D E S C R I P T I O N

PRODUCT COVERED:

\*USL, CNL Waffle maker, Models 1150, 1200, 1550, 1600, 1800 and 1950. Pizzelle maker Models 1225, 1300 and 1400. All models may be followed by a one letter suffix.

ELECTRICAL RATING:

Rated 120 V ac, 1000 W, 8.5 A.

GENERAL CONSTRUCTION:

See Sec. Gen. for details. Text for "Important Safeguards, see ILL. 1.

ENGINEERING CONSIDERATIONS (NOT FIELD REPRESENTATIVE'S USE:

CNL - Indicates investigation to Canadian National Standard C22.2, No. 64-M91. Household Cooking and Liquid-Heating Appliances.

## WAFFLE BAKER - MODEL 1950 - FIG. 1 (C92-6548)

1. Handle/Foot Piece - Consists of three pieces. R/C (QMFZ2) plastics, Type EB3000-2, manufactured by Cuyahoga Molded Plastics Corp., (rated 94V-0) minimum 0.07 in. thick. Top piece 10-3/16 in. long by 4-11/16 in. wide maximum tapering to 3 in. wide. Provided with three openings, two for lens pieces, each 1 by 11/16 in. Other opening 1-1/2 in. by 9/32 in., provided for thermostat actuator knob, Item 2. Handle and feet secured to bottom enclosure, Item 6 by screws. Foot piece at rear approx 13/32 in. long by 9/16 in. wide by 1/4 in. high maximum. Secured to bottom enclosure by three screws. Foot piece contains an integrally molded compartment for strain relief, Fig. 3, Item 4.

Alternate - Same as above except molded of R/C (QMFZ2), Type MB2000-10 manufactured by MAR-BAL INC. (rated 94V-0).

2. Actuator Knob - Two-piece construction. Knob is molded of R/C (QMFZ2), rated at least 94HB. Secured by snap-fit in thermostat adjustment piece, R/C (QMFZ2), phenolic Type 506, manufactured by Plaslok Corp. (rated 94V-0, 150°C), overall 1-1/2 in. long by 29/32 in. wide by 1/2 in. high maximum. Adjustment piece provided with integrally molded tooth rack which meets with pinion gear of thermostat.
3. Pilot Light - Two provided. Neon bulbs with integral copper alloy leads and dropping resistor, leads terminated at internal wiring by crimp-on copper alloy connectors and are completely sleeved, including dropping resistor by R/C (YPDU2) sleeving, rated at least 150°C, 150 V. Connections at internal wiring are made between the top enclosure, Item 1 and handle/foot piece, Item 1. Bulbs snap-fit in integral formed ribs of handle foot assembly. Provided with a snap-fit in pilot light/lens which is R/C (QMFZ2) plastics, Type Lexan 940-A, manufactured by GE Plastics or Type Calibre 700-06 manufactured by Dow Chemical (rated 94V-0, 125°C), requiring tool for removal.

Alternate - Identical to above, except one provided.

4. \*Top Enclosure - Plated steel, minimum 0.024 in. thick, 7-1/4 in. diameter by 1-1/8 in. high. Provided with an opening for thermostat actuator knob, Item 2, and opening with rounded edges, for routing of internal wiring.

Alternate - Identical to above, except opening for routing of internal wiring provided with a silicon rubber grommet of Vanguard Products Corporation Compound No. VC2495 material, minimum of 1/16 in. thick, secured by shape and tight fitting to opening.

C92-6548

361

5. Bottom Enclosure - Same material and dimensions as top enclosure, Item 4 except openings for routing of actuator knobs and internal wiring are omitted.
6. \*Power Supply Cord - Listed/Certified, Type HPN, No. 18 AWG, 3-conductor, length ranges between 2 to 7 ft. Cord terminates in a molded-on parallel blade attachment plug cap provided with grounding pin. Other end is terminated in copper-alloy crimp-type spade connectors with detents. Grounding conductor terminated at cord guard in crimped-on closed loop connectors.

