CUSTOM RESEARCH
CUSTOM TELEPHONE STUDY
JUNE 2007

Acceptance of this report constitutes acceptance and acknowledgment of the terms, conditions and restrictions set forth herein.

Table of Contents

I.	Limitations	4
II.	Permissible Uses of This Study	8
III.	Description of Methodology	10
IV.	Sample Disposition	15
V.	Survey Results	17
VI.	Data Collection Materials	18
VII.	Report Table Specifications	19

I. Limitations

Limitations

A. Universe

Estimates in this report are based on persons 18 years of age or older in households located in the United States.

B. Sampling Error

Because the estimates included in this report are based on a sample selected from the sampling frame described in Section III.B.1, they will differ from a census of the universe using the same methods.

C. Non-Sampling Error

1. Non-Coverage Error

The sampling frame used to select the households and persons to be surveyed included households with a telephone. Therefore, non-telephone households were excluded.

2. Non-Response Error

The sample used for tabulating the estimates included in this report is not a perfect probability sample because the sample excluded persons that were not contacted or that refused to participate in the survey. The characteristics of non-contacted and non-cooperating persons may differ from the persons used in this report. The survey sample disposition is provided in Section IV of this report.

Limitations (cont'd)

C. Non-Sampling Error (cont'd)

3. Response Error

Some persons may not provide accurate information because they are unable or unwilling to do so or because they are unable to recall information. Despite efforts to maintain homogeneity in the interviewer techniques, interviewers may have influenced responses. Questionnaires, telephone interviewer monitoring and supervision were designed to reduce such response error. The extent to which such error occurred in this study is unknown.

4. Processing Errors

Although substantial efforts were made to ensure quality in the processing of the data collected, some deviations from instructions may have occurred.

Limitations (cont'd)

D. Liability

Nielsen Media Research, Inc. shall not be responsible or liable in contract, tort or otherwise and Client expressly waives any claims against Nielsen Media Research, Inc. for any loss, injury or damage of any kind, present or prospective, including without limitation any direct, special, incidental or consequential damages (including without limitation lost profits and loss of or damage to goodwill) whether suffered by Client or any third party even if Nielsen Media Research, Inc. is advised or has knowledge of the possibility thereof, directly or indirectly resulting from any errors or inaccuracies in this report or from any action or inaction whether or not negligent of Nielsen Media Research, Inc. or any officer, agent or employee of Nielsen Media Research, Inc. in compiling or publishing this report or in delivering or communicating the same to Client or others, or from the use of publication of the same by Client or others.

If any material errors or inaccuracies should occur in this report, it will be the Nielsen Media Research, Inc. policy, if feasible, to furnish appropriate correction notices which Client shall accept as its sole and exclusive remedy at law or in equity. In all other cases, in the event of the occurrence of any of the foregoing, Client shall accept as its sole and exclusive remedy at law or in equity an appropriate refund of any amount therefore paid or credited (at the option of Nielsen Media Research, Inc.) with respect to this report.

Nielsen Media Research, Inc. is a subsidiary of The Nielsen Company (US), Inc.

II. Permissible Uses of This Study

Written approval from Nielsen Media Research, Inc. is required before the estimates from this study can be published or released in any form. Such approval may be withheld unless the quotation is in accordance with Nielsen Media Research, Inc. policies as may be indicated to the Client in writing from time to time. No officer or employee of Nielsen Media Research, Inc. is authorized to give oral approval of any form of publication.

The Client may not use -- nor permit or allow the use of -- all or any portion of these data in any legal proceedings.

III. Description of Methodology

Description of Methodology

A. Purpose

This report provides estimates of Internet and media usage patterns, opinions and attitudes among persons 18 years of age or older in the United States.

B. Sample Design and Selection Procedures

1. Sample Frame

A sample frame is a list of the sampling units that have a chance of being selected in the sample. The frame used for this study was a list of all telephone numbers among exchanges that operate within the United States. This includes any telephone number within working residential prefixes as determined in development of the Nielsen Station Index (NSI) Total Telephone Frame (TTF). This list is referred to as a restricted random digit dial (RDD) frame. Households without telephones are excluded from the frame and have no chance to be selected for the sample. Households with more than one telephone number have a greater chance of selection than households with one telephone number. Households with more than one telephone number were given a weight to adjust for their higher probability of being selected for the sample.

2. Sample Design

The sample consists of telephone households in the United States. Prior to selection of the sample, the sample frame was stratified by geography to provide a proportionate geographic distribution of telephone numbers. A systematic sample of telephone numbers was selected with each telephone number in the frame having an equal probability of selection.

Description of Methodology (cont'd)

B. Sample Design and Selection Procedures (cont'd)

3. Sample Size

A sample of 141,324 phone numbers was selected for the survey. The survey sample disposition is provided in Section IV.

C. Data Collection

1. Data Collection Period

The survey data collection was conducted from May 7-27, May 29-31 and June 1-3, 2007.

2. Data Collection Procedures

Telephone interviews, using a Computer-Assisted Telephone Interviewing (CATI) system, were used to collect the information from the sample households. Interviews were conducted with a randomly selected household member at least 18 years old. Household members included any persons living at the selected residence. Up to eight attempts were made to reach the selected respondent.

Interviews were conducted by trained, experienced interviewers from a supervised telephone center with facilities for monitoring interviews. Interviewers were given detailed instructions on procedures. The CATI system controlled callbacks to non-contacted households and ensured that each sample phone number received up to eight attempts over a minimum of three days. The CATI system also controlled the administration of the interview by controlling question skip patterns and checking for logical or valid responses.

