FORM 2
MCH BUDGET DETAILS FOR FY 2007

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: ME

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])

Of the Federal Allocation (1 above), the amount earmarked for:

\$ 3,507,117

A.Preventive and primary care for children:

\$ 2,127,067 (60.65 %)

B.Children with special health care needs:

\$ 1,097,026 (31.28 %)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 283,024 (8.07 %)

(The above figure cannot be more than 10%)[Sec. 504(d)]

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 13,704,352

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 0

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 0

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 3,903,140

\$ 13,704,352

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 17,211,469

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 1,175,405

b. SSDI: \$ 100,000

c. CISS: \$ 0

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 20,152,197

h. AIDS: \$ 0

i. CDC: \$ 441,208

j. Education: \$ 0

k. Other: \$ 0

HGWY \$ 223,197

HRSA/USDA \$ 2,420,815

SS FAMILY PLANNING \$ 273,406

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 24,786,228

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 41,997,697

FIELD LEVEL NOTES

1. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: PregWomenExpended
Row Name: Pregnant Women
Column Name: Expended
Year: 2005
Field Note:
Expenditures were shifted to fill demographic need.
2. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: PregWomenExpended
Row Name: Pregnant Women
Column Name: Expended
Year: 2004
Field Note:
Categorical expenditure was shifted to fill demographic need. The system for capturing population categories was improved. Now people that previously were counted in the "other" category are now counted in category a, b, c, or d.
3. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: Children_0_1Expended
Row Name: Infants <1 year old
Column Name: Expended
Year: 2005
Field Note:
Expenditures were shifted to fill demographic need.
4. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: Children_0_1Expended
Row Name: Infants <1 year old
Column Name: Expended
Year: 2004
Field Note:
Expenditures were shifted to fill demographic need.
5. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: Children_1_22Expended
Row Name: Children 1 to 22 years old
Column Name: Expended
Year: 2005
Field Note:
Some applicable expenditures were excluded from the FFY 05 Budget.
6. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: Children_1_22Expended
Row Name: Children 1 to 22 years old
Column Name: Expended
Year: 2004
Field Note:
Tobacco funds were received and used.
7. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: CSHCNExpended
Row Name: CSHCN
Column Name: Expended
Year: 2005
Field Note:
Some applicable expenditures were excluded from the FFY 05 Budget.
8. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: CSHCNExpended
Row Name: CSHCN
Column Name: Expended
Year: 2004
Field Note:
This is the result of better tracking of people that were previously counted in the "other" category.
9. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AllOthersExpended
Row Name: All Others
Column Name: Expended
Year: 2005
Field Note:
Some applicable expenditures were excluded from the FFY 05 Budget.
10. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AllOthersExpended
Row Name: All Others
Column Name: Expended
Year: 2004
Field Note:
Expenditures in this category were defined better, making them fit into other categories listed.
11. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AdminExpended
Row Name: Administration
Column Name: Expended
Year: 2005
Field Note:
Some applicable expenditures were excluded from the FFY 05 Budget.
12. **Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: AdminExpended

Row Name: Administration
Column Name: Expended
Year: 2004
Field Note:
Several administrative positions were vacant during this time period.

FIELD LEVEL NOTES**1. Section Number:** Main**Field Name:** calls_2**Row Name:** Number of calls received On the State MCH Hotline This reporting period**Column Name:** FY**Year:** 2005**Field Note:**

Several factors have played a role in the decreasing number of calls.

1. Increased internet access permits those seeking information to obtain contact information online and call programs directly.

2. Program brochures and resource materials contain contact information therefore those seeking assistance are more likely to call the program directly.

3. Restriction on travel result in staff being in their office to receive calls reducing the number of attempts, by someone seeking information, to reach the program.

4. The merger into the new DHHS resulted in an improved process for accessing DHHS programs resulting in fewer calls to the MCH line to locate other programs.

FORM 10
TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2007
[SEC. 506(A)(1)]
STATE: ME

1. State MCH Administration:
(max 2500 characters)

The Title V Program is administered through the Division of Family Health in the Maine Center for Disease Control (formerly the Bureau of Health) within the Department of Health and Human Services. Programs included in Title V are: Oral Health, Maine Injury Prevention Program, Teen and Young Adult Health, Children with Special Health Needs, Genetics, State Systems Development Initiative, MCH Nutrition, Public Health Nursing, Healthy Families, Women, Infants and Children, and Medical and Epidemiology Consultation.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 3,507,117
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 13,704,352
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 0
7. Program Income (Line 6, Form 2)	\$ 0
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 17,211,469

9. Most significant providers receiving MCH funds:

Family Planning Association of Maine
Public Health Nursing
Children with Special Health Needs
School-Based Health Centers

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	13,733
b. Infants < 1 year old	13,733
c. Children 1 to 22 years old	91,019
d. CSHCN	1,311
e. Others	0

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

School-Based Health Clinics (SBHC), administered by the Teen and Young Adult Health Program represent an excellent example of improved health care access through existing institutions. The Division focus continues to be to increase the number of clinics available as well as expand the scope of these programs, capitalizing on the opportunity to reach this underserved population. A state level advisory group functions to explore opportunities and increase awareness to ensure on-going funding for SBHCs. The Women, Infant and Children (WIC) Program, in collaboration with MCH Nutrition and Public Health Nursing, is encouraging breastfeeding and developing systems of support for breastfeeding women. More than 50% of mothers are breastfeeding at hospital discharge. A broad approach focusing on hospitals, as well as developing systems of support are being employed in order to substantially increase the incidence and duration of breastfeeding.

b. Population-Based Services:
(max 2500 characters)

Newborn Bloodspot Screening through the Genetics Program has proved effective in both screening and identifying those with positive results. This was facilitated through the cross match of screening results and birth certificates. The Oral Health Program (OHP) continues to take proven oral health education programs and expand services, as well as data capability. The OHP works with multiple stakeholders (state and non-governmental agencies) to increase access to dental care/services. The Public Health Nursing (PHN) Program provides surveillance of all Sudden Infant Death Syndrome (SIDS) events in the state. Across the state, public health nurses respond to all cases identified as a possible SIDS death offering support and follow up services to families and individuals. During 2005 and 2006, the Family Health Division laid the groundwork to establish a Maternal Infant Mortality and Resiliency Review. Infant deaths classified as SIDS will be included in the cases reviewed.

c. Infrastructure Building Services:
(max 2500 characters)

Activities related to the Birth Defects Program were scaled back slightly as our CDC application to support these activities was approved but not funded. Data collection and review continue until we can garner additional funds to carry out other activities previously outlined. Health care providers are required to report on 18 selected conditions identified at birth or through ongoing health evaluations. Through a Substance Abuse and Mental Health Services Administration (SAMHSA) Grant, the Maine Injury Prevention Program continues to build infrastructure at the school and community level to address the prevention of youth suicide.

Field Level Notes**1. Section Number:** Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2005**Field Note:**

The data reported in 2005 are pre-populated with the data from 2004 for this performance measure.

The 2005 indicator 62.8 % is the value for Maine from the the first National CSHCN Survey carried out in 2001. It is comparable to the national indicator of 57.5%. An objective of 75% is projected for 2007 when data become available from the second administration of the survey.

The indicators for 1998 to 2001 are NOT percentages. They reflect the average score (on a 0 to 18 point scale) of a family participation questionnaire. The method for determining the score changed in 2000 so that parents themselves answered the questionnaire. This represents a more accurate measure of parental involvement in the CSHN Program.

2. Section Number: Performance Measure #2**Field Name:** PM02**Row Name:****Column Name:****Year:** 2004**Field Note:**

The 2004 indicator 62.8 % is the value for Maine from the the first National CSHCN Survey carried out in 2001. It is comparable to the national indicator of 57.5%. An objective of 75% is projected for 2007 when data become available from the second administration of the survey.

The indicators for 1998 to 2001 are NOT percentages. They reflect the average score (on a 0 to 18 point scale) of a family participation questionnaire. Field Level Notes**1. Section Number:** Performance Measure #3**Field Name:** PM03**Row Name:****Column Name:****Year:** 2005**Field Note:**

The data reported in 2005 are pre-populated with the data from 2004 for this performance measure.

The 2005 indicator of 60% is the value for Maine from the first National CSHCN Survey in 2001. This is higher than the national measure of 52.6 %. An objective of 72% is projected for 2007 when data from the next administration of the survey become available.

The percentages for 1998 to 2001 refer to the original NPM # 3. For 1998 the numerator and denominator were based on estimates from the 1992 National Health Information Survey (NHIS), adjusted for Maine. From 1999-2001, the CSHN Program used an 18% prevalence rate based on the work of Paul Newacheck.

