Education GEORGIA INSTITUTE OF TECHNOLOGY Atlanta, GA
Ph.D. in Nuclear Engineering, March 1997. GPA 4.0.

GEORGIA INSTITUTE OF TECHNOLOGY Atlanta, GA
M.S. in Health Physics, Medical Physics Option, March 1994. GPA 4.0.

HAVERFORD COLLEGE Haverford, PA
B.S. in Physics and Astronomy, May 1992. GPA 3.3.
Thesis, *The Dipole Anisotropy of the Cosmic X-Ray Background*.

Research PH.D. DISSERTATION: *The Calculation and Measurement of Nanodosimetric Energy Distributions for Electrons and Photons*. Advisor: Dr. C.K. Wang.

ANALYTICAL/COMPUTATIONAL: Expert in computational science methods and applications including PDE solvers, Monte Carlo methods, linear algebra, Fourier and error analysis, and parallel algorithms. Designed source specific radiation transport codes using S_N , P_N , and Monte Carlo transport techniques. Extensive work in radiation-hydrodynamics coupling. Experience using radiation transport codes including MCNP, ITS, PARTISN, LAHET, and EGS and the radiation-hydrodynamics code RAGE. Principal developer of the following Oak Ridge National Laboratory codes:

- Denovo: a parallel, 3-D, discrete-ordinates (S_N) linear transport code (C++, PYTHON, F95).

Have been a co-developer on the following major Los Alamos National Laboratory physics codes:

- RAGE: a parallel, Adaptive Mesh, Eulerian radiation-hydrodynamics code (F90).
- Milagro: a parallel, Implicit Monte Carlo radiation transport code (C++); principal developer, LA-CC-03-009.
- MCNP: an n-particle Monte Carlo transport code (F77); wrote packages for automated variance reduction, LA-13709-M.

EXPERIMENTAL: Extensive experience measuring single and mixed radiation fields using gas, film, and solid state detectors. Designed and fabricated Superheated Liquid Drop Detectors for neutron and photon dosimetry. Experience with radiation detection techniques involving charged particle, photon, and neutron fields. Utilized and designed systems for radiation spectroscopy and spectrum unfolding, dosimetry, and microdosimetry. Experience using A/D data acquisition systems, cryogenic and vacuum technology, and basic circuit design for data analysis. Designed data acquisition software using VISUAL BASIC and C/C++. Experience designing and building neutron and photon source shields.

OTHER RESEARCH EXPERIENCE: Research experience in computational radiation transport and radiative transfer, fusion Tokamak divertors, radiological risk assessment, neutron capture therapy, ray-tracing algorithms, and Compton camera imaging.

Employment	OAK RIDGE NATIONAL LABORATORY, 4/2007–PRESENT SENIOR R&D STAFF Develop computational methods, algorithms, and parallel application codes in the Nuclear Science and Technology Division for ORNL customers. Develop and submit proposals for scientific funding.	Oak Ridge, TN
	LOS ALAMOS NATIONAL LABORATORY, 4/1997–4/2007 PROJECT LEADER, 10/2003–4/2007 TECHICAL STAFF MEMBER, 11/1997–10/2003 POSTDOCTORAL FELLOW, 4/1997–11/1997 Project Leader of the Marmot and Jayenne projects. The Marmot project was a multi-physics code development effort within the Computational Sciences Program Element of ASC (Advanced Simulation and Computing) at LANL. Jayenne is a Monte Carlo thermal radiation project that encompasses the Milagro IMC code. As a staff member, contributed to radiation transport and radiative transfer methods development in CCS-4 Transport Methods Group. Mentor to junior staff members and graduate students. As a postDoc, wrote physics, variance reduction, and capabilities packages for MCNP.	Los Alamos, NM
Internships and Research	GEORGIA INSTITUTE OF TECHNOLOGY, 1994–1997 GRADUATE RESEARCH ASSISTANT Investigated topics in microdosimetry, Compton camera imaging, and NCT. System administrator for the Radiological Engineering Computer Network (RECoN) which featured five SUN UNIX workstations and peripheral devices. Webmaster for the RECoN World Wide Web server.	Atlanta, GA
	RADIATION ONCOLOGY INC., SUMMER 1993 MEDICAL PHYSICS INTERN Performed instrument calibrations and therapy planning in conjunction with an ACR certified medical physicist at a radiation oncology treatment center.	Atlanta, GA
	NEELY NUCLEAR RESEARCH CENTER, 1992–1993 GRADUATE HEALTH PHYSICS ASSISTANT Performed radiation surveys, instrument calibrations, and ALARA enforcement. Managed Georgia Tech campus low-level radioactive waste.	Atlanta, GA
	HAVERFORD COLLEGE, SUMMER 1991,90 RESEARCH ASSISTANT Investigated large scale galactic structure including the cosmic x-ray and microwave backgrounds.	Haverford, PA
Consulting	UNIVERSITY OF NEW MEXICO, LOS ALAMOS, SPRING 2002 INSTRUCTOR Taught CS 351: Design of Large Programs, a 3-credit hour graduate course required by the Computer Science Department at UNM.	Los Alamos, NM
	MGP INSTRUMENTS, 1994–1996 R&D CONSULTANT Performed MCNP simulations and assisted with primary calibrations to determine detector responses and submitted reports through MGPI to customers. This was a one-third time consulting job.	Smyrna, GA

