Developing Countries Will Double Population Says Pegram Lecturer

"The problem we are faced with in the developing countries at this time is not 'overpopulation,' but unprecedentedly high rates of population growth, which if unchecked, would result in a doubling of the numbers of people in these countries within the next twenty to thirty years."

Professor Roger Revelle, this year's Pegram Lecturer, will give a series of three lectures on the general subject, "The Population Problem and What Can Be Done About It." The first lecture will be given the night of Thursday, April 17, and will be titled "Mankind Divided - The Rich and the Poor." The second lecture, on Tuesday, April 22, will explore the question "Can the Poor Countries Feed Themselves?" The last lecture, on Thursday, April 24, will examine "What Must Be Done to Solve the Population Problem."

Tickets for the series of three lectures will be available free from the Pegram Lecture Committee, 40 Brookhaven Avenue. Interested members of the community, as well as Lab employees, are invited to attend the lecture series.

Professor Revelle is the Richard Saltonstall Professor of Population Policy in the Faculty of Public Health, and Director of the Harvard Center for Population Studies. He has devoted much of his time in recent years to the problems of developing countries.

The Pegram Lectures were established by the Trustees of AUI to provide an opportunity for distinguished scholars such as Professor Revelle, to examine in depth subjects important to our culture and society. George B. Pegram, Dean of Columbia in 1946, was one of the "Founding Fathers" of Associated Universities and of BNL.

New Or Old School . . . Let There Be Art

Will it be art after the style of Tintoretto, Rodin, Pollack, Picasso, Dali? Surrealism, pop art, modern art, classic art? Or will these young artists lend their talents to a new school of art - their own school?

High schoolers will exhibit their works at the Hospitality Committee's Tea and Sherry Party on Wednesday, May 7, at the Brookhaven Center.

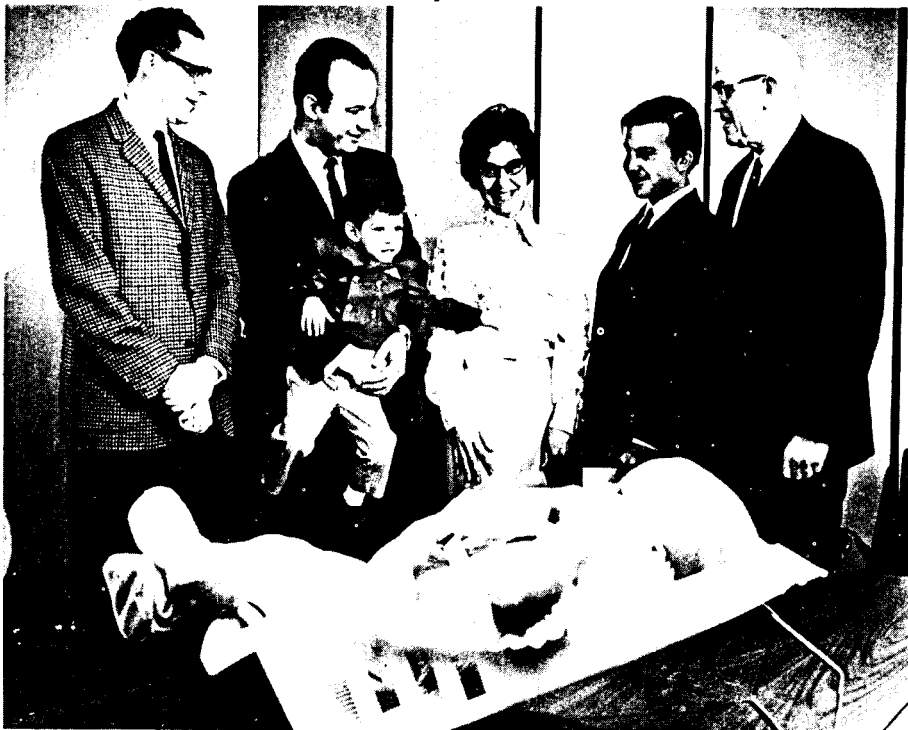

All those wishing to exhibit must be at least 13 years of age and must be related to a Lab employee. They are asked to register with Evonne Hammond, giving name, age, grade, home phone number, and the name of the Lab employee to whom they are related. A brief description of the work to be exhibited would be most helpful to the committee.

