

This merger between XM and Sirius is a monopoly. Their argument doesn't hold water as they do NOT compete with iPods or CD players. You cannot call in to a taped show, you do not get LIVE coverage on baseball games, you do however compete with regular radio. The primary difference is content, this is what we pay for and thus why XM and Sirius pay royalties to such stars to compete with the rival satellite service. Content. Do not allow this merger to continue. This is bad for the consumer especially in light of our current economic situation.
