### *Bulbs and Tubers*

#### All Origins

**TABLE 3-1: Bulbs and Tubers for Planting from All Countries**

If:	Then:
Potato tubers	GO to <a href="#">Table 3-2</a>
<b>Other than</b> potato tubers	GO to <a href="#">Table 3-3</a>

**TABLE 3-2: Potato Tubers (Seed Potatoes)**

If from:	And:	Then:
All provinces of Canada <sup>1</sup>	Accompanied by a Canadian Phytosanitary Certificate with appropriate additional declaration <sup>2</sup>	RELEASE
	<b>Lack</b> a Canadian Phytosanitary Certificate with appropriate additional declaration	PROHIBIT ENTRY
A country <b>other than</b> Canada	→	

- Commercial shipments of seed potatoes, including potato tuber samples for laboratory testing, from any province in Canada are allowed to transit the U.S. to Mexico with a valid PPQ issued T&E Permit and a Canadian Phytosanitary Certificate. Refer to the [Manual for Agricultural Clearance](#) for further guidance.
- The [Canadian Food Inspection Agency \(CFIA\)](#) will provide **one** of the following additional declarations stating that the shipment is free from Potato Cyst Nematodes (PCN):
  - ◆ “Field(s) used to produce the seed potato lot(s) in this shipment were surveyed and tested according to the current agreed-upon protocol and Potato Cyst Nematodes (*Globodera rostochiensis* and *Globodera pallida*) were not detected.” **or,**
  - ◆ “The articles in this shipment were grown in a PCN-free place of production and in a manner to prevent infestation by Potato Cyst Nematodes (*Globodera rostochiensis* and *Globodera pallida*).”

For specific requirements related to the establishment of Pest Free Places of Production or Pest Free Production Sites within regulated areas, please see Section 7.0 of the [Guidelines on Surveillance and Phytosanitary Actions for the Potato Cyst Nematodes: \*Globodera rostochiensis\* and \*Globodera pallida\*](#), Version 13 dated May 4, 2008.

The areas of Canada regulated for PCN by [CFIA](#) are the following:

- ◆ Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
- ◆ British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- ◆ Newfoundland and Labrador: The entire island of Newfoundland
- ◆ Quebec: The municipality of Saint-Amable

**TABLE 3-3: Bulbs and Similar Structures that Grow Underground<sup>1</sup>**

If the bulbs originated in:	And:	Then:
Canada	Are accompanied by a Canadian Phytosanitary Certificate <sup>2</sup>	REFER to CBP AS for INSPECTION
	<b>Lack</b> a Canadian Phytosanitary Certificate	PROHIBIT ENTRY
A country <b>other than</b> Canada		REFER to CBP AS who will use the job aid <a href="#">Clearing Nursery Stock and Flower Bulbs</a>

- 1 Includes onion sets and flower bulbs for planting.
- 2 If the article is from a Potato Cyst Nematode (PCN) regulated area, the [Canadian Food Inspection Agency \(CFIA\)](#) will provide an additional declaration "The articles in this shipment were grown in a PCN-free place of production and in a manner to prevent infestation by Potato Cyst Nematodes (*Globodera rostochiensis* and/or *G. pallida*)."

The areas of Canada regulated for PCN by [CFIA](#) are the following:

- ◆ Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
- ◆ British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- ◆ Newfoundland and Labrador: The entire island of Newfoundland
- ◆ Quebec: The municipality of Saint-Amable

### *Cut Flowers and Greenery*

#### Canadian Origin

**TABLE 3-5: Canadian Origin Cut Flowers and Greenery**

If:	Then:
Conifer <sup>1</sup> Christmas trees or branches	GO to <a href="#">Table 3-6</a>
Commercially produced wreaths or garlands	RELEASE
<b>Other than</b> a commodity listed in the three cells above	GO to <a href="#">Table 3-13</a>

- 1 The term *conifer* refers to cone-bearing trees. Common examples include pine, fir, spruce, hemlock, and Douglas fir.

**TABLE 3-6: Cut Christmas Trees or Branches**

If:	Then:
A pine species (for example, white pine, Scotch or Scots pine)	GO to <a href="#">Table 3-7</a>
<b>Not</b> a pine species (for example, fir, spruce, hemlock, Douglas fir) <sup>1</sup>	GO to <a href="#">Table 3-12</a>

- 1 Conifer branches from species **other than pine** and less than 15 mm (1/2 inch) in diameter are **exempt** from gypsy moth certification requirements and may be released.

**TABLE 3-7: Cut Pine Christmas Trees or Branches<sup>1</sup>**

If from:	And:	Then:
New Brunswick, Nova Scotia, or Prince Edward Island		GO to <a href="#">Table 3-8</a>
Ontario or Quebec		GO to <a href="#">Table 3-10</a>
A province <b>other than</b> those listed above	<b>All</b> of the following requirements are met: 1. The trees are accompanied by a certification of origin <sup>2</sup> stating that they were produced in an area of Canada where gypsy moth is not known to occur <sup>3</sup> 2. The trees are accompanied by a statement of origin and movement <sup>4</sup> that specifies the Canadian province where the trees originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and also states that: a. The trees originated in and were moved only through areas of Canada not considered to be infested with pine shoot beetle, as determined by the <a href="#">Canadian Food Inspection Agency (CFIA)</a> <sup>3</sup> , <b>or</b> b. The trees originated from a province not quarantined for pine shoot beetle and are moved through a province that is infested with pine shoot beetle during October, November, or December, or when ambient air temperature is below 10°C (50°F) (the shipment does <b>not</b> have to be covered or in an enclosed container). 3. The U.S. destination (including county and State) is plainly indicated on the trees or on the outer covering or container	RELEASE <sup>5</sup>
	<b>Lacks</b> the documents and indication of destination described above	REFER to CBP AS

- 1 Cut pine Christmas trees or branches of Canadian origin are subject to requirements for both gypsy moth and pine shoot beetle. Because the entry requirements are complex and are based on place of origin in Canada as well as place of destination in the U.S., determine the requirements for gypsy moth first, then determine the requirements for pine shoot beetle.
- 2 The certification of origin for gypsy moth is a signed, accurate statement certifying the area in which the trees were grown. The statement may be provided directly on the documents accompanying the tree shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a [CFIA](#) inspector; exporters may sign the statement.
- 3 See [Appendix G](#).
- 4 The statement of origin and movement for pine shoot beetle may be printed directly on the documentation accompanying the shipment, or may be provided on a separate document. The certification does **not** require the signature of a [CFIA](#) inspector; exporters may sign the document.
- 5 If the trees are to be moved through an area of the U.S. quarantined for pine shoot beetle ([Appendix G](#)), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the trees must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