The registration date has been extended to give everyone a chance to be an exhibitor. Entries should be sent to Mrs. Hammond, Personnel Office, Bldg. 185, as soon as possible.

RCA Tube Seminar

A symposium entitled "State of the Art-Photomultipliers" will be presented by the RCA Conversion Tube Division on Wednesday, April 16 at 10 a.m. in the AGS Seminar Room.

Scholarship Presentation A Family Affair

Impressive ceremonies do not seem to make a very great impression on the younger set, as evidenced by this picture of Karen Stoffel (on table in foreground) and her brother John (being held by father). Both children of John Stoffel came with their mother, Janet (center) to witness Daddy being awarded an AEC Technician Scholarship, along with Manfred Thomas (second from right). Dr. George Vineyard, BNL's Deputy Director (left) and Emory Van Horn, Manager, Brookhaven Office AEC (right) are trying to retain formal attitudes in the face of juvenile opposition. —Humphrey

LIDAR Probes of Air Is Conference Topic

Expanding research in the use of Light Detection And Ranging (LIDAR) techniques for atmospheric research has led to the convening of an international conference at Brookhaven.

The first conference, held last April at the National Center for Atmospheric Research in Boulder, Colorado, revealed the potential use of LIDAR systems for studying the atmosphere. Because of the success of this conference, a suggestion was made for the present meeting and Bob Brown of Meteorology was delegated to work out the details for it.

The formal sessions for the two-day conference will begin on Tuesday morning, April 15, and will conclude the following evening. Research pertaining to stratospheric and tropospheric topics will be given by some of the most outstanding workers in the field.

The first session of papers will consist of research in the Upper Atmosphere and will be chaired by Professor R.W. Wright of the University of the West Indies. The second session will be concerned with research in the Lower Atmosphere and Professor Richard Schotland of New York University will be the Chairman.

A laser safety committee, headed by Leonard Baker of the Safety Group at BNL, will present a short report of its activities. Dr. John Cooney of the National Center for Atmospheric Research will also present a report on another committee working on ways to standardize LIDAR systems.

Finally, Howard Halsey of the General Electric Company will be the chairman for several papers of general interest to be given during the last day of the conference.

Old Timers Get Together

Nicolas P. Samios, Nuclear Interaction Group, Department of Physics, was recently awarded his ten-year pin at a Group party. Helping to celebrate the happy occasion are past ten- and twenty-year pin recipients in the Group. Standing (left to right) are E.O. Salant (20), L. Stuart (20), J. Hornbostel (20 - now deceased), J. Quinn (10), N.P. Samios (10), J. Smith (20), and E. Rappe (10). Sitting (left to right) are Audrey Biittner (10), Barbara Cozine (10), Mary Hall (20), and Matilda Austin (10).

Two Brookhaven Men Awarded AEC Technical Scholarships

John B. Stoffel, Physics, and Manfred Thomas, Accelerator, were each awarded AEC Technical Scholarships at a ceremony in the BNL Personnel Office last Friday.

Stoffel and Thomas, both Senior Technicians, will receive full salary and benefits as well as tuition and fees while completing requirements for a bachelor's degree.

Stoffel, 27 years old, has been employed by BNL since December, 1963, and is currently assigned to the 80" Bubble Chamber in the Physics Department. He has completed approximately 70 transferable credits on a full and part-time basis, and hopes to attend Brooklyn Polytechnic Institute and major in physics. John and his wife Janet, live in Bellport with their two children, John, 2½ and Karen, 6 months.

Manfred Thomas (left) and John Stoffel (right) display envelopes containing scholarship awards.

Thomas, age 31, has been at BNL since November, 1961, and is currently assigned to the Linac in the Accelerator Department. He has completed approximately 65 transferable credits in full and part-time study. Manny has applied to Wesleyan University and Queens College and will major in physics. Manny and his wife Rose, live in Yaphank. They have two children, Gregory, 4 years and Cheryl, 5 years old.

Six other AEC contractors and BNL nominated 30 candidates from an estimated pool of over 5000 eligible employees for the 1969 to 1970 academic year. The AEC selection panel, which includes one member from BNL, made the final determination, and Stoffel and Thomas were among those designated as recipients of these coveted scholarships.

Since 1966, six other Brookhaven employees are taking advantage of this award, or have completed their requirements for their degree. Past winners include: Richard Isler, George Meinkin, Norwood Greenlaw, Dean Easler, Frank Thornhill, and Lew Jacobson.

