Fortune 500 Green Power Challenge

The following is a list of EPA's Fortune 500 Green Power Partners. These corporations are participating in EPA's Fortune 500 Green Power Challenge, a 13-month campaign focusing on the collective green power purchases of eligible Fortune 500 companies. EPA is challenging Fortune 500 companies to roughly double their current level of green power purchasing. The goal is to exceed 5 billion kilowatt-hours (kWh) of green power purchasing among participating companies by the end of 2007, which would be enough electricity to power more than 400,000 average American homes annually. Achieving this goal will avoid the equivalent CO2 emissions associated with more than 680,000 passenger cars each year. This Challenge will raise awareness of green power options and stimulate the construction of new domestic green power resources. For additional information on how your company can participate in EPA's Fortune 500 Green Power Challenge download the Fortune 500 Fact Sheet (PDF, 2 pp., 99 KB, About PDF).

This list was finalized as of January 8, 2007 and will be updated quarterly. The next update, scheduled for April 2007, will reflect purchase information received from Partners by April 9, 2007.

Green Power Usage (kWh)	% of Total Electricity	Organization Type	Provider	Resources
1. Wells Fargo	& Company			
550,000,000	42%	Banking, Financial Services	3 Phases Energy	Wind
2. Whole Foods	<u>Market</u>			
463,128,000	100%	Retail	Austin Energy, Community Energy, PNM, Renewable Choice Energy, Sky Energy	Biomass, Geothermal, Small-hydro, Solar, Wind
3. Johnson & Johnson	<u>ohnson</u>			
306,418,000	30%	Manufacturing	3 Phases Energy, On- site Generation, PECO Energy, Sempra Energy, Sterling Planet	Biomass, Small- hydro, Solar, Wind
4. Starbucks

Fortune 500 Green Power Challenge – as of April 9, 2007

The next update, scheduled for July 2007, will reflect completed Partner purchase information received by July 9, 2007.

The following is a list of EPA's Fortune 500 Green Power Partners. These corporations are participating in EPA's Fortune 500 Green Power Challenge, a 13-month campaign focusing on the collective green power purchases of eligible Fortune 500 companies. EPA is challenging Fortune 500 companies to roughly double their current level of green power purchasing. The goal is to exceed 5 billion kilowatt-hours (kWh) of green power purchasing among participating companies by the end of 2007, which would be enough electricity to power more than 400,000 average American homes annually. Achieving this goal will avoid the equivalent CO2 emissions associated with more than 680,000 passenger cars each year. This Challenge will raise awareness of green power options and stimulate the construction of new domestic green power resources. For additional information on how your company can participate in EPA's Fortune 500 Green Power Challenge download the Fortune 500 Fact Sheet (PDF, 2 pp., 99 KB, About PDF).

Current and past Fortune 500 Green Power Challenge lists.

Green Power Usage (kWh)	% of Total Electricity	Organization Type	Provider	Resources	
1. PepsiCo

Fortune 500 Green Power Challenge – as of October 1, 2007

This list was finalized as of October 1, 2007 and will be updated quarterly. The next update, scheduled for January 2008, will reflect purchase information received from Partners by January 8, 2008.

The following is a list of EPA's Fortune 500 Green Power Partners. These corporations are participating in EPA's Fortune 500 Green Power Challenge,

a 13-month campaign focusing on the collective green power purchases of eligible Fortune 500 companies. EPA is challenging Fortune 500 companies to roughly double their current level of green power purchasing. The goal is to exceed 5 billion kilowatt-hours (kWh) of green power purchasing among participating companies by the end of 2007, which would be enough electricity to power more than 400,000 average American homes annually. Achieving this goal will avoid the equivalent CO₂ emissions associated with more than 680,000 passenger cars each year. This Challenge will raise awareness of green power options and stimulate the construction of new domestic green power resources. For additional information on how your company can participate in EPA's Fortune 500 Green Power Challenge download the Fortune 500 Fact Sheet (PDF, 2 pp., 99 KB, About PDF).
