

LANDSAT 7 -- WRS GLOBAL LAND DATA BASE
Rev. 2.1 ~~8 January~~December 1998

A few typos were found and corrected.

Some of the geographical tags were updated to it within request editor constraints and to split multiple month entries for sea ice into individual month entries.

The changes that were made to Table 1 - Global Land Mass - for Revision 2 are as follows:

- the flywheel scenes identified as water were deleted; it was a mistake to include them in earlier versions as there is no intent to open a request for these scenes except as required by the requirements of the instrument on/off duty cycle (flywheeling)
- 35 scenes that contain reefs but were not in the earlier versions of the data base were added; they are identified with the tag “reef”
- a cut-and-paste error in two Australia entries was discovered and corrected
- the night path/rows for volcano acquisitions were added
- the sea ice requests were greatly revised to reduce the overall number of scenes and to take advantage of the overlap at high latitudes

The changes that were made to the supplemental tables for Revision 2 are as follows:

- The path/rows for volcano scenes in Table 6 that will be acquired at night were converted to nighttime path/rows values.
- The Alaska/Russia volcano list was added to Table 6.
- A new table was added for global oceanic islands.
- TheEOS Core Validation Sites table was updated.

I intend in the next revision to have a supplemental table for reefs.

Any corrections/additions, including data for new supplemental tables, should be sent to terry.arvidson@gsfc.nasa.gov
