Dear Reader,

It is always a pleasure to bring to you a new edition of “Wyoming Agricultural Statistics.” The interesting information that is contained in each edition demonstrates the tremendous effort put forth by the staff at the Wyoming Agricultural Statistics office. Congratulations on a job well done!

As always, agriculture depends so much on Mother Nature. Last year I was hopeful the rains would finally come and they did for a brief time this spring, but in most areas of the state that relief was short-lived and the dry spell is back.

Generally speaking, the drought had a negative impact on last year’s crop production. Production numbers were down for winter wheat, spring wheat, hay, barley, dry edible beans and corn for grain. Despite the drought, cattle inventory remained relatively unchanged and sheep and lamb inventory increased 2% from the previous year.

Though we can’t compete with, nor predict Mother Nature, the Wyoming Business Council Agribusiness Division works to assist producers in areas they can control, such as adding value to their agricultural products, marketing their products, and diversifying their income. We offer leadership development and educational opportunities, business development counseling, and market development assistance. We cooperate with many organizations to bring these services to Wyoming producers. The Wyoming Agricultural Statistics Service is a vital partner in this effort and we appreciate the time and dedication the staff puts forth to collect and compile the data found within this book.

We hope this information helps you make informed and profitable business decisions.

With warm regards,

Cindy Garretson-Weibel

Cindy Garretson-Weibel
Agribusiness Director
(307) 777-6589

The Wyoming Field Office of USDA's National Agricultural Statistics Service is pleased to provide you with the 2007 edition of "**Wyoming Agricultural Statistics**". The information contained within this publication will provide you with an overall picture of the importance of agriculture to Wyoming. It will not only give you a picture of historic data trends but it will also provide you with the most recent crop, livestock and economic data available.

Wyoming producers have been challenged in recent years by drought conditions and 2006 was no exception. Crop production was down for nearly every crop last year. Livestock inventories remained fairly steady although many producers were faced with tough management decisions because of the lack of feed supplies. The good news is that there were record high prices for wheat and steers and heifers last year. This, combined with steady to higher other crop and livestock prices, helped push cash receipts back over the 1 billion dollar mark for 2006.

The data in our bulletin would not be possible without the continued support of ranchers and farmers across the State who willingly participate in our surveys and I thank them for their cooperation. I also want to thank the grain elevator managers, County Extension Educators, Farm Service Agency County Executive Directors and National Resource and Conservation Service District Conservationists who provide additional information used in preparing these statistics.

I would also like to take this opportunity to thank our cooperators who make the free distribution of this publication possible. The Wyoming Business Council, Agribusiness Division under the direction of Cindy Garretson-Weibel funds the preparation and printing of this book. In addition, the University of Wyoming, Agricultural Experiment Station under the direction of Dr. Stephen Miller also helps fund the printing costs.

Finally, I would like to personally thank all of my office staff and both our field and office enumerators who are so critical in making this data possible.

Since I am new to this position in Wyoming, I am excited about my new job and hope to get out and meet many of the wonderful producers and others involved in agriculture in Wyoming during the next few years. One of the exciting things for next year will be the 2007 Census of Agriculture. This is the most extensive set of agricultural data available and occurs every five years. I encourage you to fill out your 2007 Agricultural Census form as you receive it so we can make sure that "Agriculture Counts" in Wyoming.

Please feel free to contact us anytime with your questions, comments or requests for information.

Sincerely,

Glenda L. Shepler
Director

WYOMING AGRICULTURE 2006

The value of the ag sector output in Wyoming annually approaches or exceeds one billion dollars with cash receipts historically around \$900 million. In 2006, 9,100 farms and ranches were operating in Wyoming with a total land area of 34.4 million acres. Wyoming ranks eighth nationally in total land in farms and ranches and first in average size of farms and ranches. The cattle industry is by far the largest component of Wyoming agriculture accounting for about three-fourths of all cash receipts in 2006. Cattle also led the way in 2006 in terms of value of production at \$548.6 million. All livestock production was valued at \$621.0 million, down 7 percent from 2005. Sheep and wool and hogs were far behind cattle with value of production at \$26.2 million and \$28.1 million, respectively.

Hay is by far the leading crop in Wyoming in terms of value of production totaling \$190.3 million in 2006, but most is marketed through livestock. **Sugarbeets** had the next highest crop value in 2006 at \$34.2 million, followed by **wheat** at \$18.4 million, **corn** at \$17.4 million, **barley** at \$15.8 million and **dry beans** at \$12.4 million. In terms of cash receipts, hay and sugarbeets continue to be the leading crops followed by wheat.