2. Section Number: Performance Measure #3**Field Name:** PM03**Row Name:****Column Name:****Year:** 2004**Field Note:**

The 2004 indicator of 60% is the value for Maine from the first National CSHCN Survey in 2001. This is higher than the national measure of 52.6 %. An objective of 72% is projected for 2007 when data from the next administration of the survey become available.

Denominator					

Field Level Notes**1. Section Number:** Performance Measure #7**Field Name:** PM07**Row Name:****Column Name:****Year:** 2005**Field Note:**

2005 data are not yet available.

The indicator of 80% is being maintained for the following reasons. Maine is beginning to approach the years when the impact of the focus of program resources in the late 1990's from provider education to the development of an immunization registry is being seen in lower immunization rates. We are also hearing anecdotally about increased parental concern around immunization and the perceived correlation with autism. In addition, with the increasing cost of immunizations coupled with flat state and federal budgets we anticipate this will have an impact on our immunization rates in the coming years.

2. Section Number: Performance Measure #7**Field Name:** PM07**Row Name:****Column Name:****Year:** 2004**Field Note:**

Percent of 19 to 35 month olds who have received full schedule of age appropriate immunizations against Measles, Mumps, Rubella, Polio, Diphtheria, Tetanus, Pertussis, Haemophilus Influenza, and Hepatitis B.

Reporting for 1998-2004 is based on the National Immunization Survey 4:3:1:3:3 series. (Note: The 2002 and 2003 indicators were corrected for the FY06 block grant application; the values reported in prior applications were incorrect.)

3. Section Number: Performance Measure #7**Field Name:** PM07**Row Name:****Column Name:****Year:** 2003**Field Note:**

Percent of 19 to 35 month olds who have received full schedule of age appropriate immunizations against Measles, Mumps, Rubella, Polio, Diphtheria, Tetanus, Pertussis, Haemophilus Influenza, and Hepatitis B.

Reporting for 1998-2003 is based on the National Immunization Survey 4:3:1:3:3 series. The 2003 indicator of 78.6% for Maine is not statistically significantly different from the national value of 79.4%. (Note: The 2002 and 2003 indicators were corrected for the FY06 block grant application; the values reported in prior applications were incorrect.)

PERFORMANCE MEASURE # 08

The rate of birth (per 1,000) for teenagers aged 15 through 17 years.

	<u>Annual Objective and Performance Data</u>

Field Level Notes**1. Section Number:** Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2005**Field Note:**

Percent of third grade children who have received protective sealants on at least one permanent molar tooth.

The 2005 indicator reflects 3rd grade data from the 2003-2004 Maine Child Health Survey. Data were not weighted due to a low response rate (17.6% for kindergarten and 3rd grade combined). A total of 1234 3rd graders participated in the survey; sealant status was not obtained for 111 (9.0%) of these children. The results reported here are for the 1123 children for whom sealant status was known. Due to the low response rate and high percentage of missing sealant statuses, the results should not be considered generalizable to all 3rd graders in Maine.

The 2001-2003 indicators reflect the percentage of Medicaid-eligible children ages 8 to 9 years who had at least one sealant placed on a permanent tooth. Of note is that the procedural coding by dental offices is inconsistent. This influences the ability to determine how many children received sealants (Code D1351) and may partly explain the variation from 2002 to 2003. The data does not include children who received dental care through a provider approved for claims bundling such as a federally qualified health center (FQHC) or a rural health center (RHC). The result is an under reporting of children insured through MaineCare who receive any dental services including sealants. The reduction from 2002 to 2003 may also be due to increased number of dental provider organizations that were approved for claims bundling.

Prior to 2001, the indicators for this objective came from the 1999 Smile Survey.

The Maine Child Health Survey of kindergartners and third graders will be conducted again in 2006-2007.

2. Section Number: Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2004**Field Note:**

Percent of third grade children who have received protective sealants on at least one permanent molar tooth.

The 2004 indicator reflects 3rd grade data from the 2003-2004 Maine Child Health Survey. Data were not weighted due to a low response rate (17.6% for kindergarten and 3rd grade combined). A total of 1234 3rd graders participated in the survey; sealant status was not obtained for 111 (9.0%) of these children. The results reported here are for the 1123 children for whom sealant status was known. Due to the low response rate and high percentage of missing sealant statuses, the results should not be considered generalizable to all 3rd graders in Maine.

The 2001-2003 indicators reflect the percentage of Medicaid-eligible children ages 8 to 9 years who had at least one sealant placed on a permanent tooth. Of note is that the procedural coding by dental offices is inconsistent. This influences the ability to determine how many children received sealants (Code D1351) and may partly explain the variation from 2002 to 2003. The data does not include children who received dental care through a provider approved for claims bundling such as a federally qualified health center (FQHC) or a rural health center (RHC). The result is an under reporting of children insured through MaineCare who receive any dental services including sealants. The reduction from 2002 to 2003 may also be due to increased number of dental provider organizations that were approved for claims bundling.

Prior to 2001, the indicators for this objective came from the 1999 Smile Survey.

3. Section Number: Performance Measure #9**Field Name:** PM09**Row Name:****Column Name:****Year:** 2003**Field Note:**

The indicator of 34.1 in calendar year 2002 and 22.7 in calendar year 2003 is the percent of Medicaid eligible children ages 8 to 9 years of age who had at least one sealant placed on a permanent tooth. Of note is that the procedural coding by dental offices is inconsistent. This influences the ability to determine how many children received sealants (Code D1351) and may partly explain the variation from 2002 to 2003. The data does not include children who received dental care through a provider approved for claims bundling such as a federally qualified health center (FQHC) or a rural health center (RHC). The result is an under reporting of children insured through MaineCare who receive any dental services including sealants. The reduction from 2002 to 2003 may also be due to increased number of dental provider organizations that were approved for claims bundling. Prior to 2001, the indicators for this objective came from the 1999 Smile Survey. Due to the infrequency of the Smile Survey, we chose the Medicaid population for this indicator.

PERFORMANCE MEASURE # 10

The rate of deaths to children aged 14 years and younger caused by motor vehicle crashes per 100,000 children.

	<u>Annual Objective and Performance Data</u>				
	2001	2002	2003	2004	2005

Field Level Notes**1. Section Number:** Old Performance Measure #11**Field Name:** PM11R07**Row Name:****Column Name:****Year:** 2005**Field Note:**

Percentage of mothers who breastfeed their infants at hospital discharge.

Indicator is based on feeding method noted on newborn bloodspot filter papers. Beginning in 2004, the indicator reflects those newborns for whom feeding method was known. In 2005, feeding method was known for 13,450 (95.7%) of the 13,988 occurrent births.

2. Section Number: Old Performance Measure #11**Field Name:** PM11R07**Row Name:****Column Name:****Year:** 2004**Field Note:**

Percentage of mothers who breastfeed their infants at hospital discharge.

Indicator is based on feeding method noted on newborn bloodspot filter papers. Beginning in 2004, the indicator reflects those newborns for whom feeding method was known. In 2004, feeding method was known for 13,122 (95.7%) of the 13,709 occurrent births.

3. Section Number: Old Performance Measure #11**Field Name:** PM11R07**Row Name:****Column Name:****Year:** 2003**Field Note:**

The indicators of 60.5 and 60.1 are for calendar years 2002 and 2003 respectively. The rate reflects exclusively breastfed newborns at hospital discharge. This figure does not include the infants who were breast and bottle fed. The data source is the bloodspot filter paper newborn screening specimen. Thus, the denominator is the number of births that take place in Maine. The indicator shows a slight decrease from prior years. While Maine's rates are lower than those of some other states, many of those states do not report using a measure of exclusive breastfeeding.

PERFORMANCE MEASURE # 12

Percentage of newborns who have been screened for hearing before hospital discharge.

<u>Annual Objective and Performance Data</u>					
	2001	2002	2003	2004	2005
Annual Performance Objective	82	92	95	75	90

Field Level Notes**1. Section Number:** Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2005**Field Note:**

For 2003 and prior years, this indicator reflected the percentage of newborns who had *access* to a hearing screen before hospital discharge. Beginning in 2004, the indicator reflects the percentage of newborns that were actually screened.

The 2005 estimate includes all hospitals.

2. Section Number: Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2004**Field Note:**

For 2003 and prior years, this indicator reflected the percentage of newborns who had *access* to a hearing screen before hospital discharge. Beginning in 2004, the indicator reflects the percentage of newborns that were actually screened. The 89.1% indicator for 2004 is, however, an underestimate, since the two largest hospitals did not fully capture data during the transition to the new electronic reporting system. It is estimated that the true percentage of newborns screened was approximately 97%. (It is assumed that the remaining 3% were the result of parental refusal, home births not screened, or infants who died before screening.)