**TABLE 3-8: Cut PINE Christmas Trees or Branches from New Brunswick, Nova Scotia, or Prince Edward Island – Gypsy Moth Requirements**

If from:	And destined to:	And:	Then:
A Canadian area infested with gypsy moth <sup>1</sup>	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth <sup>1, 2</sup>		GO to <a href="#">Table 3-9</a>
	An area in the U.S. <b>not</b> infested with gypsy moth	Accompanied by a Canadian phytosanitary certificate with <b>one</b> of the following additional declarations: ◆ “The trees have been inspected and found free of gypsy moth.” <b>or</b> ◆ “The trees have been treated for gypsy moth in accordance with the Plant Protection and Quarantine Treatment Manual.”	
		<b>Lacks</b> the above certification	PROHIBIT ENTRY
A Canadian area <b>not</b> infested with gypsy moth	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth <sup>1, 2</sup>		GO to <a href="#">Table 3-9</a>
	An area in the U.S. <b>not</b> infested with gypsy moth	Accompanied by a certification of origin <sup>3</sup> stating that the trees were produced in an area of Canada where gypsy moth is not known to occur	
		<b>Lacks</b> the above certification	PROHIBIT ENTRY

- 1 See [Appendix G](#).
- 2 Trees destined to a gypsy moth infested area, but moving through a U.S. noninfested area (other than noninfested areas in the counties of Aroostock, Franklin, Oxford, Penobscot, Piscataquis, and Somerset, ME) must meet entry requirements for trees destined to gypsy moth noninfested areas.
- 3 The certification of origin is a signed, accurate statement certifying the area in which the trees were grown, and stating that the trees were produced in an area of Canada where gypsy moth is not known to occur. The statement may be provided directly on the documents accompanying the tree shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a [CFIA](#) inspector; exporters may sign the statement.

**TABLE 3-9: Cut PINE Christmas Trees or Branches from New Brunswick, Nova Scotia, or Prince Edward Island – Pine Shoot Beetle Requirements**

<b>If:</b>	<b>And:</b>	<b>Then:</b>
The trees are moved through an area of Canada or the U.S. quarantined for pine shoot beetle (Appendix G)	<b>Both</b> of the following requirements are met: 1. The trees are accompanied by a statement of origin and movement that specifies the province where the trees originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and a. The trees are moved through the quarantined area during October, November, or December, or when ambient air temperature is below 10°C (50°F) <b>or</b> b. The trees are moved during the period of January through September when the temperature is 10°C (50°F) or higher, and are shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by the pine shoot beetle. 3. The U.S. destination (including county and State) is plainly indicated on the regulated articles or, if applicable, on the outer covering, packaging, or container.	RELEASE
	Both of the conditions above are <b>not</b> met	PROHIBIT ENTRY
The trees are moved through an area of Canada or the U.S. <b>not</b> quarantined for pine shoot beetle	<b>Both</b> of the following requirements are met: 1. The trees are accompanied by a statement of origin and movement that specifies the province where the trees originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and also states that the trees originated in and were only moved through provinces of Canada not considered to be infested or partially infested with pine shoot beetle, as determined by the CFIA; and 2. The U.S. destination (including county and State) is plainly indicated on the regulated articles or, if applicable, on the outer covering, packaging, or container.	RELEASE
	Both of the conditions above are <b>not</b> met	PROHIBIT ENTRY

**TABLE 3-10: Cut PINE Christmas Trees or Branches from Ontario or Quebec – Gypsy Moth Requirements**

		<b>Lacks</b> the above certification	PROHIBIT ENTRY

- 1 See [Appendix G](#).
- 2 Trees destined to a gypsy moth infested area, but moving through a U.S. noninfested area (other than noninfested areas in the counties of Aroostock, Franklin, Oxford, Penobscot, Piscataquis, and Somerset, ME) must meet entry requirements for trees destined to gypsy moth noninfested areas.
- 3 The certification of origin is a signed, accurate statement certifying the area in which the trees were grown, and stating that the trees were produced in an area of Canada where gypsy moth is not known to occur. The statement may be printed directly on the documents accompanying the tree shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a [CFIA](#) inspector; exporters may sign the statement.

**TABLE 3-13: Cut Flowers and Greenery of Canadian Origin OTHER THAN Conifer Christmas Trees, Branches, Commercially Produced Wreaths, or Garlands**

If a flower or branch (stem) from:	And:	Then:
Almond ( <i>Prunus</i> spp.), Apple ( <i>Malus</i> spp.), Apricot ( <i>Prunus</i> spp.), Cherry ( <i>Prunus</i> spp.), Cherry laurel ( <i>Prunus</i> spp.), Cotton ( <i>Gossypium</i> spp.), Crabapple ( <i>Malus</i> spp.), English laurel ( <i>Prunus</i> spp.), Flowering quince ( <i>Chaenomeles</i> spp.), Grape ( <i>Vitis</i> spp.), Nectarine ( <i>Prunus</i> spp.), Peach ( <i>Prunus</i> spp.), Pear ( <i>Pyrus</i> spp.), Prune ( <i>Prunus</i> spp.), or Quince ( <i>Cydonia</i> spp.)		PROHIBIT ENTRY
Other than a plant listed above	For personal use	REFER to CBP AS
	Commercial	<b>INSPECT</b> 5% of all cut flower shipments following directions in the <a href="#">Cut Flowers and Greenery Import Manual</a> <sup>1, 2</sup> <b>RELEASE</b> other shipments <sup>3</sup>

- 1 Cut flowers grown in Canada may enter the United States during all CBP hours of coverage.
- 2 Flower shipments selected for the required 5% inspection rate (the 5% inspection rate translates to approximately every 20th shipment) must be inspected and released by a CBP AS.
- 3 Outside of CBP AS hours of coverage the following criteria **must** be met:
  - ◆ **On a yearly basis**, provide CBP AS personnel, in each port of entry utilized, **one** of the following: a current copy of the NAFTA certificate of origin **or** a signed affidavit certifying cut flower shipments are of Canadian origin. Any updates/changes in the supplier list must be provided to CBP ASs as the changes occur.
  - ◆ **For each shipment**, provide CBP AS personnel **advance** notification. This advance notice must be provided on company fax letterhead and during the regular staffed hours of CBP AS. The advance notification must also provide the following information: estimated time of arrival, origin, and description of cut flower varieties (the description can be attached and may be in the form of an invoice).

**Note:** These requirements will allow the CBP AS to select shipments, entering outside of CBP AS regular staffed hours, in advance for inspection as needed. The CBP AS will also provide access to this information to local CBP officers so that CBP officers can determine if the importer has met the conditions listed above.