Description of Methodology (cont'd)

D. Computation of Estimates

Projectable persons weights are computed to agree with the Total U.S. persons 18+ universe estimates at the territory (5-way) level.

The projectable persons 18+ weights are derived for twelve mutually exclusive demographic categories. The universe estimates for each group are shown below:

	MALES	FEMALES
18-24	14,365,237	14,093,091
25-34	19,094,577	19,119,286
35-44	20,566,589	21,245,397
45-54	20,681,469	21,743,996
55-64	15,157,823	16,444,221
65+	15,407,057	20,644,963
TOTAL 18+	105,272,752	113,290,954

This report provides projected percents and counts. The denominator of each reported percent is described on each table. The computation of the sample respondent projections follows:

$$P(bi) = \frac{\text{Persons 18+ universe Estimate}}{\text{Sum of \# Persons 18+ in all sample households}}$$

Each initial person projection was adjusted such that the sum of projections among all respondents was equal to the universe estimates (UE) for persons 18+ in the United States.

E. Presentation of Results

Each table provides the base and weighted percents for the various responses to the question(s) on the table. For some questions, percents may sum to greater than 100% due to multiple responses or rounding. Percents may sum to less than 100% due to non-response.

IV. Sample Disposition

Sample Disposition

Total Sample	141,324	100.0%

FCC PHONE SURVEY 2007

BASE: ALL RESPONDENTS

INTRO Hello, this is (GIVE FIRST AND LAST NAME) calling for Nielsen TV Ratings. Today we are calling to conduct a special survey among a select group of households in your area.

BASE: ALL RESPONDENTS

A. (Are you/May I speak with) a household member 16 years old or older?

SAME RESPONDENT	1	(GO TO QB)
NEW RESPONDENT COMES TO PHONE	2	(REINTRO GO TO QA)
RESPONDENT UNAVAILABLE	3	(SET UP CALLBACK)
REFUSE	9	(GO TO PERSUADER 1)

BASE: ALL RESPONDENTS

B. To help us randomly select a household member to interview, would you please tell me how many persons 18 years old or older, including yourself, are in your household?

(RI: ENTER NUMBER 00-99
ENTER 00 FOR NONE; ENTER RF FOR REFUSE---> GO TO PERSUADER 2)

BASE: QB>4

C. So, to confirm, that is (INSERT RESPONSE QB) person(s) 18 years old or older in your household?

YES	1	(GO TO QD IF RESPONSE QB >4, ELSE GO TO QF)
NO/DK	2	(MAKE CORRECTIONS)
REFUSE	9	(GO TO PERSUADER 2)

BASE: QB>4

D. (IF HOUSEHOLD SIZE EXCEEDS "4" MEMBERS, ASK:) How many members of your household are males 18 years old or older?

(RI: ENTER NUMBER. ENTER 0 FOR NONE. ENTER RF FOR REFUSE.)

BASE: QB>4

E. Then (CALCULATED DIFFERENCE BETWEEN HOUSEHOLD SIZE AND NUMBER OF MALES) of the (NUMBER IN HOUSEHOLD) household members (are/is) female. Is this information correct?

YES	1	(GO TO QF)
NO/DK	2	(MAKE CORRECTIONS)
REFUSE	9	(GO TO PERSUADER 2)

BASE: ALL RESPONDENTS

F. May I speak to the (DESCRIPTION OF RANDOMLY SELECTED RESPONDENT SUCH AS "OLDEST/2ND YOUNGEST") (INSERT "MALE", "FEMALE" or "PERSON") who is 18 years old or older in your household?

YES, SAME RESPONDENT	1 (GO TO QG)
NEW RESPONDENT COMES TO PHONE	2 (REINTRO., GO TO QF)
NOT AVAILABLE	3 (ARRANGE CALLBACK)
RESP. UNAVAILABLE DURING CALLING DATES	5 (GO TO CLOSE)
REFUSE	9 (GO TO PERSUADER 1)

PERSUADER 1: We're doing a special telephone study today which will only take a few minutes of your time. We really appreciate your help.

PERSUADER 2: We're asking this question only to be certain that we contact persons of all age groups for this study.

BASE: ALL RESPONDENTS

G. (ONCE DESIGNATED RESPONDENT IS ON-LINE, READ:)

Thank you for agreeing to participate in this survey. Today we will be asking you questions on your sources of information for national news, local news, and current affairs. We are also interested in the amount of time you spend using these different sources. Please remember, for some sources, you may only use that source in short sittings, but perhaps several times a day. In answering these questions, please provide information on the total amount of time per week that you use these resources.

Also, before we begin I want to make a clear distinction between broadcast TV channels and cable or satellite TV channels. **Broadcast TV** channels are the channels that you can receive for free over the air if you have good reception. They are often the traditional channels like ABC, NBC, CBS, or PBS. These are often re-transmitted by the cable company, but are nonetheless broadcast channels. There are also **cable and satellite TV** channels such as CNN, HBO, Disney Channel, Discovery Channel, or Cartoon Network that you can only receive if you subscribe to either cable or satellite service.

BASE: ALL RESPONDENTS

Q1. In an average week, how much time do you spend, in total, watching or listening to **broadcast television** channels?

RI: ENTER 4-DIGIT NUMBER OF MINUTES, USING LEADING ZEROS.