3. Section Number: Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2003**Field Note:**

Please note that the measure reported here is the percentage of newborns who have access to a hearing screen before hospital discharge.

The indicator of 98.4 % is for the calendar year 2003. No data are available until 1997. The data from 1997-2003 represent the percent of newborns who had ACCESS to screening, not the percent of newborns actually screened. The increasing percentage of newborns who had ACCESS reflects increases in the number of hospitals that have screening equipment in place. By 2004, we will be able to assess the actual percentage of newborns screened. Objectives for 2002 and 2003 are based on access. The subsequent objectives for 2004-2007 reflect reasonable estimates for the percentage of infants who actually will be screened.

PERFORMANCE MEASURE # 13

Percent of children without health insurance.

<u>Annual Objective and Performance Data</u>

Field Level Notes**1. Section Number:** Performance Measure #13**Field Name:** PM13**Row Name:****Column Name:****Year:** 2005**Field Note:**

2005 data not yet available

The indicator of 10% reflects anticipated future trends. Insurance rates have been increasing with the result that families are being asked to assume larger co-pays and deductibles. Anecdotal information suggests families are beginning to drop their insurance coverage as a result of higher out of pocket expenses. We anticipate these external forces will create the likelihood of increased uninsured rates in future years.

2. Section Number: Performance Measure #13**Field Name:** PM13**Row Name:****Column Name:****Year:** 2004**Field Note:**

Percent of children without health insurance.

The 2004 indicator reflects analysis of 2003-2004 state data from the pooled 2004 and 2005 Current Population Surveys conducted by the Kaiser Family Foundation and reported on the statehealthfacts.org Web site. The indicator is for children aged 18 years and under.

Our objective of 10 % by 2009 is influenced by persisting economic uncertainty mixed with anticipated benefits from Maine's new health care reform, Dirigo Health Plan.

3. Section Number: Performance Measure #13**Field Name:** PM13**Row Name:****Column Name:****Year:** 2003**Field Note:**

Percent of children without health insurance.

The 2003 indicator reflects analysis of 2002-2003 state data from the pooled 2003 and 2004 Current Population Surveys conducted by the Kaiser Family Foundation and reported on the statehealthfacts.org Web site. The indicator is for children aged 18 years and under.

2002: Indicator is derived from the Maine Child Health Survey for kindergarten age children. Interestingly, the 6.7 % estimated uninsured kindergartners from the Maine Child Survey sample is close to the 5.9 % of children birth to 5 estimated to be uninsured from a Year 2000 survey titled, "Health Insurance Coverage Among Maine's Children" (Ormand C., Salley S., Kilbreth E., 2000).

1999-2001: Indicators derived from random telephone surveys carried out by Mathematica in partnership with the Muskie School of Public Service at the University of Southern Maine.

Our objective of 10 % by 2009 is influenced by persisting economic uncertainty mixed with anticipated benefits from Maine's new health care reform, Dirigo Health Plan.

PERFORMANCE MEASURE # 14

Percentage of children, ages 2 to 5 years, receiving WIC services with a Body Mass Index (BMI) at or above the 85th percentile.

Please fill in only the Objectives for the above years. Numerator, Denominator and Annual Indicators are not required for future year data.

Field Level Notes**1. Section Number:** State Performance Measure #1**Field Name:** SM1**Row Name:****Column Name:****Year:** 2005**Field Note:**

2005 PRAMS data are not yet available. The 2004 data are used as an estimate for 2005.

Please note that the estimate for 2003 was changed from 59.2 to 50.7 when it was discovered that previous data had been provided for women less than 25 years of age instead of 24 years of age. The 2003 and 2004 data reflect unintended pregnancies among those under age 24. We could not change the values prior to 2003.

2. Section Number: State Performance Measure #1**Field Name:** SM1**Row Name:****Column Name:****Year:** 2004**Field Note:**

The data source for this measure is the Pregnancy Risk Assessment Monitoring System (PRAMS). PRAMS data are weighted, therefore the numerator and denominator for this measure are not entered.

3. Section Number: State Performance Measure #1**Field Name:** SM1**Row Name:****Column Name:****Year:** 2003**Field Note:**

The percent of unintended births in women less than 24 years of age. The data source for the 2003 indicator is the 2003 PRAMS survey (Maine data).

This estimate was changed in the FY2007 block grant when it was determined that the data presented incorrectly reflected unintended pregnancies to women less than age 25 (not age 24 as the measure reflects).

STATE PERFORMANCE MEASURE # 2

The percentage of 0-11 month old children enrolled in WIC who were ever breastfed.

	<u>Annual Objective and Performance Data</u>

Field Level Notes

1. **Section Number:** Outcome Measure 1
Field Name: OM01
Row Name:
Column Name:
Year: 2005
Field Note:
 2005 infant mortality data not yet available.

2. **Section Number:** Outcome Measure 1
Field Name: OM01
Row Name:
Column Name:
Year: 2004
Field Note:
 The infant mortality rate per 1,000 live births.

The 2004 indicator is the 5-year average for 2000-2004. Due to the small number of infant deaths, we report a 5-year moving average in order to control for potential large year-to-year random variation.

3. **Section Number:** Outcome Measure 1
Field Name: OM01
Row Name:
Column Name:
Year: 2003
Field Note:
 The infant mortality rate per 1,000 live births.

The 2003 indicator is the 5-year average for 1999-2003. Due to the small number of infant deaths, we report a 5-year moving average in order to control for potential large year-to-year random variation.

OUTCOME MEASURE # 02

The ratio of the black infant mortality rate to the white infant mortality rate.

Annual Objective and Performance Data					
	2001	2002	2003	2004	2005
Annual Performance Objective	1	1	1	1	1
Annual Indicator	2.2	2.6	2.4	2.6	
Numerator	11.9	13.1	12	12.8

FIELD LEVEL NOTES

1. **Section Number:** Main
Field Name: Question4
Row Name: #4. Family members are involved in service training of CSHCN staff and providers.
Column Name:
Year: 2007
Field Note:
The Family Advisory Council remains concerned that family members are not utilized as consultants or provide in-service training to staff. With the merger of the CSHN and Genetics Program we anticipate increased opportunities for families to provide training. The newly merged program will explore ways for families to provide more intensive training to staff and/or other health professionals.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: ME FY: 2007

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Improve Birth Outcomes
2. Improve the safety of the MCH population, including the reduction of intentional and unintentional injuries
3. Improve the respiratory health of the MCH population
4. Increase the proportion of the MCH population who are at a healthy weight and physically active
5. Improve the mental health system of services and supports for the MCH population
6. Foster conditions to improve oral health services and supports for the MCH population
7. Foster the conditions that enable the CSHN Program to move from a direct care focus to a community-based system of care that enables the whole CSHN population to achieve optimal health
8. Foster conditions to expand the medical home model to a comprehensive health home system for the entire MCH population
9. Improve cultural and linguistic competence within the system of services for the MCH population
10. Integrate existing services and supports for adolescents and young adults into a comprehensive system that draws upon their own strengths and needs

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: ME

SP # 1

PERFORMANCE MEASURE:

The percentage of births in women less than 24 years of age that are unintended.

STATUS:

Active

GOAL

To reduce the incidence of unintended pregnancy in women <24 years of age.

DEFINITION

Numerator:

Number of women <24 surveyed through Pregnancy Risk Assessment Monitoring System (PRAMS) who indicate that just before they got pregnant, they either wanted to be pregnant later or did not want to be pregnant then or anytime in the future.

Denominator:

Number of pregnant women <24 surveyed through PRAMS

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

Increase the proportion of pregnancies among 15-44 year olds that are intended to 70%.

DATA SOURCES AND DATA ISSUES

PRAMS

SIGNIFICANCE

All children should be wanted and loved. Women, particularly women in poverty and adolescents are more likely to experience difficulty raising a child. Their pregnancies are more likely to be high risk. They are more likely to need public assistance, and less likely to obtain appropriate health care for themselves and their children. Providing assurance that pregnancies can occur when families are prepared and desirous of children may help improve health outcomes. We have made great strides in reducing unintended pregnancies in the 15 to 17 year olds. We have made the least improvement in youth 18- 19 years and 20 to 24 years of age. Attention needs to focus on the later two groups.

SP # 2

PERFORMANCE MEASURE:

The percentage of 0-11 month old children enrolled in WIC who were ever breastfed.

STATUS:

Active

GOAL

To obtain the benefits for infants from breastfeeding for at least the first year of life (per AAP and LaLeche recommendations); including nutritional, immunologic and psychosocial benefits. Initiation of breastfeeding is a shared goal of the USDA. Increasing initiation rates is the first step toward attaining the one year goal. Once initiation increases, we will change to a six-month breastfeeding measure.

