HURRICANE SEASON

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watch on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed.

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

- (a) HURRICANE WATCH - a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and
- (b) HURRICANE WARNING - which indicated that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricanes and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

FLORIDA-SEACOAST-BETHEL SHOAL TO JUPITER INLET-PORT EVERGLADES: U.S. Navy Operations.

The U.S. Navy has established a simulated mine field composed of approximately 38 moored and bottom inert units which will remain in the water for approximately two years. Minimum case depth of the moored units is 600 feet below the surface. The area is bounded by: 26°01'00.0"N 079°53'00.0"W, 26°05'00.0"N 079°53'00.0"W, 26°01'00.0"N 080°01'00.0"W, and 26°05'00.0"N 080°01'00.0"W.

FLORIDA-DRAWBRIDGES: VHF-FM Channel Change.

Drawbridges owners/operators in Florida have been encouraged by the Federal Communication Commission to use VHF-FM channel 9 for communications with vessels instead of VHF-FM channel 13. This is an attempt to reduce the congestion of VHF-FM channel 13 which is intended for vessel to vessel passing information. When using VHF-FM channel 9, all vessel operators and bridge tenders are encouraged to switch to low power for hailing or

discussing bridge opening information; this will help minimize confusion for boaters especially on waterways with a large number of drawbridges located in close proximity.

FLORIDA-PORT EVERGLADES: Waterways Analysis and Management System (WAMS) Study.

The Coast Guard is conducting a Waterways Analysis and Management System (WAMS) study for Port Everglades. The study focuses on the area aids to navigation system, waterborne commerce, marine casualty information, port and harbor resources, and environmental criticality. Routine and emergency communication capabilities, emergency response plans and development projects are also examined. Any interested company, agency, or individual wishing to provide comments or participate in a user survey should contact:

IV. CHART CORRECTIONS

(Explanation of Format)

Corrective action, affecting charts, is contained in this section. Chart corrections are listed numerically by chart number, beginning with the lowest and progressing through all charts affected. The correction listed pertains to that chart only. It is up to the mariner to decide which charts are to be corrected. The following example explains the individual elements of a typical correction.

Chart number	Chart edition	Edition date	Last Local Notice to Mariners	Notice datum	Reference correction	Source of to Mariners	Current Notice

VI. PROPOSED CHANGES

Periodically the Coast Guard evaluates the system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing the aids to navigation is considered. In this regard, the Coast Guard is evaluating changes in aids to navigation as noted below. Comments are requested, and should be sent to the address on the cover of this notice. Comments should include the following:

- (A) Quantity, type, capacity and value of vessels involved, and the extent that these vessels traverse the area under consideration seasonally, by day, and by night.

- (B) Where practicable, the type of navigation devices, such as compasses, radio direction finder, radar, loran, and search lights, with which such vessels are equipped.
- (C) The number of passengers and the type, quantity, and value of cargo involved.
- (D) A chart section or sketch showing the action proposed when necessary to clearly describe the recommended improvement.

SOUTH CAROLINA-ST. HELENA SOUND-SOUTH EDISTO RIVER: Aids Proposed to be Discontinued.

The following aids to navigation are proposed to be discontinued:
