

Appendix F

Abatement Projects in the

Tygart Valley River Watershed

Tygart Valley River Watershed Abandoned Mine Land and Mine Drainage Pollution Treatment and Abatement Projects in Planning, Mapping, Design, Completed and/or Ongoing Phase

<u>Project</u>	<u>County</u>	<u>Status</u>	<u>Costs/Estimated Costs</u>
Austen Highwall, Refuse, & Portals (Raccoon Run)	Preston	Mapping	\$ 952,380.00
Beaver Creek Highwall	Barbour	Completed	\$1,124,845.00
Camp Mahonegan Surface Mines (Middle Fork)	Randolph	Completed	\$ 910,000.00
Coalton School Portals (Roaring Creek)	Randolph	Completed	\$ 47,184.00
Fords Run Refuse & Mining Facility	Barbour	Planning	\$ 631,400.00
Kittle Flats - Phase II (Middle Fork)	Randolph	Design	\$1,738,000.00
Kittle Flats – Phase I	Upshur	Completed	\$1,042,281.00
Left Fork of Little Sandy Creek	Preston	Completed	\$1,450,900.00
Mabie Highwall (Roaring Creek)	Randolph	Planning	\$ 593,120.00
Maple Run Portals	Preston	Mapping	\$ 654,390.00
Upshur Rt 10/15 Portals	Upshur	Completed	\$ 267,942.00
Whitman Flats	Upshur	Completed	\$1,174,839.00

The Special Reclamation Group has completed reclamation of the following bond forfeiture sites in the Tygart Valley River watershed:

<u>Permit No.</u>	<u>Permit Name</u>	<u>Forfeiture Date</u>	<u>County</u>	<u>Receiving Stream</u>
U039300				Moats Hollow of Laurel Cr
P102786	BALAR COAL CO.	11/01/88	BARBOUR	UT Raccoon Ck.
S108786	BEEFSTEAK MINING CO.	06/01/90	PRESTON	UT Raccoon Creek

The Special Reclamation Group is currently applying active chemical treatment at two sites in the Tygart Valley River watershed. The first site is the DLM Mine Complex in Upshur County. Treatment to NPDES technology-based effluent limitations is required through litigation by the West Virginia Highlands Conservancy in 1985. Drainage from the Complex flows into several small tributaries of the Buckhannon River. The second site is the F&M Mine Complex in Preston County. Treatment at this site is a result of litigation by the Laurel Mountain/Fellowsville Area Clean Watershed Association. Treatment to technology-based effluent limitations requirements is the goal but not the requirement at F&M. Drainage from the site flows into the Left Fork of Sandy Creek, Sandy Creek, and then into the Tygart Lake.