DEFINITION

Numerator:

Number of infants enrolled in WIC who were born during the reporting period who were ever breastfed.

Denominator:

Number of infants enrolled in WIC who were born during the reporting period.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Increase proportion of mothers who breastfeed their babies during early postpartum period to 75%.

DATA SOURCES AND DATA ISSUES

PedNSS (which is 100% WIC data in Maine)

SIGNIFICANCE

Breastfed infants have as much as 60% fewer visits to the doctor in the first year of life due to improved immunity and nutritional status. Studies also indicate that the maternal-infant bonding of breastfeeding promote security and may reduce the incidence of child abuse. The Maine WIC program has incentives in place to encourage WIC agencies to increase breastfeeding initiation among their clients.

SP # 3

PERFORMANCE MEASURE:

The motor vehicle death rate per 100,000 among children 15 to 21 years of age

STATUS:

Active

GOAL

To reduce the rate of mortality due to motor vehicle related injuries among children ages 15 to 21.

DEFINITION

Numerator:

Number of motor vehicle related injury deaths among children 15 to 21 years of age.

Denominator:

Number of children aged 15 to 21.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Numerator: Death certificates (Maine Office of Data, Research and Vital Statistics) Denominator: Population file (Maine Office of Data, Research and Vital Statistics)

SIGNIFICANCE

Motor vehicle related injuries are the leading cause of death among children age 15 to 21. This also serves as a proxy measure for associated high risk behaviors resulting in primarily unintentional injuries. Multiple interventions should impact positively upon this measure, including license restrictions and education focused upon substance abuse and injury prevention.

SP # 4

PERFORMANCE MEASURE:

The percentage of high school students (grades 9-12) who are overweight

STATUS:

Active

GOAL

To reduce the prevalence of overweight among high school students.

DEFINITION

Numerator:

Number of high school students (grades 9-12) who have a BMI for age > 95th percentile. BMI= Body Mass Index (weight (kg)/height squared (m))

Denominator:

Number of high school students

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

Reduce proportion of children/adolescents (ages 12-19) who are overweight or obese to 5%.

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey (YRBS) (grades 9-12); self-reported height and weight.

SIGNIFICANCE

Overweight and obesity are major public health issues and risk factors for several chronic disease. National data show that the percentage of young people who are overweight has more than doubled in the past 30 years.

SP # 5

PERFORMANCE MEASURE:

The percentage of high school students (grades 9-12) who feel like they matter to people in their community.

STATUS:

Active

GOAL

To obtain the benefits of improving adolescent attachment to their communities including improved self-esteem, decreased suicide ideation, and improved school performance.

DEFINITION

Numerator:

Number of high school students (grades 9-12) who report that they "agree" or "strongly agree" that they matter to people in their community.

Denominator:

Number of high school students in the State of Maine

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey (YRBS) (grades 9-12)

SIGNIFICANCE

This measure was selected based on our desire to look at strengths and not just deficits. It is based in the Search Institute's knowledge regarding the relationship between increased youth assets and decreased risk behavior. Vermont has monitored 5 assets of youth strength for several years and using this indicator moves us toward a shared regional measure. The question was first asked in Maine in the 2005 YRBS.

SP # 6

PERFORMANCE MEASURE:

The percentage of elementary schools that have developed and implemented a comprehensive approach to the prevention of bullying in collaboration with the Maine Injury Prevention Program.

STATUS:

Active

GOAL

To increase the number of schools in the state that are providing a comprehensive approach to reduce the detrimental effects of peer victimization among elementary school students.

DEFINITION

Numerator:

The cumulative number of elementary schools in the State that have developed and implemented a comprehensive approach to bullying prevention to date, in collaboration with the Maine Injury Prevention Program.

Denominator:

The number of elementary schools in the State of Maine.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Maine Injury Prevention Program

SIGNIFICANCE

The MCHB is focusing attention on decreasing bullying in youth 9 through 14 years of age. Bullying often leads to other violent behavior or actions that result in increased morbidity and mortality. The Maine Injury Prevention Program is already directing resources (human and financial) on reducing bullying. Focusing on elementary schools supports changes in behavior at an earlier stage and has the ability to reduce morbidity and mortality related to intentional injury.

SP # 7

PERFORMANCE MEASURE:

The rate per 1000 of emergency department visits for asthma among women ages 15-44.

STATUS:

Active

GOAL

To improve the management of asthma among women of childbearing age to reduce the need for emergency services.

DEFINITION

Numerator:

Number of emergency department visits among women ages 15-44 (Maine residents) for which the principal diagnosis is asthma (439.0-439.9).

Denominator:

The number of women ages 15-44 residing in the State of Maine.

Units: 1000 **Text:** 2

HEALTHY PEOPLE 2010 OBJECTIVE

Reduce hospital emergency department visits for asthma.

DATA SOURCES AND DATA ISSUES

Numerator: Emergency Department dataset, Maine Health Data Organization Denominator: Population dataset, Maine Office of Data, Research and Vital Statistics.

SIGNIFICANCE

Data show that asthma is more prevalent among women compared to men and that women are seen in emergency departments for their asthma more often than men. Clinical providers report a high proportion of asthma symptoms in pregnant women. Emergency department use is a way to assess the efficacy of asthma management plans.

SP # 8

PERFORMANCE MEASURE:

The percent of licensed child care centers serving children age birth to five who have on-site health consultation.

STATUS:

Active

GOAL

To increase the number of licensed child care providers serving children age birth through five that receive annual visits from a child care health consultant.

DEFINITION

The number of center-based child care providers licensed by the Maine Office of Child and Family Services who serve children aged birth through six years that receive and least one visit annually from a child health care consultant.

Numerator:

Number of licensed center-based facilities that serve children under six years of age who have received a visit from a child care health consultant in the past year.

Denominator:

Licensed center-based facilities that serve any child under six years of age.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

N/A

DATA SOURCES AND DATA ISSUES

Maine is moving towards requiring all licensed center-based facilities that serve children under age 6 to have a visit from a health care consultant. As part of this process, a pilot project sponsored by the Maine Division of Early Childhood will begin in Maine's Midcoast Region in 2007. This pilot project will facilitate contact between child care centers and health consultants. Also, as part of this pilot, a database will be developed to track health consultant visits. We anticipate that numerator data for this measure from the pilot program will be available in FY08. Results from the pilot project should lead to statewide implementation, which will include an enhanced data system to track the progress of this state performance measure. Denominator data are available from the Maine Office of Child and Family Services, Office of Child Care and Head Start.

SIGNIFICANCE

Child care health consultants play a critical role in promoting healthy and safe child care environments and supporting education for children, their families, and child care providers. This support specifically includes children with special health care needs. Child care health consultants also improve access to preventive health services such as medical and dental homes, early intervention and family support. This measure is consistent with recommendations from the AAP, APHA, and MCHB/HRSA.

The percent Medicaid enrollees whose age is less than one year during the reporting year who received at least one initial periodic screen.

2005 indicator is for Federal Fiscal Year 2005 (10/1/04-9/30/05).

This indicator is problematic. Due to Claims Bundling by Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics, we can not accurately count the number of infants receiving EPSDT procedure codes. There is no way to tell if the service is a periodic screening for infants seen in these settings. All we can do is count whether or not the infant had a claim. The large increase in the numerator in 2000 reflects a greater understanding by Medicaid of what the data means. Specifically, starting in 2000, Medicaid pulled any claim whatsoever, while prior to 2000, it pulled claims by a combination of category of service and procedure codes. The HEDIS methodology of using 11 months of continuous eligibility is not used. The denominator is based on children determined to be Medicaid eligible on a month to month basis. If a child is eligible for any one month, he or she is counted for inclusion. The denominator increased in 2001 primarily due to increased enrollment for the Healthy Maine Prescriptions Rx Program. The Dirigo Health Plan, enacted in 2003, and other state initiatives will hopefully increase this indicator as a result of more people having access to health insurance which includes coverage of preventive health services such as well child checks.

It is difficult to interpret any differences between the 2004 indicator and indicators for prior years due to a change in MaineCare staff calculating this measure; we are uncertain as to whether consistent criteria were used across the years.

2. Section Number: Health Systems Capacity Indicator #02**Field Name:** HSC02**Row Name:****Column Name:****Year:** 2004**Field Note:**

The percent Medicaid enrollees whose age is less than one year during the reporting year who received at least one initial periodic screen.

2004 indicator is for Federal Fiscal Year 2004 (10/1/03-9/30/04).

