

## Leadership Training for Development, Potosí (SDAF 0020)

# Leadership Training for Development (SDAF 0020)

## Project Description:

Leaders from throughout Potosí identified the lack of effective leadership skills as detrimental to their ability to promote citizen participation and good governance. The SDAF project supported leadership training courses for 90 new leaders in areas such as economic development, conflict resolution, and civil society.

The methodology of training was participatory and interactive. The course was taught in Spanish and Quechua.

Alongside the training workshops, radio programs will be disseminated across Radio Pio XII to a broader audience.
