Soil Type	Normal, Sandy, Clay
Moisture	Moist
Mature Form	Upright
Growth Rate	Fast
Sun Exposure	Full Sun - Partial Sun
Fall Color	Yellow
Foliage Color	Green
<u>Zones</u>	4-9

The Flame Willow, 'Salix Willow', gets its name from the stems that turn red in late fall and last until early spring. It grows multistemmed, more like a shrub, unless trained otherwise.

The Flame willow is very hardy and responds well to pruning. Plant these as specimens or in a line along a border. They grow fast and can be planted as privacy screens where the fall color will be fabulous!