This indicator is problematic. Due to Claims Bundling by Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics, we can not accurately count the number of infants receiving EPSDT procedure codes. There is no way to tell if the service is a periodic screening for infants seen in these settings. All we can do is count whether or not the infant had a claim. The large increase in the numerator in 2000 reflects a greater understanding by Medicaid of what the data means. Specifically, starting in 2000, Medicaid pulled any claim whatsoever, while prior to 2000, it pulled claims by a combination of category of service and procedure codes. 3. Section Number: Health Systems Capacity Indicator #02**Field Name:** HSC02**Row Name:****Column Name:****Year:** 2003**Field Note:**

The percent Medicaid enrollees whose age is less than one year during the reporting year who received at least one initial periodic screen. (Access)

This indicator is problematic. Due to Claims Bundling by Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics, we can not accurately count the number of infants receiving EPSDT procedure codes. There is no way to tell if the service is a periodic screening for infants seen in these settings. All we can do is count whether or not the infant had a claim. The large increase in the numerator in 2000 reflects a greater understanding by Medicaid of what the data means. Specifically, starting in 2000, Medicaid pulled any claim whatsoever, while prior to 2000, it pulled claims by a combination of category of service and procedure codes. Also, Medicaid changed its reporting time frame from federal fiscal year 2000 (ending 9/30/00) to calendar year 2001, so that data on the last three months of 2000 are not reported in either year. The HEDIS methodology of using 11 months of continuous eligibility is not used. The denominator is based on children determined to be Medicaid eligible on a month to month basis. If a child is eligible for any one month, he or she is counted for inclusion. The denominator increased in 2001 primarily due to increased enrollment for the Healthy Maine Prescriptions Rx Program. The Dirigo Health Plan, enacted in 2003, and other state initiatives will hopefully increase this indicator as a result of more people having access to health insurance which includes coverage of preventive health services such as well child checks.

HEALTH SYSTEMS CAPACITY MEASURE # 03

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

	<u>Annual Indicator Data</u>				
	2001	2002	2003	2004	2005
Annual Indicator	90.9	91.4	62.3	72.0	75.0
Numerator	60	171	71	18	27
Denominator	66	187	114	25	36
Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes**1. Section Number:** Health Systems Capacity Indicator #03**Field Name:** HSC03**Row Name:****Column Name:****Year:** 2005**Field Note:**

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

The 2005 indicator is for federal fiscal year 2005 (10/1/04-9/30/05).

Prior to the development of SCHIP, Maine's Medicaid Program covered infants up to 185% FPL. With the addition of the SCHIP program, coverage was expanded to cover infants between 185% and 200% of FPL. This translates to a small number of infants. Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics are permitted to bundle their Medicaid claims. With claims bundling, the Medicaid agency is unable to specifically count the number of persons receiving EPSDT procedure codes, as there is no way to determine if the service was a periodic screen. We believe this results in under reporting for this indicator. There is a significant drop in the percentage of children less than one year of age receiving at least one periodic screen in CY03. To date, the etiology of the drop has not been determined. In 1999, Medicaid blended SCHIP with Title XIX.

It is difficult to interpret any differences between the 2004 indicator and indicators for prior years due to a change in MaineCare staff calculating this measure; we are uncertain as to whether consistent criteria were used across the years.

2. Section Number: Health Systems Capacity Indicator #03**Field Name:** HSC03**Row Name:****Column Name:****Year:** 2004**Field Note:**

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

The 2004 indicator is for federal fiscal year 2004 (10/1/03-9/30/04).

Prior to the development of SCHIP, Maine's Medicaid Program covered infants up to 185% FPL. With the addition of the SCHIP program, coverage was expanded to cover infants between 185% and 200% of FPL. This translates to a small number of infants. Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics are permitted to bundle their Medicaid claims. With claims bundling, the Medicaid agency is unable to specifically count the number of persons receiving EPSDT procedure codes, as there is no way to determine if the service was a periodic screen. We believe this results in under reporting for this indicator. There is a significant drop in the percentage of children less than one year of age receiving at least one periodic screen in CY03. To date, the etiology of the drop has not been determined. In 1999, Medicaid blended SCHIP with Title XIX.

It is difficult to interpret any differences between the 2004 indicator and indicators for prior years due to a change in MaineCare staff calculating this measure; we are uncertain as to whether consistent criteria were used across the years.

3. Section Number: Health Systems Capacity Indicator #03**Field Name:** HSC03**Row Name:****Column Name:****Year:** 2003**Field Note:**

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

The most recent data is for calendar years 2002 and 2003. Prior to the development of SCHIP, Maine's Medicaid Program covered infants up to 185% FPL. With the addition of the SCHIP program, coverage was expanded to cover infants between 185% and 200% of FPL. This translates to a small number of infants. Rural Health Centers, Federally Qualified Health Centers, and ambulatory hospital based clinics are permitted to bundle their Medicaid claims. HEALTH SYSTEMS CAPACITY MEASURE # 07A

Percent of potentially Medicaid-eligible children who have received a service paid by the Medicaid Program.

	<u>Annual Indicator Data</u>				
	2001	2002	2003	2004	2005
Annual Indicator	76.6	77.2	78.4	81.3	81.6
Numerator	96,256	109,463	118,870	111,523	113,657
Denominator	125,701	141,850	151,651	137,134	139,367
Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes**1. Section Number:** Health Systems Capacity Indicator #07A**Field Name:** HSC07A**Row Name:****Column Name:****Year:** 2005**Field Note:**

Percent of potentially Medicaid-eligible children who have received a service paid by the Medicaid Program.

2005 indicator is for Federal Fiscal Year 2005 (10/1/04-9/30/05). Indicator is for 1-21 year olds.

2. Section Number: Health Systems Capacity Indicator #07A**Field Name:** HSC07A**Row Name:****Column Name:****Year:** 2004**Field Note:**

Percent of potentially Medicaid-eligible children who have received a service paid by the Medicaid Program.

2004 indicator is for Federal Fiscal Year 2004 (10/1/03-9/30/04). Indicator is for 1-20 year olds.

3. Section Number: Health Systems Capacity Indicator #07A**Field Name:** HSC07A**Row Name:****Column Name:****Year:** 2003**Field Note:**

The latest indicators are for calendar year 2002 and 2003. The term "potentially Medicaid eligible" needs to be clarified. Medicaid eligibility is defined as the total number of persons who apply to Medicaid and are found eligible. It does NOT include uninsured persons. The large increase in the numerator from 2000 onward reflects a greater understanding by Medicaid of what the data means. Starting in 2000 the Medicaid agency pulled any claim whatsoever, while prior to 2000 it pulled claims by a combination of category of service and procedure codes. Because FQHCs, RHCs, and ambulatory hospital based practices bundle their claims and do not provide procedure codes, the identification of claims by procedure code was not accurate. The denominator is based on children determined to be Medicaid eligible on a month to month basis, rather than the HEDIS method of using 11 months of continuous eligibility. The denominator had a significant increase in 2001 primarily due to the development of the Healthy Maine Prescriptions Rx Program. Participants in the Healthy Maine Prescriptions Rx Program are only eligible for prescription benefits.

HEALTH SYSTEMS CAPACITY MEASURE # 07B

The percent of EPSDT eligible children aged 6 through 9 years who have received any dental services during the year.

	<u>Annual Indicator Data</u>				
	2001	2002	2003	2004	2005
Annual Indicator	41.7	35.1	35.5	45.4	40.1
Numerator	7,438	10,479	11,330	11,333	7,825
Denominator	17,843	29,817	31,954	24,939	19,534
Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes**1. Section Number:** Health Systems Capacity Indicator #07B**Field Name:** HSC07B**Row Name:****Column Name:****Year:** 2005**Field Note:**

The percent of EPSDT eligible children aged 6 through 9 years who have received any dental services during the year.

2005 indicator is for federal fiscal year 2005 (10/1/04-9/30/05).

It is difficult to interpret any differences between the 2004 indicator and indicators for prior years due to a change in MaineCare staff calculating this measure; we are uncertain as to whether consistent criteria were used across the years.

2. Section Number: Health Systems Capacity Indicator #07B**Field Name:** HSC07B**Row Name:****Column Name:****Year:** 2004**Field Note:**

The percent of EPSDT eligible children aged 6 through 9 years who have received any dental services during the year.

2004 indicator is for federal fiscal year 2004 (10/1/03-9/30/04).

It is difficult to interpret any differences between the 2004 indicator and indicators for prior years due to a change in MaineCare staff calculating this measure; we are uncertain as to whether consistent criteria were used across the years.

3. Section Number: Health Systems Capacity Indicator #07B**Field Name:** HSC07B**Row Name:****Column Name:****Year:** 2003**Field Note:**

The percent of EPSDT eligible children age 6 - 9 years who have received any dental services during the year.