Computer Skills	<p>OPERATING SYSTEMS: Advanced user and developer on POSIX-standard systems (UNIX, LINUX, DARWIN). Expert developer on LINUX and MACOS systems. Developed advanced physics codes on platforms running AIX, SOLARIS, IRIX, Tru64, Darwin and LINUX. Have system administration experience on SPARC clusters running SOLARIS and a 12 box LINUX cluster.</p> <p>PROGRAMMING LANGUAGES: Expert programming ability in C++, C, and FORTRAN. Advanced user of multiple scripting and extension languages including PYTHON, TCL/TK, Lisp, and BASH. Experienced user of XML and DocBook. Advanced user of L^AT_EX and T_EX typesetting systems.</p> <p>PARALLEL COMPUTING: Have developed code on large Symmetric Multi-Processing (SMP) computers (ASCI Blue Mountain, ASCI Q, ASCI WHITE, Lightning). Extensive knowledge of parallel programming systems and libraries including MPI, Pthreads, and OpenMP. Parallel programming and analysis experience on multi-core architectures.</p> <p>TOOLS AND APPLICATIONS: Developed advanced build models utilizing AUTOMAKE, AUTOCONF and GMAKE. Extensive knowledge of pre-processors including CPP and M4. Advanced user of the CVS/RCS version control system. Have designed GUI code with visual tools including Visual Basic and Visual C/C++. Mathematical simulation programming experience with Mathematica. Extensive experience utilizing visualization software including OpenDX and Ensight. Experience utilizing scientific software libraries including BLAS, LAPACK, ATLAS, HDF, and SPRNG. Extensive experience using common desktop applications including MS Office. Extensive experience testing open-source software.</p>
Certifications	<ul style="list-style-type: none"> DOE Q-clearance
Teaching	<ul style="list-style-type: none"> CS 351, <i>Design of Large Programs</i>, Instructor, University of New Mexico, Los Alamos, Spring 2002. IEEE Short Course, <i>Electron-Photon Transport Modeling with MCNP</i>, Nuclear Science Symposium and Medical Imaging Conference, Albuquerque, NM, November 10, 1997. NE/HP 6750, <i>Radiation Detection</i>, Teaching Practicum, Georgia Inst. of Tech., Fall Quarter, 1996. HP 8113, <i>Advanced Radiation Dosimetry</i>, Teaching Assistant, Georgia Inst. of Tech., Spring Quarter 1995. HP 6410, <i>Radiation Dosimetry</i>, Teaching Practicum, Georgia Inst. of Tech., Winter Quarter 1995.
Professional Courses Taken	<ul style="list-style-type: none"> Construx Software, <i>Software Project Survival</i>. Los Alamos, NM, October, 2003. Construx Software, <i>Real World Requirements</i>. Los Alamos, NM, October, 2003. Construx Software, <i>Success through Risk Management</i>. Los Alamos, NM, October, 2003. Construx Software, <i>Configuration Management</i>. Los Alamos, NM, October, 2003. Los Alamos National Lab, <i>Python for Scientists and Engineers</i>. Los Alamos, NM, October 21–22, 1999. True North pgs, Inc. <i>Mastering Projects Workshop</i>. Los Alamos, NM, August 18–21, 1998. Los Alamos National Lab, <i>Introduction to DANTSYS</i>. Los Alamos, NM, June 17–20, 1997.

- Los Alamos National Lab, *Advanced MCNP Topics*. Los Alamos, NM, May 13–16, 1997.
- Health Physics Society Summer School, *Internal Radiation Dosimetry*. UC-Davis, CA, June 20–24, 1994.