Cattle and calves inventory on January 1, 2007 totaled 1.43 million head with a value of \$1.44 billion. Cattle inventory was unchanged from January 1, 2006. The January 1, 2007 inventory of **sheep and lambs** was 460,000 head, valued at \$63.0 million. Breeding sheep inventory in Wyoming was unchanged but market sheep and lambs increased 10,000 head on January 1, 2007. **Hogs and pigs** dropped 5 percent totaling 100,000 head on December 1, 2006. The breeding herd went up 32 percent from a year ago but the market hog inventory decreased 13 percent. The hog and pig inventory value on December 1, 2006 was \$10.0 million.

1/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

2/ A positive value of inventory change represent current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

1/ Value of sales.

2/ The 2006 value of sugarbeet production is based on 2005 price and 2006 production. The 2006 price is not available until January 2008.

Land Use and Agricultural Value in Wyoming Counties

The following estimates of the county value of livestock inventories are based on State average inventory values multiplied by county livestock inventory estimates. The reference date for cattle and sheep is January 1, 2007 and for hogs is December 1, 2006. The value of livestock also includes 2006 wool and milk production apportioned to counties based on the number of sheep and milk cows. For crops, the 2006 county production estimates are multiplied by preliminary marketing year average prices for the State. The previous year price is used for sugarbeets. Crops include alfalfa and other hay, all wheat, barley, oats, corn grain and silage, dry beans, and sugarbeets.

LIVESTOCK

The number of **cattle and calves** on Wyoming farms and ranches on January 1, 2007 was unchanged from a year ago at 1,430,000 head.

The inventory of beef cows increased 1 percent to 763,000 head. Beef cow replacement heifers increased 3 percent to 180,000 head. The total inventory of other heifers, steers, and all calves under 500 pounds decreased 2 percent from the previous year. The 2006 calf crop, at 750,000 calves, was up 1 percent from 2005. The January 1, 2007 average value per head for all cattle and calves was \$1,010.00, down \$130.00 from a year earlier.

The number of **milk cows** in Wyoming herds during 2006 averaged 6,700 head, up 1,800 head from a year ago. Milk production in 2006 totaled 118 million pounds, up from 72.9 million in 2005. Average production per cow increased 18 percent to 17,612 pounds. The average price per hundredweight received for milk dropped \$2.00 to \$12.80 in 2006.

The number of **hogs and pigs** in Wyoming on December 1, 2006 was 100,000 head, down 5,000 head from a year earlier.

Breeding inventory increased 6,000 head to 25,000, while market hogs and pigs declined 11,000 head to 75,000. The 2006 pig crop totaled 377,000 pigs, down 2 percent from 2005. The average value per head for hogs and pigs was \$100.00 on December 1, 2006, down \$10.00 from a year earlier.

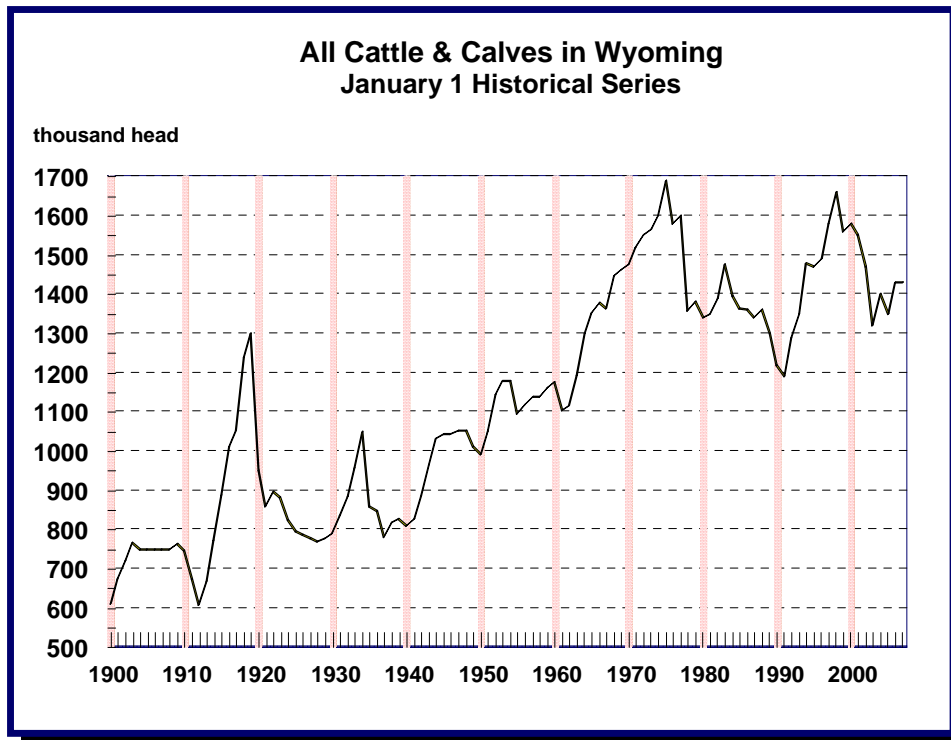

Sheep and lamb inventory in Wyoming on January 1, 2007 totaled 460,000 head, up 10,000 head from the previous year. Breeding sheep, which includes ewes, rams, and replacement lambs, was unchanged from the previous year at 350,000 head. The 2006 lamb crop totaled 310,000 lambs, up 10,000 head from 2005. An average of 112 lambs were saved per 100 ewes. The average value per head for sheep and lambs declined from 148.00 on January 1, 2006 to \$137.00 on January 1, 2007.