HEALTH SYSTEMS CAPACITY MEASURE # 08

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

		<u>Annual Indicator Data</u>				
	2001	2002	2003	2004	2005	
Annual Indicator	9.3	6.5	9.1	1.1	0.3	
Numerator	262	182	247	30	9	
Denominator	2,820	2,800	2,713	2,776	2,821	
Provisional or Final?				Provisional	Provisional	

Field Level Notes**1. Section Number:** Health Systems Capacity Indicator #08**Field Name:** HSC08**Row Name:****Column Name:****Year:** 2005**Field Note:**

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

This indicator has decreased as the CSHCN program is moving from a direct service program to actively building a community-based system of care. As of July 1, 2005, Maine's CSHN Program is no longer serving clients who receive all of their services through MaineCare (Medicaid). Since the SSI population automatically receive MaineCare, this population has been reduced. The CSHCN program serves only those SSI beneficiaries whose needs cannot be met through MaineCare.

2. Section Number: Health Systems Capacity Indicator #08**Field Name:** HSC08**Row Name:****Column Name:****Year:** 2004**Field Note:**

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

This indicator has decreased as the CSHCN program is moving from a direct service program to actively building a community-based system of care. Also, reductions in staff have given the program an opportunity to prioritize who is receiving direct services and focusing on serving children and youth who have no other source of health insurance. The CSHCN program serves only those SSI beneficiaries whose needs cannot be met through MaineCare (the state's Medicaid program).

3. Section Number: Health Systems Capacity Indicator #08**Field Name:** HSC08**Row Name:****Column Name:****Year:** 2003**Field Note:**

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

We report 9.1 % for calendar year 2003. The increase noted from 1999 to 2000 was due in part to the CSHN Program's effort to vigorously focus on this population for inclusion into the Program. The indicator for 2002 went down due to reduced staffing.

FIELD LEVEL NOTES

1. **Section Number:** Indicator 06 - Medicaid
Field Name: Med_Infant
Row Name: Infants
Column Name:
Year: 2007
Field Note:
Title 19 for infants is up to 185% of FPL.
2. **Section Number:** Indicator 06 - Medicaid
Field Name: Med_Children
Row Name: Medicaid Children
Column Name:
Year: 2007
Field Note:
Medicaid (Title XIX) for children 1 to 5 goes to 150 % FPL, then Title XXI kicks in to 200 % FPL.
Title XIX for children 6 to 18 goes to 133 % FPL, then Title XXI kicks in to 200 % FPL.
3. **Section Number:** Indicator 06 - Medicaid
Field Name: Med_Women
Row Name: Pregnant Women
Column Name:
Year: 2007
Field Note:
Medicaid for pregnant women goes to 185 %, then Title XXI kicks in to 200 % FPL.
4. **Section Number:** Indicator 06 - SCHIP
Field Name: SCHIP_Infant
Row Name: Infants
Column Name:
Year: 2007
Field Note:
Title XIX for infants is up to 185% of FPL. Title XXI covers infants from 186% to 200% of FPL.
5. **Section Number:** Indicator 06 - SCHIP
Field Name: SCHIP_Children
Row Name: SCHIP Children
Column Name:
Year: 2007
Field Note:
Title XXI eligibility for children age range 1 to 5 starts at 151% of FPL.

Title XXI eligibility for children 6 to 18 starts at 134% FPL.
6. **Section Number:** Indicator 06 - SCHIP
Field Name: SCHIP_Women
Row Name: Pregnant Women
Column Name:
Year: 2007
Field Note:
Pregnant women are covered under SCHIP from 186 to 200 % FPL.
7. **Section Number:** Indicator 05
Field Name: LowBirthWeight
Row Name: Percent of ow birth weight (<2,500 grams)
Column Name:
Year: 2007
Field Note:
Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2005.

All: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2005.

Non-Medicaid: Calculated by subtracting the Medicaid number of low birthweight babies from the All number of low birthweight babies and dividing that by the number of All live births minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year), this figure is an rough estimate, rather than an actual value.

Maine's Office of MaineCare Services staff have indicated that there are some concerns about the birth information in the MaineCare data system. Another potential data source for this indicator is the 2004 PRAMS survey, which found that 7.1% of MaineCare births were low birthweight, compared with 4.4% of non-MaineCare births and 5.6% of all births statewide.
8. **Section Number:** Indicator 05
Field Name: InfantDeath
Row Name: Infant deaths per 1,000 live births
Column Name:
Year: 2007
Field Note:
Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2005. MaineCare manually matched the names on a list of infant deaths (provided by the Office of Data, Research and Vital Statistics at the Maine Bureau of Health) against the MaineCare database. A child was considered to be in the Medicaid population if either the child was enrolled in MaineCare or the child's mother was "full MaineCare eligible" on the child's birth date.

All: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2004. 2005 mortality data are not yet available.

Non-Medicaid: Calculated by subtracting the Medicaid number of infant deaths from the All number of infant deaths and dividing that by the number of All live births minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year), this figure is an rough estimate, rather than an actual value.
9. **Section Number:** Indicator 05
Field Name: CareFirstTrimester
Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester

Column Name:**Year:** 2007**Field Note:**

Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2005.

All: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2005.

Non-Medicaid: Calculated by subtracting the Medicaid number of infants born to pregnant women receiving prenatal care starting in the first trimester from the All number of infants born to pregnant women receiving prenatal care beginning in the first trimester and dividing that by the number of All live births minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year), this figure is an rough estimate, rather than an actual value.

Office of MaineCare Services staff have indicated that there are some concerns about the birth information in the MaineCare data system. Another potential data source for this indicator is the 2004 PRAMS survey, which found that 89.2% of women enrolled in MaineCare received prenatal care during the first trimester, compared with 94.6% of women who were not enrolled in MaineCare and 92.3% of women statewide.

10. Section Number: Indicator 05**Field Name:** AdequateCare**Row Name:** Percent of pregnant women with adequate prenatal care**Column Name:****Year:** 2007**Field Note:**

Data sources:

Medicaid: Data are from the Office of MaineCare Services, using the MaineCare data system, and are for federal fiscal year 2005. The statistic is calculated including all births. It is not restricted to only women age 15-44.

All: Data are from the Office of Data, Research and Vital Statistics, Maine CDC, using birth certificate files, and are for calendar year 2005. Data are restricted to only those age 15-44.

Non-Medicaid: Calculated by subtracting the Medicaid number of pregnant women with adequate prenatal care from the All number of pregnant women with adequate prenatal care and dividing that by the number of All women giving birth minus the number of Medicaid live births. Due to the different time periods for which data were available from these two sources (federal fiscal year vs. calendar year) and slightly different denominators (women giving birth vs. live births; age differences), this figure is an rough estimate, rather than an actual value.

Office of MaineCare Services staff have indicated that there are some concerns about the birth information in the MaineCare data system. As such, we also present the following values from the 2004 PRAMS survey:

"Medicaid" population: 86.1%

"Non-Medicaid" population: 90.5%

"All" population: 88.3%

(Note: For the PRAMS analysis, a woman was considered to be in the "Medicaid" population if she reported that she was enrolled in Medicaid/MaineCare just before pregnancy or that Medicaid/MaineCare was one of the payers for her prenatal care or delivery.)

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: ME

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	2	No
Annual linkage of birth certificates and WIC eligibility files	1	No
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: ME

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other: Maine Youth Drug and Alcohol Drug Survey	3	Yes