Awards

- NNSA Defense Programs Award of Excellence, 2005.
- Los Alamos LAAP Achievement Award, (2×) July 2006, August 2005, (2×) August 2004, June 2002.
- Los Alamos National Laboratory Distinguished Performance Award, *Jayenne Implicit Monte Carlo Project*, 2002.
- Best Paper Award, ANS Radiation Protection and Shielding Division Topical Meeting, Nashville, TN, 1998.
- Sigma Xi award for Best Ph.D. Thesis, Georgia Institute of Technology, 1997.
- Best Paper Award, Radiation Protection and Shielding Division, ANS Winter Meeting, Washington D.C., 1996.
- *Who's Who in America's Colleges and Universities*, 1996-1997.
- Best Paper Award, 3rd Place in Conference, ANS/HPS Eastern Regional Student Conference, Gainesville, FA, 1996.
- Best Paper Award, Risk and Safety Session, ANS/HPS Eastern Regional Student Conference, Gainesville, FA, 1996.
- Health Physics Society Graduate Student Fellowship, 1994-1995.
- ANΣ Nuclear Engineering Honor Society, 1994–1997.
- Health Physics Society Summer School Scholarship, 1994.
- Health Physics Society, Atlanta Chapter, Travel Grant, 1994.
- Ph.D Qualifier Award (highest test score), School of M.E., Georgia Tech, 1993.
- ΒΓΦ National Honor Society Member, 1993.

Organizations

- American Nuclear Society, Secretary of Math and Computational Division, 2000-2001.
- Society for Industrial and Applied Mathematics
- American Association of Physicists in Medicine

Presentations

1. Tom Evans and Rob Lowrie. Marmot: A Multi-Physics Code Development Project. *CCS Division External Review*, March 31, 2004.
2. Tom Evans. SQA by Parts. *ASCI Methods Workshop*, Monterey, CA, March 16, 2004.
3. Todd Urbatsch, Tom Evans, Jim Morel, and Henry Lichtenstein. Monte Carlo Methods for Thermal Radiative Transfer, LA-UR-03-0215, *talk to Russian scientists at the VNIIEF Laboratory*, Serov, Russia, January 27, 2003.
4. Todd Urbatsch and Tom Evans. SQE in Action: with a simultaneous, LIVE “Buggy Pageant”. *CCS Division External Review*, LA-UR-1932, March 26, 2003.
5. K. Thompson and T. Evans. CDI: The Common Data Interface package. *Nuclear Explosives Code Development Conference*, Naval Postgraduate School, Monterey, CA, October 21-24, 2002.
6. C.W. Nakhleh, Jas. Mercer-Smith, R.E. Chrien, T.M. Evans, T.J. Urbatsch, M.R. Clover, and M.L. Gittings. Validation of a Radiative Transfer Package in an ASCI Code (U). *Nuclear Explosives Code Development Conference*, Naval Postgraduate School, Monterey, CA, October 21-24, 2002.
7. T.M. Evans, T.J. Urbatsch, J.E. Morel, H. Lichtenstein. A Residual Discrete Monte Carlo Method for 1-D Radiation Diffusion. *Presentation to X-Division*, Los Alamos National Lab., June 12, 2001.
8. T.M. Evans and T.J. Urbatsch. An Objected-Oriented/Generic C++ Design for IMC. *Nuclear Explosives Code Development Conference*, Las Vegas, NV, 1998.
9. T.M. Evans. Savannah River Site Consolidated Incineration Facility health risk assessment. *ANS/HPS Eastern Regional Student Paper Conference*, Gainesville, FA, 1996.
10. T.M. Evans. Design and construction of a storage container for the $57.07 \mu\text{g}$ SR series ^{252}Cf source. *ANS/HPS Eastern Regional Student Paper Conference*, Gainesville, FA, 1996.
11. T.M. Evans. Cross sections for extended diffusion theory. *ANS Eastern Region Student Paper Conference*, Atlanta, GA, 1995.
12. T.M. Evans. Assessment of quality factors for low-energy electrons and photons. *ANS Eastern Region Student Paper Conference*, Atlanta, GA, 1995.

Other Work CENTRAL DOOR AND PLYWOOD CORP., SUMMER 1992,89,88 Reading, PA
TEAM LEADER
Organized daily workload and completed millwork orders in the Special Millwork, Circle Trim Department.

Activities and Interests

- Road Cycling, Mt. Biking (member of IMBA since 1998)
- Soccer (USSF National "C" license)
- World War II history

Personal Married with 2 children.