Sheep and lamb losses to all causes during 2006 totaled 51,000 head, unchanged from 2005. Losses to predators were up 600 head from the previous year to 24,600 head, while non-predator losses were down 600 head. Lamb predator losses (before and after docking) represented 7 percent of the 2006 lamb supply (lamb crop plus lambs lost before docking). Total predator losses were valued at \$1.83 million and all losses at \$4.20 million.

Wyoming sheep and lambs produced 3.55 million pounds of wool in 2006, up 1 percent from 2005. The price per pound averaged \$0.92, down from \$1.00 in 2005. The total value of wool dropped 7 percent to \$3.27 million.

There were an estimated 16,000 **chickens** in Wyoming flocks on December 1, 2006, unchanged from a year earlier. An average of 12,000 hens and pullets of laying age produced 3.6 million eggs in the 12-month period ending December 1, 2006, also unchanged from the previous year.

2/Excludes custom slaughter for use on farms where produced and interfarm sales within Wyoming.

3/Receipts from marketings and sale of farm slaughter.

SHEEP LOSSES TO ALL CAUSES - 2006

TOTAL DEATH LOSS UNCHANGED: Wyoming sheep and lamb producers lost an estimated 51,000 head of sheep and lambs to predators, weather, lambing problems, disease and other causes in 2006. Total losses were unchanged from the previous year. Predators accounted for 48 percent of the losses. The 2006 lamb crop totaled 310,000 lambs marked, docked, or branded which was up 10,000 from 2005. Adding in the lambs lost before docking results in a potential lamb supply of 333,000 head. Of these, 40,000 or 12 percent were lost to various causes, down slightly from 2005.

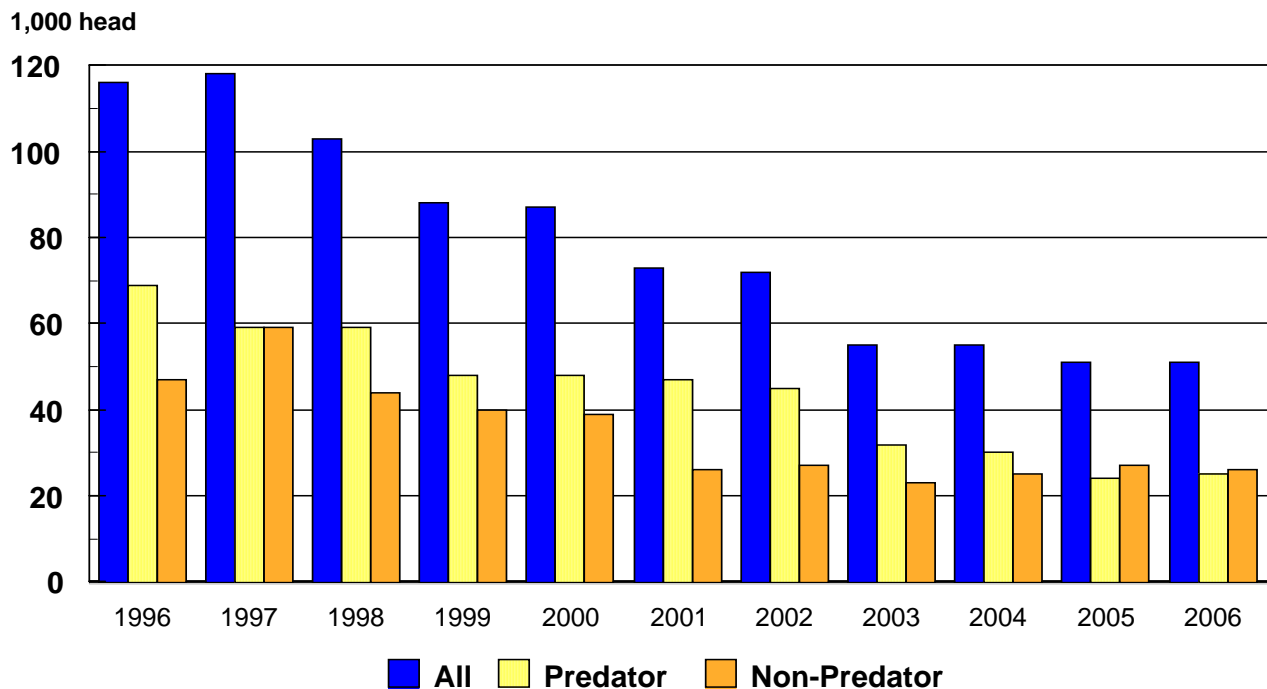

PREDATOR LOSSES HIGHER: Wyoming sheep producers lost 24,600 sheep and lambs to predators in 2006, up 3 percent from 2005. Coyotes were again the biggest predator taking 70 percent of the total predator losses and 34 percent of all losses. Losses to weather, disease and other non-predator causes decreased by 600 head to 26,400.