---

## Foreign Origin Other than Canada

**TABLE 3-14: Cut Flowers and Greenery from a Foreign Country OTHER THAN Canada  
(Including Christmas Trees, Branches, Commercially Produced Wreaths, and Garlands)**

Canadian Border  
Manual

## Plant

### *Fruits, Vegetables, and Herbs*

#### Verified Canadian Origin

**TABLE 3-15: Verified Canadian Origin Fruits, Vegetables, or Herbs**

If:	Then:
Fresh fruits, vegetables, or herbs <sup>1</sup>	GO to <a href="#">Table 3-16</a>
Frozen or dried fruits, vegetables, or herbs <sup>1</sup>	GO to <a href="#">Table 3-22</a>
Preserved or cooked fruits, vegetables, or herbs <sup>1</sup>	GO to <a href="#">Table 3-24</a>

- 1 Origin may be verified by thoroughly reviewing the documentation and the shipping containers of shipments presented for entry. It is important to note that fruits and vegetables, which were grown and harvested in other countries, may be identified as Canadian origin. Tropical fruits and vegetables, such as citrus, mangoes and avocados are not grown in Canada and are not Canadian origin. Also, fruits such as grapes, nectarines, peaches, plums, and sand pears presented for entry during winter months may not be of Canadian origin. The origin of these types of fruit is probably a country below the equator, for instance, Chile or South Africa.

Fruits and vegetables presented as from Canada may not necessarily have originated in Canada. Commodities entering Canadian commerce can be considered a product of Canada, however, this designation does not necessarily mean the product's origin is Canadian.

**TABLE 3-16: Fresh Fruits, Vegetables, or Herbs of Verified Canadian Origin<sup>1</sup>**

If:	And:	Then:
Selected for referral	_____→	REFER to CBP AS
<b>Not</b> selected for referral	<i>Arctostaphylos uva-ursi</i> (bearberry) leaves, <i>Cetraria islandica</i> (Iceland moss) plants, <i>Hydrastis canadensis</i> (goldenseal) roots, <i>Lycopodium clavatum</i> (clubmoss) plants, <i>Menyanthes trifoliata</i> (bogbean) leaves, or <i>Panax quinquefolius</i> (North American ginseng) roots <sup>1</sup>	
	<i>Allium</i> spp. (Alliaceous vegetables which include but are not limited to garlic, leeks, onions, and shallots) <sup>1</sup>	GO to <a href="#">Table 3-17</a>
	<i>Ipomoea aquatica</i> (water spinach) or <i>Sagittaria sagittifolia</i> (arrowhead) <sup>1</sup>	GO to <a href="#">Table 3-18</a>
	Corn-on-the-cob <sup>1</sup>	GO to <a href="#">Table 3-19</a>
	A kind of potato <sup>1</sup>	GO to <a href="#">Table 3-21</a>
	<b>Other than</b> a fruit, vegetable, or herb listed above <sup>1</sup>	RELEASE

- 1 Origin may be verified by thoroughly reviewing the documentation and the shipping containers of shipments presented for entry. It is important to note that fruits and vegetables, which were grown and harvested in other countries, may be identified as Canadian origin. Tropical fruits and vegetables, such as citrus, mangoes and avocados are not grown in Canada and are not Canadian origin. Also, fruits such as grapes, nectarines, peaches, plums, and sand pears presented for entry during winter months may not be of Canadian origin. The origin of these types of fruit is probably a country below the equator, for instance, Chile or South Africa.

**TABLE 3-17: Canadian Origin Fresh Alliaceous Vegetables**

If:	And:	And:	Then:
Dry bulb <sup>1</sup>	_____→		RELEASE
Fresh bulb (green parts present) and other plant parts <sup>2</sup>	Entire bulb	Accompanied by a phytosanitary certificate issued by the <a href="#">Canadian Food Inspection Agency (CFIA)</a> containing an additional declaration (AD) that the shipment is free from <i>Acrolepiopsis assectella</i>	
		Accompanied by a phytosanitary certificate issued by the <a href="#">CFIA</a> lacking the above AD	PROHIBIT ENTRY
		Lacking the above phytosanitary certificate	
	Processed bulb (peeled and chopped)	_____→	RELEASE

- 1 Dry bulb refers to alliums which are harvested and then left to cure in the field and placed in storage under controlled conditions to allow the bulbs to dry completely. Dry bulb alliums have a dry, papery outer skin as distinguished from fresh alliums, which are green and soft.

Sprout suppressants are sometimes used to avoid sprouting of dry bulbs in storage, but in some situations sprouting might happen. These sprouts originate from storage so green parts related to sprouted dry bulbs do not require a phytosanitary certificate and can be released after inspection.

Dry bulb onions (*Allium cepa* var *cepa*) come in a wide range of sizes and shapes, and bulbs might be red, white or yellow. Examples of other dry bulb alliums are dried garlic (*A. sativum*) and dried shallots (*A. cepa* var *aggregatum*).

- 2 Fresh bulb and other plant parts refer to alliums which are harvested fresh and green. They should be targeted by the Leek Moth requirements and be accompanied by a phytosanitary certificate and an additional declaration. Fresh bulb and other plant parts of alliums could be scallions or welsh onions (*Allium fistulosum*), leeks (*A. porrum*) and chives (*A. schoenoprasum*). Garlic (*A. sativum*), green bunching onions (*A. cepa* var *cepa*) and shallots (*A. cepa* var *aggregatum*) when harvested and marketed fresh and showing green parts are regulated and should be accompanied by a phytosanitary certificate and an additional declaration.

If:	And:	Then
Accompanied by <b>one</b> of the following documents <sup>1</sup> : 1. A Canadian Phytosanitary Certificate issued by the <a href="#">Canadian Food Inspection Agency (CFIA)</a> , or 2. An E2 - Certificate of Inspection for Fresh Fruit and Vegetables (CFIA/ACIA Form 2401), or 3. An E3 - Certificate of Inspection for Fresh Fruit and Vegetables, or 4. An S5 - Certificate of Inspection for Fresh Fruit and Vegetables, or 5. An Export Document for C-PIQ Establishments Fresh Fruit and Vegetables (CFIA/ACIA Form 5314), or 6. A Certificate of Origin for Potatoes (CFIA/ACIA Form 5565)		RELEASE
<b>Lacks</b> one of the above documents	50 lbs or less, for personal use <sup>2</sup>	PROHIBIT ENTRY
	Not as above	

- 1 All of these documents are issued by the [Canadian Food Inspection Agency \(CFIA\)](#). If the potatoes are from a Potato Cyst Nematode (PCN) regulated area and grown, processed, and shipped per the required protocol, [CFIA](#) will provide the following additional declaration (AD) on the document presented: "The potatoes in this shipment have been cleaned and commercially packed in a CFIA approved facility." The areas of Canada regulated for PCN by [CFIA](#) are the following:
  - ◆ Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
  - ◆ British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
  - ◆ Newfoundland and Labrador: The entire island of Newfoundland
  - ◆ Quebec: The municipality of Saint-Amable
- 2 The potatoes must be free from soil and commercially packaged.