MODELS 1150, 1200, 1225, 1400, 1600 AND 1800

General - The Models 1150, 1200, 1225, 1400, 1600 and 1800 are identical to the Model 1950, except the grids cooking surface configuration are the "Texas Waffler," "Carousel," "Christmas Pizzelle," "Pizzelle," "Five of Hearts" or "Classic Waffle" respectively in place of the "Mickey Mouse" configuration.

\*MODELS 1300 AND 1550

General - The Models 1300 and 1550 are identical to the Model 1950 except 95 described in Fig. 4.

MODEL 1950 - FIG. 2 (C92-6549)

1. Grids - (Two provided) - Aluminum, 3/16 in. thick by 7-3/8 in. diameter excluding hinges. Provided with integral hinges pinned together by plated steel pin. Grids secured by screws to top and bottom enclosures. Surfaces may be provided with a nonstick coating.

C92-6549

364

MODEL 1950 - FIG. 3 (C92-6550)

1. \*Internal Wiring\* - R/C (AVLV2)/Certified No. 18 AWG, comprised of 16 No. 30 AWG nickel coated copper conductors insulated with minimum 0.017 in. thick mica-glass insulation rated 300 V, 350°C. Wiring is terminated as follows: In nickel-plated copper alloy, crimp-type connectors with detents at thermostat, heating element assembly and power supply cord.  
  
\*Alternate - R/C (AVLV2)/Certified AWM, No. 18 AWG, comprised of 19 strands of 0.0092 in. diameter No. 30 nickel coated copper conductors, rated 300 V, 350°C.
2. \*Thermostat - R/C (XAPX2)/Certified, Type A862, manufactured by Norstat Corp., (rated 120 V ac, 15 A, noninductive, tested for 100,000 c). Calibrated and marked to open at "L430." Secured to lower grid by a screw. Rotation prevented by integral tab on grid mated with same type opening in thermostat.  
  
\*Alternate - Same except R/C (XAPX2)/Certified, Type HT, manufactured by Bimet Corp. (rated 120 V ac, 16.67 A. Noninductive, tested for 100,000 c). Calibrated to open at 430°F.  
  
\*Alternate - Same except R/C (XAPX2)/Certified, manufactured by Electrovac, Type Z42BJJJ-A230QJ-A, calibrated to open at 230°C (rated 230 V ac, 10 A noninductive, tested for 100,000 c).
3. Heating Element Assembly - Two provided, one in each grid. Each assembly consists of sheathed heating elements. Construction consists of resistance wire embedded in magnesium oxide, encased in a 1/32 in. thick, 5/16 in. OD aluminum sheath. Resistance wire terminated in 1/16 in. diameter steel cold pins, with weld plated steel male quick-connects, with detents. Lower element is rated 120 V ac, 500 W and the upper element is rated 120 V ac, 500 W. Located in formed integral channels of grids, Fig. 2, Item 1 and clamped in place.
4. Strain Relief - Provided within an integrally molded compartment in foot piece, Fig. 1, Item 1. Consists of power supply cord, Fig. 1, Item 6 being routed around two integral wall extensions, 1/4 in. high maximum by 3/4 in. long maximum. Cover piece 4-1/2 in. long by 1-1/2 in. wide by 1-3/16 in. high. Provided with two 3/16 in. diameter openings for screw securement to foot piece.

AND REPORT

C92-6550

366

5. Marking - Pressure sensitive Marking and Label System applied to base of handle/foot piece, Fig. 1, Item 1, includes manufacturer's name, electrical rating, model number and the following statement "Do Not Immerse In Water, Household Use Only." See Sec. Gen. for other required markings.

## MODEL 1550 - WAFFLE BAKER - FIG. 4 (C93-5027)

General - The Model 1550 is identical to the Model 1950, except for as described below.

1. Handle/Foot Piece - Same as Fig. 1, Item 1 except dimensions. Top piece 9-1/2 in. long by 4-7/16 in. wide maximum tapering to 3 in. wide. Foot piece at rear approx 4-3/8 in. wide by 3 in. long by 3/4 in. high.
2. Top Enclosure - Same as Fig. 1, Item 4 except dimensions. 10-1/4 in. wide by 5-1/2 in. deep by 1-1/8 in. high.

