| OU-1  | OT-01<br>OT-08<br>OT-09 | An extensive data review of base records indicated that hazardous materials and wastes were never handled or disposed at these locations. |       |         |         |        |
| <hr/> |                         |   |       |         |         |        |
| OU-1  | OT-10                   | This site lies completely within the boundaries of DP-13.   |       |         |         |        |
| <hr/> |                         |   |       |         |         |        |
| OU-1  | SS-15<br>SS-16<br>ST-19 | These three sites were removed from the superfund process and placed under the ADEQ UST jurisdiction.                                     |       |         |         |        |
| <hr/> |                         |   |       |         |         |        |
| OU-1  | DP-24                   | Removed from the Superfund process because this site was mistakenly included on the list of potentially contaminated sites.               |       |         |         |        |

- [a] n-Hexane is used as a surrogate for comparison to the Region IX PRG. The chromium PRG is based on total chromium carcinogenic effects and a 1:6 ratio of chromium IV to chromium III.
- [b] Pyrene is used as a surrogate for comparison to the Region IX PRG.
- [c] Naphthalene is used as a surrogate for comparison to the Region IX PRG.
- [d] The PRG is based on naphthalene non-carcinogenic effects.
- [e] Not Established
- NE Not Established
- NA Not Available
