# INCIDENT MANAGEMENT SITUATION REPORT <br> SATURDAY, JULY 22, 2006 - 0800 MDT <br> NATIONAL PREPAREDNESS LEVEL 4 

## CURRENT SITUATION:

Initial attack activity was heavy nationally with 308 new fires reported. Three new large fires (*) were reported, two in the Southern California Area and one in the Southern Area. Fourteen large fires were contained, four each in the Rocky Mountain and Eastern Great Basin Areas, three in the Northern Rockies Area, two in the Western Great Basin Area and one in the Northern California Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Minnesota, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Wisconsin, Washington, Utah, Arkansas, Texas, Idaho and Wyoming.

Two MAFFS C-130 aircraft and support personnel from the $145^{\text {th }}$ Airlift Wing, Charlotte, North Carolina have been deployed to Klamath Falls, Oregon. Major Dan Cloninger, NCANG is the Mission Commander.

## EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

ELKHORN, Salmon-Challis National Forest. A Type 2 Incident Management Team (Morcom/Lunde) is assigned. This fire is six miles northeast of North Fork, ID in timber. Steep terrain is hindering containment efforts. Minimal fire growth with isolated interior torching was reported.

QUARTZ CREEK, Payette National Forest. A Type 2 Incident Management Team (Barnett/Haskins) is assigned. This fire is six miles north of Yellowpine, ID in timber. One cabin is threatened. Steep, rugged terrain is hindering containment efforts. Individual tree torching and spotting up to one-quarter of a mile was reported.

TRAILHEAD, Sawtooth National Forest. This fire is ten miles southwest of Stanley, ID in timber. Steep, rugged terrain is impeding containment efforts. Torching, spotting and uphill runs were reported.

DOG VALLEY, Fish Lake National Forest. A Type 2 Incident Management Team (Lund) is assigned. This fire is three miles northeast of Cove Fort, UT in grass, sagebrush, pinyon pine, juniper and oak. The community of Cove Fort, Interstates 15 and 70 corridors, wildlife habitat and a historical site remain threatened. Steep, rugged terrain and limited access are hampering containment efforts. Single tree and group torching was observed.

RANCH, Southwest Area, Utah State Division of Forestry Fire and State Lands. A Type 2 Incident Management Team (Brunner) is assigned. This fire is nine miles northeast of Leeds, UT in cheatgrass, brush, pinyon pine and juniper. A watershed area, wildlife habitat and recreational access to a part of Zion National Park are threatened. Difficult access and unfavorable weather are impeding containment efforts. Smoldering fire behavior was observed.

SPRING, Moab Field Office, Bureau of Land Management. This fire is 15 miles south of West Water, UT in pinyon pine, juniper, sagebrush and grass. Numerous residences and wildlife habitat are threatened. Single tree torching was reported.

TWIN PEAKS, Richfield Field Office, Bureau of Land Management. This fire is ten miles west of Kanosh, UT in grass, sagebrush, pinyon pine and juniper. Fire behavior was characterized by interior torching and smoldering.

LICK CREEK, Payette National Forest. A Fire Use Management Team (Hahnenberg) is assigned. The Team is also managing the Dunce WFU. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 21 miles northwest of McCall, ID in timber. Several structures within the Ponderosa Campground and critical fisheries habitat are threatened. Minimal fire activity with surface fire was reported.

KILN COMPLEX, Arizona Strip Field Office, Bureau of Land Management. This fire is 30 miles southwest of St. George, UT in brush and cheatgrass. The complex includes the Kiln, Lime, and White Rock Fires. Steep, inaccessible terrain continues to hamper control efforts. Creeping and smoldering with isolated torching were reported.

DUNCE, Payette National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 31 miles east of Edwardsburg, ID in cheatgrass. The University of Idaho research station at Taylor Ranch is threatened. Structure protection is in place. The fire spread upslope in the grass and smoldered in downed timber.

JIM CREEK, Bridger Teton National Forest. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 24 miles north of Pinedale, WY in subalpine fir, spruce and pine. Ground fire with isolated torching was observed.

PACKER GULCH, Southwestern Land Office, Montana Department of Natural Resources and Conservation. A Type 2 Incident Management Team (Kusicko) is assigned. This fire is 11 miles northwest of Drummond, MT in timber. Residences, utility lines and other structures remain threatened. Rugged terrain and flash fuels are hindering containment efforts. Running fire with scattered group torching was reported.

SOUTH PINE, Gallatin National Forest. A Fire Use Management Team (Hall) is assigned. This fire is 11 miles northeast of Pray, MT in timber. Trail bridges and a campground are threatened. Steep terrain, weather and dry fuels are impeding containment efforts. Moderate fire behavior with interior torching was observed.

BLACK PULASKI COMPLEX, Miles City Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Stanich) is assigned. This complex, consisting of the Black Pulaski, Lodgepole, Hill Coulee, Lost Creek, Square Butte, Soda Creek and Chalk Butte fires, is 25 miles north of Jordan, MT in ponderosa pine, grass, juniper and sagebrush. Smoldering, creeping with some short runs were reported.

