Comments: I would like to see a government where speaking for the ones that cant speak is

taken literally. It would be ideal for someone to finally step up and set down concrete and reasonable laws that stop the continuation of animal testing and hunting. It is true that hunting simply for sport is inessential and honestly cruel. It will also help add to gun control if hunting is banned. There is also the very vulnerable case of animal testing, many dont speak out against it because they are unaware of it. This theory should be true because never have i heard of recieving mail that encourages the testing. So please, to truely show that your party will true to it's word speak up for the little ones i ask you to intervene in the harsh practices used on animals.

thank you for your time, and i wish you the best of luck
sincerely, natasha
