## Introduction

The Contractor **shall** procure all hardware and software, including licensing and maintenance associated with DADS, with the exception of hardware and software purchased and maintained by the Census Bureau. The Government does not have a requirement to own any equipment included in the Contractor's solution. The Government is open to various ownership arrangements.

## U.S. Census Bureau Policy for Software License Information Center (SLIC)

### Purpose

The purpose of this policy is to communicate the U.S. Census Bureau's business practice objectives for using SLIC to achieve increased software monitoring so that it will be possible to:

- help divisions plan software purchases;
- prevent acquisition of unauthorized software;
- provide a history of purchases; and
- easily identify software that can be used at the Census Bureau.

### Census Bureau Software Acquisition Policy

For the purposes of this policy, acquisition is defined as the acquiring (by purchases and all other means) of all software for all platforms by the Census Bureau. This includes:

- software procured with government issued credit cards;
- software procured through small purchase requisitions;
- all third party contract vehicles;
- Internet downloads;
- software bundled with hardware;
- shareware; and
- open source software.

All organizational and operating units' staff involved in software acquisition activities at the Census Bureau shall use the Software License Information Center software system. A request for software acquisition approval is submitted electronically through the Software License Information Center.

Acquisition of all software products for all computing platforms in use at the Census Bureau, including software acquired through government issued credit cards, small purchase requisitions, third party contract vehicles, and Internet downloads, as well as shareware, freeware, open source software, and software bundled with hardware that will be used on the LAN or desktop, shall adhere to the provisions of the U. S. Census Bureau Policy for the Software License Information Center. Software, excluding in-house developed software, must be approved through SLIC with a Software Approval Request (SAR). Unauthorized software should not be installed on any workstation and must be removed.

### Enforcement

Anyone who submits a purchase card acquisition without using Software License Information Center system, risks having their credit card authority revoked. Acquisitions made using the

small purchase requisition, but not submitted through Software License Information Center first, will not be acted upon by Acquisition Division until approval is obtained. Acquisition of all software products for all computing platforms in use at the Census Bureau, including software acquired through government issued credit cards, small purchase requisitions, third party contract vehicles, and Internet downloads, as well as shareware, freeware, open source software, and software bundled with hardware that will be used on the LAN or desktop, shall adhere to the provisions of the U. S. Census Bureau Policy for the Software License Information Center. The Systems Support Division and Acquisition Division are responsible for processing requests and supplying information about non-compliance back to Bureau divisions. Division chiefs are responsible for compliance within their divisions. Software, excluding in-house developed software, must be approved through SLIC with a Software Approval Request (SAR). Unauthorized software should not be installed on any workstation and must be removed.

## **Policy Updates**

The IT Governing Board is responsible for reviewing and approving this policy on an annual basis.

## **Supporting Information**

The Systems Support Division is responsible for SLIC's day-to-day operations. The Software License Information Center Management team, will assist organizational and operating units in improving their software acquisition practices through the Census Software License Information Center. Support from and interaction with LAN staff, Unix support staff, Unix systems managers and others on the procurement and installation of software will continue. For more information about the Software License Information Center please see the Intranet site, [cww2.census.gov/it/ssd/slic](http://cww2.census.gov/it/ssd/slic)

## Software License Information Center -- Census Previously Approved\* Software as of 11/16/2006

\* Software on this list has been previously approved for Census Bureau use. Users must pay for the product unless provided at no cost by the manufacturer.

## Major Software Packages

### Geographic Information Technology (GIS)

The Census Bureau has a multi-year Blanket Purchase Agreement (BPA) with ESRI. Under this agreement, Census employees have access to most ESRI software products which are distributed via the CSO Help Desk, (301) 763-3333. The BPA also provides unlimited access to ESRI's Virtual Campus for online training. For further information about ESRI software contact SSD on (301) 763-5768.

### Oracle

The Database Management Systems Branch, SSD-DMSB, is the central point of contact for Oracle support. The branch provides system analysis and design consultation services to application divisions in the design, development, implementation, and support of database applications. The branch provides research in database technology and systems software support for all supported database management systems used in the Census Bureau. The Database Management Systems Branch also distributes Oracle software throughout the Census Bureau and coordinates all Oracle off-site training. DMSB is located in 1325-3, and the Oracle support number is (301) 763-1686

Please refer to the Database Management System Portal for detailed information on:

- Licensed Oracle Software
- Oracle Education and Training
- Oracle Documentation
- Oracle Tips
- Portal Information
- Alerts

For distribution information please see the System Support Division's Software Distribution Policy.

### SAS

The Survey Analysis Systems Branch of SSD provides contractual support for the Census Bureau's SAS contract, distributes SAS software & licenses, provides SAS software technical support, and provides guidance on SAS training classes and SAS documentation to the Census Bureau SAS community. SAS software products can be installed on any Census owned or leased hardware and any Census Bureau employee's home computer.