NON-PREDATOR LAMB LOSSES LOWER: Sheep producers lost 40,000 lambs before or after docking in 2006, down 1,000 head (2 percent) from 2005. Losses to predators accounted for 54 percent of the total or 21,600 head, up 600 from 2005. Losses of lambs to weather, disease, and other non-predator causes were down 1,600 head to 18,400.

SHEEP LOSSES EDGE HIGHER: Sheep losses in Wyoming during 2006 totaled 11,000 head, up 1,000 head from 2005. Predator losses were unchanged at 3,000 while non-predator losses were up 1,000 head to 8,000.

VALUE OF LOSSES UP 2 PERCENT: Sheep producers lost an estimated \$4.20 million due to sheep and lamb deaths in 2006, down 5 percent from the previous year as prices were lower. Predation accounted for \$1.83 million or 44 percent of the total.

1/Totals may not add due to rounding.

2/Includes total beef, veal, pork, lamb and mutton, excluding farm slaughter.

3/Number of calves slaughtered in Wyoming not shown because of insignificant numbers.

Crops

2006 CROP YEAR IN REVIEW

March 2006 was cool and dry. Topsoil moisture was rated adequate to surplus in 56 percent of the State at month's end. Mild weather during most of April allowed sugarbeet planting to accelerate at a rapid pace while small grain seeding lagged slightly behind normal. Cooler, wet weather in late April improved soil moisture supplies but slowed fieldwork. May brought little precipitation and hot, windy conditions later in the month. Row crop progress moved ahead of average but small grains were pushed to early development. The heat wave continued through June deteriorating moisture supplies and pushing crop progress. Hay harvest moved at a fast pace but dry conditions took a toll on production.

Unrelenting heat with little moisture continued into July. At month's end, only 7 percent of the State had adequate topsoil moisture. Harvest of winter wheat started in early July. Small grain and hay harvest stayed ahead of the average pace. Row crop development moved rapidly. August remained hot with scattered moisture. Small grains were being harvested well ahead of the average pace while corn development started to lag behind. Scattered storms through August brought minimal relief to drought conditions and 27 percent of the State had adequate topsoil moisture supplies by the end of the month. September was mild and some producers were able to get a third cutting of alfalfa. Corn silage and dry bean harvest made good progress. October was cooler with welcome rainfall. Corn for grain harvest stayed on schedule but sugarbeets and dry beans were slightly off pace.

Average yields per acre in 2006 improved for oats and alfalfa hay. Wheat, barley, corn for grain, dry beans, sugarbeets, and other hay experienced lower than average yields compared to 2005.

WINTER WHEAT production in 2006 decreased 16 percent from 2005. Harvested acreage was down 10,000 acres and average yields per acre fell 3 bushels to 27 bushels per acre.

SPRING WHEAT production in 2006 was down 26 percent. Acres harvested for grain were down 1,000 acres and average yield per acre was 6 bushels below 2005.

BARLEY production in 2006 was 15 percent below 2005 and 33 percent below 2004. Harvested acreage was down 3,000 acres and yields averaged 83 bushels per acre, down 10 bushels from 2005.

OAT production in 2006 was up 14 percent from 2005. Grain was harvested from 12,000 acres, unchanged from last year. The average yield was up 7 bushels to 57 bushels per acre.

CORN FOR GRAIN production was down 15 percent from 2005. Acreage harvested for grain was down 4,000 acres and yields averaged 129 bushels per acre.

CORN FOR SILAGE production was up 13 percent from the previous year thanks to a 4,000 acre increase in area harvested. Yield, at 22 tons per acre, was the same as in 2005.

DRY BEAN output in 2006 fell 24 percent from 2005. Acreage harvested was down 5,500 acres and average yield was down 200 pounds to 2,150 pounds per acre.

SUGARBEET production was virtually unchanged from 2005 but 2 percent below 2004. Acreage harvested increased 4,200 acres and was the largest since 2000. The average yield per acre was down 2.4 tons to 19.9 tons per acre.

ALFALFA HAY production in 2006 fell 10 percent from 2005 to 1.40 million tons but was up 7 percent from 2004. Acreage cut for alfalfa was down 100,000 acres but average yields increased from 2.6 tons to 2.8 tons per acre. Production of all **OTHER HAY** slipped by 5 percent from 2005. Acreage cut was up 10,000 acres but average yield was down from 1.4 tons to 1.3 tons per acre. **ALL HAY** production was down 9 percent from 2005 but was still 3 percent more than in 2004.