- 3 Includes steamed partly processed potato screenings (peels)

TABLE 3-24: Canadian Origin Preserved or Cooked Fruits, Vegetables, or Herbs Sealed in Containers

RELEASE (These fruits, vegetables, or herbs may be subject to <a href="#">U.S. Food and Drug Administration</a> (FDA) regulations.
--

Foreign Origin Other than Canada

REFER to CBP AS.

U. S. Produce Returned

In most instances you can release fruits and vegetables if you can verify that they are of U. S. origin. Use accompanying documents on fruit and labels on containers to establish origin. If at any time you are in doubt of the produce’s origin, regulate as if the produce were of foreign origin.

Fresh produce of foreign origin is often permitted to transit the United States on its way to Canada. Since the transiting produce may be prohibited entry into the United States, **don’t let it back into the United States without PPQ’s concurrence.** Apples, citrus, grapes, mangoes, nectarines, peaches, pears, plums, and sandpears are examples of fruits prohibited entry into the United States that may be allowed to transit.

Evidence of Origin

Evidence of origin can come from labeling, sales receipts, and answers to your questions. Most often it will be the cumulative evidence that will confirm the origin of the produce.

Citrus

In the case of citrus, **undeniable proof of origin** is an entry requirement. The only example of undeniable proof of origin is labeling declaring U.S. origin on a sealed, unopened bag of fruit.

Stickers on small quantities of non-commercial produce that provide evidence that the fruit originated in the U.S. suffices as adequate proof of origin, but only for travelers from the U.S. returning after transiting solely Canada.

**TABLE 3-25: Fresh Produce of U.S. Origin Being Returned from Canada**

### Timber Products

#### Canadian Origin

**TABLE 3-32: Canadian Origin Timber Products<sup>1</sup>**

If:	And:	Then:
Firewood		GO to <a href="#">Table 3-33</a>
Forest litter, mulch, sawdust, or shavings		REFER to CBP AS
Logs		GO to <a href="#">Table 3-34</a>
Lumber	A pine ( <i>Pinus</i> ) species with pieces of bark larger than 1 inch attached	REGULATE as logs; GO to <a href="#">Table 3-35</a>
	A pine species <b>without</b> bark or with pieces of bark 1 inch or smaller attached	RELEASE
	An ash ( <i>Fraxinus</i> ) species with pieces of bark attached	REGULATE as logs; GO to <a href="#">Table 3-42</a>
	An ash species <b>without</b> bark	RELEASE
	<b>Not</b> a pine or ash species	
Wood chips <sup>2</sup> , bark, or bark chips	An ash ( <i>Fraxinus</i> ) species	GO to <a href="#">Table 3-44</a>
	A pine ( <i>Pinus</i> ) species	GO to <a href="#">Table 3-45</a>
	<b>Not</b> an ash or pine species	REFER to CBP AS

1 Includes railroad crossties and mulch.

2 No permit is required for wood chips of any size that are derived from recycled wood pallets of Canadian origin. If wood chips are accompanied by a document carrying a statement that the wood chips have been derived from pallets, then inspect and RELEASE the shipment. The statement may be affixed to any official Canadian document, a company's letterhead, or the manifest.

**TABLE 3-33: Canadian Origin Firewood**

If:	And the shipment is:	And:	Then:
A softwood (conifer) <sup>1</sup>	_____→		REGULATE as logs; GO to <a href="#">Table 3-34</a>
A hardwood <sup>1</sup>	Commercial	Accompanied by a treatment certificate <sup>2</sup> declaring that the firewood was heat treated (HT) at 71.1 °C (minimal core temperature) for 75 minutes	RELEASE <sup>3</sup>
		<b>Lacks</b> above HT certificate	PROHIBIT ENTRY
	Noncommercial	Accompanied by a treatment certificate <b>or</b> attached commercial treatment label declaring that the firewood was heat treated (HT) at 71.1 °C (minimal core temperature) for 75 minutes	RELEASE <sup>3</sup>
		<b>Lacks</b> above HT certificate or label	PROHIBIT ENTRY

- 1 Refer to the [Firewood Job Aid](#) to determine whether the firewood is a softwood or a hardwood.
- 2 Refer to “[Heat Treatment Certificate Using a Kiln Facility](#)” on **page A-37**.
- 3 Treated firewood may still harbor pests. Inspect treated firewood periodically to monitor for pests.

**TABLE 3-34: Canadian Origin Logs**

If:	Then:
A species of pine ( <i>Pinus</i> )	GO to <a href="#">Table 3-35</a>
A species of ash ( <i>Fraxinus</i> )	GO to <a href="#">Table 3-42</a>
A species <b>other than</b> pine or ash	GO to <a href="#">Table 3-43</a>

**TABLE 3-35: Canadian Origin Pine Logs<sup>1</sup>**

<b>If from:</b>	<b>And:</b>	<b>Then:</b>
New Brunswick or Nova Scotia		GO to <b>Table 3-36</b>
Ontario or Quebec		GO to <b>Table 3-38</b>
A province <b>other than</b> those listed above	<b>All</b> of the following requirements are met: 1. The logs are accompanied by a certification of origin <sup>2</sup> stating that the logs were produced in an area of Canada where gypsy moth is not known to occur <sup>3</sup> 2. The logs are accompanied by a statement of origin and movement <sup>4</sup> that specifies the Canadian province where the logs originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and also states that the logs originated in and were moved only through areas of Canada not considered to be infested with pine shoot beetle, as determined by the <b>CFIA</b> <sup>3</sup> 3. The U.S. destination (including county and State) is plainly indicated on the logs or, if applicable, on the outer covering, packaging, or container	RELEASE <sup>5</sup>
	<b>Lacks</b> the documents and indication of destination described above	REFER to CBP AS

- 1 Canadian origin pine logs with bark attached are subject to requirements for both gypsy moth and pine shoot beetle. Because the entry requirements are complex and are based on place of origin in Canada as well as place of destination in the U.S., determine the requirements for gypsy moth first, then determine the requirements for pine shoot beetle.
- 2 The certification of origin for gypsy moth is a signed, accurate statement certifying the area in which the logs originated. The statement may be provided directly on the documents accompanying the log shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a **CFIA** inspector; exporters may sign the statement.
- 3 See **Appendix G**.
- 4 The statement of origin and movement for pine shoot beetle may be printed directly on the documents accompanying the shipment, or may be provided on a separate document. The certification does **not** require the signature of a **CFIA** inspector; exporters may sign the statement.
- 5 If the logs are to be moved through an area of the U.S. quarantined for pine shoot beetle (**Appendix G**), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the logs must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

