INCIDENT MANAGEMENT SITUATION REPORT WEDNESDAY SEPTEMBER 28, 1994 - 0530 MDT NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued throughout the West. Large fires continued to burn actively, as hot and dry conditions prevailed. Resource mobilization through NICC has moderated.

Northern Rockies Area Large Fires:
WARD MOUNTAIN, Bitterroot NF. A Type I Incident Management Team (Bailey) is assigned. The fire continues to threaten 30 homes and numerous outbuildings 4 $1 / 2$ miles southwest of Hamilton, MT.

SIAM, Clearwater NF. A Type II Incident Management Team (Kechter) is assigned. The fire continued to burn actively under light winds. Lines constructed adjacent to private lands are holding. The fire is now burning in the Clearwater and Lolo National Forests, and the proposed Great Burn Wilderness.

PETER'S RIDGE, Montana State. A Type II Incident Management Team (Bennett) is assigned. Good progress was made in line construction, while aerial support checked the fire's spread. Snags and rolling debris provide potential for downhill spread.

LIBBY COMPLEX, Kootenai NF. A Type II Incident Management Team (Bosworth) is assigned. Low humidities and high winds caused acreage increases on the China Basin and McKay fires. Poor access is hampering control efforts on both fires.

CABINET COMPLEX, Kootenai NF. A Type II Incident Management Team (Spradlin) is assigned. Sixteen of the fires in the complex are now controlled, with the remaining fires being monitored by air. Snag hazards are limiting suppression efforts to daylight only.

KOOCANUSA COMPLEX, Kootenai NF. A Type II Incident Management Team (Suenram) is assigned. Lines constructed along the northern edge continue to be tested by the fire. High winds led to a 900 acre increase on the Webb Knob fire.

ROBINSON, Yellowstone NP. A Type II Incident Management Team (Hancock) is assigned. Warm temperatures, low humidities and low fuel moisture continue to cause extreme fire behavior. A campground and three structures, two of which have historical significance, remain threatened.

Northwest Area Large Fires:

REED, Malheur NF. A Type II Incident Management Team (Groshong) is assigned. The fire continues to burn to the north and east, towards structures at Dupratt Springs, Tempest Mine and Lemon Cabin. Crews, supported by helicopters, made good progress on line construction.

FOX POINT, Wallowa-Whitman NF. A Type II Incident Management Team (Lukens) is assigned. The fire remained active through the night. Extreme burning conditions were experienced mid-afternoon. A structure crew worked on securing the Bear Creek Guard Station. The decrease in acreage is due to better mapping.

Eastern Great Basin Area Large Fires:
THUNDERBOLT, Boise NF. A Type II Incident Management Team (McAtee) is assigned. The fire continued to be active, gaining 624 acres. The burnout operation along the Paradise Valley Summer Home Road was successful. Good progress was made above the Wapiti and Cox ranches.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. The Corral fire has burned into the Blackwell fire perimeter and continues to burn south on both sides of the North Fork of the Payette River. Warren Road remains closed intermittently, due to fire behavior and safety concerns. Fire activity was intense, with spotting and crowning runs of 1 to 2 miles.

CHICKEN COMPLEX, Payette NF. The fire gained 945 acres, mainly on the north and east flanks. A smoke inversion again hampered air operations. Crews remain in place at the lower South Fork of the Salmon River and Chamberlain Basin for structure protection. The fire was active on multiple fronts, however, the effects of the inversion reduced extreme fire activity.

North Zone - California Large Fires:
SPECIMEN, Klamath NF. A Type II Incident Management Team (Phenix) is assigned. Up-canyon winds switched from east to west, forcing crews to retreat from the fireline. Gusty winds and poor access continue to hamper suppression efforts. Activity is expected to increase today due to stronger up-canyon winds.

Rocky Mountain Area Large Fires:
RAYMOND MOUNTAIN, Rock Springs District, BLM. This human caused fire began on private land and spread onto a BLM Wilderness Study Area. It is located near the town of Cokeville, WY. Strong winds, low humidities, dry conditions and heavy fuels are hampering suppression efforts.

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) is assigned. The support operation in Fairbanks is receiving and distributing supplies to the areas affected by the flood. Building reconstruction, cleaning, debris removal and woodcutting continue.

Outlook: A RED FLAG WATCH has been posted in southwestern Oregon for thunderstorms with little rain initially. An upper level low pressure system off the California coast will pump moisture into California, Nevada and southern Oregon, possibly triggering thunderstorms. The remainder of the West will remain under the influence of strong upper level high pressure. Fire activity is expected to continue on large fires.