ALFALFA SEED production in 2006 totaled 3.53 million pounds of seed from 5,665 acres according to the Wyoming Seed Certification Service. Production was up 2 percent from the 2005 crop and was the largest since 2001.

PRICES

The Wyoming **All Commodities Price Index** in 2006 fluctuated throughout the year. The index peaked at 139 (1990-92=100) in September, influenced by livestock marketings and strong crop prices. The low for the year was 106 in December. The **All Livestock Index**, which drives the **All Commodities Index** in Wyoming, was below the previous year in most months. The Index hit a high of 143 in January and a low of 102 in December. The **All Crops Index** in 2006 was lower than last year early in the year but started gaining ground in June. The index started at 110 in January and declined to a low of 107 in August before finishing at 128.

Beef Cattle prices started 2006 over \$100 but fell during the year, rebounded in late summer, and ended the year in the mid \$70's. The average price for the year was \$98.90 per cwt., down \$3.10 from 2005 but up 10 cents from 2004. Monthly prices peaked at \$110.00 in January before sliding to \$75.40 in December.

Combined **Steer and Heifer** prices stayed above \$105.00 per cwt. during most of 2006 but ended the year at a low of \$102.00. The average price for the year was \$111.00 per cwt., up \$2.00 from 2005 and up \$4.00 from 2004. Prices peaked at \$119.00 in January.

Calf prices averaged above the \$130 mark most of the year. The monthly high for the year was \$153.00 in January and the low was \$121.00 in December. The average price for the year was \$131.00 per cwt., down \$9.00 from the record in 2005.

Sheep prices averaged \$30.80 per cwt. in 2006, down \$15.10 from 2005. Monthly prices ranged from a low of \$23.10 per cwt. in June to a high of \$50.80 per cwt. in January. **Lamb** prices fluctuated throughout 2006. The average price for the year was \$107.00 per cwt., down \$14.00 from the record in 2005. Prices hit a high of \$115.00 in September and October while the low was \$78.50 in April.

Wool prices declined again in 2006. The marketing year average was 92 cents per pound compared with \$1.00 in 2005, \$1.17 in 2004, and \$1.10 cents in 2003.

Hog prices started the marketing year in December 2005 at \$40.00 per cwt., rose to a high of \$51.80 in June 2006 but fell to \$36.10 in November. The market year average price for hogs, at \$41.10 per cwt., was down \$5.50 from 2005.

Milk prices finished lower than in 2005. The marketing year average price for 2006 was \$12.80 per cwt., down \$2.00 from 2005. Prices started and ended the year at \$13.70 per cwt. and never exceeded that price during the year.

The All Hay price for the 2006 crop climbed steadily throughout the year reaching over \$100 per ton by January 2007. All hay started the marketing year in June 2006 at \$79.00 per ton and peaked at \$113 per ton at the end of the marketing year in May 2007. The preliminary marketing year average price for **alfalfa**, at \$91.00 per ton, was up \$16.00 from 2005. The preliminary marketing year average price for **other hay** was \$88.00 per ton, up \$16.50 from 2005.

Wheat prices during the 2006 crop marketing year showed strength as the year progressed. The preliminary marketing year average price was a record high at \$4.75 per bushel, up \$1.27 from 2005. The monthly high was \$4.88 per bushel in October 2006.

Corn prices fluctuated during the 2006 crop marketing year. The preliminary marketing year average price was \$3.00 per bushel, up 55 cents from 2005. The monthly price hit the high for the year in March 2007 at \$4.06 per bushel.

Feed Barley prices were higher than a year earlier for most of the 2006 marketing year. The monthly high for the year was \$1.92 per bushel in September 2006.

