Question1: Sec. Johanns, please have the courage to remove all farm subsidy programs from United States Agriculture. The farm subsidies have created a generation of farmers that have lost site of their responsibility to be stewards of the land and operate responsible, profitable businesses. Instead they traded the vision to farm for subsidies and payments. Please do some research on how New Zealand Agriculture has prospered since their gov't eliminated the subsidies. I am a 34 year old 5th generation farmer and beef producer. I would like my children to be the 6th generation of farmers in my family, but I don't know if they will have that opportunity.

Question2: Sec. Johanns, please have the courage to remove all farm subsidy programs from United States Agriculture.