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

FIELD LEVEL NOTES

1. **Section Number:** Indicator 09A
Field Name: BAD
Row Name: Annual linkage of infant birth and infant death certificates
Column Name:
Year: 2007
Field Note:
Access to this data is via the Office of Data, Research and Vital Statistics in the Maine CDC.
2. **Section Number:** Indicator 09A
Field Name: BAW
Row Name: Annual linkage of birth certificates and WIC eligibility files
Column Name:
Year: 2007
Field Note:
We plan to conduct the first linkage of birth certificates and WIC eligibility files in 2006. The initial linkage will cover the 1999-2003 birth cohorts.
3. **Section Number:** Indicator 09A
Field Name: BAN
Row Name: Annual linkage of birth certificates and newborn screening files
Column Name:
Year: 2007
Field Note:
Title V has access to these data through Maine's ChildLink database that links birth certificates to newborn screening, newborn hearing and birth defects data.
4. **Section Number:** Indicator 09A
Field Name: Discharge
Row Name: Hospital discharge survey for at least 90% of in-State discharges
Column Name:
Year: 2007
Field Note:
Data are available to Title V through the Maine Health Data Organization (MHDO). All hospitals in the State are required by legislation to report their data to MHDO.
5. **Section Number:** Indicator 09A
Field Name: BirthDefects
Row Name: Annual birth defects surveillance system
Column Name:
Year: 2007
Field Note:
Mandatory reporting to the Birth Defects Surveillance System began on 5/1/03. As of February 2005, there were 17 reportable defects (primarily cardiac and neural tube defects). Data are available through Maine's ChildLink data system.
6. **Section Number:** Indicator 09A
Field Name: RecentMother
Row Name: Survey of recent mothers at least every two years (like PRAMS)
Column Name:
Year: 2007
Field Note:
Access to this data is via the Office of Data, Research and Vital Statistics in the Maine CDC.
7. **Section Number:** Indicator 09B
Field Name: YRBSS_09B
Row Name: Youth Risk Behavior Survey (YRBS)
Column Name:
Year: 2007
Field Note:
Access to YRBS data is through the Maine Department of Education (DOE). The Maine CDC has a longstanding collaborative relationship with DOE and has access to the electronic database for analysis.
8. **Section Number:** Indicator 09B
Field Name: Other1_09B
Row Name: Other
Column Name:
Year: 2007
Field Note:
The Maine Youth Drug and Alcohol Use Survey (MYDAUS) is administered by the Office of Substance Abuse (OSA). The survey is designed to quantify alcohol, tobacco, and other substance use among Maine middle and high school students and to identify risk and protective factors for these behaviors. The survey is administered in even-numbered years. Epidemiologists working with MCH-related programs at the Maine CDC have direct access to the electronic database for analysis.
9. **Section Number:** Indicator 09A
Field Name: BAM
Row Name: Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files
Column Name:
Year: 2007
Field Note:
Title V can request analyses from MaineCare (the State's Medicaid agency). As part of Maine's SSDI project, we will be collaborating with the Office of MaineCare services to improve access to their data.

Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes

None

HEALTH STATUS INDICATOR MEASURE # 03A

The death rate per 100,000 due to unintentional injuries among children aged 14 years and younger.

		<u>Annual Indicator Data</u>			
	2001	2002	2003	2004	2005
Annual Indicator		6.6	6.9	7.1	7.1
Numerator		80	83	84	
Denominator		1,212,050	1,195,448	1,174,980	
Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes**1. Section Number:** Health Status Indicator #03A

Field Name: HSI03A

Row Name:

Column Name:

Year: 2005

Field Note:

2005 data are not yet available. The 2004 estimate was used for 2005.

2. Section Number: Health Status Indicator #03A

Field Name: HSI03A

Row Name:

Column Name:

Year: 2004

Field Note:

The death rate per 100,000 due to unintentional injuries among children aged 14 years and younger. (Injuries)

HEALTH STATUS INDICATOR MEASURE # 03B

The death rate per 100,000 for unintentional injuries among children aged 14 years and younger due to motor vehicle crashes.

	Annual Indicator Data				
	2001	2002	2003	2004	2005
Annual Indicator		3.1	3.4	3.8	3.8
Numerator		37	41	45	
Denominator		1,212,050	1,195,448	1,174,980	
Provisional or Final?				Provisional	Provisional

Field Level Notes

1. **Section Number:** Health Status Indicator #03B

Field Name: HSI03B

Row Name:

Column Name:

Year: 2005

Field Note:

2005 data are not yet available. TVIS requires that an estimate be entered for 2005; we used the 2004 indicator (which is the average annual rate for 2000-2004) as the 2005 estimate.

2. **Section Number:** Health Status Indicator #03B

Field Name: HSI03B

Row Name:

Column Name:

Year: 2004

Field Note:

The death rate per 100,000 for unintentional injuries among children aged 14 years and younger due to motor vehicle crashes. (Injuries)

Child Motor Vehical Crash Mortality is calculated as a five year average. Thus, the indicator reported for 2004 of 3.8 represents a five year average for 2000-2004

3. **Section Number:** Health Status Indicator #03B

Field Name: HSI03B

Row Name:

Column Name:

Year: 2003

Field Note:

Child Motor Vehical Crash Mortality is calcaulted as a five year average. Thus, the indicator reported for 2002 of 3.1 represents a five year average for 1998-2002.

HEALTH STATUS INDICATOR MEASURE # 03C

The death rate per 100,000 from unintentional injuries due to motor vehicle crashes among youth aged 15 through 24 years.

		<u>Annual Indicator Data</u>			
	2001	2002	2003	2004	2005
Annual Indicator		30.1	28.0	26.1	26.1
Numerator		247	234	223	
Denominator		819,484	835,218	855,693	
Is the Data Provisional or Final?				Provisional	Provisional

Field Level Notes

1. **Section Number:** Health Status Indicator #03C

Field Name: HSI03C

Row Name:

Column Name:

Year: 2005

Field Note:

2005 data are not yet available. TVIS requires that an estimate be entered for 2005, therefore the 2004 estimate, which is a 5-year average rate for 2000-2004 was used as the 2005 estimate.

2. **Section Number:** Health Status Indicator #03C

Field Name: HSI03C

Row Name:

Column Name:

Year: 2004

Field Note:

The death rate per 100,000 from unintentional injuries due to motor vehicle crashes among youth aged 15 through 24 years. (Injuries)

A 5-year average rate is presented for years 2000-2004.

3. **Section Number:** Health Status Indicator #03C

Field Name: HSI03C

Row Name:

Column Name:

Year: 2003

Field Note:

The indicator reported for 2002 of 30.4 represents the moving average for the years 1998-2002.

HEALTH STATUS INDICATOR MEASURE # 04A

The rate per 100,000 of all nonfatal injuries among children aged 14 years and younger.

		Annual Indicator Data			
	2001	2002	2003	2004	2005
Annual Indicator		194.8	195.6	207.4	207.4
Numerator		457	451	469	
Denominator		234,656	230,535	226,178	
Provisional or Final?				Provisional	Provisional

Field Level Notes**1. Section Number:** Health Status Indicator #04A

Field Name: HSI04A

Row Name:

Column Name:

Year: 2005

Field Note:

2005 data are not yet available. TVIS requires that an estimate be entered for 2005; we used the 2004 indicator as the 2005 estimate.

2. Section Number: Health Status Indicator #04A

Field Name: HSI04A

Row Name:

Column Name:

Year: 2004

Field Note:

The rate per 100,000 of all nonfatal injuries among children aged 14 years and younger. (Injuries)

Numerator = # of hospitalizations in 2004 among 0-14 year old Maine residents for which the principal diagnosis is an injury and the patient's disposition is not "expired."

3. Section Number: Health Status Indicator #04A

Field Name: HSI04A

Row Name:

Column Name:

Year: 2003

Field Note:

The rate per 100,000 of all nonfatal injuries among children aged 14 years and younger. (Injuries)

Numerator = # of hospitalizations among 0-14 year old Maine residents for which the principal diagnosis is an injury and the patient's disposition is not "expired."

HEALTH STATUS INDICATOR MEASURE # 04B

The rate per 100,000 of nonfatal injuries due to motor vehicle crashes among children aged 14 years and younger.

		Annual Indicator Data			
	2001	2002	2003	2004	2005
Annual Indicator		23.4	17.8	20.3	20.3
Numerator		55	41	46	
Denominator		234,656	230,535	226,178	
Provisional or Final?				Provisional	Provisional

Field Level Notes

1. **Section Number:** Health Status Indicator #04B

Field Name: HSI04B

Row Name:

FORM NOTES FOR FORM 21

Health Status Indicator 6A/6B:

Source: US Census Bureau as of July 1, 2004

Health Status Indicator 7A/7B:

Data Source: Maine Office of Data, Research and Vital Statistics

Age was unknown for one birth to a white non-Hispanic woman and one birth to a non-Hispanic black women.

Health Status Indicator 8A/8B:

Data Source: Maine Office of Data, Research and Vital Statistics

2005 mortality data not yet available.

Health Status Indicators 9A / 9B:

- Readers should be very cautious when comparing numbers on the "All children 0 through 19" line with the numbers for any given program due to the following reasons:
 - a) The "All children" numbers (obtained from the U.S. Census Bureau) use a different set of race categories than that used by most programs. As such, a given child could be counted in different race categories on different lines of the form. For example, a child whose mother was white and whose father was black would be included in the "More than one reported" category on the "All children" line, but might be included in the "Black or African American" category on the "Number enrolled in Medicaid" line. (This likely is a major part of the explanation why there appear to be more Black or African children enrolled in the Medicaid program than are living in the state.)
 - b) Race is unknown for a large proportion of the children in certain programs.
 - c) The "All children" numbers are estimates; the program numbers are actual counts.
 - d) The "All children" numbers are as of July 1, 2004; many of the program numbers are from other time periods.
 - e) The "All children" numbers are for 0-19 year olds; the WIC numbers are for 0-4 year olds.
- We strongly recommend that readers do not calculate percentages using the "All children" numbers as the denominator.

