The United States Coast Guard Navigation Information Service (NIS)

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: http://www.navcen.uscg.gov/gps/status/default.htm. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, Email: webmaster@smtp.navcen.uscg.mil, or on the World Wide Web at: http://www.navcen.uscg.gov

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

Hurricane Season

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as

Hurricane Season

needed

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

- (a) HURRICANE WATCH a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and
- (b) HURRICANE WARNING which indicate that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricane and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States.

For Complete Text of Message See Enclosure (2).

NAVAL PROTECTION ZONES

The U. S. Coast Guard has established protection zones around U. S. Naval vessels within U. S. navigable waters. Naval vessels protection zones are established within 100 yards of any U. S. Naval vessel. This includes any vessel owned, operated, chartered, or leased by the U. S. Navy or under the operational control of the U. S. Navy.

Vessels within 500 yards of a U.S. Naval vessel shall operating at the minimum speednecessary to maintain a safe course course and proceed as directed by the official patrol. Mariners may contact the U.S. Coast Guard on VHF Channel 16 regarding this message.

DATES OF LASTEST EDITIONS, NAUTICALS CHARTS AND MISCELLANEOUS MAPS

The Dates of Latest Editions, Nautical Charts and Miscellaneous Maps, dated April 1, 2007, published by the National Ocean Service, is available for issue. It may be obtained free by mail from the FAA/National Aeronautical Charting Office, Distribution Division AVN-530, 10201, Good Luck Road, Glenn Dale, MD, 20769-9700, by telephone at 1-800-638-8972 or from your local authorized nautical chart sales agent. This is a quarterly publication listing the most recent editions of nautical charts, miscellaneous maps and publications relating to navigation, weather, etc. with brief descriptions and up-to-date prices for most of the publications listed. Much of this information may also be obtained online at: http://chartmaker.ncd.noaa.gov/mcd/dole.htm

INTERNET DELIVERY OF U.S. NOTICE TO MARINERS

The National Geospatial-Intelligence Agency (NGA) has changed the way the U.S. Notice to Mariners are made available to the maritime community. NGA will continue to provide U.S. Notice to Mariners to the public but only in the digital version exclusively via the Internet.

U.S. COAST PILOT 4, ATLANTIC COAST: CAPE HENRY. VA TO KEY WEST, FL

PUBLICATION - National Ocean Service - U.S. Coast Pilot 4, Atlantic Coast: Cape Henry, VA to Key West, FL, 2006, 38th Edition, is ready for issue and may be obtained from:

Federal Aviation Administration National Aeronautical Charting Office Distribution Division, AVN - 530 10201 Good Luck Road Glenn Dale, MD 20769-9700

and authorized agents of the National Ocean Service. Price \$26.00. The 2006 Edition cancels the preceding 2005 Edition. All corrections to the previous edition issued in Notices to Mariners are incorporated in this edition.

Mariners are encouraged to use the convenient -RECORD Of CHANGES- form on Page VI of this book. All Coast Pilot changes published in the U.S. Coast Guard Local Notice to Mariners, National Geospatial-Intelligence Agency Notice to mariners, and on the Internet at: http://nauticalcharts.noaa.gov/nsd/cpdownload.htm. are serially numbered (i.e., Changes No. 1, Changes No. 2. etc.) to assist you in tracking the changes.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa

Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

FLORIDA-INTRACOASTAL WATERWAY-TOLOMATO RIVER-PALMS SHORES-SAN SEBASTIAN RIVER: Dredging Operations. (Updated Version)

Subaqueous Services are advising all mariners transiting the San Sebastian River between the U.S. 1 bridge and the North Prong Dam, that this portion of the river is being used as a staging area for floating and submerged pipelines. The piping is marked with identification buoys and lights. Actual dates and locations/positions of new dredging area will be updated in this Local Notice to Mariners as they commence:

(See below for new location/position as of May 29, 2007)

Dredging will commence on June 1, 2007, in the vicinity of 27 degrees 50-48.28N 080 degrees 28-19.43W. This work will continue for approximately 35-45 days, on or about July 21, 2007.

This work will include a 150' X 40' 16" hydralic dredge C-WAY, one (1) tugt boat (Razorback), two (2) tender boats, and one (1) flexifloat barge. Dredge operations will continue twelve (12) daylight hours a day, seven (7) days a week until completion.

All vessels can be contacted on VHF Channel 1 for safety and maneuvering information. All mariners are urged to transit this area with extreme caution and a slow safe speed as some pipe is submerged. For further information please contact Mr. Chris Faught at (321) 228-0235.

FLORIDA - INTRACOASTAL WATERWAY - CHARLOTTE HARBOR TO TAMPA BAY: Hazard to Navigation. (Updated)

The Coast Guard has received a report of a possible submerged object in the vicinity of the center span of the Ringling Bridge.

On February 10, 2006 three (3) temporary buoys were deployed south of the new Ringling Causeway Bridge, in Sarasota Bay to mark submerged rocks that could pose a hazard to navigation during high tides. All three (3) buoys are east of the Gulf Intracoastal Waterway outside of the marked channel. The buoys are a standard, white, cylindrical information buoy. The buoys are anchored in place either on or in close proximity to the submerged rocks.