**TABLE 3-36: Pine Logs from New Brunswick or Nova Scotia – Gypsy Moth Requirements**

The details of the treatment must be specified in the treatment section of the PC. <b>or</b>,</li> <li>◆ The articles have been heat treated at a temperature of at least 71.1°C for a minimum of 75 minutes as specified in T314-a of PPQ’s <a href="#">Treatment Manual</a>.<sup>2</sup> The details of the treatment must be specified in the treatment section of the PC. <b>or</b>,</li> <li>◆ The articles have been kiln dried as specified in T404-b-4 of PPQ’s <a href="#">Treatment Manual</a>. The details of the treatment must be specified in the treatment section of the PC.</li> </ul>	GO to <a href="#">Table 3-43</a>
	<b>Lacks</b> IP or PC with above AD	PROHIBIT ENTRY
Counties <b>not</b> regulated for EAB but located within a regulated province or territory <sup>1</sup>	<p>Accompanied by an import permit (IP) and a phytosanitary certificate (PC) with additional declaration (AD) stating that “The articles in the shipment were produced/harvested in a county where emerald ash borer (<i>Agrilus planipennis</i>) does not occur, based on official surveys.”</p>	GO to <a href="#">Table 3-43</a>
	<b>Lacks</b> PC with above AD	PROHIBIT ENTRY
Provinces or territories <b>not</b> regulated for EAB <sup>1</sup>	<p>Accompanied by an importer document that certifies that the articles are not from an area known to be infested by EAB (oral declarations are acceptable for noncommercial shipments)</p>	GO to <a href="#">Table 3-43</a>
	<b>Lacks</b> the importer document described above	PROHIBIT ENTRY

1 Canadian areas regulated for EAB as of October 2008 include the following:

- ◆ All parts of the Province of Ontario described as follows: The City of Brampton, City of Mississauga, City of Ottawa, City of Sault Ste. Marie, City of Toronto, City of Vaughan, Town of Oakville, Municipality of Bluewater, Municipality of Chatham-Kent, County of Essex, County of Elgin, County of Lambton, County of Middlesex, and the County of Norfolk.
- ◆ All parts of the Province of Quebec described as follows: Municipality of Carignan (located in the Montérégie region of Quebec, southeast of Montreal).
- ◆ Any new areas determined through surveys to be infested and that were placed under a Notice of Prohibition of Movement by the [Canadian Food Inspection Agency \(CFIA\)](#). Contact CFIA for more information.

2 The industry must meet the core temperature requirement.

**TABLE 3-43: Logs OTHER THAN Pine – Gypsy Moth Requirements**

If from:	And destined to:	And:	Then:
A Canadian area infested with gypsy moth <sup>1</sup>	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth <sup>1, 2</sup>		RELEASE
	An area in the U.S. <b>not</b> infested with gypsy moth	Accompanied by <b>one</b> of the following: 1. A Canadian phytosanitary certificate with <b>one</b> of the following additional declarations: ◆ “The logs have been inspected and found free of gypsy moth.” <b>or</b> ◆ “The logs have been treated for gypsy moth in accordance with the Plant Protection and Quarantine Treatment Manual.” <b>OR</b> 2. A copy of an APHIS compliance agreement which is acceptable proof of destination to a specified U.S. processing plant or mill for handling or processing	
		<b>Without</b> the above certification or proof of destination described above	PROHIBIT ENTRY
A Canadian area <b>not</b> infested with gypsy moth	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth <sup>1, 2</sup>		RELEASE
	An area in the U.S. <b>not</b> infested with gypsy moth	Accompanied by a certification of origin <sup>3</sup> stating that the logs were produced in an area of Canada where gypsy moth is not known to occur	
		<b>Without</b> the above certification	PROHIBIT ENTRY

1 See [Appendix G](#).

2 Logs destined to a gypsy moth infested area, but moving through a U.S. noninfested area (other than noninfested areas in the counties of Aroostock, Franklin, Oxford, Penobscot, Piscataquis, and Somerset, ME) must meet entry requirements for logs destined to gypsy moth noninfested areas.

3 The certification of origin is a signed, accurate statement certifying the area in which the logs originated, and stating that the logs were produced in an area of Canada where gypsy moth is not known to occur. The statement may be printed directly on the documents accompanying the log shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a [CFIA](#) inspector; exporters may sign the statement. Oral declarations are acceptable for noncommercial shipments.

1 The most common genera of bamboo include *Arundinaria*, *Bambusa*, *Chimonobambusa*, *Dendrocalamus*, *Phyllostachys*, *Pseudosasa*, *Sasa*, *Semiarundinaria*, and *Shibataea*.

- 2 The term “citrus” refers to all genera, species, and varieties of the subfamilies Aurantioideae, Rutoideae, and Toddalioideae of the botanical family Rutaceae, and includes such plants as *Boronia*, *XCitrofortunella mitis* (calamondin), *Calodendrum capense* (cape chestnut), China flower, *Citrus medica* (citron), *Fortunella* (kumquat), *Citrus X paradisi* (grapefruit), *Citrus limon* (lemon), *Citrus aurantiifolia* (lime), *Citrus sinensis* (orange), *Murraya paniculata* (orange-jessamine), *Ruta* spp. (rue), *Citrus X tangelo* (tangelo), and *Citrus reticulata* (tangerine).
- 3 CITES is the Convention on International Trade in Endangered Species of Wild Fauna and Flora.
- 4 The palm family includes over 100 cultivated genera, some of which are prohibited entry into the United States. [CFIA](#) will not issue a phytosanitary certificate for prohibited plants.
- 5 The common bedding plant called a geranium is really in the genus *Pelargonium*. While plants of the genus *Geranium* are not host to *Ralstonia solanacearum* race 3 biovar 2, geraniums (*Pelargonium* sp.) plants are a separate species from *Geranium* spp. and are regulated differently due to disease risk.
- 6 The phytosanitary certificate may be CFIA Form 1327, CFIA Form 4743, or CFIA/ACIA 5378.