Engineer Sounds Off On Underwater Acoustics

Eugene Vehslage, Chief Acoustics Engineer of Grumman Electronic Systems Center in Bethpage will deliver a lecture to the BNL USNR-R Co. 3-9 on April 16.

The lecture, entitled "Underwater Acoustics in Anti-Submarine Warfare," will include a discussion of the importance of underwater acoustics (sonar) in anti-submarine warfare. The similarities and differences with radar will be used as a reference to explain the basic types of sonar systems and their modes of operation. The main factors that limit sonar performance will be explained, including ambient noise, reverberation, source level, and transmission losses with emphasis on anomalies due to ray bending. Slides will be used to illustrate the lecture.

The lecture will be held in the Instrumentation and Health Physics, Building 535, at 7:30 p.m. Visitors are welcome to attend the meeting.

Safety Issue Schedule

Safety equipment (shoes and spectacles) are issued in the lower level of Bldg. 535.

Safety shoes will be issued on Mondays from 1330 to 1630, and on Thursdays from 0900 to 1200.

Safety spectacles will be issued on Mondays from 0900 to 1200, and on Wednesdays from 1330 to 1630.

Doctor's Day Thru Student's Eyes

A routine annual physical examination is given to June Odwazny by Dr. Nina Pluss (center) as Doctor of Tomorrow Claire Webber transfers data to a report. — Humphrey

A Doctor of Tomorrow Sees Today's Medicine

After spending a day at the BNL Medical Research Center, Claire Webber still wants to be a doctor.

This is not a surprising reaction on Claire's part, in spite of the tremendous amount of activity she participated in when she spent the day with Dr. Nina Pluss.

Claire, a seventeen-year old senior at West Babylon High School, is a candidate for a \$1,000 scholarship to be given by the Suffolk Academy of Medicine.

Claire was nominated by her high school after writing an essay titled "Why I Want to be a Doctor." Final selection of the winner of the scholarship will be based on the evaluation of each candidate made by a Preceptor who spends the day with the student.

Claire reported to Dr. Pluss of BNL's Industrial Medicine Clinic promptly at 8:30 a.m. to spend the entire working day in learning firsthand what a doctor's life entails.

After being given a hospital coat and a name tag, the student then joined Dr. Pluss in routine clinic operations. As soon as the clinic was finished, she watched as Dr. Pluss completed the procedures for a routine physical examination of a Lab employee.

The balance of the morning was spent in visits in research areas, first to Dr. Leonard Hamilton's project on multiple sclerosis where she talked with Dr. Yolanda Skrzywan, and then to Dr. Harold Atkins and Dr. Wolfgang Hauser to learn about scanning procedures for medical diagnosis.

After lunch, Claire was assigned to Dr. Rosemary Gellene for receiving information on treatment of Parkinson's disease. Dr. Kanti Rai then took Claire to Pavillion Three for a look at equipment and procedures for the use of extracorporeal irradiation of the blood in the treatment of leukemia. After this she went to the cow barn to see work being done on transplants.

Towards the end of the afternoon, the tired student joined in a medical staff meeting that culminated in an informal celebration of Dr. Van Slyke's 86th birthday.

After 5:30 p.m., Dr. Pluss took Claire home with her as a dinner guest, and also to recap the experiences of the day. The young student, who hopes to go to Cornell for her pre-med training, ended the evening even more firm in her desire to become a research physician, in spite of the length of training necessary.

Dr. Harold Atkins explains some of the instrumentation in the scanning room to Claire Webber.

In a hospital pavilion, Doctor of Tomorrow Claire Webber (left) gets advice from Dr. Nina Pluss (center) and Dr. Rosemary Gellene.

In a research area of the Medical Research Center, Claire Webber looks at cell cultures shown by Dr. Yolanda Skrzywan.

Here and There

Dolores del Castillo

John Deitz and Robert Young (Safety Office) presented talks on fire safety to the New York Chapter of the Society of Fire Protection Engineers on Monday, March 24.

U.S. Patent No. 3,434,061 was granted to the AEC on March 18 for "Compensation of Phase Drift on Long Cables," invented by Harold Hahn and Henry J. Halama (both of the Accelerator Dept.).

Andrew Keyv (Physics) was the inventor of "Neutron Spectrometer for High Neutron Flux," for which U.S. Patent No. 3,435,219 was issued to the AEC on March 25.

