To Whom it may concern at the BLM,

I feel it is my duty as a U.S. Citizen, and a resident of Oregon to let you know how deeply saddened and at the same time, appalled, I am over the Western Oregon Plan Revision. (WOPR-aptly named)

Your current proposal is so unacceptable, for so many reasons as I'm sure you know them all. The biggest issue and really the bottom line lies in the fact that our remaining old-growth (ancient!) forests need to be protected and not used for ~~ecomic~~ economic resources. These forests are so very crucial to everything that lies below, the eco-system, the fish and wildlife, and us, the humans, not to mention climate control which tends to be ignored.

These forests are older than our nation, how can we destroy something so precious?!

It's very disappointing to me that our land is being managed in this way when in fact we've been given the resource already to provide wood to the mills... previously logged public forest lands - many of which are now overgrown and in need of thinning, which would actually improve conditions for fish and wild life.

Please protect these forests and focus on management of BLM lands in already logged over areas.

Thank you! Sincerely, Lynda Sirlanni
