ABSTRACT

Suggesting that beginning reading should be a combination of phonics instruction along with the "whole word" approach, this book presents 56 brief and concentrated units of study that demonstrate that both systems can work together to improve the process of learning to read. In all units in the book, learners have the opportunity to read complete sentences immediately based upon the vocabulary in the unit. The book also contains periodic reviews to reinforce previous knowledge. (RS)

PREFACE

Webster's dictionary gives one a concise and understandable definition of illiteracy, and this is "The inability to read or write". That our country has a grave literacy problem is highlighted not only in almost daily newspaper reports of crime, family breakdown, illegitimacy, drug abuse, and so forth, but also reports from responsible sources about the failure of our public schools.

Probably the most distressing study by the U.S. Department of Education states that "90 million adults, almost half of the population, possess at best the most rudimentary reading and math skills^m.

Former Education Secretary Lauro Cavasos said that "The reading and writing skills of American students remain 'dreadfully inadequate'".

In a poll of college faculties by the Carnegie Foundation, more than three-fourths of these teachers said that college undergraduates are seriously unprepared in basic skills and are illsuited for the academic rigors of higher education. One can only ask then if some of the blame lies in these colleges, primarily English and education departments, whose basic goal ought to be to graduate student teachers who are competent and well-prepared to teach in our elementary and secondary schools.

There is also much concern about the college-level teaching whose thrust seems to be from traditional subject matter to outcome based education which emphasizes teaching of values, attitudes, opinions, relationships and self-esteem rather than objective information.

Americans should be really concerned about this change in focus because the destiny of our country is inevitably determined by the knowledge and abilities of our children in our schools.

Undoubtedly, the most important challenge in education has been the bitter debate over the teaching of reading by the whole word approach versus the use of the phonics system.

As this writer understands the whole word approach, its advocates are firmly committed to the ideas that words should be recognized as whole words and that in most cases, children should not spell or sound out words at the beginner's level. If the child has trouble with a word, the teacher should tell him/her the word or lead the pupil into guessing in context. Thus, learning to read is based upon a cumulation of knowledge words with the idea that comprehension in context is the long term goal. Textbooks emphasizing this procedure are used in the upper grade levels year after year. It seems to me that the principle of "The whole is the sum of its parts, and the whole comes first" is evident.

In general, phonics advocates support the idea that the whole is the sum of its parts, but the parts come first. Hence, they believe that the most natural method is to have the student realize that letter symbols represent sounds and that if one combines certain letters with sounds, one can then read whole words.

Teachers of phonics follow a system in which the five short vowels, a, e, i, o and u and consonants are spelled by single letters, after which consonants and consonant combinations are spelled with two or three letters. Then vowels and vowel combinations are usually spelled with two letters, followed by the five long vowels and irregular spelling.

A recent federal report bolsters the view of phonics advocates that an understanding of phonics is "of inescapable importance to both skillful reading and its acquisition". This report also states that phonics instruction alone is not enough to give children the skills and interest needed to become readers.

¹Sources available on page IV.

Both sides of the reading controversy should be supportive of a synthesis of philosophies because it will provide the stimulus to help stop the outpouring of reading illiterates into our American society. The whole word advocates will recognize the goal of immediate and sustained contextual learning readily available in the practice sentences in the booklet in each and every unit. The phonics supporters should approve the substantive inclusion of their position which reveals the efficacy of combining vowels and consonants into a lifetime ability to read. Also, everyone should encourage the use of supplementary materials whenever it is apparent that they can be helpful.

So there seems to be a common ground, and it is the responsibility of writers of reading texts to incorporate this knowledge in their books and blend the two schools of thought.

This writer has been a teaching principal and classroom teacher for 35 years. He has taught about 4000 teenagers a linguistic grammar followed by a modern version of Standard English, which was then capped by having students write a sequence of short sentences evolving into longer compositions. Students were pre- and post- tested with the startling results of an average of three years growth in one semester.

During and after that time, he reached the conclusion that beginning reading should be a combination of phonics instruction along with the whole word approach as indicated in his new book, SPELL, SAY, and WRITE.

At this point, I should like to go into the past as an English major at the University of Michigan.

In the 40's and 50's, the English department had some excellent nationally recognized professors, especially Charles Fries who impressed me with his methods of investigation into everyday English. He researched the spoken word (via the telephone) and the written word (via written letters from servicemen) to gather data to facilitate the understanding of the structure of the English language. His book, *The Structure of English*, 1952, is an epic journey into the study of our language. In my opinion, he offers substantial evidence that the use of his list of function (signal) words can be an invaluable instrument in bridging the gap between the whole word supporters and the phonics people.

