

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, AUGUST 20, 1996 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

*** THE TEN STANDARD FIRE ORDERS ARE FIRM ***
*** WE DON'T BREAK THEM; WE DON'T BEND THEM ***

CURRENT SITUATION: Moderate initial attack activity was reported throughout the western United States. A Type II Incident Management Team was mobilized in the Northwest Area. The Task Force Vanguard, 3rd Brigade, 4th Infantry Division, U.S. Army Battalion from Fort Carson, CO will be mobilized to the Fork fire in Northern California today. Resource mobilization through NICC remained constant.

Southern California Large Fires:

ROGGE, Stanislaus NF. A Type I Incident Management Team (Greenhoe) is assigned. The fire is being suppressed under Unified Command with California State. The fire is burning in the Tuolumne River drainage south of Highway 108. The fire was contained on the west end yesterday, reducing the threat to Tuolumne City. Major spread continued to the northeast up the Clavey River drainage. Heavy fuel loading and steep terrain are limiting the options to stop the spread of the fire.

ACKERSON COMPLEX, Yosemite NP. A Type I (Dague) and Type II (Byrd) Incident Management Teams are assigned. The complex consists of the ACKERSON, POOP/NAUT, BIG CREEK, and MIGUEL fires. The Ackerson and Poop/Naut fires have burned together. The fire continues to burn actively towards Camp Mather. Fire camp is being moved from Camp Mather to Drew Meadows.

HWY. FIFTY-EIGHT, San Luis Obispo Ranger Unit, California State. A State Type I Incident Management Team (Bates) and a Type II Incident Management Team (Smith) are assigned. This fire is 5 miles east of Santa Margarita, CA. Coastal fog that moved inland yesterday slowed the spread of the fire. The fire has burned through and is now south of the Machesna Mountain Wilderness. Burnout operations were planned for the southeast flank last night. The head of the fire did not progress much yesterday.

KAWEAH, Tulare Ranger Unit, California State and Sequoia Kings NP. A Type I Incident Management Team (Monahan) is assigned. The fire is threatening Giant Sequoia Groves and the Giant Forest Development which are estimated at \$140,000,000. Steep terrain and limited access are hindering control efforts.

CHALOLO, Sequoia NF. The fire is burning on the Tule Indian Reservation, east of Springville, CA. There have been a total of 14 starts, two continue to burn actively. Burnout operations were planned for last night.

Northwest Large Fires:

BULL COMPLEX, Umatilla NF. A Type II Incident Management Team (Kearney) is assigned. The BULL, SUMMIT, ROCKY, and #104 fires comprise this complex. High winds and low relative humidities increased fire activity. Periods of extreme behavior caused the fire to jump control lines.

TOWER, Umatilla NF. A Type II Incident Management Team (Lukens) is assigned. The Tower fire is 17 miles south of Ukiah, OR. The fire escaped containment lines on the northeast perimeter. Strong winds created torching and spotting up to 1/4 mile ahead of the fire, hindering control efforts. Current threats are to Tower Mountain lookout and private lands.

SOUTH ZONE COMPLEX, Willamette NF. A Type II Incident Management Team (Gardner) is assigned. The complex is 11 miles southeast of Oakridge, OR. Increasing winds throughout the day created active fire behavior. Endangered species and 7,000 acres of private timber are threatened.

SPRING, Umpqua NF. A Type II Incident Management Team (Murphy) is committed. The fire is burning in the Boulder Creek Wilderness, near Toketee Falls, OR. Line construction on the south flank is progressing well. Helicopter support has been instrumental in meeting containment objectives.

NORTH UMPQUA COMPLEX, Umpqua NF. Suppression forces continue to meet containment goals. Current threats include a key watershed and endangered Cutthroat Trout habitat.

WILDCAT COMPLEX, Malheur NF. A Type I Incident Management Team (Dubois) is assigned. The fire is 10 miles southeast of John Day, OR. The fire is being suppressed under Unified Command with Oregon State. The Wildcat and Graham fires are included in this complex. Gusty winds created spotting and significant fire activity on the Graham fire. The fire has burned approximately 150 acres of private timber.

SIMNASHO, Warms Springs Agency, BIA. A Type I Incident Management Team (Porter) is assigned. The fire is burning in grass, brush and timber 10 miles north of Warm Springs, OR. Potential for flare-ups around subdivisions remains. Large unburned islands of fuel within the control lines are a concern.

BLUE CREEK, Spokane Agency, BIA. A Type II Incident Management Team (Johnson) is assigned. Additional resources are enroute. No other information available.

SALT COMPLEX, Wallowa-Whitman NF. A Type I Incident Management Team (Bailey) is assigned. The complex includes the SALT CREEK, DAM, SHEEP CREEK, and HEAVEN'S GATE fires. The fires are burning on the Oregon/Idaho border of the Hells Canyon Recreation Area. Helicopter bucket drops have aided ground forces in line construction. Moderate fire behavior was observed yesterday. Decrease in acreage is due to more accurate mapping.

HOG VALLEY, Oregon State. The fire is near the community of Union, OR. No information received. This will be the last report unless new information becomes available.

One fire is in a confinement suppression strategy totalling 1,500 acres.