**TABLE 3-53: Reported Hosts of Swede Midge**

Scientific Name	Common Name
<i>Armoracia rusticana</i>	Horseradish
<i>Brassica napus</i> (all varieties)	Includes: Rape, Colza, Rutabaga, Swede, Swedish Turnip, Siberian Kale, Hanover Salad, etc.
<i>Brassica oleracea</i> (all varieties)	Includes: Wild Cabbage, Kale, Collards, Chinese Kale, Broccoli, Cauliflower, Head Cabbage, Brussels Sprouts, Kohlrabi, etc.
<i>Brassica rapa</i> (all varieties)	Chinese Cabbage, Rapini, Turnip
<i>Lepidium sativum</i>	Garden Cress
<i>Nasturtium amphibium</i>	Tall Nasturtium
<i>Nasturtium officinale</i>	Watercress
<i>Nasturtium palustre</i>	Marsh Watercress
<i>Nasturtium silvestre</i>	Creeping Watercress
<i>Raphanus sativus</i> (all varieties)	Chinese Radish

**TABLE 3-54: Canadian Origin Hosts of Swede Midge**

<b>If from:</b>	<b>And:</b>	<b>Then:</b>
An area of Canada infested with swede midge <sup>1</sup>	Produced under the Swede Midge Certification Program (SMCP) and accompanied by the SMCP sticker indicating it meets the USDA requirements for entry	GO to <a href="#">Table 3-59</a>
	<b>Lacks</b> the above sticker	PROHIBIT ENTRY
All areas of Canada other than those listed above	Accompanied by a phytosanitary certificate that indicates origin from a non-infested area of Canada, <b>or</b> Produced under the Canadian Greenhouse Certification Program and accompanied by the appropriate sticker indicating the material meets USDA requirements in lieu of a phytosanitary certificate, <b>or</b> Produced under the SMCP and accompanied by the appropriate sticker indicating the material meets USDA requirements in lieu of a phytosanitary certificate	GO to <a href="#">Table 3-59</a>
	<b>Lacks</b> a phytosanitary certificate or the above sticker	PROHIBIT ENTRY

1 The areas of Canada infested with swede midge are as follows:

- ◆ **Ontario:** The city of Toronto and the counties of Brant, Dufferin, Durham, Halton, Hamilton-Wentworth, Niagara, Norfolk, Oxford, Simcoe, Victoria, Waterloo, Wellington, or York.
- ◆ **Quebec:** The counties of Argenteuil, Communauté Urbaine de Montréal, Deux-Montagnes, Haut-Richelieu, Jardins-de- Napierville, Laval, La Vallée-du- Richelieu, Mirabel, Montcalm, Roussillon, Rouville, Therese-de- Blainville, or Vaudreuil- Soulanges.

**TABLE 3-55: Canadian Origin CITES Regulated Plants Grown Indoors**

If:	And:	And:	Then:
Grown at a greenhouse participating in the Canadian greenhouse certification program <sup>1</sup>	CITES documents <sup>2</sup> accompany the shipment	Entering a designated port <sup>3</sup>	REFER to PPQ or CBP AS
		<b>Not</b> entering a designated port	HAVE the importer reroute the plants to a designated port (if appropriate, safeguard under plant quarantines first). Shipping and handling charges are to be borne by the importer <sup>4</sup> .
	No CITES documents accompany the shipment	→	SEIZE the shipment and hold for PPQ
Grown at a greenhouse <b>not</b> participating in the Canadian greenhouse certification program, or grown in soil but <b>not</b> greenhouse grown	→	→	GO to <b>Table 3-56</b>

- 1 Must be accompanied by **either** a shipping invoice with a Canadian Food Inspection Agency label (Form CFIA/ACIA 4702) attached stating "Greenhouse-grown Plants from Canada," **or** a Canadian Phytosanitary Certificate.
- 2 CITES is the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The documentation must be a CITES export permit issued by the Canadian Wildlife Service.
- 3 Designated ports for the importation of plants from Canada are the following: Detroit and Port Huron, MI; Buffalo and Rouses Point, NY; and Blaine, WA.
- 4 If movement to a designated port is unacceptable, contact a PPQ Regional Botanist or CITES Specialist to see whether re-export is an option.

**TABLE 3-56: Canadian Origin CITES Regulated Plants Not Greenhouse Certified**

If:	And:	Then:
CITES documents <sup>1</sup> accompany the shipment	Entering a designated port <sup>2</sup>	GO to <b>Table 3-57</b>
	<b>Not</b> entering a designated port	GO to <b>Table 3-58</b>
No CITES documents accompany the shipment	→	SEIZE the shipment and hold for PPQ

- 1 CITES is the Convention on International Trade in Endangered Species of Wild Fauna and Flora. For CITES plants that are artificially propagated, the documentation must be a **CFIA** issued phytosanitary certificate that has a CITES Inventory Sheet attached. For CITES plants that were wild-collected, the documentation must be a CITES export permit issued by the Canadian Wildlife Service.
- 2 Designated ports for the importation of plants from Canada are the following: Detroit and Port Huron, MI; Buffalo and Rouses Point, NY; and Blaine, WA.

**TABLE 3-57: Canadian Origin CITES Regulated Plants Not Greenhouse Certified; with CITES Documents; Entering at a Designated Port**

## Plant

### *Seeds and Nuts for Other than Planting*

#### All Origins

**TABLE 3-79: Seeds and Nuts for Other than Planting from All Countries**

If:	And from:	Then:
Processed	A foreign country <b>other than</b> Canada	GO to <a href="#">Table 3-80</a>
	Canada or U. S. returned	RELEASE
Raw (unprocessed)	A foreign country <b>other than</b> Canada	GO to <a href="#">Table 3-81</a>
	Canada or U. S. returned	GO to <a href="#">Table 3-82</a>

#### Foreign Origin Other than Canada

**TABLE 3-80: Processed Seeds and Nuts for Eating from a Foreign Country OTHER THAN Canada**

If grain or seed is:	And:	Then:
Milled into <b>flour</b>		RELEASE
Coarsely milled ( <b>meal</b> )	Wheat <sup>1</sup>	REFER to CBP AS
	<b>Other than</b> wheat	RELEASE
<b>Processed by heat</b> (for example popped popcorn, puffed wheat, roasted coffee, or peanut)		
<b>Split</b> (like split pea)	Fava bean or lentil	REFER to CBP AS
	<b>Other than</b> fava beans or lentils	RELEASE
Polished rice	Basmati variety or red rice	REFER to CBP AS
	Other varieties	RELEASE
Shelled, dry nuts	Acorn or chestnut	REFER to CBP AS
	Neither acorn nor chestnut	RELEASE
Processed <b>insufficiently</b> to eliminate pests		REFER to CBP AS

<sup>1</sup> May be manifested as bran, clears, cream of wheat, farina, ground wheat, hulls, middlings, offal, pollards, red dog, sharps, shorts, standard middlings, or thistle sharps.