Philip F. Palmedo (DAS) recently attended the Eleventh Meeting of the European American Committee on Reactor Physics held in London. While abroad he also visited at Cadarache to discuss measurement of material buckling of fast systems, and at Karlsruhe to discuss details of their experimental and analytical methods.

Frederick P. Cowan (HP) has been elected to the Board of Directors of the National Council on Radiation Protection and Measurements.

It has been announced by Provost Oswald Tippo, University of Massachusetts, that Seymour Shapiro, professor and head of the Department of Botany at the University, has been named Acting Dean of the College of Arts and Sciences. Shapiro was an Associate Botanist in BNL's Biology Department for a number of years.

John Russell Askew, General Reactor Physics Division, UKAEA, will visit the Laboratory on April 18 for discussions on the studies of small graphite-uranium critical assemblies.

On April 21-22 Stephen William Love-sey of Harwell will visit the Laboratory for discussions on neutron scattering.

Ivan Bernal (Chemistry) was named Chairman, on a continuing basis, of the Structural Inorganic Section of the New York Regional ACS meetings.

Max Wolfsberg has terminated his appointment in the Chemistry Department to accept a position at the University of California, Irvine. He will continue his association with the Department as a Research Collaborator.

Edward Sayre (Chemistry) was a seminar speaker at Case Western Reserve University. He spoke on "Neutron Activation Analysis of Sassanian Silver." He also gave a talk in the Nuclear Engineering Department of New York University, on "Neutron Activation Analysis Applied to the Study of Fine Art Objects."

The American Crystallographic Association met in Seattle, Washington, March 23-27. Walter Hamilton presided at the meeting in his capacity of President of the Association. Papers were presented by S. La Placa (co-authored by E.O. Schlemper and W.C. Hamilton), J.W. Edmonds (co-authored by W.C. Hamilton and A. Tippe), Ivan Bernal (co-authored by E. Epstein), and Philip Coppens (joint BNL-SUNY paper). Earl Epstein and Robert Thomas also attended the meeting. (All are in the Chemistry Dept.)

In Memoriam

Angela M. Iacovelli of the Accelerator Department died on March 26, 1969 after a short illness.

Mrs. Iacovelli came to BNL in April of 1954 and worked in the Accounting Division of the Accelerator Department.

She is survived by her husband, Frank, and one child, who reside in St. James.

Letters To The Editor

Dear Sir:

When one's car is stalled in the middle of oncoming traffic on Upton Ave. at 8:20 a.m. it is most disconcerting to have another driver bear down on her, nearly side-swiping her car, and yell a four-letter obscenity accompanied with its appropriate sign. Politeness and consideration for others' safety on the roads around here seem to be forgotten commodities.

Victoria Levis

Dollars and Sense

Leon Meshel

Deadline: April 15, 1969

by Frank Federmann

In the spirit of the time - return day minus five days - we offer these suggestions. Again, they are old hat, but it cannot hurt to remind yourself about these things:

1. Thousands of returns were held up last year because taxpayers did not furnish supporting statements where necessary;
2. There is a choice of tax tables at your disposal. It is a good idea to check and recheck to be sure you have used the right table;
3. Errors in arithmetic keep recurring in returns, causing delays and, oftentimes, disappointments that a refund is not as big as expected or even is not owing. Double-check; use a machine if possible;
4. Make certain you have checked the correct box indicating marital status. Once more, this saves processing time;
5. If you have income from farming, pensions, business and professional activities, or profits or losses from the sale or exchange of property, certain Schedules - F, C, and D, respectively - must be attached to your return;
6. For the umpteenth time, be certain your Social Security number is correctly given on your return. It is the key to automatic data processing;
7. Normally, both husband and wife must sign a joint return; however, if a husband is a serviceman in Vietnam, he is not required to sign a joint return. The wife should indicate in the space provided for her husband's signature that he is in military service in Vietnam;
8. If you are due a refund, mail your federal return to:

**Internal Revenue Service Center
310 Lowell Street
Andover, Mass. 01812**

If you are *not* due a refund, use this address: (L.I. Residents)
**Internal Revenue Service
35 Tillary Street
Brooklyn, N.Y. 11201**

All New York State returns (for Long Island residents) should be mailed to:
**New York State Income Tax Bureau
114 Old Country Road
Mineola, N.Y. 11501**

April 15 is Estimated Tax Day too. Even if you are all set on your 1968 income tax returns, April 15, 1969 may still have "tax" meaning. It's the due date for the first installment of your 1969 individual estimated tax.

