

MEMORANDUM

From: Christian Fellner
 To: Coal Preparation NSPS Docket (EPA-HQ-OAR-2008-0260)
 Date: April, 2008
 Subject: Coal Handling RACT/BACT Permit Limits

Introduction

We used permit data from the RACT/BACT clearinghouse database to determine the typical requirements of coal handling equipment at new coal preparation plants. Even though performance test results are often lower than the actual permit limits, we did not collect performance test data on all of the facilities with the most stringent limits since we concluded that the permits already contain an adequate compliance margin. Table 1 lists the permit limits from the RACT/BACT database.

Table 1: RACT/BACT Permit Limits

FACILITY	STATE	PERMIT DATE	Process Type	EMISSION LIMIT	Units	Control Description
Louisiana Generating, LLC Big Cajun I Power Plant	LA	1/8/2008	Dome	0.01	LB/H	Fabric Filter