**TABLE 3-81: Raw (unprocessed) Seeds and Nuts for Eating or Decorative Use from a Foreign Country OTHER THAN Canada**

If the seeds or nuts are:	And:	And:	Then:
Acorn, chestnut, corn or its relatives <sup>1</sup> , cucurbit <sup>2</sup> , cumin, fava bean, kola, lentil, mango, niger, rough pea, or wheat	_____	_____➔	REFER to CBP AS
Coconut	Have milk	The husk is present	PROHIBIT ENTRY <sup>3</sup>
	Lack milk	The husk is <b>absent</b> _____➔	REFER to CBP AS
Coffee	Roasted	_____➔	RELEASE
	Unroasted	Moving to Hawaii or Puerto Rico	PROHIBIT ENTRY <sup>3</sup>
		Moving to <b>other than</b> Hawaii or Puerto Rico	REFER to CBP AS
Macadamia	With husk or shell	_____➔	PROHIBIT ENTRY <sup>3</sup>
	Shelled	_____➔	REFER to CBP AS
Noxious weeds or parasitic plants (see <a href="#">Appendix F</a> for a list)	_____	_____➔	PROHIBIT ENTRY <sup>4</sup>
Peanut	Raw	From Burkina Faso, China, Cote d' Ivoire, India, Japan, Senegal, Thailand, or Philippines	PROHIBIT ENTRY <sup>3</sup>
		From <b>other than</b> above	REFER to CBP AS
	Roasted	_____➔	RELEASE
Rice	Brown or polished	Basmati variety or red rice	REFER to CBP AS
		Other varieties	RELEASE
	With or in hulls	_____➔	PROHIBIT ENTRY <sup>3</sup>
<b>Not</b> listed above	_____	_____➔	REFER to CBP AS

- 1 Corn relatives include adlay millet, Job's tears, johnsongrass, kaffir corn, millet, pearl millet, foxtail millet, sorghum, teosinte, and sudangrass.
- 2 Cucurbits include cucumber, gourd, melon, pumpkin, squash, and watermelon.
- 3 Release if accompanied by and in compliance with a Departmental Permit.
- 4 Release if accompanied by and in compliance with a PPQ Form 526, Noxious Weed Permit.

## Canadian Origin or U.S. Produce Returned

**TABLE 3-82: Raw (unprocessed) Seeds and Nuts for Eating, Animal Feed, and Other than Planting, Such as Sprouting for Consumption Uses, Research, and Arts and Crafts from Canada or Returning to the U.S.**

If:	And:	And:	Then:
Corn or corn relatives <sup>1</sup>	Declared of U.S. origin	Accompanied by documentation showing U.S. origin	RELEASE
		<b>Lacks</b> the documentation described above	REFER to CBP AS
	Declared of Canadian origin	Accompanied by a copy of a USDA permit <b>or</b> a USDA permit is on file	RELEASE
		<b>Lacks</b> the documentation described above	REFER to CBP AS
Niger	From an approved facility <sup>2</sup>	—————→	RELEASE
	From <b>other than</b> an approved facility	U.S. returned seed in its original, unopened packaging from a USDA approved heat treatment facility <sup>3</sup>	REFER to CBP AS
		<b>Not</b> as above	
<i>Prunus</i> spp. (stone fruit) <sup>4</sup>	—————→	—————→	
A Federal noxious weed or a parasitic plant (see <a href="#">Appendix F</a> for a list)	—————→	—————→	PROHIBIT ENTRY
Coated or pelleted seed, seed tape, seed mats, or seed embedded in any other substrate that obscures visibility	Accompanied by CFIA Form 5289	—————→	RELEASE
	<b>Not</b> accompanied by CFIA Form 5289	Conform to the obscured seed protocol (see <a href="#">Appendix H</a> )	PROHIBIT ENTRY
		Do <b>not</b> conform to the obscured seed protocol	
<b>Other than</b> seeds or nuts listed above <sup>5</sup>	—————→	—————→	RELEASE

- 1 Including shelled corn, yellow dent corn, and high moisture corn. Corn relatives include adlay millet, Job's tears, johnsongrass, kaffir corn, millet, pearl millet, foxtail millet, sorghum, teosinte, and sudangrass.
- 2 Approved Canadian facilities include the following: (1) Armstrong Milling Co., Hagersville, ON; (2) Baden Feed and Supply, Ltd., Baden, ON; (3) Sun Country Seeds, Langham, SK
- 3 USDA approved heat treatment facilities for niger seed include the following: (1) ETO Sterilization, Linden, NJ; (2) I.S.I., Baltimore, MD; (3) Shah Nanji Nagsi, Nagpur, India; (3) UAE (United American Engineers Pte. Ltd.), Singapore
- 4 For example: almond, apricot, cherry, nectarine, peach, and plum.
- 5 This table does **not** include animal feed derived from animal material. If animal feed contains any animal products, contact a CBP Agriculture Specialist (CBP AS).

## Plant

### Seeds for Planting

#### Canadian Origin

**TABLE 3-83: Seeds for Planting from All Origins**

If the origin of the seed is:	Then:
Canada	GO to <a href="#">Table 3-84</a>
A foreign country <b>other than</b> Canada	GO to <a href="#">Table 3-87</a>
United States (returned)	GO to <a href="#">Table 3-88</a>

**TABLE 3-84: Canadian Origin Seed for Planting**

If the seed is:	And:	Then:
A Federal noxious weed seed or a parasitic plant seed (see <a href="#">Appendix F</a> for a list)	Accompanied by PPQ Form 526, Permit to Move Live Plant Pests or Noxious Weeds	RELEASE <sup>1</sup>
	<b>Not</b> accompanied by the above form	PROHIBIT ENTRY
An Agricultural (field) or Vegetable seed (see Chapter 5: <a href="#">Procedures</a> for a list)	—————→	GO to <a href="#">Table 3-85</a>
Neither a noxious weed, parasitic plant, field, nor vegetable seed	—————→	GO to <a href="#">Table 3-86</a>

1 Forward a copy of the permit to PPQ.

**TABLE 3-85: Canadian Origin Agricultural or Vegetable Seed**

If seed is:	And:	Then:
Rice	Accompanied by a copy of the importer's USDA issued Departmental permit (PPQ Form 588) <sup>1</sup>	USE FEDERAL SEED ACT PROCEDURES (see Chapter 5: <a href="#">Procedures</a> )
	<b>Lacks</b> evidence of the permit described above	PROHIBIT ENTRY
Corn	Accompanied by a copy of a USDA issued permit <sup>1</sup>	USE FEDERAL SEED ACT PROCEDURES (see Chapter 5: <a href="#">Procedures</a> )
	<b>Lacks</b> the above permit	PROHIBIT ENTRY
Okra or kenaf <sup>2</sup>	—————→	CONTACT PPQ
<b>Not</b> one of the crops in the three cells above	—————→	USE FEDERAL SEED ACT PROCEDURES (see Chapter 5: <a href="#">Procedures</a> )