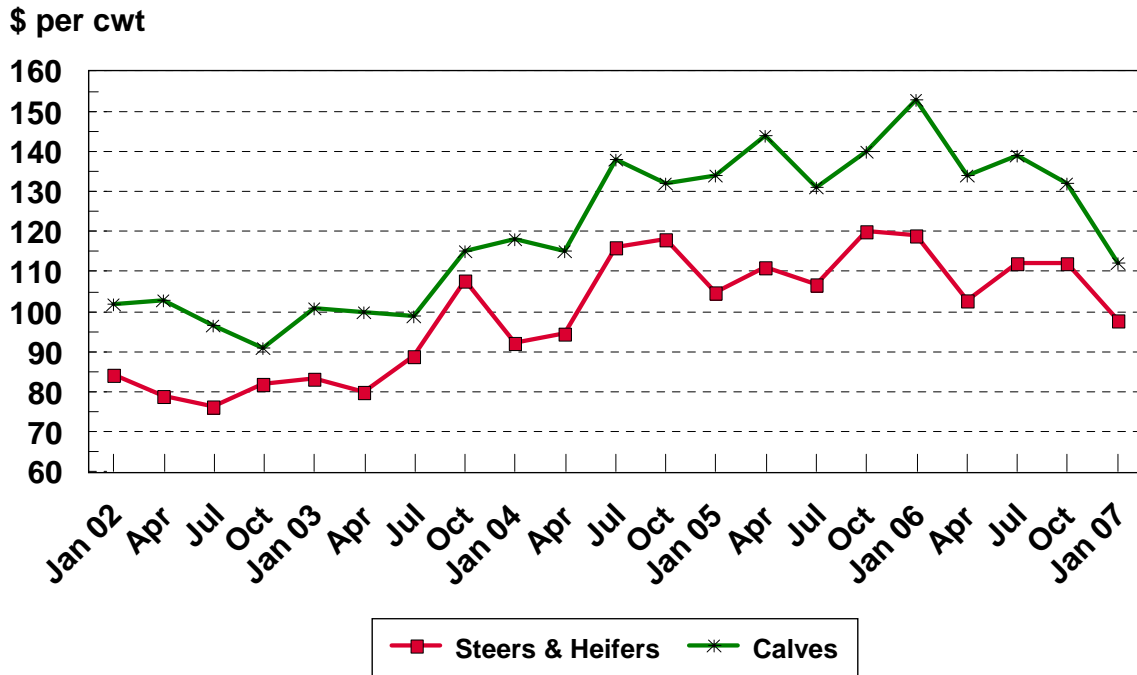

Oats prices averaged \$1.70 per bushel during the 2006 marketing year, up 10 cents from 2005. Prices during the year were steady around the \$1.70 per bushel mark.

Dry Bean prices began the marketing year lower than the previous year but made steady gains during the remainder of the year. The preliminary marketing year average price was \$21.10 per cwt., up \$2.40 from 2005. The high was \$25.80 in April 2007.

The 2006 **Prices Paid Index** for the U.S. was higher than 2005. Prices paid by farmers and ranchers in the Mountain region on April 1, 2007 were higher than a year earlier for most items, particularly gasoline, diesel, and fertilizer.

College of Agriculture 2007

Mention agriculture and images of fields, crops, and livestock come to mind. The truth is, that's only a snapshot of the role played by the University of Wyoming's College of Agriculture. The big picture is one of the college making a difference in our families and our towns, in classrooms and community centers, and on our farms and ranches. The mission of the College of Agriculture is to be a proactive leader in education, scholarship, and outreach/extension in support of natural resource management, healthy and sustainable agricultural systems, rural economic and community development, and basic and applied life sciences.

With eight undergraduate and 20 graduate degree programs, the college's array of educational opportunities is impressive and designed to give students the ability to find solutions for the complex array of interactions facing agriculture today. These degree programs provide students with a broad educational background, which allows them to focus training in their areas of interest. Students graduating from the University of Wyoming (UW) with a degree in agriculture have excellent opportunities for employment in a number of areas. Active participation in research projects and internships with business and government agencies offer students first-hand job experience prior to graduation. For additional information about the college's programs contact the Office of Academic and Student Programs (307-766-4135) or any of our seven departments:

Department of Agricultural and Applied Economics	307-766-2386	coupal@uwyo.edu
Department of Animal Science	307-766-2224	animalscience@uwyo.edu
Department of Family and Consumer Sciences	307-766-4145	fcs-consci@uwyo.edu
Department of Molecular Biology	307-766-3300	uwmbio@uwyo.edu
Department of Plant Sciences	307-766-3103	plantsciences@uwyo.edu
Department of Renewable Resources	307-766-2263	rolson@uwyo.edu
Department of Veterinary Sciences	307-742-6638	dot@uwyo.edu

Research and educational programs in the College of Agriculture extend beyond the UW campus in Laramie. The distance degree program offered by Family and Consumer Sciences has a waiting list of individuals from around the world with backgrounds in many disciplines. Educational programs are offered to clientele across the state by the UW Cooperative Extension Service (UWCES) that has offices in all 23 counties and on the Wind River Indian Reservation.

Research projects are conducted at the college's four major research and extension facilities located at Powell, Sheridan, Lingle, and Laramie or with individual cooperators located throughout the state. The information provided from these projects is critical for managing wildlife/livestock conflicts, natural resource development, maintenance of profitable and sustainable agricultural production systems and development of healthy lifestyle choices.