No fewer than five times in five pages in his book does he admonish the reader that "in order to respond to certain structural signals, one must know these words as items".

Naturally, all words have a function of meaning or meanings, but Fries' book lists specific function words as playing a vital role in signalling a variety of structures endemic to understanding our language.

These function (signal) words are some of the oldest words in the language and are listed on the next page.

FUNCTION WORDS

Note: The three dots after a word means that the list is not complete.

- 1. Determiners: one..., first..., the, a, an, my, your, his, her, its, our, their, Jim's..., this, that, these, those, all, each, either, every, few, many, most, much, neither, several, some, no, any, more...
- 2. Auxiliaries: may, might, can, could, will, would, should, shall, must has, have, had, was, were, got, kept, do, did, am, is, are.
- 3. Negative: not
- 4. Intensifiers: very, not, too, quite, awfully, awful, really, real, any, pretty, fairly, more, rather, most, still, even, some, much, no, unusually...
- 5. Coordinators: and, but, or, not, nor, rather than, both-and, either-or, neither-nor, not-but...
- 6. Prepositions: about, above, across, after, along, among, around, at, by, before, below, beside, between, beyond, despite, down, except, for, from, in, into, like, near, of, off, on, over, to, through, under, until, up, with, without, within...
- 7. Preparatory there: there
- 8. Interrogative pronouns: when, why, where, how, who, which, what...
- 9. Subordinators: when, whenever, because, although, since, before, after, as, if, as if, as though, even though, lest, so that, than, that, unless, until, where, while...
- 10. Interjections: well, oh, say, now, why, listen, look, yes, no, please, let's...
 (This group has various connotations.)

As an example of the frequency of function words, read the short paragraph by Reed Smith and look for function words.

"The terms, categories, and definitions of grammar are neither unusually numerous nor unusually difficult. Other school subjects are beset with much harder problems both for the teacher and the pupils, but we do not hear their advocates apologizing or giving ground on that account."

The, their, that, and much are determiners that signal the nouns that follow them. Of, with, for, and on are prepositions that signal prepositional phrases. Neither-nor, but, or, and, and both-and signal coordination; are signals the verb beset. Much and unusually are intensifiers. Not is a negative intensifier.

All words have one or more meanings, but the function words have, in addition to their particular meaning(s) an important job of signalling a particular language structure. Examples are: in the structure the boy, the refers to a particular person and, in addition, signals that boy is a noun. In the structure by the wall, by, meaning beside or near, has the additional function of signalling that by the wall is a structure known as a prepositional phrase.

Supporting the evidence that a significant number of words in English are the function words is a similar research study made by my eighth grade students. After completing the course material in the grammar and usage of English, and certain that they knew the structure and terms common in language study, I asked them to find a 1000 word corpus in any book, count off 1000 words, and then reread the material and count the number of function words. They then subtracted the function words from 1000, found the difference, and then divided the difference by the original number. The result indicated that approximately 40-50% of the corpus were the function, or signal words.

_{III} 7

As another check of the percentage of function words, this writer counted the first two pages of words in the preface and found that there were about 1018 whole words of which approximately 431 were function words. Dividing the difference of 431 by 1018 revealed that in this corpus 42.3% of the words were function words. The data appears to show that indeed the function words approximate about one-half of the above corpus studies. This writer believes that the near equality of use of both whole words and function words should lead teachers of both schools to make a determined effort to reconcile differences and come up with a solution that will prove profitable to everyone, especially the beginning readers.

INNOVATIVE ASPECTS OF SPELL, SAY, AND WRITE

There are two major innovations in the book Spell, Say, and Write.

- *1. As indicated earlier, the writer has combined the phonics method with the whole word system in an attempt to show that both systems can work together to improve significantly the process of learning to read.
- *2. The second innovation is that in all units mainly because of the function words, the program offers the learner the opportunity to read complete sentences immediately based upon the vocabulary in the unit.
- 3. The book has been programmed to elicit the skills of spelling, reading, writing, and comprehension of words and sentences.
- Children will learn to read from this book because the units are composed from easy to difficult with a logical sequence of development.
- 5. There are many periodic reviews to invigorate and reinforce previous knowledge.

A TEACHER ALERT!

The teacher needs to read all of the directions. If students ask about the meaning of words, the teacher should give a practical everyday definition.

The students must master each unit before moving to the next lesson.

To help in the memorization of function words, the teacher should write the words on the board, spell and say each word, and ask for student response.