The buoys are one (1) foot in diameter and approximately 5 ½ feet tall, marked with a orange diamond shape and worded HAZARD. The approximate positions of the buoys are:

- 1. 27-19-52.620N 082-33-24.060W
- 2. 27-19-52.920N 082-33-23.220W
- 3. 27-19-53.940N 082-33-22.080W

It is requested that all mariners exercise caution when transiting this area.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious venders attempting to sell/deliver merchandise or drop off packages

POSSIBLE SUBMERGED HAZARDS/DEMOLITION DEBRIS IN COOPER RIVER SHALLOWS FOR DURATION OF GRACE AND PEARMAN BRIDGE DEMOLITION

Boaters are advised to stay in the main channel when transiting under the new Ravenel Bridge on the Cooper River. The South Carolina Department of Transportation and their demolition contractor are in the process of removing the remaining foundations for the Grace and Pearman bridges. This project will continue into 2007. During this period, there is the possibility of both partially submerged hazards and demolition debris in the areas outside the main channel. The contractor's work area will be marked with temporary buoys, but these buoys may not be visible at night. To avoid hazards boaters should transit only through the main Cooper River channel (HOG ISLAND REACH) or should consider using Town Creek channel as an alternate route.

Boaters are also reminded to obey Navigation Rule 9 and give large ships the right of way while in or planning to cross the main channel. Vessels less than 20 meters long, and sailing vessels, shall not impede the passage of a vessel that can safely navigate only within a narrow channel.

The U.S. Coast Guard has designated the waters under the old and new bridges as a Regulated Navigation Area (shown below in purple). All vessels are prohibited from anchoring, mooring, or loitering within the regulated area, unless specifically authorized by the U.S. Coast Guard.

Boaters should contact Coast Guard Sector Charleston's 24x7 operations center on VHF channel 16 or via phone at (843) 724-7616 to report any concerns or ask any questions about this notice.

Port of Palm Beach Draft Restriction – Update #1

Time: 1600/Date: September 11, 2006

The Army Corps of Engineers has completed soundings of the Lake Worth Inlet entrance channel and found shoaling caused by Tropical Depression ERNESTO to be extensive throughout the area. The Captain of the Port has imposed a draft restriction of 28 feet at high water slack on all inbound vessel, 27 feet for vessels carrying oil products, and 29 feet for all outbound vessels. These restrictions will remain in effect until further notice. Palm Beach Harbor Pilots may impose additional restrictions as conditions warrant, in coordination with the Captain of the Port.

The Captain of the Port may be reached at telephone (305) 535-8701, or via Channel 16 VHF FM Marine Radio through Coast Guard Sector Miami.

Emergency Position Indicating Radiobeacons (EPIRBs), are designed to save your life if you get into trouble by alerting rescue authorities and indicating your location. EPIRB types are described in the accompanying table.

EPIRB Types				
Туре	Frequency	Description		
Cat I	406/121.5 MHz	Float-free, automatical ly activated EPIRB. Detectable by satellite anywhere in the world. Recognized by the Global Maritime and Distress Safety System (GMDSS).		
Cat II	406/121.5 MHz	Similar to Category I, except is manually activated. (Some models are also water activated).		

406 MHz EPIRBs (Category I, II): The 406 MHz EPIRB was designed to operate with satellites. The signal frequency (406 MHz) has been designated internationally to be used only for distress. Other communications and interference are not allowed on this frequency. Its signal allows a satellite local user terminal to accurately locate the EPIRB and identify the vessel

(the signal is encoded with the vessel's identity) anywhere in the world (there is no range limitation). These devices are detectable not only by COSPAS-SARSAT satellites which are polar orbiting, but also by geostationary GOES weather satellites. EPIRBs detected by the GEOSAR system, consisting of GOES and other geostationary satellites, send rescue authorities an instant alert, but without location information unless the EPIRB is equipped with an integral GPS receiver. EPIRBs detected by COSPAS-SARSAT (e.g. TIROS N) satellites provide rescue authorities location of distress, but location and sometimes alerting may be delayed as much as an hour or two. These EPIRBs also include a 121.5 MHz homing signal, allowing aircraft and rescue craft to quickly find the vessel in distress. These are the only type of EPIRB which must be certified by Coast Guard approved independent laboratories before they can be sold in the United States.

A new type of 406 MHz EPIRB, having an integral GPS navigation receiver, became available in 1998. This EPIRB will send accurate location as well as identification information to rescue authorities immediately upon activation through both geostationary (GEOSAR) and polar orbiting satellites. These types of EPIRB are the best you can buy.

406 MHz emergency locating transmitters (ELTs) for aircraft are currently available and 406 MHz personnel locating beacons (PLBs) are also available.

The Coast Guard recommends you purchase a 406 MHz EPIRB, preferably one with an integral GPS navigation receiver. A Cat I EPIRB should be purchased if it can be installed properly.

Proper registration of your 406 MHz EPIRB is intended to save your life, and is mandated by

end 9 mil

Federal Communications Commission regulations; the Coast Guard is enforcing this FCC registration rule.

If you purchase a new or a used 406 MHz EPIRB, you MUST register it with NOAA. If you change your boat, your address, or your primary phone number, you MUST re-register your EPIRB with NOAA. If you sell your EPIRB, make sure the purchaser re-registers the EPIRB, or you may be called by the Coast Guard if it later becomes activated. An FCC ship station license is no longer required to purchase or carry an EPIRB. Download or request 406 MHz EPIRB registration forms from www.sarsat.noaa.gov/beacon.html, and mail or fax completed forms to:
