

Hello Folks,

I have to register my opinion about the government trying to turn the Bangor TFR into a no flight zone. I am a voting, taxpaying citizen who has lived in the Seattle area for 53 years. I fly a float plane on a regular basis. I used to like to fly children past the Bangor station at low altitude and show them the submarines. It was quite a thrill for the little ones, and the big ones too. Since 9/11 the government, under the appearance of "doing something", has taken away four areas of flying within 15 minutes flying time of my home. This is nonsense. We need to run America for Americans, not for the fanatics that would do us harm. How am I and thousands of other law abiding citizen to respond when our tiny Cessna's are considered "threats"? Give me a break? One could do more damage with a pickup truck! Please don't take away any more airspace. Life has been difficult enough for small private pilots without the government making it worse. Please remove the TFR's in Puget sound. They are a waste of taxpayer money and an infringement on the rights of innocent citizens. And all this under the guise of Security? Give me a break. You know who the enemy is. Go get them!!
