To whom it may concern:

Or should I address this to: "To whom it SHOULD concern" ?

I believe you have received more than just a few complaints from the American public regarding S7-20-08.

Since when is it okay for someone to turn their back on blatant, illegal behavior? Since when is it okay for an agency that is supposed to "regulate" actions by companies and individuals, allow some of them to break the regulations with impunity? Since when is it okay for an agency that is charged with protecting the American investors, allowing those investors to get "screwed"?

The naked short selling that you have been ignoring in the silver market, we now find out is spread throughout the entire market!

Do something about it NOW!