Cafeteria Menu Week Ending April 17, 1969

Friday, April 11	Baked Meat Loaf/Mushroom Sauce	.65
	Chicken Chow Mein/Rice	.65
	Chopped Steak & Mushroom Hero	.70
	Weekly Special	
	Wednesday	
	Chicken Gumbo Soup

"Special" Tickets Still Available!!

There are still about 300 tickets available for BERA's Special Double-Header musical extravaganza, but don't wait for the last day of sales!

So far, ticket sales have been mostly confined to the Lab family, with a two-week embargo on sales to the public. This week sales are going to be made to all, so time is running out.

The Brothers Four, opening act of the Double-Header, will supply the sounds of music in a conventional way, without any reliance on costuming or staging. The young men comprising this group will present a folk-rock program that is always a sure-fire hit with most audiences.

In contrast, the Baja Marimba Band is a colorful, zany, musical conglomeration that is equally received for their visual impact as for their superb music.

Tickets for the Special are still being sold at the Cafeteria every day at lunch time, as well as at the Recreation Office all day. Employees pay only \$4.50 each for reserved seats for themselves and their family members. Seats for guests and the general public are sold for \$6.00 each.

The Brothers Four

Movie Tonight

Thurs., April 10 - 8 p.m. - Berkner Hall
Playboy of the Western World

When Christy Mahon, a tall lad with a long, sad jaw (Gary Raymond), announces to everyone in an inn on the Irish coast that he has murdered his tyrannical father with a clout on the head, the news spreads fast and he becomes the hero of the local girls.

The innkeeper's daughter, a beautiful dark-haired and high-cheekboned lass named Pegreen Mike (Siobahn McKenna) falls in love with him. But his father isn't really dead, and his reappearance cramps Christy's style. Christy spreads a rumor that his father is mad, but Pegreen, disenchanted with Christy, spurns him. To win her back, Christy strikes his father down again. But Pegreen remains distant, and as the old man recovers, the bond between father and son strengthens once again. They go off together, and Pegreen, still enamored of Christy, loses him.

Directed by Brian Desmond Hirst, Synge's comedy is a classic work of strong, Irish satire, witty and well seasoned with a good Irish brogue.

Light refreshments will be served after the movie. Regular admission.

Movie next week: 1967 All England Badminton Finals. Free to all employees and their guests. No tickets required. Note: movie takes one hour and will begin promptly at 5:30 p.m.

Movie May 1 - A Day at the Races with the Marx Brothers. Regular admission.

Movie May 15 - An evening of Movies about Latin American Development: movies will be supplied by government and independent sources. For subscription holders only.

Champs On Their Way To Bowl Over Rochester

The Electronics (standing left to right: Arnold Schroeder; Charles Tomesch; Stanley Mac Cormack; George Sabine, BERA Recreation Supervisor; Captain Werner Hayes; and Paul Levy) and the Fizzles (seated left to right: Maebelle Madden, Pat Oster, Captain Josephine Gazzola, Fran Green, and Helen Caisey) will represent BNL this weekend in the National Industrial Recreation Association's Regional Tournament in Rochester. —Rosen

Bowling Champions Off To Rochester

BERA, in cooperation with the Bowling Board, is sending its reigning ladies' and mens' championship bowling teams to Rochester to compete in the National Industrial Recreation Association's Regional Tournament. The two-day tournament, April 11-12, will be hosted by the Kodak Park Athletic Association, Eastman Kodak Company.

The team events in which the BNL bowlers are entered will be held on Saturday and are handicapped to provide equal competition. The winners' prize list, which is dependent on the number of entries, will include traveling team trophies, cash and merchandise awards.

George Sabine, Recreation Supervisor, will accompany the teams and cheer them along. This is another first for BERA. Up to this time, the National Bowling Tournaments have been held in states too distant for BNL participation. It is hoped this Eastern Regional affair will be held an-

nually and that the champions developed through the Intra-Laboratory competition receive, in addition to their trophies, the privilege of participation in the tournament.

The members of the Championship Mens' Team, the Electronics, are: Capt. Werner Hayes (Physics); Stanley MacCormack (I & HP); Arnold Schroeder (I & HP); Paul Levy (Physics); and Charles Tomesch (I & HP).

