

# CALIFORNIA

## LEGEND

(Major producing areas)

- County boundary
- ★ Capital
- City
- 1** — Crushed stone/sand and gravel districts

## MINERAL SYMBOLS

- |            |                 |                 |                                     |
|------------|-----------------|-----------------|-------------------------------------|
| Asb        | Asbestos        | Ful             | Fuller's earth                      |
| Au         | Gold            | Gem             | Gemstones                           |
| B          | Borates         | Gyp             | Gypsum                              |
| Bent       | Bentonite       | <u>Gyp</u>      | Gypsum plant                        |
| <u>Cem</u> | Cement plant    | IS              | Industrial sand                     |
| Clay       | Common clay     | Ka              | Kaolin                              |
| CS         | Crushed stone   | <u>Lime</u>     | Lime plant                          |
| Dia        | Diatomite       | LS              | Limestone                           |
| Do         | Dolomite        | <u>LS</u>       | Limestone plant                     |
| DS         | Dimension stone | MgCp            | Magnesium compounds                 |
| FC         | Fire clay       | Per             | Perlite                             |
| Fe         | Iron            | <u>Per</u>      | Perlite plant                       |
| Fel        | Feldspar        | Pum             | Pumice and pumicite                 |
|            |                 | Pyrp            | Pyrophyllite                        |
|            |                 | RE              | Rare earths                         |
|            |                 | S-o             | Sulfur (oil)                        |
|            |                 | SaCp            | Saline compounds                    |
|            |                 | Salt            | Salt                                |
|            |                 | SG              | Construction sand and gravel        |
|            |                 | Sh              | Shale                               |
|            |                 | <u>Steel</u>    | Steel plant                         |
|            |                 | Ti              | Titanium minerals                   |
|            |                 | Zeo             | Zeolites                            |
|            |                 | (dashed circle) | Concentration of mineral operations |