Northern California Large Fires:

FORK, Mendocino NF. An Area Command Team (Mann) is assigned. Two Type I Incident Management Teams (Kohut & Loving) are assigned. The fire is located north of the town of Upper Lake, CA. Some line was lost yesterday due to winds. Good progress was made toward the completion of dozer lines around the communities of High Valley and Long Valley. Another control line above Upper Lake and Nice is almost complete.

BUTCHER, Shasta-Trinity NF. This fire is burning near McCloud, CA. Major powerlines less than 2 miles from the fire and private land within a mile are currently threatened. There were a few small breaks in the fire line yesterday, but suppression forces made good progress. Containment is now projected for 8/20.

DIXIE, Lassen-Modoc Ranger Unit. The fire is about 36 miles northeast of Susanville, CA. It is burning on State, UFSF, BLM and private land. There were 10-15 mph winds on the fire today, but none of the constructed fires lines were breached.

ROCK, Shasta-Trinity NF. A Type II Incident Management Team (Madden) is assigned. The fire is located 40 miles southwest of Redding, CA. Fire activity was moderate again today.

EAST FORK, Shasta-Trinity NF. The fire is near Weed, CA. Some progress was made but rolling material and winds continue to hamper containment efforts.

MORRIS, Shasta-Trinity NF. The fire is located in an inaccessible area. Rolling material is hindering containment efforts.

Rocky Mountain Large Fires:

CHAPIN #5, Mesa Verde NP. A Type II Incident Management Team (Hart) is assigned. This fire is burning 8 miles southeast of Cortez, CO. The fire blew out yesterday afternoon and ran to the northeast. The Far View Lodge and Visitor Center was spared even though the fire surrounded the building area. Communications is still a problem, as phone lines were burned yesterday. There is still a threat to structures, powerlines, and cultural and historic resources.

SINK CREEK, Grand Junction District, BLM. A Type II Incident Management Team (Summerfeldt) is assigned. The fire is located 15 miles east of Grand Junction, CO. There are large pockets of unburned and underburned fuel inside of containment lines. Torching and a reburn through oakbrush was experienced. Crews were able to line most of the fire.

Northern Rockies Large Fires:

POWDERVILLE COMPLEX, Eastern Montana State. A Type II Incident Management Team (Hancock) is assigned. The fires in this complex are burning in grass and sage northeast of Broadus, Mt. The complex consists of 3 large fires and several small fires. Good progress was made today. An increase in activity along hot portions of line is expected with the predicted frontal passage tomorrow. Windy conditions continue to cause control problems.

SWET/WARRIOR, Nez Perce NF & Bitterroot NF. A Type II Incident Management Team (Hodge) is assigned. Some suppression action is taking place on portions outside of the Wilderness. Fire activity was minimal today.

COLBERT, Miles City District, BLM. This fire started on private land and burned onto State and BLM land. Four Type II crews have been ordered.

One fire is in confinement suppression strategy totalling 220 acres.

Western Great Basin Large Fires:

SUN, Toiyabe NF. This fire is located about 40 miles west of Las Vegas, Nevada. Significant progress was reported yesterday; retardant drops and helicopter bucket support aided handcrews in holding the perimeter. Current threats are to cultural resources and wildlife habitat.

SHOEMAKE, Ely District, BLM. This fire is located 35 miles southeast of Caliente, Nevada. Interior burning was reported yesterday, but no perimeter increases resulted.

Eastern Great Basin Large Fires:

CUNNINGHAM, Cedar City District, BLM. The fire is located 10 miles northwest of Beaver, UT. It is burning in oak brush and Pinyon-Juniper in rugged, rolling terrain. Structures and two communications sites are currently threatened.

PAIUTE, Cedar City District, BLM. The fire is burning in grass and pinyon-juniper in a remote area 14 miles northwest of St. George, Utah. Rugged terrain and high temperatures are causing control problems. The Paiute also includes the Pahcoon fire.

Three fires are in confinement suppression strategy totalling 3,754 acres.

Southwest Large Fires:

SADDLE, Kaibab NF. This fire is burning in mixed conifer and Ponderosa Pine 35 miles northeast of the North Rim developed area. Steep rocky terrain and poor access are causing difficulty in controlling the fire safely. Perimeters on the south, east, and west held well yesterday. Rolling material continues to cause problems on the north end of the fire.

HOT SPOT, Arizona State. Gusting winds are causing flare-ups which are impeding containment efforts.

Three fires are in confinement suppression strategy totalling 1,129 acres.

Alaska Large Fires: Seventeen fires are in a non-suppression status totalling 419,659 acres.

OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED IN EASTERN MONTANA ***
 *** FOR WINDS ASSOCIATED WITH A COLD FRONT AND SCATTERED THUNDERSTORMS ***

An upper level trough is pushing east along the northwest U.S. and Canadian border. The associated surface cold front extends from western Montana through Idaho to northern California and will extend from eastern Montana to northwest Wyoming and northern Nevada late this afternoon. Windy conditions in eastern Oregon, Idaho, Montana and Wyoming. Winds shifting to the northwest behind the front will bring cooler temperatures and higher humidities. Eastern Montana will have scattered thunderstorms. Northern Idaho and western Montana will have a slight chance of showers. Arizona and New Mexico will have scattered thunderstorms. High temperatures will range from the 70's and 80's in the northern half of the West and from the 80's to 110 in the southern half of the West.