THE ALPHABET

To the teacher: The first essential student(s) task is to memorize the printed letters as indicated below. This book recommends the printed type of the alphabet for beginners mostly because all the words in the following lessons are printed and probably easier to write than the cursive alphabet which can be learned in a later year. Point out that there is a capital and small letter for each sound and that capital letters are mainly used to begin sentences and proper nouns. Do not go on until the student(s) can sound and write every letter legibly. Insist upon small, neat careful writing. This may take several days but will help to insure positive results later on. The student(s) should write all the letters the first time. After that, they should practice only on small letters because these they will be using over and over in the following pages. The lines below can be used for writing, but the letters may be written on tablets.

TEACHER ALERT!

Since this program is also aimed at good penmanship, students should not go on until they can recognize and write all of the letters of the alphabet and especially the lower case letters.

In the following units, if some of the students have difficulty writing the words in the spaces provided, the author recommends tablets with lines be provided for those who need them. Encourage and praise the writing of small letters.

THE VOWEL A

Αa

To the teacher: Tell the student(s) that this is the capital type A they will use in their writing, and this is the small type a or a they should learn to write. Both types are used in this book.

Begin by telling them that both letters are often sounded and written as in the words Ann and mat. Note: In all units, the key words should be written and explained on the board.

Directions: Underline the a in the words below and then spell the word, say it, and write it.

lap	bag	rag	sat
cat	fan	fat	tag
ran	Sam	Dan	jam
and	pad	rat	Ann
pass	dad	man	nap
had	lap	bat	tag
van	Pam	sad	mat

SENTENCE EXERCISES

There are many words called whole words that just have to be learned so that you will know how to say them when you see them. Some of the first words to learn are the, will, is, can, on, its, my, and by. Whole words are helpful in understanding sentences, a string of words that has meaning. Your teacher will write these words on the board and tell you how to say them perhaps over and over until you are sure you know them.

Can you now read the sentences below? Remember, always read from left to right!

- 1. Sam will pass the jam.
- 2. The cat is on its mat.
- 3. A man sat with Pam.
- 4. Dad will nap on the pad.
- 5. A rat ran by Dan.
- 6. Dan and Sam sat by the fan.
- 7. Sam will tag Ann.
- 8. A fat cat is on my lap.

THE VOWEL E

Еe

This is the print type capital **E** and this is the small type **e** you will use in your writing. The name *Ted* and the word *set* tell us how to say the **e** and how it is written in this unit.

As in the previous lesson, you should underline the e and then spell, say, and write each of the words below in the space after them. Try to write as carefully as you can.

tell	pet	egg	get	
wet	beg	men	leg	
set	bet	sell	bell	
net	Ben	Ted	pen	
yes	them	mess	yell	
den	red	hen	fed	•

SENTENCE EXERCISES

As in the last lesson, you need to memorize some more whole words. Learn the following words, and when you know them, recite them to your teacher. I, you, he, she, it, we, was, were, go, went, with and they. After you know them, see if you can read the sentences below. Note: Personal pronouns are not function words.

- 1. We went with Ted.
- 2. The egg was a mess.
- 3. He is by the bed.
- 4. A fat rat ran on the mat.
- 5. She had a pet cat.
- 6. It is Sam by the bag.
- 7. You will go with Dan.
- 8. An egg, was by the her.
- 9. They ran by them.
- 10. I will pass the hat.
- 11. Dad can sell the pen.
- 12. Ben fed the cat.

THE VOWEL I

Ιi

This is the print type capital I and this is the small type i that you will use in your writing. You can learn the sound of this letter in the name **Bill** and **mill**.

Directions: First, underline the i in the word(s) below, then spell the word, say it, and then write it in the space. Use the print type.

big	did	fill	hill	•
sit	lip	Tim	did	
lid	sip	hit	is	
pin	big	rib	mill	
Bill	bib	Jill	him	
will	pill	his	bit	

SENTENCE EXERCISES

Again, you need to memorize some new whole words such as the following: one, two, three, four, five, six, seven, eight, nine, ten.

After your teacher agrees that you know the words, see if you can read the sentences below.

- 1. Bill can fill the bag.
- 2. Five men did go with them.
- 3. One mill was by the hill.
- 4. Two and four is six.
- 5. Dan can hit the bat.
- 6. She is my pal.
- 7. Three and six is nine.
- 8. A bib was on the bed.
- 9. Jill can fill the bin.
- 10. Ann is six and Tim is seven.
- 11. A big bat bit Bill.
- 12. His hat is by Dad.