Health Status Indicator 10:

- Numbers presented here are estimates for 2004. They were derived by determining the proportion of the Maine population (all ages) that lived in each type of geographic area as of the 2000 Census and applying those proportions to the estimated Maine 0-19 year old population for 2004.
- Frontier: Defined as Piscataquis County (i.e., the only frontier county in the state)
- Metropolitan: Defined as the Bangor, Lewiston-Auburn, and Portland New England County Metropolitan Areas (as defined in the 2000 Census)

Health Status Indicator 11:

Data Source: Current Population Survey, 2005

Health Status Indicator 12:

Data Source: Current Population Survey, 2005

FIELD LEVEL NOTES

1. **Section Number:** Indicator 09A
Field Name: HSIRace_Children
Row Name: All children 0 through 19
Column Name:
Year: 2007
Field Note:
Data Source: US Census Bureau estimates as of July 1, 2004

2. **Section Number:** Indicator 09A
Field Name: HSIRace_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2007
Field Note:
Data Source: Current population survey, 2005

Data on race and ethnicity were not available for this item.

3. **Section Number:** Indicator 09A
Field Name: HSIRace_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2007
Field Note:
Counts were obtained from the Maine Bureau of Family Independence for 0-19 year olds in calendar year 2005. These numbers should be viewed as estimates--race was unknown for 19.4% of the 0-19 year old TANF clients.

The Total percent in TANF (Grant) families is an estimate based on numerator data from the Maine Bureau of Family Independence for calendar year 2005 and denominator data from the US Census Bureau for July 1, 2004.

4. **Section Number:** Indicator 09A
Field Name: HSIRace_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2007
Field Note:
Data Source: Office of MaineCare Services

Race and ethnicity data are not collected separately by MaineCare. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are represented in 9B.

5. **Section Number:** Indicator 09A
Field Name: HSIRace_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2007
Field Note:
Data Source: Office of MaineCare Services

Race and ethnicity data are not collected separately by MaineCare. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are represented in 9B.

6. **Section Number:** Indicator 09A
Field Name: HSIRace_FoodStampNo
Row Name: Number enrolled in food stamp program

Column Name:**Year:** 2007**Field Note:**

Data Source: Maine Bureau of Family Independence for 0-19 year olds for calendar year 2005. Race was unknown for 21% of 0-19 year old food stamp clients

7. Section Number: Indicator 09A**Field Name:** HSIRace_WICNo**Row Name:** Number enrolled in WIC**Column Name:****Year:** 2007**Field Note:**

Data from the Maine WIC program for calendar year 2005.

8. Section Number: Indicator 09A**Field Name:** HSIRace_JuvenileCrimeRate**Row Name:** Rate (per 100,000) of juvenile crime arrests**Column Name:****Year:** 2007**Field Note:**

Race and ethnicity data are not currently available for juvenile arrests in Maine.

2005 arrest data were not available. 2004 data are presented here using 2004 census denominator for youth 0-19.

9. Section Number: Indicator 09A**Field Name:** HSIRace_DropOutPercent**Row Name:** Percentage of high school drop-outs (grade 9 through 12)**Column Name:****Year:** 2007**Field Note:**

Percentage of high school drop-outs (grade 9 through 12), by race.

Data are for the 2003-2004 school year. 2004-2005 data were not available.

The Maine Department of Education's data system does not code Hispanic ethnicity separately from race (i.e., "Hispanic" is one of the race categories). Also, the Asian value reported here is for Asian and Pacific Islanders combined.

10. Section Number: Indicator 09B**Field Name:** HSIEthnicity_Children**Row Name:** All children 0 through 19**Column Name:****Year:** 2007**Field Note:**

All children 0 through 19, by Hispanic ethnicity.

2005 data are not yet available; we used the US Census Bureau's July 1, 2004 population estimates for Maine, enumerated by age group and ethnicity, as our estimates for 2005.

11. Section Number: Indicator 09B**Field Name:** HSIEthnicity_SingleParentPercent**Row Name:** Percent in household headed by single parent**Column Name:****Year:** 2007**Field Note:**

Data source: 2005 Current Population Survey

Data on race and ethnicity were not available.

12. Section Number: Indicator 09B**Field Name:** HSIEthnicity_TANFPercent**Row Name:** Percent in TANF (Grant) families**Column Name:****Year:** 2007**Field Note:**

Counts were obtained from the Maine Bureau of Family Independence for 0-19 year olds in calendar year 2005. The Hispanic-ethnicity-specific percentages should be considered estimates on this form because Hispanic ethnicity was unknown for 12% of the 0-19 year old TANF clients.

The estimates are based on numerator data from the Maine Bureau of Family Independence for calendar year 2005 and denominator data from the US Census Bureau for July 1, 2004.

13. Section Number: Indicator 09B**Field Name:** HSIEthnicity_MedicaidNo**Row Name:** Number enrolled in Medicaid**Column Name:****Year:** 2007**Field Note:**

Data Source: Office of MaineCare Services

Race and ethnicity data are not collected separately by MaineCare. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are listed in 9B.

14. Section Number: Indicator 09B**Field Name:** HSIEthnicity_SCHIPNo**Row Name:** Number enrolled in SCHIP**Column Name:****Year:** 2007**Field Note:**

Data Source: Office of MaineCare Services

Race and ethnicity data are not collected separately by MaineCare. Hispanic ethnicity is collected as one of the race categories. Therefore, Hispanics are not included in the race data in indicator 9A, but are represented in 9B.

15. Section Number: Indicator 09B**Field Name:** HSIEthnicity_FoodStampNo**Row Name:** Number enrolled in food stamp program**Column Name:**

Year: 2007
Field Note:
Data Source: Maine Bureau of Family Independence

Data are for calendar year 2005. Ethnicity data were missing for 12.6% of Food Stamp clients ages 0-19.

16. **Section Number:** Indicator 09B
Field Name: HSIEthnicity_WICNo
Row Name: Number enrolled in WIC
Column Name:
Year: 2007
Field Note:
Data Source: Maine WIC Program

17. **Section Number:** Indicator 09B
Field Name: HSIEthnicity_JuvenileCrimeRate
Row Name: Rate (per 100,000) of juvenile crime arrests
Column Name:
Year: 2007
Field Note:
Data are from 2004. 2005 data are not yet available.

Ethnicity data on juvenile arrests are not available in Maine.

18. **Section Number:** Indicator 09B
Field Name: HSIEthnicity_DropOutPercent
Row Name: Percentage of high school drop-outs (grade 9 through 12)
Column Name:
Year: 2007
Field Note:
Percentage of high school drop-outs (grade 9 through 12), by Hispanic ethnicity.

Data are from 2004-2005. The Maine Department of Education does not collect race and Hispanic ethnicity information separately. The "Total Hispanic or Latino" value reported here is for those students for whom race is coded as Hispanic.

19. **Section Number:** Indicator 11
Field Name: S11_50percent
Row Name: Percent Below: 50% of poverty
Column Name:
Year: 2007
Field Note:
This is the percentage for whom poverty status is 0-49% FPL.

20. **Section Number:** Indicator 11
Field Name: S11_100percent
Row Name: 100% of poverty
Column Name:
Year: 2007
Field Note:
This is the percentage of the population for whom poverty status is 0-99% FPL.

21. **Section Number:** Indicator 11
Field Name: S11_200percent
Row Name: 200% of poverty
Column Name:
Year: 2007
Field Note:
This is the percentage of the population for whom poverty status is 0-199%.

22. **Section Number:** Indicator 12
Field Name: S12_50percent
Row Name: Percent Below: 50% of poverty
Column Name:
Year: 2007
Field Note:
This is the percentage of 0-19 year olds for whom poverty status is 0-49% FPL.

23. **Section Number:** Indicator 12
Field Name: S12_100percent
Row Name: 100% of poverty
Column Name:
Year: 2007
Field Note:
This is the percentage of 0-19 year olds for whom poverty status is 0-99% FPL.

24. **Section Number:** Indicator 12
Field Name: S12_200percent
Row Name: 200% of poverty
Column Name:
Year: 2007
Field Note:
This is the percentage of 0-19 year olds for whom poverty status is less than 199% FPL.

25. **Section Number:** Indicator 09A
Field Name: HSIRace_FosterCare
Row Name: Number living in foster home care
Column Name:
Year: 2007
Field Note:
This is the count of children ages 0-19 years who are in the care of the Maine Department of Health and Human Services, where the Department is the court appointed guardian and the children are living in a community foster home (not an institutional setting).

Data are a point-in-time estimate, as of April 1, 2006, rather than for the entire year,

26. **Section Number:** Indicator 09B
Field Name: HSIEthnicity_FosterCare

Row Name: Number living in foster home care

Column Name:

Year: 2007

Field Note:

2005 ethnicity data were unavailable at the time of submittal, but should be available by September 2006.
