FLORIDA-AMELIA ISLAND TO ST AUGUSTINE: Underwater Marine Repairs.

U.S. Naval Station Mayport will be placing a work boat in a four point mooring over the Naval Station Degaussing Range at various times based upon periods of slack water while divers conduct underwater repairs.

The mooring legs will not interfere with the main channel of the St John River, but will restrict passage of Naval Ships in the Naval Station Mayport Approach Channel. Local traffic to and from the Mayport Basin will be halted during those times when work is in progress.

Four mooring balls will remain in position clear of the St Johns Bar Cut Channel and will be marked with Quick Flashing White Lights (QW). The work boat will display anchor ball day shapes and dive flags for daytime operations, appropriate obstruction lights during darkness, and will monitor VHF Channels 12 and 13 while on station.

Upon completion of daily work mooring legs will be recovered, and the work boat will return to port, clearing the Naval Station Mayport Approach Channel. This operation is ongoing and will be completed on or about April 30, 2007.

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages

**POSSIBLE SUBMERGED HAZARDS/DEMOLITION DEBRIS IN COOPER RIVER
SHALLOWS FOR DURATION OF GRACE AND PEARMAN BRIDGE DEMOLITION**

Boaters are advised to stay in the main channel when transiting under the new Ravenel Bridge on the Cooper River. The South Carolina Department of Transportation and their demolition contractor are in the process of removing the remaining foundations for the Grace and Pearman bridges. This project will continue into 2007. During this period, there is the possibility of both partially submerged hazards and demolition debris in the areas outside the main channel. The contractor’s work area will be marked with temporary buoys, but these buoys may not be visible at night. To avoid hazards boaters should transit only through the main Cooper River channel (HOG ISLAND REACH) or should consider using Town Creek channel as an alternate route.

Boaters are also reminded to obey Navigation Rule 9 and give large ships the right of way while in or planning to cross the main channel. Vessels less than 20 meters long, and sailing vessels, shall not impede the passage of a vessel that can safely navigate only within a narrow channel.

The U.S. Coast Guard has designated the waters under the old and new bridges as a Regulated Navigation Area (shown below in purple). All vessels are prohibited from anchoring, mooring, or loitering within the regulated area, unless specifically authorized by the U.S. Coast Guard.

Boaters should contact Coast Guard Sector Charleston’s 24x7 operations center on VHF channel 16 or via phone at (843) 724-7616 to report any concerns or ask any questions about this notice.

Port of Palm Beach Draft Restriction – Update #1

Time: 1600/Date: September 11, 2006

The Army Corps of Engineers has completed soundings of the Lake Worth Inlet entrance channel and found shoaling caused by Tropical Depression ERNESTO to be extensive throughout the area. The Captain of the Port has imposed a draft restriction of 28 feet at high water slack on all inbound vessel, 27 feet for vessels carrying oil products, and 29 feet for all outbound vessels. These restrictions will remain in effect until further notice. Palm Beach Harbor Pilots may impose additional restrictions as conditions warrant, in coordination with the Captain of the Port.

The Captain of the Port may be reached at telephone (305) 535-8701, or via Channel 16 VHF FM Marine Radio through Coast Guard Sector Miami.

NOTICE TO NAVIGATION INTERESTS

OKEECHOBEE WATERWAY, FLORIDA

1. Navigation interests are advised that restricted navigation depths are being encountered in the Okeechobee Waterway. Water levels in the lake are averaging 10.41 feet and below.
2. Based on recent reports, restricted depths occur along Lake Okeechobee Route 1 and the Route 2 split just west of Port Mayaca Lock. At best, maximum draft would be 4.74 feet at a lake water elevation of 10.4 feet, NGVD 1929.
3. It is recommended navigation interests navigate strictly to the marked channel - Route 1, thereby avoiding uncharted waters.
4. Route 2 (the Rim Canal) is closed with navigation depths of 1.61 feet and less.
5. If Lake levels continue to drop and the outlook for rain is below normal. The table below gives Lake Conditions at a glance for Route 1:

Lake Level (ft., NGVD)	Available Depth (ft.)	Max Draft (ft.)
10.9	*5.24	*4.14
10.4	*4.74	*3.64
9.9	*4.24	*3.14
9.4	*3.74	*2.64

*Available depth may be temporarily impacted up to 1.1 feet by strong winds. Shoaling outside Port Mayaca further limits available depth to suggested maximum draft. Prudent boating

should be exercised according to prevailing weather. Navigation Depths are based on 2001 Channel Condition Survey.

6. Landowners are experiencing pump cavitation localized to an area two miles west and one mile east of the bridge which crosses the C-44 Canal at Highway 710 just south of Indiantown. It is requested that mariners reduce wakes in this reach of the river.

7. Additional information concerning Lake Okeechobee and the adjoining waterway may be obtained by accessing the Jacksonville District web site at <http://www.saj.usace.army.mil> and linking to the NAVIGATION and/or WATER MANAGEMENT selections from the Menu.
