

Hurricane Ivan

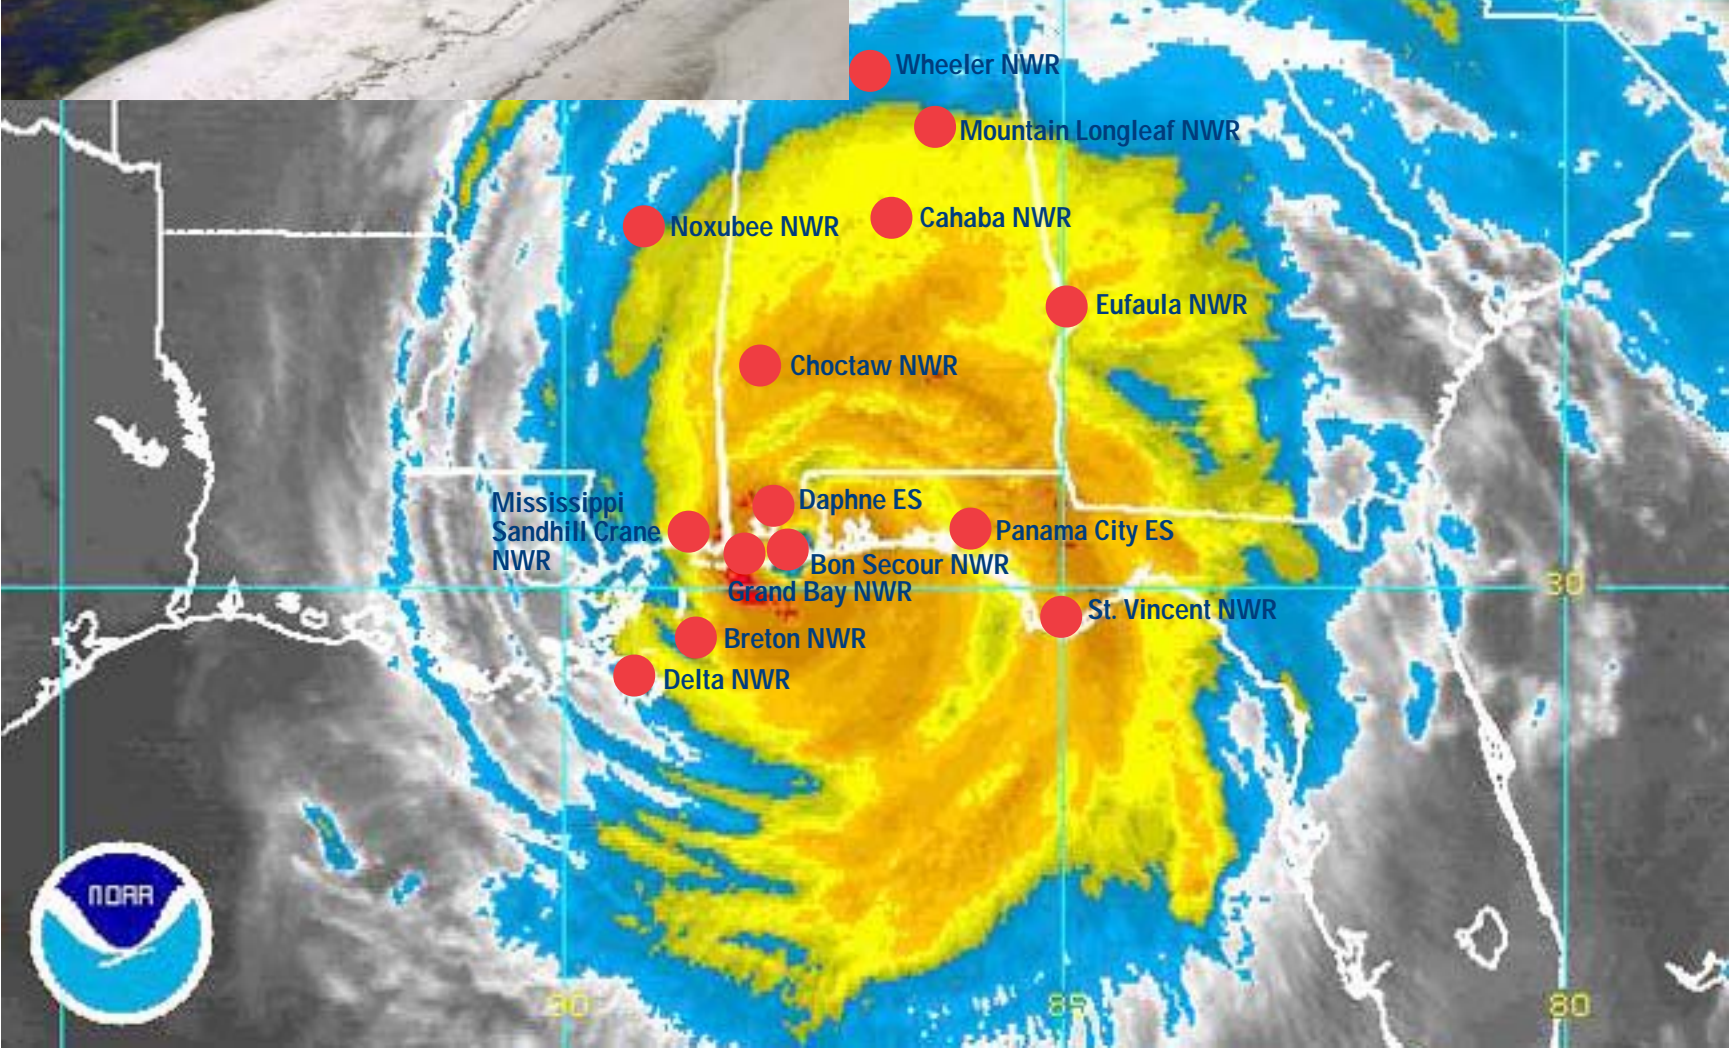

Bon Secour and Choctaw National Wildlife Refuges, two among fourteen Refuges and Ecological Services Field Offices impacted
Thursday, September 16, 2004

Above: Bon Secour NWR impacted by Hurricane Ivan including major debris. Below: damage to primary dunes at Bon Secour NWR is extensive. These dunes are critical habitat to endangered beach mice populations.

Above: missing section of boardwalk at Bon Secour NWR. Below: this refuge residence (Friend House) was condemned due to structural defects occurring from tidal surge and 2-3' water intruding through floor into the residence.

Extensive downed trees at Choctaw NWR.

Boat on the road at Bon Secour NWR.