SAGE, Northern Cheyenne Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Reid) is assigned. A transfer of command back to the local unit will occur tomorrow. This fire is one mile west of Ashland, MT in timber, grass and understory. Minimal fire activity was reported.

UL BEND, Charles M. Russell National Wildlife Refuge. This fire is 60 miles northwest of Winnett, MT. The fire is in patrol status. No further information was received.

## ROCKY MOUNTAIN AREA INCIDENTS/LARGE FIRES:

SAWMILL, Natrona County. A Type 2 Incident Management Team (Goheen) is assigned. This fire is ten miles east of Edgerton, WY in sagebrush, ponderosa pine and juniper. Several residences,
oil wells, telecommunications towers and powerlines are threatened. Short duration crown runs were reported.

LITTLE VENUS, Shoshone National Forest. A Type 2 Incident Management Team (Smith) is assigned. This fire is 30 miles west of Meeteetse, WY in bug-killed spruce with heavy down fuels. A historic cabin is threatened. Extreme fire behavior with torching and spotting was reported.

BOMBER BASIN, Shoshone National Forest. This fire is 15 miles south of Dubois, WY in timber. Single tree and group torching was reported.

WEAVER, Ute Mountain Agency, Bureau of Indian Affairs. This fire is ten miles southwest of Red Mesa, CO in pinyon pine, juniper and sagebrush. Native American archaeological sites are threatened. Heavy fuel loading and steep terrain are impeding containment efforts. Isolated interior torching was reported.

## EASTERN AREA INCIDENTS/LARGE FIRES:

CAVITY LAKE, Boundary Waters Canoe Area Wilderness, Superior National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This fire is 44 miles northeast of Ely, MN in timber and blowdown. Residential and commercial structures are threatened. The fire is progressing toward the Canadian border. Heavy fuel loading and strong winds are impeding containment efforts. Extreme fire behavior with backing through continuous heavy blowdown was reported.

TURTLE LAKE, Superior National Forest. A Fire Use Management Team (Svalberg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 15 miles east of Ely, MN in timber. Group tree torching and shortrange spotting were observed.

## SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

HEART-MILLARD, San Bernardino National Forest. A Type 1 Incident Management Team (Molumby) is assigned. This fire, comprised of the previously reported Heart and Millard Complex fires, is eight miles southwest of Big Bear Lake, CA in timber and brush. Steep terrain and inaccessibility are impeding containment efforts. Creeping and smoldering were observed.

COYOTE, Tulare Unit, California Department of Forestry \& Fire Protection. This fire is nine miles east of Porterville, CA in grass and oak brush. High temperatures are hampering containment efforts. No further information was received.

COVINGTON, Joshua Tree National Park. This fire is 17 miles northeast of Palm Springs, CA in Joshua trees and grass. Erratic winds, high temperatures and inaccessibility are hampering containment efforts. No further information was received.

## SOUTHWEST AREA INCIDENTS/LARGE FIRES:

CIBOLA, Cibola National Wildlife Refuge. A transfer of command from a Type 2 Incident Management Team (Reinarz) back to the local unit has occurred. This fire is 42 miles southwest of Yuma, AZ in chaparral and salt cedar. Residences and endangered species remain threatened. Limited torching near the perimeter was observed.

STONE, Fort Apache Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Philbin) is assigned. This fire is 16 miles northwest of Whiteriver, AZ in timber and chaparral. Severe thunderstorms with lightning hampered containment efforts. Creeping and smoldering were reported.

THUMB, Truxton Canon Agency, Bureau of Indian Affairs. This fire is 13 miles northeast of Supai, AZ in pinyon pine, juniper and grass. No new information was reported. This will be the last report unless new information is received.

POCKET, Kaibab National Forest. This fire is 18 miles southwest Jacob Lake, AZ in mixed conifer. No new information was reported. This will be the last report unless new information is received.

## NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

CARIBOU COMPLEX, Klamath National Forest. A Wildland Fire Use Management Team (Perkins) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning ten miles southeast of Cecilville, CA in timber. This complex consists of the Caribou and Moraine fires. Trail closures remain in effect for the Caribou Lakes area. Active burning on the northeast side of the fire was reported.

## OUTLOOK:

Fire Weather Watches: East slopes of the central Cascades Saturday afternoon and evening for thunderstorms with little or no rain after an extended dry period.

Weather Discussion: Strong high pressure will prevail over northern Nevada and southern Idaho with very hot and dry conditions persisting across the Pacific Northwest and the northern Great Basin. Isolated dry thunderstorms are possible along the Cascade Range in Oregon, with mostly wet storms further south across California and the Southwest. A dry northerly flow will suppress any convective activity over Wyoming and northern Colorado through the weekend.