An example of the college's unbiased, cutting-edge research that discovers, generates, and synthesizes knowledge to meet Wyoming's technological, scientific, and social needs is the brucellosis research being conducted by the Department of Veterinary Sciences. Brucellosis is a contagious disease of cattle, elk, and bison that can infect humans. The disease is spread by ingestion of bacteria that is shed by infected females during abortions or live births in areas where animals are concentrated such as feedlots or winter feed grounds. Brucellosis has been eradicated from most cattle herds throughout the United States. However, transmission of brucellosis from wildlife to domestic cattle is a real threat in the Greater Yellowstone Area. Research in progress includes improved diagnostic tests that are faster, safer, and more sensitive than current tests, epidemiology studies that will facilitate and assist future management plans, and studies designed to improve vaccines and develop new therapeutic agents. This research is critical for three reasons: 1) to protect the livestock industry, 2) to maintain healthy wildlife populations for multiple uses, and 3) to protect human health.

Wyoming and other western states are undergoing a rapid shift in land use. Thousands of acres are being subdivided into small acreage parcels. The UWCES has taken the lead in developing a team to address small acreage issues such as soil erosion, water quality degradation, water wastage, fragmented wildlife habitat, invasive weeds, animal health, air quality, and riparian degradation. Team members in addition to UWCES include Wyoming Association of Conservation Districts, Wyoming Private Grazing Lands Team, Historic Trails Resource Conservation and Development Council, Natural Resources Conservation Service, Wyoming State Forestry Division, Audubon Wyoming, Wyoming Department of Environmental Quality, and the U.S. Environmental Protection Agency. Efforts include a quarterly magazine *Barnyards & Backyards: Rural Living in Wyoming*, as well as educational programming throughout the state. The response from small acreage landowners has been very positive with most feeling the information they have received will help them to heal their property, re-landscape with water conservation in mind, implement rotational grazing to enhance weed control, improve forage use with electric fences, and be able to spray weeds to improve growth of native forages.

Feel free to visit our campus, extension offices, or the research and extension centers to witness faculty, staff, and student efforts first hand. See how the college's tripartite mission of instruction, research, and outreach/extension is designed to meet and serve our stakeholders' needs. To learn more about the college and its programs please visit our Web site at www.uwyo.edu/UWAG.

The University of Wyoming is an equal opportunity/affirmative action institution.

**REPORTS ISSUED DURING THE YEAR 1/
WYOMING FIELD OFFICE, USDA NASS**

	<u>Frequency</u>	<u>Approximate Date of Publication</u>
General Reports:		
Crop Weather	Weekly	April-October (Mondays)
"Range Review" - Summary of latest results	Monthly	1st-18th
"Wyoming Agricultural Statistics" - Annual summary	Annual	August

Report Dates for Crops:

Winter Wheat Seedings	Annual	January (9th-12th)
Prospective Plantings	Annual	March (28th-31st)
Acreage Planted	Annual	June (28th-30th)
Crop Production Forecasts	Monthly	May-November (9th-12th)
Dry Edible Bean Acreage by Class	Annual	August (9th-12th)
Dry Edible Bean Production by Class	Annual	December (9th-12th)
Crop Production Annual	Annual	January (9th-12th)
Crop Values	Annual	February (12th-15th)
Wheat Varieties	Annual	March
Barley Varieties	Annual	July
Hay Stocks	Semi-Annual	January, May (9th-12th)

Report Dates for Livestock, Dairy, Poultry, and Livestock Products:

Cattle Inventory and Calf Crop	Semi-Annual	January or February (5th Friday of year), and July (3rd Friday)
Cattle Loss	Annual	March
Sheep Inventory and Lamb Crop	Semi-Annual	January or February (5th Friday of year), and July (3rd Friday)
Sheep Shorn and Wool Production	Annual	January or February (5th Friday of year)
Sheep and Lamb Loss	Annual	February (3rd Friday)
Hog Inventory and Pig Crop	Annual	December (last Friday of year)
Livestock Slaughter	Monthly	20th-26th
Meat Animals - Production, Disposition, and Income	Annual	April (26th-28th)
Milk Cows and Milk Production	Quarterly	January, April, July, October (17th-19th)
Bee Colonies and Honey Production	Annual	February (26th-28th)

County Estimates:

Wheat, Oats, and Barley	Annual	February
Corn	Annual	March
Hay - All, Alfalfa, and Other	Annual	April
Sugarbeets and Dry Beans	Annual	June
Livestock - Cattle and Breeding Sheep	Annual	April
All Crops, Cattle, and Sheep	Annual	In "Wyoming Agricultural Statistics"

Prices and Miscellaneous:

Farm Labor	Quarterly	February, May, August, and November (15th-21st)
Agricultural Prices	Monthly	(28th-31st)
County Ag Values and Receipts	Annual	mid-August
Number of Farms and Land in Farms	Annual	February (10th-18th)
Farm Production Expenditures	Annual	August
Agricultural Land Values	Annual	August

1/Same day news releases are issued for most reports. Summaries of these reports will appear in the next issue of the "Range Review". Separate reports are also printed for Sheep Loss, Wheat Varieties, and Barley Varieties. The annual book, "Wyoming Agricultural Statistics", is a summary of all data for the previous year. All reports are available on the Internet at www.nass.usda.gov/wy

Subscription Form

Wyoming Field Office
PO Box 1148 · Cheyenne, WY 82003
307-432-5600 • FAX 307-432-5598 • www.nass.usda.gov/wy

PLEASE NOTE: All the following reports may be accessed via the NASS website and many are available with a FREE email subscription at www.nass.usda.gov/wy. See instructions on back cover.

