

Ball and Roller Bearing Producer Price Indices Selected Years

Bearings are sold as thousands of part numbers through several distribution channels to a variety of end-users. Only about 300 bearing part numbers defining 44 price indexes are used by the Department of Labor to determine the industry's price indexes. The weights assigned these part numbers may not be valid. Bearings are complex assemblies that do not lend themselves to this kind of analysis. Based on discussions with bearing industry and government officials, many conclude that the BLS producer price indexes for the ball and roller bearing industry generally show inflationary increases greater than warranted. Intense price competition within the industry and pressure from major OEM bearing customers reinforce this conclusion, as does the lack of the same degree of inflation in the steel industry, major bearing end-user industries, and in the general U.S. economy. Various objective measures, such as trends in the average values of imported bearings and domestic bearing shipments indicate very little, if any inflation during the past decade. The reader, therefore, is urged to view these indexes with caution.

PAGE	SERIES	BEARING NAME
3	PCU3562#	Ball and roller bearings (ALL)
4	PCU3562#1	Ball bearings, unmounted
5	PCU3562#114	Single row max. capacity ball bearings: annular, including self-aligning: ground or precision
5	PCU3562#116	Double row ball bearings: annular, including self-aligning: ground or precision
6	PCU3562#118	Angular contact ball bearings: annular, including self-aligning; ground or precision
7	PCU3562#122	Other regular single row conrad ball bearings: annular, including self-aligning
8	PCU3562#12203	9 mm. O.D. thru 30 mm. O.D.; ground or precision