| Geographic Area Weather | High Temperatures | Minimum Relative Humidity | Wind |
| :---: | :---: | :---: | :---: |
| Eastern Great Basin Area Idaho, Bridger-Teton: Mostly sunny. <br> Northern Utah: Mostly sunny. Southern Utah, Arizona Strip: Partly cloudy with scattered showers and thunderstorms in the west, isolated showers and thunderstorms in the east. | Idaho, Bridger-Teton: 82 to 98 mountains, 95 to 105 valleys. <br> Northern Utah: 82 to 92 mountains, 93 to 105 valleys, <br> Southern Utah, Arizona Strip: 85 to 95 mountains 95 to 110 valleys, 109 to 118 low deserts. | Idaho, Bridger-Teton: 10 to $24 \%$ mountains, 10 to $16 \%$ valleys. Northern Utah: 13 to $17 \%$ west, 14 to $25 \%$ east. <br> Southern Utah, Arizona Strip: 22 to $32 \%$ mountains, 13 to 27\% valleys. | Idaho, Bridger-Teton: <br> Variable 8 to 10 mph . <br> Northern Utah: <br> upslope/upvalley 5 to 15 mph. <br> Southern Utah, Arizona <br> Strip: upslope/upvalley 5 to 10 mph . |
| Northern Rockies Area Huge upper level ridge will produce excessively hot and dry conditions across Idaho and Montana. Poor humidity recoveries especially over higher elevations at night. Skies will be clear with light and variable winds as well. A warming trend will continue over North Dakota with partly cloudy skies and dry conditions. | West of divide: 88 to 104. <br> East of divide: 94 to 98. <br> North Dakota: 84 to 93 . | West of divide: 11 to 18\%. <br> East of divide: 16 to 25\%. <br> North Dakota: 25 to 35\%. | West of divide: Variable 5 to 8 mph . <br> East of divide: Variable 5 to 8 mph . <br> North Dakota: Northerly 5 to 15 mph . |
| Rocky Mountain Area Isolated thunderstorms over the southern Colorado mountains, otherwise dry. | Mid 80s to mid 90s lower elevations, with 70s in the mountains. | 12 to 20\% Wyoming and western Colorado. 20 to 30\% elsewhere. | Northerly 5 to 15 mph . |
| Geographic Area | High | Minimum Relative | Wind |

| Weather | Temperatures | Humidity |  |
| :---: | :---: | :---: | :---: |
| Eastern Area <br> Scattered showers and thunderstorms likely across the southern Northeast and MidAtlantic states. Scattered showers possible over the northern and central Great Lakes. Fair elsewhere. | 77 to 82 over the Great Lakes and Northeast states. 82 to 87 elsewhere. | 37 to $42 \%$ across the western Great Lakes, Iowa, Missouri, and Illinois. Greater than 42\% elsewhere. | Light to moderate winds. |
| Southern California Area Patchy morning low clouds and fog coastal areas, otherwise partly cloudy with a few showers and thunderstorms over the mountains and deserts. | 85 to 100 mountains. <br> 100 to 110 valleys. <br> 100 to 110 upper deserts. <br> 110 to 120 lower deserts. | 40 to 60\% coastal areas. <br> 20 to 40\% valleys. <br> 20 to $40 \%$ mountains. <br> 15 to 30\% deserts. | Southeast to southwest 5 to 15 mph . |
| Southwest Area <br> Partly cloudy most areas, except mostly cloudy northern and northeastern New Mexico. Widely scattered showers and thunderstorms across central and eastern Arizona into far western New Mexico. Scattered showers and storms across northern New Mexico. | 90 to near 116 lower elevations. 70 to 90 in the higher terrain. | 13 to $25 \%$ most lower elevations, 20 to $35 \%$ higher elevations. | Light and variable across Arizona. East to southeast from 10 to 20 mph for New Mexico and west Texas. Winds becoming east to northeast at 15 to 25 mph and gusty across northern and central New Mexico by evening. |
| Northern California Area Skies varying mostly sunny to partly cloudy, with a chance of isolated showers or thunderstorms over mainly mid and higher terrain. Just patchy fog near the coast. | Mid 80s to near 110 inland, with cooler temperatures right near the ocean. | 13 to $25 \%$ drier inland areas. | Variable to 12 mph . |
| Northwest Area <br> Hot and sunny. Isolated to scattered dry thunderstorms mainly near the Oregon Cascades and southern Washington Cascades. | 95 to 105. | West of Cascades: around 20\% East of Cascades: around 10 \% | North to Northwest winds increasing to 15 to 20 mph along the coast in the afternoon. Elsewhere light and variable winds becoming upslope/upvalley 5 to 10 mph in the afternoon. |
| Western Great Basin Area No information reported. |  |  |  |
| Southern Area No information reported. |  |  |  |

## ASH PIT HAZARDS

Ash pits are an inherent and invisible risk to wildland firefighters that can cause severe burns and injuries. Ash pits are created when organic combustibles consume underground and empty space is created that is undetectable from the surface.

- Environmental factors that increase the risk of ash pit formation after a wildfire:
- Extensive root systems of trees and shrubs.
- Deep duff or peat, the organic layer covering mineral soil.
- Landscapes that have once been cultivated or manipulated by heavy equipment ie, old dozer piles, sawmills, timber sale yards or decking areas.
- Small rodent holes that have become filled with decadent combustible debris ie, beaver holes near dams and stream beds, Badger and Coyote dens.
- White ash is sometimes an indicator as are groups of hovering insects.

Mitigation measures to consider:

- Identification of high risk landscape.
- Identify and flag all hazardous discovered ash pits.