A REVIEW OF SOME A, E, I, WORDS

The purpose of this lesson is to see if you can say the a, e, i, words that you have studied in the previous units. Just read each word aloud and your teacher will let you know if you are right.

pet	dad	pat	Ted	map	tap
did	fat	red	Jill	well	, fill
bib	yes	yet	tell	rat	Ned
nap	jam	rib	web	lap	pad

A SUMMARY OF WHOLE WORDS

Can you now remember the whole words that you memorized? See if you can read the words below.

one	by	three	he	my	seven
the	two	its	four	six	went
is	they	on	can	it	eight
we	will	was	nine	were	ten
go	with	${f five}$	I	you	she
and					

- 1. My dad will let me sit by him.
- 2. They can hit the ball.
- 3. Ted will go with his pal.
- 4. One man was wet.
- 5. Jim is six and I am five.
- 6. Ben went with them.
- 7. Our cat sat on my lap.

- 8. Ed and bill were by the fan.
- 9. We were sad.
- 10. His pet bit Ted.
- 11. Jill had my bat.
- 12. A hen sat on my lap.
- 13. They can pet the cat.
- 14. The mill was on the hill.

THE VOWEL O

 \mathbf{O} o

This is the print type capital O and the small type o that you will use in your writing.

The name Bob and the word top tell us how the o is said in this lesson.

Directions: Underline the o in the word(s) below, then spell the word, say it, and write it. Try to write carefully in forming your letters.

doll	pot	_ nod	hot
got	pop		Tom
fog	not	_rob	mop
log	Bob	_job	.jot
mob	hog	_ lot	moss
hop	sob	_hog	top
boss	Ross	dog	boss

SENTENCE EXERCISES

As before, you will need to memorize some more whole words. Learn the following words, and when you know them, recite them to your teacher. This, that, has, have, had, our, your, but, at, after. After you know them, read the sentences below.

- 1. This pot is hot.
- 2. That man has a job.
- 3. I will hop with Tom.
- 4. She had our mop.
- 5. Your boss is by the log.
- 6. Bill ran after Ed.
- 7. It was not Sam but Bob.
- 8. We have three dogs.
- 9. She did yell at the cat.
- 10. The fat hog sat by the mat.
- 11. They were not in the fog.
- 12. It was your dog that bit Ross.

THE VOWEL U

Uч

This is the print type capital U and the small type u that you will use in your writing.

The name Gus and the word hum tell us how the u is said.

Directions: Underline the u in the words below, then spell the word, say it, and write it.

pup	tub	run bug	
	rub	mugbun	
Gus	bud		
hum	dull	butgun	•
bus		fusstug	

SENTENCE EXERCISES

There are more whole words that you need to memorize at this time. Learn these words and then recite them to your teacher: his, her, their, to, up, down, near, into, between, over, said, and could. Can you read the sentences below?

- 1. He ran to the bus.
- 2. The sun went down over the hill.
- 3. The cat will tug at the rug.
- 4. Jim sat near me.
- 5. Jill will hug her dad.
- 6. Gus sat by the pup.
- 7. Their dog is by our cat.
- 8. He got up the hill.
- 9. A gun was on his hip.
- 10. He said that we could go.
- 11. She sat between Tom and Bill.
- 12. The mug fell into the tub.
- 13. His dad sat in the sun.
- 14. Jack and Jill went up the hill.
- 15. Their job is over.

A REVIEW OF THE VOWELS

AEIOU

In previous units you have studied the vowels a, e, i, o, u. The purpose of this lesson is to see if you can now identify and say all of the words below. Remember to look closely at the vowel in order to say the word correctly. Do not write them. Just say them.

fun	tell	jazz	cat	Ann
buzz	big	let	wet	dog
Dan	sap	rat	got	well

Below is a list of most of the words that you have memorized. See if you can get them all correct by saying them aloud to your teacher.

one	that	was	he	up	seven
the	by	five	four	our	near
is	two	with	can	your	into
we	they	had	nine	down	nine
go	said	at	after	my	she
this	her	their	but	six	ten
his	and	three	to	it	between
eight	could	has	have	its	will

C K ck

The letters above are the capital C and K and the small c and k. Both c and k sound alike as in cap and kid. Note to the teacher: If the student appears not to know the meaning of any words in the following units, give him/her a practical everyday definition.

