779 |
| 2002 | 64 | Unit value (dollars per metric ton) |  |
| 2003 | 65 | 694 | 590 |
| 2004 | 65 | 639 | 647 |
| 2005 | 67 | 668 | 695 |
| 2006 | 70 | 684 | 819 |

Source: Production data compiled by Commission staff from official statistics of the USDA, NASS, Vegetables, 2004 Summary: Jan. 2005, Vg 1-2(05), 6; 2005 Summary: Jan. 2006, Vg 1-2(06), 73; and 2006 Summary: Jan. 2007, Vg 1-2(07), 73; exports and imports compiled from official statistics of Commerce, except as noted.

Note: Production data are revised annually and figures for the most recent calendar years may not match data presented in earlier reports.

Note: Consumption of processed tomato products can not be calculated since production is on a raw-product basis, but exports and imports are on a processed-weight basis.

Note: Unit values for U.S. production are low, relative to those for exports and imports, because production includes only raw product intended for processing, not finished product. Exports and imports are finished products.

Note: Beginning in 2000, U.S. imports of certain processed tomato products that previously had entered under HTS subheadings 2002.90.40 and 2002.90.80 are now entered under different HTS subheadings following a Federal Court ruling. As a result, import data reported here are probably understating actual total canned-tomato product imports.
${ }^{a}$ Data are for raw product intended for processing and are converted from pounds to metric tons using a factor of $2,204.62$ pounds per metric ton. U.S. production of processed tomato products on a processed-weight basis are no longer reported.
${ }^{\text {b }}$ Data are for prepared or preserved tomatoes (Schedule B No. 2002.10.0000, 2002.90.0060, and 2002.90.0080) on a processed-weight basis.
${ }^{\text {ch }}$ Data are for prepared or preserved tomatoes (HTS subheadings 2002.10.00, 2002.90.40, and 2002.90.80) on a processed-weight basis.
${ }^{\mathrm{d}}$ Calculated by Commission staff using rounded numbers.

## TRADE

Table 3 Fresh-market tomatoes: U.S. exports of domestic merchandise, ${ }^{\text {a }}$ by principal markets, 2002-06, Jan.-June 2006, and Jan.-June 2007

| Market | 2002 | 2003 | 2004 | 2005 | 2006 | Jan.-June 2006 | $\begin{array}{r} \text { Jan.-June } \\ 2007 \end{array}$ |

Source: Compiled by Commission staff from official statistics of Commerce, except as noted.
Note: Because of rounding, figures may not add to the totals shown.
Note: Unit values for tomatoes from Canada, Israel, and most EU countries are generally significantly higher than unit values for products from Mexico because they are believed to be primarily higher-valued greenhouse-grown tomatoes.

Note: Depending upon the time of year when entered, imports in 2007 enter at the MFN rates of 2.8 and 3.9 cents per kilogram, respectively, or free pursuant to the United States-Australia Free Trade Agreement (Australia), United States-Bahrain Free Trade Agreement Implementation Act (Bahrain), the Generalized System of Preferences (GSP) (0702.00.60 only), North American Free Trade Agreement (NAFTA), African Growth and Opportunity Act (AGOA) (0702.00.70 and 0702.00.40 only), Caribbean Basin Economic Recovery Act (CBERA), United States-Israel Free Trade Area (Israel), United States-Jordan Free Trade Area Implementation Act (Jordan), Andean Trade Promotion and Drug Eradication Act (ATPDEA), United States-Morocco Free Trade Agreement Implementation Act (Morocco), the Dominican Republic-Central America-United States Free Trade Agreement Implementation Act (DR-CAFTA), and the United States-Singapore Free Trade Agreement (Singapore).

Source: Compiled by Commission staff from official statistics of Commerce, except as noted.
Note: Because of rounding, figures may not add to the totals shown.
Note: Data for fresh-market greenhouse tomatoes entered under statistical reporting number 0702.00.4010 were not separately reported prior to 2005 but were included greenhouse tomatoes entered under in another category, so total imports prior to 2005 include only 0702.00 .2010 and 0702.00 .6010 , and are probably somewhat understated.

Note: Depending upon the time of year when entered, imports in 2007 enter at the MFN rates of 2.8 and 3.9 cents per kilogram, respectively, or free pursuant to the following special tariff treatment programs: Australia, Bahrain, GSP, NAFTA, AGOA, CBERA, Israel, Jordan, ATPDEA, Morocco, DR-CAFTA, and Singapore.
${ }^{\text {a D Data }}$ are for fresh or chilled greenhouse tomatoes (HTS statistical reporting numbers 0702.00.2010, 0702.00.4010, and 0702.00.6010).
${ }^{\text {b }}$ Calculated by Commission staff using rounded numbers.

Source: Compiled by Commission staff from Annual Report, Florida Tomato Commission, Orlando, FL, 2005/06 and 2006/07 crop-years.

Note: Data shown are for the actual weeks reported during the 2006/07 season; data for the other season are for weeks closest to the dates shown.

Note: Prices are generally higher earlier in the season when supplies are low and tend to fall as additional supplies from Florida and Mexico become available. However, in those seasons where supplies are somewhat less because of weather damage during the production season, prices may be higher during the ensuing weeks.
${ }^{a}$ Nothing reported.

${ }^{\text {a }} 25$-pound cartons loose.
${ }^{\mathrm{b}} 20$-pound cartons loose.
${ }^{\text {c }}$ Flats of 12 one-pint baskets.

[^0]:    ${ }^{1}$ Nothing in this report should be construed to indicate how the Commission would find in an investigation conducted under other statutory authority covering the same or similar subject matter.

[^1]:    ${ }^{1}$ Fresh-market tomatoes are those grown for use in a fresh form and are seldom used for processing.
    ${ }^{2}$ Processing tomatoes are those grown for use in processing tomato products and are seldom sold for fresh-market use.

[^2]:    ${ }^{3}$ Greenhouse tomatoes are those having been grown inside a glass or plastic covered structure.
    ${ }^{4}$ Cherry tomatoes are those within a very narrow size range and are smaller than regular round tomatoes.
    ${ }^{5}$ Grape tomatoes are the smallest-sized tomatoes grown in multi-fruit clusters and packaged differently from larger tomatoes.
    ${ }^{6}$ Roma tomatoes are those with an oblong shape and are longer than grape or cherry tomatoes, but smaller than regular round tomatoes.

[^3]:    ${ }^{\text {a }}$ Data are for fresh or chilled tomatoes (HTS subheadings 0702.00.20-0702.00.60) on a fresh-weight basis.
    ${ }^{\text {b }}$ Calculated by Commission staff using rounded numbers.

[^4]:    ${ }^{\text {a }} 5 \times 6$ size.
    ${ }^{\text {b }}$ Two-layer cartons
    ${ }^{\text {c }} 15$-pound flats.
