# QUALITY PRODUCT FINISHING, INC.

Quality Product Finishing Inc. is one of the largest jobshop powder coating and painting facilities in Texas. No matter how large or small the part or quantity, Quality Product Finishing can clean and paint your items to your specifications in record time. Quality Product Finishing has been supplying quality applied coatings on Houston and Texas manufacturer's parts and assemblies for over 25 years. The secret to their success has been to combine quality control with rapid turnarounds at a reasonable, competitive price to the customer.

In house coating capabilities include fully baked and cured powder coatings, sandblasting, abrasive cleaning, wet industrial, marine, offshore, special chemical plant and refinery coatings as well as fluoropolymer coatings. Conveyorized iron phosphate cleaning is available on powder coated parts. The powder coating operations feature two conveyorized lines. One line features manual electrostatic power coating application while the second line offers high speed, high volume, part runs using automatic electrostatic powder guns to apply the powder.

Turnaround times of 3 to 4 days are typical. Large skid mounted systems with sensitive internal electronics are masked, sandblasted and coated with wet process catalyzed coatings such as epoxy, polyurethane, polyester, polyamide, polyimid, acrylic, hi-solids coatings, primers and top coats. Large industrial and offshore equipment including valves, compressor stations, generators, pump station packages, tanks, hose and wire reels, refinery columns, and small offshore structures are also cleaned and coated at Quality Product Finishing. Coating selection consulting services are also available.