Annual Reports

- _____ 835 WYOMING AGRICULTURAL STATISTICS, **FREE** --- Annual Bulletin containing all State and County statistics for the previous year. Issued in August. (Printing paid for by the Wyoming Business Council, Agribusiness Division and the University of Wyoming, College of Agriculture.
- _____ 820 CATTLE LOSS, **FREE** --- Number and value of cattle losses to predators and other causes. Issued in March. Funded by the Wyoming Animal Damage Management Board.
- _____ 830 SHEEP AND LAMB LOSS, **FREE** --- Number and value of sheep and lamb losses to predators and other causes. Issued in February. Funded by the Wyoming Business Council, Agribusiness Division.
- _____ 805 WINTER WHEAT VARIETIES, **FREE** --- Acreage of varieties seeded by area of the State. Issued in March. Funded by the Wyoming Business Council, Agribusiness Division.
- _____ 810 BARLEY VARIETIES, **\$6.00/yr** - --- Acreage of varieties seeded by area of the State. Issued in July. Funded by the American Malting Barley Association.

Monthly Report

- _____ 800 RANGE REVIEW, **\$12.00/yr** --- Monthly summary of the latest crop, livestock, and price statistics as well as special items of current interest.

Weekly Report

- _____ 840 CROP-WEATHER REPORT (*e-mail or fax only*) --- Crop and weather information for the previous week or month, including planting and harvesting progress, crop conditions and development, and pasture and livestock conditions. Issued weekly on Mondays, April – October and monthly November – March. FREE e-mail subscription service is available by providing your e-mail address below or subscribing via our website. We are able to fax the report if you provide your fax number below. You may also access the report via the website listed above.

Fax number: _____ and/or E-mail address: _____

Electronic Dissemination of Data from National Agricultural Statistics Service (NASS)

NASS has a homepage on the World Wide Web that provides easy access to the wide range of information and data produced. Through the homepage, you can obtain copies of all reports produced by NASS plus have access to many other options.

NASS Homepage – <http://www.nass.usda.gov>

Wyoming Homepage – http://www.nass.usda.gov/statistics_by_state/wyoming

Through a cooperative agreement with Cornell University, the Albert R. Mann Library distributes NASS, Economic Research Service (ERS), and World Agricultural Outlook Board (WAOB) periodicals and data files via the USDA Economics and Statistics System on a web server. Over 400 reports annually are available free of charge. All NASS reports and WAOB's World Agricultural Supply and Demand Estimates (WASDE) are available electronically within minutes of release.

A calendar of scheduled releases is available from the NASS Homepage by clicking on **Publications**. At the next screen is the Reports Calendar where you can choose the year and month.

Free E-Mail Subscriptions to NASS Reports

Mann Library Provides a **FREE** e-mail service for NASS reports. When a current report is released, it is sent via e-mail to the list of subscribers for that report. From the NASS Homepage at <http://www.nass.usda.gov>, select **Publications**. From the **Publications** page, on the lower right hand side is a Syndication box. Clicking on the "Receive reports by E-Mail" for either National or State reports will direct you through the process. The four report options available in Wyoming are:

- Wyoming All Reports
- Wyoming Crop-Weather
- Wyoming Crops and Livestock
- Wyoming Miscellaneous

There is no charge for e-mail subscriptions via Internet. You will receive a conformation message to your email address you provide, you must verify that you did subscribe to the releases before you start receiving the releases in your inbox. You may "unsubscribe" at any time by going to the **Subscription Page** and unchecking the reports you wish to discontinue.

Agricultural Statistics Data Base (Quick Stats)

U.S. and State information, published in NASS national reports, is available in an online database via the Internet **FREE OF CHARGE**. The database allows custom extracts based on commodity, year, State and other selection criteria and produces an output file compatible for updating databases and spreadsheets for selected commodities. The database can be accessed from the NASS Homepage at: <http://www.nass.usda.gov>. The basic options are in the middle of the screen on the Home Page. Clicking on the "more" button will take you to the main menu for Quick Stats. From there you can retrieve State or County level data. The 2002 Census of Agriculture is also available.

County level data are also available via Quick Stats. The data include the total crops for each county and breakouts for irrigated and non-irrigated practices for many crops, for selected States. The database allows custom extracts based on commodity, year, selected counties within a State, or all counties in one or more States. The county data include totals for the Agricultural Statistics Districts (county groupings) and the State. The download data files contain planted and harvested area, yield per acre, and production. Livestock county data is also available for selected States.
