**To:** OCNMSmanagementplan@noaa.gov

Could not make meeting at Port Angeles

Just have some general comments and many of these you are already active with:

- we support having the sanctuary and an ecosystem approach to its management
- support processes that maintain that ecosystem
- continue debris cleanup efforts
- continued work and education on ocean debris especially plastics
- stiff fines for violators causing adverse impacts
- closures to protect marine life when needed
- continued work with tribes to minimize impacts from their fishing and harvesting including closures with needed
- no fishing areas to let populations recover and expand
- improved education for our area school systems on the values of these areas and how to protect them
- provide interpretive materials to public for sale with profits going for the areas management, would love to see/have DVD or book of this sanctuary
- not sure if it is possible, I imagine it depends on resource issues and safety, maybe allow permits for eco-tourism under certain conditions and only if it doesn't create adverse impacts
- continue efforts to protect area from invasives
- continue efforts on protecting and expanding sea otters
- creative ways to continue your efforts with all the budget cutbacks and economic problems
