# INCIDENT MANAGEMENT SITUATION REPORT WEDNESDAY, MAY 29, 2002- 0530 MDT NATIONAL PREPAREDNESS LEVEL 2 

## CURRENT SITUATION:

Initial attack activity was light across the nation. One new large fire was reported in the Rocky Mountain Area. Two large fires were contained, one each in the Southern and Alaska Areas. Very high to extreme fire indices were reported in Alaska, Arizona, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Texas and Utah.

## SOUTHWEST AREA LARGE FIRES:

BULLOCK, Coronado National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is 15 miles northeast of Tucson, AZ, and is burning in grass, oak woodland and chaparral. Fireline construction on the north flank is nearing completion. Burn out operations continues towards the Mt. Lemmon Highway and will tie in with the west flank near Green Mountain.

BORREGO, Santa Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. The fire is burning in pinon pine, juniper and mixed conifer forest two miles southeast of Cordova, NM. The lifting of an inversion, lower relative humidity and higher winds resulted in increased fire activity. Personnel are locating and securing spot fires ahead of the fire. The threat to the Village of Truchas has lessened.

## ALASKA AREA LARGE FIRES:

WEST FORK CHENA, Alaska State Division of Forestry. A Type 2 Incident Management Team (Jandt) is assigned. This fire is burning in black spruce 50 miles east of Fairbanks, AK. Structure protection remains in place, but numerous residences and commercial properties in the area continue to be threatened. The Chena Hot Springs Road is now closed at the 48.5 mile mark. The fire has spotted across the Chena Hot Springs Road and the Chena River where the wind forced the fire to the south.

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. This fire is seven miles southwest of Livengood, AK, and is burning in black spruce, hardwoods, brush and litter. Strong winds caused a significant increase in acreage and pushed the fire deep into the Brooks Creek Flats.

VINASALE, Alaska State Division of Forestry. Burning in black spruce, taiga and hardwoods, this fire is located 15 miles south of McGrath, AK. The fire received a small amount of moisture yesterday and structure protection continues for the village of McGrath and remote cabins in the area.

## SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command has been established between an interagency Fire Use Management Team (Adams), the Georgia Forestry Commission and the Florida Division of Forestry. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. Increased fire activity along the southeast portion of the fire was due to heavy brush fuels. A north wind resulted in significant fire growth to the southern portion of the Blackjack 02 Fire.

## EASTERN GREAT BASIN AREA LARGE FIRES:

ANDERSON/DANSKIN, Boise National Forest. This fire is five miles northeast of Garden Valley, ID. Minimal fire activity was observed. Crews on the Anderson fire continued hot spotting with the aid of infrared equipment.

## ROCKY MOUNTAIN AREA LARGE FIRES:

CRAZY FRENCH, Pueblo Dispatch Center Counties. This fire is 10 miles southeast of Trinidad, CO. Long term drought conditions, high winds, and remote, steep terrain are hampering containment efforts. Spotting was observed up to $1 / 8$ mile in front of the fire.

## OUTLOOK:

High pressure building over the Southwest Area will bring very warm and dry conditions to Arizona and western New Mexico. In eastern New Mexico and Oklahoma, a storm system will bring a chance of both dry and wet thunderstorms to the higher elevations. High temperatures will be in the 70's to mid 80's in the mountains and near 100 in the lower elevations. Minimum relative humidity will range from 5 to 15 percent in Arizona and New Mexico, and 15 to 30 percent elsewhere. Winds will be variable to upslope at 5 to 15 mph .

A northerly flow over the Alaska Area will bring cloudy conditions, keeping moisture to the south of the interior of Alaska. High temperatures will be 55 to 65 degrees. Minimum relative humidity will remain low with a slight increase overall. Winds will diminish throughout the day as an arctic high pressure system moves westward.

An unstable air mass over The Rocky Mountain Area will result in isolated dry thunderstorms over the mountains of Colorado, especially along the Continental Divide and eastern slopes of the Colorado mountains. Isolated, mostly wet thunderstorms are forecast over northern Wyoming in the afternoon. High temperatures will be 60 to 70 over the mountains, 70 to 80 over the northern sections of the Area, and 80 to 85 over the lower elevations of Colorado. Minimum relative humidity will range from 5 to 15 percent over western Colorado, 12 to 22 percent over the Colorado Front Range and southern Wyoming, and 20 to 30 percent over northern Wyoming and the Black Hills. Winds will be at 5 to 15 mph over most of the Area, except for stronger gusts in the vicinity of the thunderstorms.

The Southern Area can expect to see a continuation of scattered rain showers and thunderstorms. High temperatures will be in the mid 80's, except in southwest Texas where they will be near 90. Relative humidity throughout the area will be above 45 percent. Winds will be south to southeast at 5 to 15 mph , with stronger easterly winds at 10 to 15 mph over the eastern coastal areas.