1 Forward a copy of the permit to PPQ.

2 Okra or kenaf must enter at a port with a plant inspection station.

**TABLE 3-86: Canadian Origin Seed which is Neither Field nor Vegetable Seed**

If seed is:	And is:	Then:
Bamboo, barberry ( <i>Berberis</i> ), cutgrass ( <i>Leersia</i> ), Mahoberberis, mango ( <i>Mangifera</i> ), Oregon grape, holly grape ( <i>Mahonia</i> ), or sprangletop ( <i>Leptochloa</i> )	Accompanied by a copy of the importer's USDA issued Departmental permit (PPQ Form 588)	RELEASE
	<b>Lacks</b> evidence of the above permit	PROHIBIT ENTRY
Niger		REFER to CBP AS
Adlay millet, Job's tears, or teosinte	Accompanied by <b>both</b> of the following documents: 1. A Canadian Phytosanitary Certificate (or Certificate of Seed Analysis, CFIA Form 5289 <sup>1</sup> , or Seed Export Label, CFIA 5309 <sup>2</sup> ) <b>and</b> 2. A copy of a USDA issued permit	RELEASE
	<b>Lacks</b> the above documents	PROHIBIT ENTRY
<b>Not</b> one of the plants listed above	Accompanied by <b>one</b> of the following documents: ◆ A Canadian Phytosanitary Certificate ◆ A Certificate of Seed Analysis (CFIA Form 5289) <sup>1</sup> ◆ A Seed Export Label (CFIA Form 5309) <sup>2</sup> <b>or</b> Accompanied by <b>and</b> in compliance with a Permit for Small Lots of Seed (PPQ Form 597 or equivalent e-permit)	RELEASE
	<b>Lacking</b> one of the above documents	REFER to CBP AS

- 1 See [Appendix D](#) for a list of laboratories authorized to issue Seed Analysis Certificates.
- 2 See [Appendix D](#) for a list of exporters authorized to use the seed export label.

## Foreign Origin Other than Canada

**TABLE 3-87: Seed from a Foreign Country OTHER THAN Canada**

If the seed is:	And:	And:	Then:
Bamboo, barberry ( <i>Berberis</i> ), citrus, coconut, <i>Mahonia</i> , <i>Mahoberberis</i> , niger, sugarcane, or wild rice	Accompanied by a copy of the importer's USDA issued departmental permit (PPQ Form 588)	→	RELEASE
	<b>Not</b> accompanied by above form	→	PROHIBIT ENTRY
Broadbean, broomcorn, corn, cotton, emmer, fava bean, foxtail millet, guineagrass, hibiscus, Japanese millet, Job's tears, johnsongrass, kaffir corn, kenaf, lentil, napiergrass, okra, panicgrass, peanut, pearl millet, proso millet, rice, rough pea, sorghum, sorghum alnum, sorghum-sudangrass, sorgrass, spelt, sudangrass, sweetpea ( <i>Lathyrus</i> ), switchgrass, teosinte, triticale, vetch, or wheat	→	→	REFER to CBP AS
Coated or pelleted seed, seed tape, seed mats, or seed embedded in any other substrate that obscures visibility	Accompanied by CFIA Form 5289	→	RELEASE
	<b>Not</b> accompanied by CFIA Form 5289	Conform to the obscured seed protocol (see <a href="#">Appendix H</a> )  Do <b>not</b> conform to the obscured seed protocol	PROHIBIT ENTRY
An agricultural (A) or vegetable (V) seed (see Chapter 5: <a href="#">Procedures</a> for a list) and <b>not</b> listed above	→	→	USE FEDERAL SEED ACT PROCEDURES (see Chapter 5: <a href="#">Procedures</a> )
A Federal Noxious Weed or parasitic plant (see <a href="#">Appendix F</a> for a list)	→	Accompanied by and in compliance with PPQ Form 526, Noxious Weed Permit <sup>1</sup>	RELEASE <sup>2</sup>
		<b>Not</b> accompanied by PPQ Form 526	PROHIBIT ENTRY
Other than those listed above	→	→	GO to <a href="#">Table 5-3</a> in Chapter 5: <a href="#">Procedures</a>

- 1 If a shipment is not in compliance with permit conditions, CONTACT PPQ PERMIT SERVICES at 1-877-770-5990.
- 2 Forward a copy of the permit to PPQ.

## U. S. Seed Returned

**TABLE 3-88: U.S. Seed Returned<sup>1</sup>**

If the seed is:	And:	And the seed is:	Then:
Agricultural or vegetable	You are convinced that the seed's origin <sup>2</sup> is the United States <b>or</b> the seed was cleared in the U.S. <sup>2, 3</sup>	→	RELEASE
	You are reasonably sure that the seed's origin is the United States, but all conditions are <b>not</b> met	→	GO to <a href="#">Table 5-2</a> in the <a href="#">Procedures</a> section and treat as Canadian origin seed
	You doubt that the seed's origin <sup>2</sup> is the United States or that the seed was cleared in the U.S.	→	REFER to CBP AS
Other than agricultural or vegetable	<b>One</b> of the following conditions is met: ◆ The seed is accompanied by a Seed Export Label (CFIA Form 5309) <sup>4</sup> <b>or</b> ◆ You are convinced that the seed's origin <sup>5</sup> is the United States <b>or</b> ◆ The seed was cleared in the U.S. <sup>3</sup>	→	RELEASE
	<b>None</b> of the above conditions apply	Accompanied by a Phytosanitary Certificate or a Certificate of Seed Analysis (CFIA Form 5289)	REFER to CBP AS
		Not accompanied by either of the above forms	PROHIBIT ENTRY

- 1 If shipment is refused (infested with noxious weeds, diseases, or plant pests) CONTACT PPQ.
- 2 To establish proof of U.S. origin, the importer must provide the following documentation:
  - ◆ Export documents indicating the quantity of seed and number of containers, the date of exportation from the United States, the distinguishing marks on the containers at the time of exportation, and the name and address of the United States exporter; **OR** both of the following:
  - ◆ A document issued by a Customs or other government official of the country to which the seed was exported indicating that the seed was not admitted into the commerce of that country; **and**
  - ◆ A document issued by a Customs or other government official of the country to which the seed was exported indicating that the seed was not commingled with other seed after being exported to that country.
- 3 The U.S. Customs entry form must be stamped "I & R" and documentation of sale from a U.S. company to a Canadian company must be present.
- 4 See [Appendix D](#) for a list of exporters authorized to use the seed export label.
- 5 A U.S. issued Phytosanitary Certificate must be present.