(301) 763-1687 Non-technical  
(301) 763-3333 Technical  
(301) 457-4606 Fax

### TIPS [Table Image Processing System]

The Table Image Processing System (TIPS) was designed and developed, and is supported, entirely in-house at the U.S. Census Bureau by the TIPS Staff of the Systems Support Division. TIPS is an enterprise wide composition system designed to produce large volumes of publication quality statistical tables. Census standard characteristics for tables such as font,

point size, and leading are included as the systems default attributes. TIPS has unique pagination and continuation algorithms based on hierarchical structures to provide optimal page breaks. The system generates PostScript output files for print and for the Adobe Acrobat Distiller to produce PDF files.

TIPS has produced statistical tables for many Bureau publications including every Economic Census since 1977, Annual Survey of Manufactures (ASM), Annual Capital Expenditures (ACES), County Business Patterns (CBP), Consolidated Federal Funds Report (CFFR), American Housing Survey (AHS), County and City Data Book, State and Metropolitan Area Data Book, 1990 Decennial Census, and selected publications for Census 2000.

The original TIPS system was designed on the Univac (later Sperry, now Unisys) mainframe as an experimental system for the 1976 ASM. TIPS was redesigned in 1981 and launched in 1982 for the 1982 Economic and Agriculture Censuses. The TIPS Staff migrated the system to the DEC VAX/VMS platform in 1990 and to the DEC Alpha/OpenVMS environment in 1997.

TIPS is currently installed on the HP (formerly Compaq, DEC) Alpha/OpenVMS Economic C2, C3, C4, and C5 clusters, and the HP Alpha/OpenVMS CSBA06 system. For technical support, contact 301-763-5805.

Product	Description	Quantity
9117-570	Server 1:9117 Model 570	1
0265	AIX Partition Specify	5
0983	Assembled in USA Indicator	1
1846	Op Panel	1
1847	Processor Cable, Two-Drawer System	1
1857	SP Flex Cable, Two-Drawer System	1
3274	73.4 GB 10,000 RPM Ultra320 SCSI Disk Drive Assembly	8
4651	Rack Indicator, Rack #1	1
5005	Software Preinstall	1
5701	IBM 10/100/1000 Base-TX Ethernet PCI-X Adapter	6
5716	2 Gigabit Fibre Channel PCI-X Adapter	6
5751	IBM 4.7 GB IDE Slimline DVD-RAM Drive	1
6671	Power Cord (9-foot), Drawer to IBM PDU, 250V/10A	4
7164	IBM Rack-mount Drawer Rail Kit	2
7300	System Drawer Enclosure w/ Bezel	2
7665	One way Processor Activation for Processor FC 7782	8
7768	Processor Power Regulator	6
7782	2-Way 1.9 GHz POWER5+ Processor Card, 0-way active, 8 DDR2 Memory Slots	4
7802	Ethernet Cable, 15M, Hardware Management Console to System	1
7865	CEC Backplane	2
7866	I/O Backplane	2
7867	Midplane	2
7868	DASD Backplane	2
7869	Media Backplane	1
7870	Power Midplane	2
7878	System Port Riser Card	2
7888	AC Power Supply, 240V, 1400 W	4
7894	8GB (4x2GB) DIMMs, 276-pin, 533 MHz DDR2 SDRAM	4
7997	Service Processor Card (FSP)	1
9169	Order Routing Indicator- System Plant	1
9300	Language Group Specify - US English	1
7311-D20	I/O Drawer 1:7311 Model D20	1
3147	RIO-2 (Remote I/O-2) Cable, 3.5M	2
3274	73.4 GB 10,000 RPM Ultra320 SCSI Disk Drive Assembly	2
4257	PCI Adapter to DASD Backplane Cable	2
4651	Rack Indicator, Rack #1	1
5701	IBM 10/100/1000 Base-TX Ethernet PCI-X Adapter	2
5736	PCI-X Dual Channel Ultra320 SCSI Adapter	1
6006	SPCN 3m Cable	2
6268	AC Power Supply, 435 W	2
6417	RIO-2 Ports to I/O Planar Riser Card	1
6429	Ultra320 SCSI Backplane for Hot-swap Disks	1
9172	Power Specify A/C	1
9300	Language Group Specify - US English	1
9911	Power Cord Specify 4M - ALL	1
7014-T00	Rack 1:Rack Model T00	1

0210	Rack Content: 7311-D20 / 4U	1
0232	Rack Content Specify: 9117/570 - 8EIA	1
0233	Rack Content Specify: 7316/TF3 - 1EIA	1
0253	Rack Content Specify: 7310/CR3-Rack Mount HMC-Nemesis 1EIA	1
4651	Rack Indicator, Rack #1	4
6068	Front door (Black) for High Perforation (1.8m racks)	1
6098	Side Panel (Black)	2
6654	PDU to Wall Powercord 14', 200-240V/24A, UTG0247, PT#12	2
7188	Power Dist Unit-Side Mount, Universal UTG0247 Connector	1
9169	Order Routing Indicator- System Plant	1
9188	Power Distrib Unit Specify - Base/Side Mount, Universal UTG0247	1