The Championship Ladies' Team, the Fizzles, consists of: Capt. Josephine Gazzola (Fiscal); Fran Green (Medical); Pat Oster (Fiscal); Maebelle Madden (PEP); and Helen Caisey (DO).

Maebelle and Helen, of the second place team, were selected to substitute for two of the ladies who could not make the arrangements to participate. Joan Cacase, who is getting married that weekend, refuses to have her honeymoon in Rochester.

Gypsy Cast Hard At Work

At Gypsy's introduction to burlesque, her "uncle" Herbie (Charles Meinhold) gets angry with a stage hand (George Counadis) who is using foul language in front of Mama Rose (Pat Towey) and daughter Louise (Barbara Strohm). This scene takes place in act two of the hit musical. —Humphrey

"I'm a strip-woman, Slob! I don't do no scenes!" says Tessie Tura (Marie Garafola) to the manager of the burlesque theatre as played by Charlie Zavesky.

While not on stage members of the cast are dragooned by Pat Campbell to paint flats or do other construction work for the staging of Gypsy.

Bowling News

Irma Carl

Purple League

The juke box should have been playing "Hearts & Flowers" as the Phoubars lost first place. S & M now leads with 56 points in the win column followed by: Designers 55 points, Woodbutchers 54 points and the Phoubars 52 points. The next two weeks should provide some interesting bowling. Joe Rolfes had his best night of the year with a 216-571 series, Joe Nocar a 546 series, Mike Guacci a 202-525, and Jack Austen a 512 series.

Red League

The Sandbaggers and Sparks are still at it. The Sandbaggers as of this writing have first place by one point. Frank Short set a new high gross game of 288 and L. Schairer rolled his first 200 and came in with a 212. Other greats for the night were: R. Wilson 220, W. Sampson 217, E. Malcolm 207, R. Larson 206 and 203 (any wonder that he holds high average of 180), and C. Buzzeo 200.

Pink League

There was some good bowling by the Pink League this week, but girls save some of your power for position night. The only change in team standings was by the Bio-boozers (Helen Kelly 181) who gladly presented the "cellar" to the Bookies. The first and second position teams met head on which produced some outstanding bowling. Brita McGonigle of the Medigals almost converted the 6-7-10 split, with the 6 pin rockin', and finished up with a 199 game. Marge Stoeckel did well for the Pinsplitters who are trying to gain on the first place team, while at the same time holding off a strong bid from the third place Hopefuls who as a team rolled a gross series of 2434.

Indoor Soccer

The Gym is reserved for indoor soccer each Monday from 7:30 to 9:30 p.m. If you are interested in playing do come along and join in.

We shall move outside when the evenings get lighter, and hope to arrange several friendly matches with nearby schools and universities during the coming season.

Any questions? Phone M. Hutchings, Ext. 7608 or D. Cox, Ext. 7602.

BGA Deadline Extended

It's not too late to join the BERA Golf Association. Registration deadline has been extended to April 15. If fresh air, sunshine, good friends and competition appeals to you, don't hesitate, Join now. Call Dick Hillenbrand at extension 7777 for further details.

Gypsy Has A Mother

A mother is a mother is a mother. And every person has one. President Nixon has one, so does Charles de Gaulle. Gypsy Rose Lee has a mother.

Gypsy's mama may be loud, boisterous, cheap, and vulgar. But one thing's for sure . . . She's a mother, and she'll stop at nothing in order to get what's best for her children.

First, there was Baby June (June Havoc), the pride of mama's eye. June could sing and dance and really wow an audience. But June also fell in love, and finally eloped. Who can Mama turn to now? Of course! There's still Louise.

Louise can sing and dance, but can she wow an audience? Well maybe if the lights are low enough, if the audience is all male, and if she doesn't mind removing some of her clothing!

Would most mothers approve of this? Quite probably not! But then, most mothers are different from Gypsy's mama.

Shame on you, Mama!

Tickets for Gypsy are now being sold at the Cafeteria during lunch periods, and at the Recreation Office all day. A floating box office that has been operating in the Physics Department this week, will move to the Department of Applied Science at 29 Cornell Avenue, for sales on the spot all next week.

Tickets are for reserved seats and cost \$1.50 for Lab employees and family members, and \$1.75 for guests and those with no Lab affiliation. As in other Theatre Group efforts, children can get tickets for fifty cents each.
