Subje Release all, uncensored documents about your decision
ct to reject California's waiver (sam19212@yahoo.com)

Dear Administrator Johnson,

Acknowledge the facts about Global Warming and the threat it is to the survival of this planet.

Are you really going to put politics above your duty to do all that you can for the good of our Earth?!!!!

I urge you to produce full, complete, and uncensored documents explaining your decision to deny a request from California and 18 other states to regulate greenhouse gas emissions from automobiles.

11 days past its deadline, your agency turned over some documents to the Senate Environment and Public Works Committee -- but heavily redacted the materials to obscure the agency's real decision-making process, providing censored page after censored page rather than the facts we deserve.

At a recent Senate Environment and Public Works Committee hearing, you refused to acknowledge that global warming is a threat to human health -- an embarrassing and dangerous response from the head of the EPA. You also failed to acknowledge any conflict between your recent behavior and prior assurances during your confirmation process that you would pursue as open and transparent a decision-making process as possible.

It's clear that your agency is trying to keep these documents from the American people for one reason: They show that the EPA's legal and scientific staff unanimously agreed that California, and 18 other states, should be granted the waiver.

We deserve a full, uncensored accounting of your decision to block more than 150 million Americans from combating climate change. I demand that you release all related documents immediately.

Sincerely,
Sam Grossman
