Toxicity review 21

# The toxicity of chromium and inorganic chromium compounds

By S Fairhurst and C A Minty

## Contents

Summary 7

Identity 5

Behaviour of chromium in biological tissue 8

Toxicokinetics 9

Studies in animals 9

Studies in humans 19

Toxicity to animals 27

Effects of single exposure 27

Skin and eye irritancy, and sensitisation 26

Effects of repeated exposure 28

Genotoxicity 33

Carcinogenicity 39

Effects on reproduction 46

Toxicity to humans 48

Effects of single exposure 48

Skin and eye irritation 50

Sensitisation 57

Effects of repeated exposure 54

Carcinogenicity 57

Genotoxicity 77

Effects on reproduction 73

---

**Tables 74**

- 1 Single dose studies: Metallic chromium, binary chromium-non metal compounds, chromium hexacarbonyl 74
- 2 Single dose studies: Chromium (II) compounds, chromium (III) compounds 76
- 3 Single dose studies: Chromium (IV) compounds 92
- 4 Single dose studies: Stainless steel welding fume particles 107
- 5 Repeated dose studies: Metallic chromium, binary chromium-non metal compounds, chromium hexacarbonyl 110
- 6 Repeated dose studies: Chromium (II) compounds, chromium (III) compounds 111
- 7 Repeated dose studies: Chromium (VI) compounds 117
- 8 Repeated dose studies: Stainless steel welding fume particles 128
- 9 Genotoxicity studies: Metallic chromium, binary chromium-non metal compounds, chromium hexacarbonyl 129
- 10 Genotoxicity studies: Chromium (II) compounds, chromium (III) compounds 130
- 11 Genotoxicity studies: Chromium (VI) compounds 144
- 12 Genotoxicity studies: Stainless steel welding fumes 169
- 13 Carcinogenicity studies: Metallic chromium, binary chromium-non metal compounds, chromium hexacarbonyl 172
- 14 Carcinogenicity studies: Chromium (III) compounds 176
- 15 Carcinogenicity studies: Chromium (IV) compounds 182
- 16 Carcinogenicity studies: Chromium (VI) compounds 183
- 17 Carcinogenicity studies: Stainless steel welding fumes 202
- 18 Studies of effects on reproduction: Chromium (III) compounds 203
- 19 Studies of effects on reproduction: Chromium (VI) compounds 205
