

The ADIZ is a hopelessly snarled, knee-jerk response that is looking for a problem! There are no restrictions on minivans, pickup trucks, or Ryder trucks, any of which are capable of carrying a higher payload and are less obvious than a typical GA airplane. This as well as TSA screeners attempting to confiscate Joe Foss' Congressional Medal of Honour (THE highest thanks our nation can give one of its warriors) are symptomatic of the "Do SOMETHING, so it looks like we are reacting" mindset that appears to be pervasive in DC these days.

Understand this, TSA, USSS, and any other alphabet soup agencies: YOU CANNOT PROTECT EVERYTHING! With liberty comes some risk. What you, the Federal Government agencies *should* be doing is controlling the BORDERS, which is how the majority of the 9/11 hijackers gained access (illegally, I might add!). Stop aiming at General Aviation. We are NOT the problem here, nor are we the threat.

Thank you for the attention and consideration to this, and the thousands of other like comments.