## MODEL 1300

General - The Model 1300 is identical to Model 1550 except the grid's cooking surface configuration is "Pizzelle".

## IMPORTANT SAFEGUARDS

Use your Vitantonio electric waffler safely for many years to come. Please observe basic safety precautions which apply to all electric appliances, including the following:

1. Read all instructions contained in this booklet.
2. Completely unwrap cord from its storage position before plugging in.
3. Close supervision is necessary when any appliance is used by or in the presence of children.
4. Do not touch hot surface. Use handles or knobs.
5. To protect against electrical hazards, do not immerse cords, plug, or appliance in water or other liquid.
6. Remove plug from outlet when not in use and before cleaning. Allow to cool before handling, cleaning, or storing appliance.
7. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Return appliance to manufacturer or area repair center for examination, repair, or adjustment.
8. Do not let cord hang over edge of table or counter or touch hot surfaces.
9. The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.
10. Do not use outdoors.
11. Do not place appliance on or near a hot gas or electric burner or in a heated oven.
12. Do not use appliance for other than its intended purpose. Manufactured for household use only.

May 22, 1997

Hank Oberle  
Vitantonio Inc.  
6225 Cochran Road  
Solon, OH 44139

Dear Hank:

Per our earlier discussion, enclosed please find the three units which we had tested at our laboratory, ACTS Testing of Buffalo, NY. Attached to this memo is also a copy of the test report received. As we also discussed, one of the units appeared to be returned only for a broken foot, but while the other units were returned, respectively, for "flames shot out of outlet when plugged in" and "blew circuit breaker". All three units apparently failed the dielectric withstand test prescribed in UL1026.

I will await a copy of your filing with the Consumer Product Safety commission, and if there is anything else I can do for you please don't hesitate to contact me.

Thank you.

Sincerely,

Alan P. Kaufman  
Director, Technical Services

**Mr. Alan Kaufman**  
**DISNEY SOURCING ORGANIZATION**

**SUBJECT:**

Evaluation of WAFFLE IRONS received on April 30, 1997

**INTRODUCTION:**

The sample was evaluated to identify potential failure modes.

Sample Description: MICKEY'S WAFFLER  
Contents/Count/Size: 3 Specimens/One Waffle Iron  
Vendor: Vitantonio  
Model No.: 1950C  
Serial No.: 17002122; 17002694; 17002649

Life line circuit foot

**EXECUTIVE SUMMARY:**

Deficiencies were noted with regard to insulative qualities between live parts and ground. None of the three submitted specimens complied with the dielectric voltage withstand requirements of UL 1026, "Electric Household Cooking and Food Serving Appliances."

Two of the three specimens exhibited abrasion damage to the insulation of the internal wiring leading to the heating element. This condition increases the likelihood of energizing exterior dead metal parts leading to potential shock hazards.

ACTS TESTING LABS, INC.

Linda Patricia  
Hardlines Manager, North America

ACTS TESTING LABS, INC.

David V. Grandin, Senior Technician  
Hardlines Department

dlj

**D) DISCUSSION:**

Of three units submitted for evaluation (labeled flame, circuit breaker, and broken leg units), each of the units were noted to fail dielectric voltage withstand testing per UL 1026, "Electric Household Cooking and Food Serving Appliances." This would indicate a problem with insulation between live and grounded parts.

Section 38 of UL 1026 requires the product to withstand 1000 V a.c. for 1 minute with no breakdown. The units measured as follows:

Flame Unit	Approximately 100 V
Circuit Breaker Unit	Approximately 400 V
Broken Leg Unit	Approximately 850 V

Upon disassembly, a sharp edge at the rim of the exterior bottom plate was noted. Insulation on one of the supply wires to the lower heating element was damaged on the flame and circuit breaker units. The damaged insulation corresponded to char marks on the bottom plate. Although a rounded clip is placed over the rim of the bottom plate in the area of the wiring to protect against damage to the insulation, not all of the wiring passed over this clip, leaving the insulation of at least one wire subject to abrasion when opening and closing the unit.

Diminished dielectric voltage withstand performance increases the likelihood of a shock hazard.

See Appendix for photgraphic indication of failure conditions.
