

Biographical Sketch

Beth A. Gross, P.E.

Ms. Gross is a Senior Engineer with GeoSyntec Consultants in Austin, Texas. She has more than 15 years of experience with landfill design and construction. Ms. Gross is a leading authority on the performance of waste containment systems, and has coauthored a number of papers and reports on the topic. She has played a major role in developing technical support and guidance documents for the U.S. Environmental Protection Agency, including "Evaluation of Liquids Management Data for Double-Lined Landfills" and "Waste Containment System Problems and Lessons Learned". These reports are included in "Assessment and Recommendations for Improving the Performance of Waste Containment Systems", which USEPA recently posted on their website (<http://www.epa.gov/ORD/NRMRL/Pubs/index.html>). She is currently co-authoring "Technical Guidance for RCRA/CERCLA Final Covers."