Directions: Underline the c or k in each word and then spell the word, say it, and write it.

cup	kit	cab	cog	
kill	keg	cuff	cat	
cop	cut	cod	can	
cub	Ken	cob	Kim	<u>-</u>
cap	cuss	kiss	kid	

SENTENCE EXERCISES

We need to memorize some more whole words to help us learn to read basic sentences. Learn the following words and when you know them, recite the words to your teacher: why, when, what, because, since, from, of, for, often, us, these, those. Now read the sentences below.

- 1. When Tom sat on the cot, a kid sat near him.
- 2. Why could she not go with them?
- 3. Because I like cats, we have two of them.
- 4. Ken and Kim will kill the fat rat.
- 5. What we did was to fill the kit.
- 6. The cub sat on a hill.
- 7. Bill was sad because his hat was in the mud.
- 8. Since it was his bat, Dan put it near his hat.
- 9. Why did you get off the bus?
- 10. I put the hen in the pen.
- 11. She often will sit by these cats.
- 12. What Sam and Dad did was to fix the gun.
- 13. It is where he put it.
- 14. When can you go to the mill?

•	м

Quite often, one can find words ending in ck. Two examples are Jack and duck. Underline the ck in each word and then spell the word, say it, and write it.

neck	buck	Dick	tuck	
lock	sack	deck	luck	
pick	Nick	rack	duck	
rock	back	dock	sick	
pack	kick	tack	tick	

SENTENCE EXERCISES

Before you begin reading sentences, you need to memorize some more whole words. Learning these words will help a lot in reading more mature writing. The words are: all, each, every, either, neither, few, many, most, much, several, and some. After you think you know them, recite them to your teacher and then read the sentences below.

- 1. Several of the ducks sat on the dock.
- 2. Either Nick or Ken can pack the bag.
- 3. A few cups were put into the sack.
- 4. Neither one will tell about the lock.
- 5. Many of the men went by the rock.
- 6. Each sack was full.
- 7. Every man was in the hut.
- 8. Jill and Ann had most of the fun.
- 9. He can get the kit from Bob.

A REVIEW OF COMBINED LETTERS AND WORDS

In the lessons so far, you have seen words changed by adding letters at the beginning and end of words. It is important to know if you can spell and say most of the words you have had. This is called a review and will include many of the words you studied.

By now, you should know how to spell and say words. For example: To know the word *jump*, one first spells it as j-u-m-p and then say it and write it. In this lesson you will not need to write the words because you have written most of them already. Now see if you can spell and say the words below.

hands	press	acts	stick	mush	blend
Max	crash	\mathtt{hunt}	grip	grill	sash
glad	bills	sing	tent	drift	help

WHAT IS A PARAGRAPH?

You have read many sentences in the past lessons. If you write a string of sentences about something or someone and tell what happened, you will then have written a paragraph. Below is a sample of a short paragraph.

A FISH STORY

One day, Bill and Ted went fishing at a small lake near their home. To get there, they had to cross a small stream that was filled with water. They walked into the water with care but found that their legs and feet were getting very wet. They were so soaked that they had to get out of the stream and go home as fast as they could, so as not to catch cold. They ran fast and got there in a short time. When they opened the door, Dad looked at them and smiled and said, "Where are the fish?" Heads down, they went to their room to get some dry clothes. You can see that this is a fish story!

y, ies, ied, ier, ily

Some words ending in y can change their forms by dropping the y and adding ies or ied as in carry, carries, and carried. A few other words like happy can change their form by dropping the y and adding ier, iest, or ily. An example is happy, happier, happiest, happily. In the spaces below, underline the y, ies, ied, ier, iest, or ily and then spell the word, say it, and write it.

kitty	 bunny		daily	
sillier	 sunniest	•	babies	
carried	 puppies		happier	
happily	funny		baby	
stories	daddy		thirty	
fairies	 sleepily		ladies	
silliest	 forty		gladly	
thirstiest	 carries		_ponies

- 9. One clown was funnier than the rest.
- 10. We looked at the ponies.
- 11. I will gladly help him and her.
- 12. The babies cried every day.

TWO-SYLLABLE and THREE-SYLLABLE WORDS

A syllable may be several letters joined to another word as in Tues, a syllable, plus day, another syllable, becoming Tuesday. Two words joined as in class+room become class-room. Tuesday and classroom are examples of a two-syllable word. A three-syllable word has three parts as in No-vem-ber becoming November.

In this lesson, you will not need to do any writing. See if you can sound these longer words into two or three syllables as indicated above. If the word has two syllables, write a 2 after it and if it has three syllables, write a 3 after it as indicated below.

leapfrog 2	discover	himself	tower
enjoyment 3	flowers	September	birthday
