## PERFORMANCE SPECIFICATION SHEET

SWITCH, PUSHBUTTON, ILLUMINATED,
PUSH BUTTONS FOR
(SNAP-IN AND SCREW-IN)
This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the switches described herein shall consist of this specification and MIL-PRF-22885.

## NOTES:

1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerances are $\pm .010(0.25 \mathrm{~mm})$ for three-place decimals and $\pm .02(0.51 \mathrm{~mm})$ for two-place decimals.
4. The positive index tab configuration is optional. It shall engage the clots in the switch housing to prevent rotation.
5. Moisture seal furnished with push buttons.

## REQUIREMENTS:

Dimensions and configuration: See figures 1 and 2, and table I.
Vibration: Grade 2 (10-500 Hz).
Thermal shock: $71^{\circ} \mathrm{C}$ maximum temperature (nonoperating).
Indexing: The positive index tab (type 2) shall withstand rotational torque up to 2-inch pounds in either direction without damage. Type I push buttons are orientable.

Photometric brightness and color: See table I.
Legend: See application information.
Part or Identifying Number (PIN): M22885/99-(dash number identifying the body style and mounting base (see figure 1) and color combinations of table I).

1/ The chromaticities of the diffusers or color filters are expressed as "x" and "y" coordinates on the CIE chromaticity diagram using a source illuminate of $2,360 \mathrm{~K}$.
2/ Will accept type 5 engraved legend only (see application information).

## QUALIFICATION INSPECTION:

Qualification inspection is required as part of the illuminated push button switch covered by MIL-PRF-22885/18.

## APPLICATION INFORMATION:

Legend is not included when ordering push buttons by the military PIN. Push buttons with legends are category II items and shall be acquired from a source listed on the qualified products list. Information on available legend types, legend construction, and character spacing is given in figure 3 and table II.

## INTENDED USE:

The push buttons shall be capable of mating with push button switches, PIN M22885/18-01 through M22885/18-08 and M22885/18-149 through M22885/18-156 of MIL-PRF-22885/18. The push buttons shall accommodate one midget flange-base T-1-3/4 incandescent lamp. For provisioning purposes and spare parts support, the push buttons are not supplied with lamps.
